Max Length: 10

SS Note Time 57

Column Name: ss_note_time_58

Column Type: varchar

Max Length: 10

SS Note Time 58

Column Name: ss_note_time_59

Column Type: varchar

Max Length: 10

SS Note Time 59

Column Name: ss_note_time_60

Column Type: varchar

Max Length: 10

SS Note Time 60

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form:

Ambulatory_Progress_Notes_(Diagnosis_Entry)

Table Name: SYSTEM.cw_notes_voided

Table Description: This table returns voided progress notes.

Column Name: blank_row_id

Column Type: varchar

Max Length: 254

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the data.

Column Name: Filing_Hist

Column Type: varchar

Max Length: 20
Unique historic where the data will be stored.

Column Name: notes_field
Column Type: varchar
Max Length: 32759
'Notes Field'

Column Name: note_type_code
Column Type: varchar
Max Length: 50
'Note Type code'

Column Name: note_type_value
Column Type: varchar
Max Length: 40
The description associated with note_type_code. See note_type_code for more information.

Column Name: note_time
Column Type: varchar
Max Length: 25
'Note Time'

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: new_existing_svc_code
Column Type: varchar
Max Length: 5
'New Existing Service Code For. (Progress Note For)'

Column Name: new_existing_svc_value
Column Type: varchar
Max Length: 40
The description associated with new_existing_svc_code. See new_existing_svc_code for more information.

Column Name: service_charge_code
Column Type: varchar
Max Length: 40
'Service Charge Code'

Column Name: service_program_code
Column Type: varchar
Max Length: 6
'Service Program code'

Column Name: service_program_value
Column Type: varchar
Max Length: 40
The description associated with service_program_code. See service_program_code for more information.

Column Name: service_duration
Column Type: varchar
Max Length: 5
'Service Duration'

Column Name: note_addresses
Column Type: varchar
Max Length: 40
'Note Addresses Which Existing Service/Appointment'

Column Name: note_add_wh_tp_plan_prob
Column Type: varchar
Max Length: 32759
'Note Addresses Which Treatment Plan Problem'

Column Name: Tx_Note_UniqueID
Column Type: varchar
Max Length: 40
Unique ID for a service note.

Column Name: FILING_COUNTER
Column Type: integer
'Filing Counter'

Column Name: GROUP_ID
Column Type: varchar
Max Length: 10
'Group Name Or Number'

Column Name: JOIN_TO_TX_HISTORY
Column Type: varchar
Max Length: 40
Unique ID for a service.

Column Name: TODO_ID

Column Type: varchar

Max Length: 20

'To Do Id'

Column Name: aps_link

Column Type: varchar

Max Length: 40

'Note Addresses Which Existing Appointment'

Column Name: clinical_quality_code

Column Type: varchar

Max Length: 255

'Clinical Quality Indicators'

Column Name: clinical_quality_sh_val

Column Type: varchar

Max Length: 255

'The description associated with clinical_quality_code. See clinical_quality_code for more information.'

Column Name: clinical_quality_value

Column Type: varchar

Max Length: 4096

'The description associated with clinical_quality_code. See clinical_quality_code for more information.'

Column Name: co_sign_to_do_user

Column Type: varchar

Max Length: 50

'User To Send Co-Sign To Do Item To'

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 10

The time the row was last updated.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: date_of_group_service
Column Type: date
Date of service for group.

Column Name: draft_final_code
Column Type: varchar
Max Length: 5
'Draft/Final code'

Column Name: draft_final_value
Column Type: varchar
Max Length: 40
The description associated with draft_final_code. See draft_final_code for more information.

Column Name: ebps_code
Column Type: varchar
Max Length: 255
'Evidence Based Practices'

Column Name: ebps_sh_val
Column Type: varchar
Max Length: 255
'The description associated with ebps_code. See ebps_code for more information.'

Column Name: ebps_value
Column Type: varchar
Max Length: 4096
'The description associated with ebps_code. See ebps_code for more information.'

Column Name: external_system_id
Column Type: varchar
Max Length: 255
'External System Identifier'

Column Name: finalized_signature
Column Type: varchar
Max Length: 255
'Finalized Signature'

Column Name: medical_diagnosis_1_code
Column Type: varchar
Max Length: 50
'Medical Diagnosis 1 code'

Column Name: medical_diagnosis_1_value
Column Type: varchar
Max Length: 32759
The description associated with medical_diagnosis_1_code. See medical_diagnosis_1_code for more information.

Column Name: medical_diagnosis_2_code
Column Type: varchar
Max Length: 50
'Medical Diagnosis 2 code'

Column Name: medical_diagnosis_2_value
Column Type: varchar
Max Length: 32759
The description associated with medical_diagnosis_2_code. See medical_diagnosis_2_code for more information.

Column Name: notes_entry_index_nu
Column Type: varchar
Max Length: 50
'Notes Entry Index Number for Internal Use'

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: orig_note_uniq_id_num
Column Type: varchar

Max Length: 20
'Original Note Unique ID Number'

Column Name: reason_for_void_code
Column Type: varchar
Max Length: 50
'Reason For Voiding The Note code'

Column Name: reason_for_void_value
Column Type: varchar
Max Length: 50
The description associated with reason_for_void_code. See reason_for_void_code for more information.

Column Name: select_tp_version_code
Column Type: varchar
Max Length: 5
'Select T.P. Version code'

Column Name: select_tp_version_value
Column Type: varchar
Max Length: 40
The description associated with select_tp_version_code. See select_tp_version_code for more information.

Column Name: session_start_end_times
Column Type: varchar
Max Length: 32759
'Start/End Time(s)'

Column Name: ss_note_20_char_text_1
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 1'

Column Name: ss_note_20_char_text_10
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 10'

Column Name: ss_note_20_char_text_2
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 2'

Column Name: ss_note_20_char_text_3
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 3'

Column Name: ss_note_20_char_text_4
Column Type: varchar

Max Length: 20
'SS Note 20 Character Text 4'

Column Name: ss_note_20_char_text_5
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 5'

Column Name: ss_note_20_char_text_6
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 6'

Column Name: ss_note_20_char_text_7
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 7'

Column Name: ss_note_20_char_text_8
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 8'

Column Name: ss_note_20_char_text_9
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 9'

Column Name: ss_note_40_char_text_1
Column Type: varchar
Max Length: 40
'SS Note 40 Character Text 1'

Column Name: ss_note_40_char_text_10
Column Type: varchar
Max Length: 40
'SS Note 40 Character Text 10'

