

EHI Export Documentation

As part of interoperability and data portability, we provide patient data in standardized formats for electronic health information (EHI) export 170.315 (b)(10).

Users can export EHI from Nexus EHR/PM. Admin users will have access to export module.

EHI export process may require time from few seconds to several hours based on size of data. Exported information will be available for download in zip formation after export is completed.

In case of population export it is advised to inform Nexus Support (support@nexusclinical.com) so Nexus can monitor the export process in case of large data size.

Here are the detailed formats and structures we offer:

Individual Patient Export

1. Clinical Data In C-CDA Format

Clinical Data is exported in C-CDA R2.1 format.

<https://www.hl7.org/ccdasearch/>

Exported C-CDA complies with USCDI V1.

<https://www.healthit.gov/isa/united-states-core-data-interoperability-uscdi>

2. Patient Billing Information in (Comma Separated value) csv format.

Patient Billing Information will include separate csv files for

- Claims
- Insurance payment details
- Patient payment details

3. Patient Documents

Patient Documents will be exported in as-is format (pdf, doc, html, jpg etc) as individual files.

Here are most common document types –

- Chart Notes (PDF Chart notes for each encounter)
- Scanned Documents (PDF Scanned documents)
- Imported Faxes (PDF documents imported from eFax module)
- Documents and Forms generated by software (PDF Format)
- PE Images (image format)
- Other imported documents (as per original document type)

4. Future Appointments (csv format)

Appointments scheduled for future dates will be exported in csv format.

5. Patient Demographics and Insurance (csv format)

Patient Demographics (Contact details, address, and emergency contact) and Primary, Secondary Insurance and Responsible Party information will be provided in csv format.

Population Data Export

1. Clinical Data In C-CDA Format

C-CDA files will be exported for each patient in the population.

Clinical Data is exported in C-CDA R2.1 format.

<https://www.hl7.org/ccdasearch/>

Exported C-CDA complies with USCDI V1.

<https://www.healthit.gov/isa/united-states-core-data-interoperability-uscdi>

2. Patient Billing Information in (Comma Separated value) csv format.

Billing Information for all patients will be exported in csv format. Csv files will be as follows.

- Claims
- Insurance payment details
- Patient payment details

3. Patient Documents Index (csv format)

For population export document index will be exported in csv format which will include document id, patient identification details, document classification, name, created date.

Nexus will provide a document export utility program which will export documents offline based on the document index (csv) file exported as part of this export.

4. Future Appointments (csv format)

Appointments scheduled for future dates will be exported in csv format.

5. Patient Demographics and Insurance (csv format)

Patient Demographics (Contact details, address, and emergency contact) and Primary, Secondary Insurance and Responsible Party information will be provided in csv format.