Column Name: ss_note_40_char_text_2
Column Type: varchar
Max Length: 40
'SS Note 40 Character Text 2'

Column Name: ss_note_40_char_text_3
Column Type: varchar
Max Length: 40
'SS Note 40 Character Text 3'

Column Name: ss_note_40_char_text_4
Column Type: varchar

Max Length: 40
'SS Note 40 Character Text 4'

Column Name: ss_note_40_char_text_5
Column Type: varchar
Max Length: 40
'SS Note 40 Character Text 5'

Column Name: ss_note_40_char_text_6
Column Type: varchar
Max Length: 40
'SS Note 40 Character Text 6'

Column Name: ss_note_40_char_text_7
Column Type: varchar
Max Length: 40
'SS Note 40 Character Text 7'

Column Name: ss_note_40_char_text_8
Column Type: varchar
Max Length: 40
'SS Note 40 Character Text 8'

'SS Note Date 9'

Column Name: ss_note_dsm_diag_10_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 10 code'

Column Name: ss_note_dsm_diag_10_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_10_code. See ss_note_dsm_diag_10_code for more information.

Column Name: ss_note_dsm_diag_1_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 1 code'

Column Name: ss_note_dsm_diag_1_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_1_code. See ss_note_dsm_diag_1_code for more information.

Column Name: ss_note_dsm_diag_2_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 2 code'

Column Name: ss_note_dsm_diag_2_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_2_code. See ss_note_dsm_diag_2_code for more information.

Column Name: ss_note_dsm_diag_3_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 3 code'

Column Name: ss_note_dsm_diag_3_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_3_code. See ss_note_dsm_diag_3_code for more information.

Column Name: ss_note_dsm_diag_4_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 4 code'

Column Name: ss_note_dsm_diag_4_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_4_code. See ss_note_dsm_diag_4_code for more information.

Column Name: ss_note_dsm_diag_5_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 5 code'

Column Name: ss_note_dsm_diag_5_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_5_code. See ss_note_dsm_diag_5_code for more information.

Column Name: ss_note_dsm_diag_6_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 6 code'

Column Name: ss_note_dsm_diag_6_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_6_code. See ss_note_dsm_diag_6_code for more information.

Column Name: ss_note_dsm_diag_7_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 7 code'

Column Name: ss_note_dsm_diag_7_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_7_code. See ss_note_dsm_diag_7_code for more information.

Column Name: ss_note_dsm_diag_8_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 8 code'

Column Name: ss_note_dsm_diag_8_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_8_code. See ss_note_dsm_diag_8_code for more information.

Column Name: ss_note_dsm_diag_9_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 9 code'

Column Name: ss_note_dsm_diag_9_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_9_code. See ss_note_dsm_diag_9_code for more information.

Column Name: ss_note_icd9_diag_10_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Diagnosis 10 code'

Column Name: ss_note_icd9_diag_10_val

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_10_code. See ss_note_icd9_diag_10_code for more information.

Column Name: ss_note_icd9_diag_1_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Diagnosis 1 code'

Column Name: ss_note_icd9_diag_1_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_1_code. See ss_note_icd9_diag_1_code for more information.

Column Name: ss_note_icd9_diag_2_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Diagnosis 2 code'

Column Name: ss_note_icd9_diag_2_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_2_code. See ss_note_icd9_diag_2_code for more information.

Column Name: ss_note_icd9_diag_3_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Diagnosis 3 code'

Column Name: ss_note_icd9_diag_3_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_3_code. See ss_note_icd9_diag_3_code for more information.

Column Name: ss_note_icd9_diag_4_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Diagnosis 4 code'

Column Name: ss_note_icd9_diag_4_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_4_code. See ss_note_icd9_diag_4_code for more information.

Column Name: ss_note_icd9_diag_5_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Diagnosis 5 code'

Column Name: ss_note_icd9_diag_5_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_5_code. See ss_note_icd9_diag_5_code for more information.

Column Name: ss_note_icd9_diag_6_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Diagnosis 6 code'

Column Name: ss_note_icd9_diag_6_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_6_code. See ss_note_icd9_diag_6_code for more information.

Column Name: ss_note_icd9_diag_7_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Diagnosis 7 code'

Column Name: ss_note_icd9_diag_7_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_7_code. See ss_note_icd9_diag_7_code for more information.

Column Name: ss_note_icd9_diag_8_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Diagnosis 8 code'

Column Name: ss_note_icd9_diag_8_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_8_code. See ss_note_icd9_diag_8_code for more information.

Column Name: ss_note_icd9_diag_9_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Diagnosis 9 code'

Column Name: ss_note_icd9_diag_9_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_9_code. See ss_note_icd9_diag_9_code for more information.

Column Name: ss_note_multi_dict_10_cod

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 10 code'

Column Name: ss_note_multi_dict_10_val

Column Type: varchar

Max Length: 32759

The description associated with ss_note_multi_dict_10_code. See ss_note_multi_dict_10_code for more information.

Column Name: ss_note_multi_dict_1_code

Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 1 code'

Column Name: ss_note_multi_dict_1_val
Column Type: varchar
Max Length: 32759
The description associated with ss_note_multi_dict_1_code. See ss_note_multi_dict_1_code for more information.

Column Name: ss_note_multi_dict_2_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 2 code'

Column Name: ss_note_multi_dict_2_val
Column Type: varchar
Max Length: 32759
The description associated with ss_note_multi_dict_2_code. See ss_note_multi_dict_2_code for more information.

Column Name: ss_note_multi_dict_3_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 3 code'

Column Name: ss_note_multi_dict_3_val
Column Type: varchar
Max Length: 32759
The description associated with ss_note_multi_dict_3_code. See ss_note_multi_dict_3_code for more information.

Column Name: ss_note_multi_dict_4_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 4 code'

Column Name: ss_note_multi_dict_4_val
Column Type: varchar
Max Length: 32759
The description associated with ss_note_multi_dict_4_code. See ss_note_multi_dict_4_code for more information.

Column Name: ss_note_multi_dict_5_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 5 code'

Column Name: ss_note_multi_dict_5_val
Column Type: varchar

Max Length: 32759

The description associated with ss_note_multi_dict_5_code. See ss_note_multi_dict_5_code for more information.

Column Name: ss_note_multi_dict_6_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 6 code'

Column Name: ss_note_multi_dict_6_val

Column Type: varchar

Max Length: 32759

The description associated with ss_note_multi_dict_6_code. See ss_note_multi_dict_6_code for more information.

Column Name: ss_note_multi_dict_7_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 7 code'

Column Name: ss_note_multi_dict_7_val

Column Type: varchar

Max Length: 32759

The description associated with ss_note_multi_dict_7_code. See ss_note_multi_dict_7_code for more information.

Column Name: ss_note_multi_dict_8_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 8 code'

Column Name: ss_note_multi_dict_8_val

Column Type: varchar

Max Length: 32759

The description associated with ss_note_multi_dict_8_code. See ss_note_multi_dict_8_code for more information.

Column Name: ss_note_multi_dict_9_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 9 code'

Column Name: ss_note_multi_dict_9_val

Column Type: varchar

Max Length: 32759

The description associated with ss_note_multi_dict_9_code. See ss_note_multi_dict_9_code for more information.

Column Name: ss_note_scroll_text_1

Column Type: varchar

Max Length: 32759
'SS Note Scrolling Free Text 1'

Column Name: ss_note_scroll_text_10
Column Type: varchar
Max Length: 32759
'SS Note Scrolling Free Text 10'

Column Name: ss_note_scroll_text_2
Column Type: varchar
Max Length: 32759
'SS Note Scrolling Free Text 2'

Column Name: ss_note_scroll_text_3
Column Type: varchar
Max Length: 32759
'SS Note Scrolling Free Text 3'

Column Name: ss_note_scroll_text_4
Column Type: varchar
Max Length: 32759
'SS Note Scrolling Free Text 4'

Column Name: ss_note_scroll_text_5
Column Type: varchar
Max Length: 32759
'SS Note Scrolling Free Text 5'

Column Name: ss_note_scroll_text_6
Column Type: varchar
Max Length: 32759
'SS Note Scrolling Free Text 6'

Column Name: ss_note_scroll_text_7
Column Type: varchar
Max Length: 32759
'SS Note Scrolling Free Text 7'

Column Name: ss_note_scroll_text_8
Column Type: varchar
Max Length: 32759
'SS Note Scrolling Free Text 8'

Column Name: ss_note_scroll_text_9
Column Type: varchar
Max Length: 32759
'SS Note Scrolling Free Text 9'

Column Name: ss_note_sing_dict_10_code
Column Type: varchar

Max Length: 20
'SS Note Single Response Dictionary 10 code'

Column Name: ss_note_sing_dict_10_val
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_10_code. See ss_note_sing_dict_10_code for more information.

Column Name: ss_note_sing_dict_1_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 1 code'

Column Name: ss_note_sing_dict_1_value
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_1_code. See ss_note_sing_dict_1_code for more information.

Column Name: ss_note_sing_dict_2_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 2 code'

Column Name: ss_note_sing_dict_2_value
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_2_code. See ss_note_sing_dict_2_code for more information.

Column Name: ss_note_sing_dict_3_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 3 code'

Column Name: ss_note_sing_dict_3_value
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_3_code. See ss_note_sing_dict_3_code for more information.

Column Name: ss_note_sing_dict_4_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 4 code'

Column Name: ss_note_sing_dict_4_value
Column Type: varchar
Max Length: 80

The description associated with ss_note_sing_dict_4_code. See ss_note_sing_dict_4_code for more information.

Column Name: ss_note_sing_dict_5_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 5 code'

Column Name: ss_note_sing_dict_5_value
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_5_code. See ss_note_sing_dict_5_code for more information.

Column Name: ss_note_sing_dict_6_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 6 code'

Column Name: ss_note_sing_dict_6_value
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_6_code. See ss_note_sing_dict_6_code for more information.

Column Name: ss_note_sing_dict_7_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 7 code'

Column Name: ss_note_sing_dict_7_value
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_7_code. See ss_note_sing_dict_7_code for more information.

Column Name: ss_note_sing_dict_8_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 8 code'

Column Name: ss_note_sing_dict_8_value
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_8_code. See ss_note_sing_dict_8_code for more information.

Column Name: ss_note_sing_dict_9_code
Column Type: varchar
Max Length: 20

'SS Note Single Response Dictionary 9 code'

Column Name: ss_note_sing_dict_9_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_9_code. See ss_note_sing_dict_9_code for more information.

Column Name: ss_note_staff_1

Column Type: varchar

Max Length: 20

'SS Note Staff Member 1'

Column Name: ss_note_staff_10

Column Type: varchar

Max Length: 20

'SS Note Staff Member 10'

Column Name: ss_note_staff_2

Column Type: varchar

Max Length: 20

'SS Note Staff Member 2'

Column Name: ss_note_staff_3

Column Type: varchar

Max Length: 20

'SS Note Staff Member 3'

Column Name: ss_note_staff_4

Column Type: varchar

Max Length: 20

'SS Note Staff Member 4'

Column Name: ss_note_staff_5

Column Type: varchar

Max Length: 20

'SS Note Staff Member 5'

Column Name: ss_note_staff_6

Column Type: varchar

Max Length: 20

'SS Note Staff Member 6'

Column Name: ss_note_staff_7

Column Type: varchar

Max Length: 20

'SS Note Staff Member 7'

Column Name: ss_note_staff_8

Column Type: varchar

Max Length: 20
'SS Note Staff Member 8'

Column Name: ss_note_staff_9
Column Type: varchar
Max Length: 20
'SS Note Staff Member 9'

Column Name: ss_note_time_1
Column Type: varchar
Max Length: 10
'SS Note Time 1'

Column Name: ss_note_time_10
Column Type: varchar
Max Length: 10
'SS Note Time 10'

Column Name: ss_note_time_2
Column Type: varchar
Max Length: 10
'SS Note Time 2'

Column Name: ss_note_time_3
Column Type: varchar
Max Length: 10
'SS Note Time 3'

Column Name: ss_note_time_4
Column Type: varchar
Max Length: 10
'SS Note Time 4'

Column Name: ss_note_time_5
Column Type: varchar
Max Length: 10
'SS Note Time 5'

Column Name: ss_note_time_6
Column Type: varchar
Max Length: 10
'SS Note Time 6'

Column Name: ss_note_time_7
Column Type: varchar
Max Length: 10
'SS Note Time 7'

Column Name: ss_note_time_8
Column Type: varchar

Max Length: 10
'SS Note Time 8'

Column Name: ss_note_time_9
Column Type: varchar
Max Length: 10
'SS Note Time 9'

Column Name: transcription_note
Column Type: bit
Is this is Transcription note

Column Name: transition_of_care_code
Column Type: varchar
Max Length: 1
'Is This A Transition Of Care?'

Column Name: transition_of_care_value
Column Type: varchar
Max Length: 80
'The description associated with transition_of_care_code. See transition_of_care_code for more information.'

Column Name: user_row_access_code
Column Type: integer
If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Column Name: void_comments
Column Type: varchar
Max Length: 32759
'Void Comments'

Column Name: void_data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row for a void.

Column Name: void_data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row for a void.

Column Name: void_data_entry_date
Column Type: date
The date the row was voided.

Column Name: void_data_entry_source
Column Type: varchar

Max Length: 255

The name of the form that last updated the row for a void.

Column Name: void_data_entry_time

Column Type: varchar

Max Length: 10

The time the row was last updated for a void.

Column Name: void_data_entry_user_id

Column Type: varchar

Max Length: 40

The 'User ID' that last updated the row for a void.

Column Name: void_data_entry_user_name

Column Type: varchar

Max Length: 40

The 'User Description' of the 'User ID' for a void.

Column Name: void_option_desc

Column Type: varchar

Max Length: 80

The name of the form that last updated the row for a void.

Column Name: void_option_id

Column Type: varchar

Max Length: 40

The unique ID of the form that last updated the row for a void.

Documentation for form:

Ambulatory_Progress_Notes_(Diagnosis_Entry)

Table Name: SYSTEM.cw_patient_notes

Table Description: This table returns the information stored in the 'Inpatient Progress Notes', 'Inpatient Progress Notes (Diagnosis Entry)', 'Progress Notes (Group and Individual)', 'Ambulatory Progress Notes', and 'Ambulatory Progress Notes (Diagnosis Entry)' forms.

Column Name: blank_row_id

Column Type: varchar

Max Length: 254

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 20
The unique ID associated with the note.

Column Name: notes_field
Column Type: varchar
Max Length: 32700
The written note information.

Column Name: note_type_code
Column Type: varchar
Max Length: 50
'Note Type'

Column Name: note_type_value
Column Type: varchar
Max Length: 40
The description associated with note_type_code. See note_type_code for more information.

Column Name: note_time
Column Type: varchar
Max Length: 25
'Note Time'

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: New_Existing_Service_code
Column Type: varchar

Max Length: 5
'Progress Note For'

Column Name: New_Existing_Service_value
Column Type: varchar
Max Length: 40
The description associated with New_Existing_Service_code. See New_Existing_Service_code for more information.

Column Name: service_program_value
Column Type: varchar
Max Length: 40
The description associated with service_program_code. See service_program_code for more information.

Column Name: note_addresses
Column Type: varchar
Max Length: 40
'Note Addresses Which Existing Service/Appointment'

Column Name: note_add_which_tp_plan_prob
Column Type: varchar
Max Length: 32700
The treatment plan problem to add to the note.

Column Name: Tx_Note_UniqueId
Column Type: varchar
Max Length: 40
The unique ID associated with the treatment.

Column Name: service_charge_value
Column Type: varchar
Max Length: 40
The description associated with service_charge_code. See service_charge_code for more information.

Column Name: GROUP_ID
Column Type: varchar
Max Length: 10
'Group Name Or Number'

Column Name: JOIN_TO_TX_HISTORY
Column Type: varchar
Max Length: 40
The unique ID that joins the note to the service.

Column Name: Option_Desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: Option_Id

Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: TODO_ID
Column Type: varchar
Max Length: 20
'To Do Id'

Column Name: add_on_notes
Column Type: varchar
Max Length: 32768
The add-on notes.

Column Name: add_svc_info_code
Column Type: varchar
Max Length: 40
The additional service information.

Column Name: add_svc_info_shval
Column Type: varchar
Max Length: 255
The description associated with add_svc_info_code limited to 255 characters. See add_svc_info_code for more information.

Column Name: add_svc_info_value
Column Type: varchar
Max Length: 4096
The description associated with add_svc_info_code. See add_svc_info_code for more information.

Column Name: aps_link
Column Type: varchar
Max Length: 40
'Note Addresses Which Existing Appointment'

Column Name: billing_status_code
Column Type: varchar
Max Length: 50
'Service Status'

Column Name: billing_status_value
Column Type: varchar
Max Length: 50
The description associated with billing_status_code. See billing_status_code for more information.

Column Name: calpm_ebpss_csi_code
Column Type: varchar
Max Length: 50
'Evidence-Based Practices / Service Strategies (CSI)'

Column Name: calpm_ebpss_csi_value

Column Type: varchar

Max Length: 200

The description associated with calpm_ebpss_csi_code. See calpm_ebpss_csi_code for more information.

Column Name: calpm_ebpss_csi_value_long

Column Type: varchar

Max Length: 4096

The description associated with calpm_ebpss_csi_value_code. See calpm_ebpss_csi_value_code for more information.

Column Name: client_prob_list_codes

Column Type: varchar

Max Length: 50

The codes associated with the client problem list.

Column Name: client_prob_list_shvals

Column Type: varchar

Max Length: 255

The description associated with client_prob_list_code limited to 255 characters. See client_prob_list_code for more information.

Column Name: client_prob_list_vals

Column Type: varchar

Max Length: 32700

The description associated with client_prob_list_code. See client_prob_list_code for more information.

Column Name: clinical_instructions

Column Type: varchar

Max Length: 32700

'Clinical Instructions'

Column Name: clinical_quality_code

Column Type: varchar

Max Length: 255

'Clinical Quality Indicators'

Column Name: clinical_quality_sh_val

Column Type: varchar

Max Length: 255

'The description associated with clinical_quality_code. See clinical_quality_code for more information.

Column Name: clinical_quality_value

Column Type: varchar

Max Length: 4096

'The description associated with clinical_quality_code. See clinical_quality_code for more information.

Column Name: confidential_note

Column Type: varchar

Max Length: 50

The confidential note.

Column Name: co_pract_duration

Column Type: numeric

The first co-practitioner duration.

Column Name: co_pract2_duration

Column Type: numeric

The second co-practitioner duration.

Column Name: co_practitioner_id

Column Type: varchar

Max Length: 15

The first co-practitioner ID.

Column Name: co_practitioner_id_2

Column Type: varchar

Max Length: 15

The second co-practitioner ID.

Column Name: co_practitioner_name

Column Type: varchar

Max Length: 40

The name associated with co_practitioner_id.

Column Name: co_practitioner_name_2

Column Type: varchar

Max Length: 40

The name associated with co_practitioner_id_2.

Column Name: co_sign_to_do_user

Column Type: varchar

Max Length: 50

'User To Send Co-Sign To Do Item To'

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar

Max Length: 40

The name of the form that last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 10

The time the row was last updated.

Column Name: data_entry_time_j

Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: date_of_group_service
Column Type: date
The date of the group service.

Column Name: date_of_note
Column Type: date
The date of the note.

Column Name: date_of_service
Column Type: date
The date of the service.

Column Name: discipline_code
Column Type: varchar
Max Length: 40
'Discipline'

Column Name: discipline_value
Column Type: varchar
Max Length: 40
The description associated with discipline_code. See discipline_code for more information.

Column Name: document_routing_status

Column Type: varchar
Max Length: 50
Status of the document

Column Name: draft_final_code
Column Type: varchar
Max Length: 5
'Draft/Final'

Column Name: draft_final_value
Column Type: varchar
Max Length: 40
The description associated with draft_final_code. See draft_final_code for more information.

Column Name: ebps_code
Column Type: varchar
Max Length: 255
'Evidence Based Practices'

Column Name: ebps_sh_val
Column Type: varchar
Max Length: 255
'The description associated with ebps_code. See ebps_code for more information.'

Column Name: ebps_value
Column Type: varchar
Max Length: 4096
'The description associated with ebps_code. See ebps_code for more information.'

Column Name: external_system_id
Column Type: varchar
Max Length: 255
'External System Identifier'

Column Name: finalized_signature
Column Type: varchar
Max Length: 255
'Finalized Signature'

Column Name: has_nonmed_diag_flg_code
Column Type: varchar
Max Length: 50
The non-medical diagnosis flag.

Column Name: has_nonmed_diag_flg_value
Column Type: varchar
Max Length: 50
The description associated with has_nonmed_diag_flg_code. See has_nonmed_diag_flg_code for more information.

Column Name: jointodiagnosisobject1
Column Type: varchar
Max Length: 40
'Diagnosis 1'

Column Name: jointodiagnosisobject2
Column Type: varchar
Max Length: 40
'Diagnosis 2'

Column Name: jointodiagnosisobject3
Column Type: varchar
Max Length: 40
'Diagnosis 3'

Column Name: jointodiagnosisobject4
Column Type: varchar
Max Length: 40
'Diagnosis 4'

Column Name: location_code
Column Type: varchar
Max Length: 50
The location of the service.

Column Name: location_value
Column Type: varchar
Max Length: 40
The description associated with location_code. See location_code for more information.

Column Name: medical_diag1_DSM_value
Column Type: varchar
Max Length: 40
The description associated with medical_diag1_DSM_code. See medical_diag1_DSM_code for more information.

Column Name: medical_diag_1_icd10_code
Column Type: varchar
Max Length: 40
'Medical Diagnosis 1 ICD 10'

Column Name: medical_diag_1_icd10_value
Column Type: varchar
Max Length: 40
The description associated with medical_diag_1_icd10_code. See medical_diag_1_icd10_code for more information.

Column Name: medical_diag_1_icd9_code
Column Type: varchar
Max Length: 40

'Medical Diagnosis 1 ICD 9'

Column Name: medical_diag_1_icd9_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_1_icd9_code. See medical_diag_1_icd9_code for more information.

Column Name: medical_diag_1_imo_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_1_imo_code. See medical_diag_1_imo_code for more information.

Column Name: medical_diag2_DSM_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag2_DSM_code. See medical_diag2_DSM_code for more information.

Column Name: medical_diag_2_icd10_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 2 ICD 10'

Column Name: medical_diag_2_icd10_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_2_icd10_code. See medical_diag_2_icd10_code for more information.

Column Name: medical_diag_2_icd9_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 2 ICD 9'

Column Name: medical_diag_2_icd9_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_2_icd9_code. See medical_diag_2_icd9_code for more information.

Column Name: medical_diag_2_imo_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_2_imo_code. See medical_diag_2_imo_code for more information.

Column Name: medical_diag_3_icd10_code

Column Type: varchar

Max Length: 40
'Medical Diagnosis 3 ICD 10'

Column Name: medical_diag_3_icd10_value
Column Type: varchar
Max Length: 40
The description associated with medical_diag_3_icd10_code. See medical_diag_3_icd10_code for more information.

Column Name: medical_diag_3_icd9_code
Column Type: varchar
Max Length: 40
'Medical Diagnosis 3 ICD 9'

Column Name: medical_diag_3_icd9_value
Column Type: varchar
Max Length: 40
The description associated with medical_diag_3_icd9_code. See medical_diag_3_icd9_code for more information.

Column Name: medical_diag_3_imo_value
Column Type: varchar
Max Length: 40
The description associated with medical_diag_3_imo_code. See medical_diag_3_imo_code for more information.

Column Name: medical_diag_4_icd10_code
Column Type: varchar
Max Length: 40
'Medical Diagnosis 4 ICD 10'

Column Name: medical_diag_4_icd10_value
Column Type: varchar
Max Length: 40
The description associated with medical_diag_4_icd10_code. See medical_diag_4_icd10_code for more information.

Column Name: medical_diag_4_icd9_code
Column Type: varchar
Max Length: 40
'Medical Diagnosis 4 ICD 9'

Column Name: medical_diag_4_icd9_value
Column Type: varchar
Max Length: 40
The description associated with medical_diag_4_icd9_code. See medical_diag_4_icd9_code for more information.

Column Name: medical_diag_4_imo_value
Column Type: varchar

Max Length: 40

The description associated with medical_diag_4_imo_code. See medical_diag_4_imo_code for more information.

Column Name: medical_diagnosis_1_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 1'

Column Name: medical_diagnosis_1_value

Column Type: varchar

Max Length: 32700

The description associated with medical_diagnosis_1_code. See medical_diagnosis_1_code for more information.

Column Name: medical_diagnosis_2_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 2'

Column Name: medical_diagnosis_2_value

Column Type: varchar

Max Length: 32700

The description associated with medical_diagnosis_2_code. See medical_diagnosis_2_code for more information.

Column Name: medical_diagnosis_3_code

Column Type: varchar

Max Length: 50

'Medical Diagnosis 3'

Column Name: medical_diagnosis_3_value

Column Type: varchar

Max Length: 32700

The description associated with medical_diagnosis_3_code. See medical_diagnosis_3_code for more information.

Column Name: medical_diagnosis_4_code

Column Type: varchar

Max Length: 50

'Medical Diagnosis 4'

Column Name: medical_diagnosis_4_value

Column Type: varchar

Max Length: 32700

The description associated with medical_diagnosis_4_code. See medical_diagnosis_4_code for more information.

Column Name: notes_entry_index_nu

Column Type: varchar

Max Length: 50
The notes entry index.

Column Name: number_clients_in_group
Column Type: integer
'Number Of Clients In Group'

Column Name: orig_note_uniq_id_num
Column Type: varchar
Max Length: 20
'Original Note Unique ID Number'

Column Name: practitioner_id
Column Type: varchar
Max Length: 15
The practitioner associated with the note.

Column Name: practitioner_name
Column Type: varchar
Max Length: 40
The name associated with practitioner_id.

Column Name: psycho_add_on_duration
Column Type: integer
The psychotherapy add-on duration.

Column Name: reason_for_visit_code
Column Type: varchar
Max Length: 50
'Reason for Visit'

Column Name: reason_for_visit_value
Column Type: varchar
Max Length: 250
The description associated with reason_for_visit_code. See reason_for_visit_code for more information.

Column Name: recommended_decision
Column Type: varchar
Max Length: 32700
'Recommended Decision'

Column Name: release_type_code
Column Type: varchar
Max Length: 50
The value entered in the field 'Are you releasing to myHealthPointe or External providers?'

Column Name: release_type_value
Column Type: varchar
Max Length: 40
The description associated with release_type_code.

Column Name: select_tp_version_code
Column Type: varchar
Max Length: 5
'Select T.P. Version'

Column Name: select_tp_version_value
Column Type: varchar
Max Length: 40
The description associated with select_tp_version_code. See select_tp_version_code for more information.

Column Name: service_charge_code
Column Type: varchar
Max Length: 40
The service charge code.

Column Name: service_duration
Column Type: varchar
Max Length: 5
The duration of the service.

Column Name: service_end_time
Column Type: varchar
Max Length: 10
The end time of the service.

Column Name: service_program_code
Column Type: varchar
Max Length: 15
The program of the service.

Column Name: service_start_time
Column Type: varchar
Max Length: 10
The start time of the service.

Column Name: session_start_end_times
Column Type: varchar
Max Length: 32766
'Start/End Time(s)'

Column Name: ss_note_20_char_text_1
Column Type: varchar
Max Length: 20
'SS Note 20 Character 1'

Column Name: ss_note_20_char_text_10
Column Type: varchar
Max Length: 20
'SS Note 20 Character 10'

Column Name: ss_note_20_char_text_2
Column Type: varchar
Max Length: 20
'SS Note 20 Character 2'

Column Name: ss_note_20_char_text_3
Column Type: varchar
Max Length: 20
'SS Note 20 Character 3'

Column Name: ss_note_20_char_text_4
Column Type: varchar
Max Length: 20
'SS Note 20 Character 4'

Column Name: ss_note_20_char_text_5
Column Type: varchar
Max Length: 20
'SS Note 20 Character 5'

Column Name: ss_note_20_char_text_6
Column Type: varchar
Max Length: 20
'SS Note 20 Character 6'

Column Name: ss_note_20_char_text_7
Column Type: varchar
Max Length: 20
'SS Note 20 Character 7'

Column Name: ss_note_20_char_text_8
Column Type: varchar
Max Length: 20
'SS Note 20 Character 8'

Column Name: ss_note_20_char_text_9
Column Type: varchar
Max Length: 20
'SS Note 20 Character 9'

Column Name: ss_note_40_char_text_1
Column Type: varchar
Max Length: 40
'SS Note 40 Character 1'

Column Name: ss_note_40_char_text_10
Column Type: varchar
Max Length: 40
'SS Note 40 Character 10'

Column Name: ss_note_40_char_text_2
Column Type: varchar
Max Length: 40
'SS Note 40 Character 2'

Column Name: ss_note_40_char_text_3
Column Type: varchar
Max Length: 40
'SS Note 40 Character 3'

Column Name: ss_note_40_char_text_4
Column Type: varchar
Max Length: 40
'SS Note 40 Character 4'

Column Name: ss_note_40_char_text_5
Column Type: varchar
Max Length: 40
'SS Note 40 Character 5'

Column Name: ss_note_40_char_text_6
Column Type: varchar
Max Length: 40
'SS Note 40 Character 6'

Column Name: ss_note_40_char_text_7
Column Type: varchar
Max Length: 40
'SS Note 40 Character 7'

Column Name: ss_note_40_char_text_8
Column Type: varchar
Max Length: 40
'SS Note 40 Character 8'

Column Name: ss_note_40_char_text_9
Column Type: varchar
Max Length: 40
'SS Note 40 Character 9'

Column Name: ss_note_80_char_text_1
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 1'

Column Name: ss_note_80_char_text_10
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 10'

Column Name: ss_note_80_char_text_2
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 2'

Column Name: ss_note_80_char_text_3
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 3'

Column Name: ss_note_80_char_text_4
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 4'

Column Name: ss_note_80_char_text_5
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 5'

Column Name: ss_note_80_char_text_6
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 6'

Column Name: ss_note_80_char_text_7
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 7'

Column Name: ss_note_80_char_text_8
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 8'

Column Name: ss_note_80_char_text_9
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 9'

Column Name: ss_note_date_1
Column Type: date
'SS Note Date 1'

Column Name: ss_note_date_10
Column Type: date
'SS Note Date 10'

Column Name: ss_note_date_2

Column Type: date
'SS Note Date 2'

Column Name: ss_note_date_3
Column Type: date
'SS Note Date 3'

Column Name: ss_note_date_4
Column Type: date
'SS Note Date 4'

Column Name: ss_note_date_5
Column Type: date
'SS Note Date 5'

Column Name: ss_note_date_6
Column Type: date
'SS Note Date 6'

Column Name: ss_note_date_7
Column Type: date
'SS Note Date 7'

Column Name: ss_note_date_8
Column Type: date
'SS Note Date 8'

Column Name: ss_note_date_9
Column Type: date
'SS Note Date 9'

Column Name: ss_note_dsm_diag_10_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 10'

Column Name: ss_note_dsm_diag_10_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_10_code. See ss_note_dsm_diag_10_code for more information.

Column Name: ss_note_dsm_diag_1_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 1'

Column Name: ss_note_dsm_diag_1_value
Column Type: varchar
Max Length: 250

The description associated with `ss_note_dsm_diag_1_code`. See `ss_note_dsm_diag_1_code` for more information.

Column Name: `ss_note_dsm_diag_2_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM IV Diagnosis 2'

Column Name: `ss_note_dsm_diag_2_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_2_code`. See `ss_note_dsm_diag_2_code` for more information.

Column Name: `ss_note_dsm_diag_3_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM IV Diagnosis 3'

Column Name: `ss_note_dsm_diag_3_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_3_code`. See `ss_note_dsm_diag_3_code` for more information.

Column Name: `ss_note_dsm_diag_4_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM IV Diagnosis 4'

Column Name: `ss_note_dsm_diag_4_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_4_code`. See `ss_note_dsm_diag_4_code` for more information.

Column Name: `ss_note_dsm_diag_5_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM IV Diagnosis 5'

Column Name: `ss_note_dsm_diag_5_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_5_code`. See `ss_note_dsm_diag_5_code` for more information.

Column Name: `ss_note_dsm_diag_6_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM IV Diagnosis 6'

Column Name: ss_note_dsm_diag_6_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_6_code. See ss_note_dsm_diag_6_code for more information.

Column Name: ss_note_dsm_diag_7_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 7'

Column Name: ss_note_dsm_diag_7_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_7_code. See ss_note_dsm_diag_7_code for more information.

Column Name: ss_note_dsm_diag_8_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 8'

Column Name: ss_note_dsm_diag_8_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_8_code. See ss_note_dsm_diag_8_code for more information.

Column Name: ss_note_dsm_diag_9_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 9'

Column Name: ss_note_dsm_diag_9_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_9_code. See ss_note_dsm_diag_9_code for more information.

Column Name: ss_note_icd9_diag_10_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 10'

Column Name: ss_note_icd9_diag_10_value

Column Type: varchar

Max Length: 250

The description associated with `ss_note_icd9_diag_10_code`. See `ss_note_icd9_diag_10_code` for more information.

Column Name: `ss_note_icd9_diag_1_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 1'

Column Name: `ss_note_icd9_diag_1_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_1_code`. See `ss_note_icd9_diag_1_code` for more information.

Column Name: `ss_note_icd9_diag_2_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 2'

Column Name: `ss_note_icd9_diag_2_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_2_code`. See `ss_note_icd9_diag_2_code` for more information.

Column Name: `ss_note_icd9_diag_3_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 3'

Column Name: `ss_note_icd9_diag_3_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_3_code`. See `ss_note_icd9_diag_3_code` for more information.

Column Name: `ss_note_icd9_diag_4_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 4'

Column Name: `ss_note_icd9_diag_4_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_4_code`. See `ss_note_icd9_diag_4_code` for more information.

Column Name: `ss_note_icd9_diag_5_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 5'

Column Name: ss_note_icd9_diag_5_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_5_code. See ss_note_icd9_diag_5_code for more information.

Column Name: ss_note_icd9_diag_6_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 6'

Column Name: ss_note_icd9_diag_6_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_6_code. See ss_note_icd9_diag_6_code for more information.

Column Name: ss_note_icd9_diag_7_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 7'

Column Name: ss_note_icd9_diag_7_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_7_code. See ss_note_icd9_diag_7_code for more information.

Column Name: ss_note_icd9_diag_8_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 8'

Column Name: ss_note_icd9_diag_8_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_8_code. See ss_note_icd9_diag_8_code for more information.

Column Name: ss_note_icd9_diag_9_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 9'

Column Name: ss_note_icd9_diag_9_value

Column Type: varchar

Max Length: 250

The description associated with `ss_note_icd9_diag_9_code`. See `ss_note_icd9_diag_9_code` for more information.

Column Name: `ss_note_multi_dict_10_code`

Column Type: `varchar`

Max Length: 20

'SS Note Multi Response Dictionary 10'

Column Name: `ss_note_multi_dict_10_value`

Column Type: `varchar`

Max Length: 32700

The description associated with `ss_note_multi_dict_10_code`. See `ss_note_multi_dict_10_code` for more information.

Column Name: `ss_note_multi_dict_1_code`

Column Type: `varchar`

Max Length: 20

'SS Note Multi Response Dictionary 1'

Column Name: `ss_note_multi_dict_1_value`

Column Type: `varchar`

Max Length: 32700

The description associated with `ss_note_multi_dict_1_code`. See `ss_note_multi_dict_1_code` for more information.

Column Name: `ss_note_multi_dict_2_code`

Column Type: `varchar`

Max Length: 20

'SS Note Multi Response Dictionary 2'

Column Name: `ss_note_multi_dict_2_value`

Column Type: `varchar`

Max Length: 32700

The description associated with `ss_note_multi_dict_2_code`. See `ss_note_multi_dict_2_code` for more information.

Column Name: `ss_note_multi_dict_3_code`

Column Type: `varchar`

Max Length: 20

'SS Note Multi Response Dictionary 3'

Column Name: `ss_note_multi_dict_3_value`

Column Type: `varchar`

Max Length: 32700

The description associated with `ss_note_multi_dict_3_code`. See `ss_note_multi_dict_3_code` for more information.

Column Name: `ss_note_multi_dict_4_code`

Column Type: `varchar`

Max Length: 20

'SS Note Multi Response Dictionary 4'

Column Name: ss_note_multi_dict_4_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_4_code. See ss_note_multi_dict_4_code for more information.

Column Name: ss_note_multi_dict_5_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 5'

Column Name: ss_note_multi_dict_5_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_5_code. See ss_note_multi_dict_5_code for more information.

Column Name: ss_note_multi_dict_6_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 6'

Column Name: ss_note_multi_dict_6_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_6_code. See ss_note_multi_dict_6_code for more information.

Column Name: ss_note_multi_dict_7_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 7'

Column Name: ss_note_multi_dict_7_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_7_code. See ss_note_multi_dict_7_code for more information.

Column Name: ss_note_multi_dict_8_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 8'

Column Name: ss_note_multi_dict_8_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_8_code. See ss_note_multi_dict_8_code for more information.

Column Name: ss_note_multi_dict_9_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 9'

Column Name: ss_note_multi_dict_9_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_9_code. See ss_note_multi_dict_9_code for more information.

Column Name: ss_note_scroll_text_1

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Text 1'

Column Name: ss_note_scroll_text_10

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Text 10'

Column Name: ss_note_scroll_text_2

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Text 2'

Column Name: ss_note_scroll_text_3

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Text 3'

Column Name: ss_note_scroll_text_4

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Text 4'

Column Name: ss_note_scroll_text_5

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Text 5'

Column Name: ss_note_scroll_text_6

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Text 6'

Column Name: ss_note_scroll_text_7

Column Type: varchar
Max Length: 32700
'SS Note Scrolling Text 7'

Column Name: ss_note_scroll_text_8
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Text 8'

Column Name: ss_note_scroll_text_9
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Text 9'

Column Name: ss_note_sing_dict_10_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 10'

Column Name: ss_note_sing_dict_10_value
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_10_code. See ss_note_sing_dict_10_code for more information.

Column Name: ss_note_sing_dict_1_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 1'

Column Name: ss_note_sing_dict_1_value
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_1_code. See ss_note_sing_dict_1_code for more information.

Column Name: ss_note_sing_dict_2_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 2'

Column Name: ss_note_sing_dict_2_value
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_2_code. See ss_note_sing_dict_2_code for more information.

Column Name: ss_note_sing_dict_3_code
Column Type: varchar
Max Length: 20

'SS Note Single Response Dictionary 3'

Column Name: ss_note_sing_dict_3_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_3_code. See ss_note_sing_dict_3_code for more information.

Column Name: ss_note_sing_dict_4_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 4'

Column Name: ss_note_sing_dict_4_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_4_code. See ss_note_sing_dict_4_code for more information.

Column Name: ss_note_sing_dict_5_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 5'

Column Name: ss_note_sing_dict_5_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_5_code. See ss_note_sing_dict_5_code for more information.

Column Name: ss_note_sing_dict_6_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 6'

Column Name: ss_note_sing_dict_6_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_6_code. See ss_note_sing_dict_6_code for more information.

Column Name: ss_note_sing_dict_7_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 7'

Column Name: ss_note_sing_dict_7_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_7_code. See ss_note_sing_dict_7_code for more information.

Column Name: ss_note_sing_dict_8_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 8'

Column Name: ss_note_sing_dict_8_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_8_code. See ss_note_sing_dict_8_code for more information.

Column Name: ss_note_sing_dict_9_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 9'

Column Name: ss_note_sing_dict_9_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_9_code. See ss_note_sing_dict_9_code for more information.

Column Name: ss_note_staff_1

Column Type: varchar

Max Length: 20

'SS Note Staff Member 1'

Column Name: ss_note_staff_10

Column Type: varchar

Max Length: 20

'SS Note Staff Member 10'

Column Name: ss_note_staff_2

Column Type: varchar

Max Length: 20

'SS Note Staff Member 2'

Column Name: ss_note_staff_3

Column Type: varchar

Max Length: 20

'SS Note Staff Member 3'

Column Name: ss_note_staff_4

Column Type: varchar

Max Length: 20

'SS Note Staff Member 4'

Column Name: ss_note_staff_5
Column Type: varchar
Max Length: 20
'SS Note Staff Member 5'

Column Name: ss_note_staff_6
Column Type: varchar
Max Length: 20
'SS Note Staff Member 6'

Column Name: ss_note_staff_7
Column Type: varchar
Max Length: 20
'SS Note Staff Member 7'

Column Name: ss_note_staff_8
Column Type: varchar
Max Length: 20
'SS Note Staff Member 8'

Column Name: ss_note_staff_9
Column Type: varchar
Max Length: 20
'SS Note Staff Member 9'

Column Name: ss_note_time_1
Column Type: varchar
Max Length: 10
'SS Note Time 1'

Column Name: ss_note_time_10
Column Type: varchar
Max Length: 10
'SS Note Time 10'

Column Name: ss_note_time_2
Column Type: varchar
Max Length: 10
'SS Note Time 2'

Column Name: ss_note_time_3
Column Type: varchar
Max Length: 10
'SS Note Time 3'

Column Name: ss_note_time_4
Column Type: varchar
Max Length: 10
'SS Note Time 4'

Column Name: ss_note_time_5
Column Type: varchar
Max Length: 10
'SS Note Time 5'

Column Name: ss_note_time_6
Column Type: varchar
Max Length: 10
'SS Note Time 6'

Column Name: ss_note_time_7
Column Type: varchar
Max Length: 10
'SS Note Time 7'

Column Name: ss_note_time_8
Column Type: varchar
Max Length: 10
'SS Note Time 8'

Column Name: ss_note_time_9
Column Type: varchar
Max Length: 10
'SS Note Time 9'

Column Name: transcription_note
Column Type: bit
Is this is Transcription note

Column Name: transition_of_care_code
Column Type: varchar
Max Length: 1
'Is This A Transition Of Care?'

Column Name: transition_of_care_value
Column Type: varchar
Max Length: 80
'The description associated with transition_of_care_code. See transition_of_care_code for more information.'

Column Name: user_row_access_code
Column Type: integer
If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form:

Ambulatory_Progress_Notes_(Diagnosis_Entry)

Table Name: SYSTEM.cw_patient_notes_supp

Table Description: This table returns the site specific information stored in the 'Progress Notes (Group and Individual)', 'Inpatient Progress Notes', 'Inpatient Progress Notes (Diagnosis Entry', 'Ambulatory Progress Notes', and 'Ambulatory Progress Notes (Diagnosis Entry)' forms.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 50
The unique ID associated with the note.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: confidential_note
Column Type: varchar
Max Length: 50
Whether the note is confidential.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date

Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: notes_field
Column Type: varchar
Max Length: 32700
The contents of the notes field.

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 50
The unique ID of the form that last updated the row.

Column Name: ss_note_20_char_text_11
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 11'

Column Name: ss_note_20_char_text_12
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 12'

Column Name: ss_note_20_char_text_13
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 13'

Column Name: ss_note_20_char_text_14
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 14'

Column Name: ss_note_20_char_text_15
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 15'

Column Name: ss_note_20_char_text_16
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 16'

Column Name: ss_note_20_char_text_17
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 17'

Column Name: ss_note_20_char_text_18
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 18'

Column Name: ss_note_20_char_text_19
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 19'

Column Name: ss_note_20_char_text_20
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 20'

Column Name: ss_note_20_char_text_21
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 21'

Column Name: ss_note_20_char_text_22
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 22'

Column Name: ss_note_20_char_text_23
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 23'

Column Name: ss_note_20_char_text_24
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 24'

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_18_code. See ss_note_icd9_diag_18_code for more information.

Column Name: ss_note_icd9_diag_19_code

Column Type: varchar

Max Length: 20
'SS Note ICD9 Diagnosis 19'

Column Name: ss_note_icd9_diag_19_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_19_code. See ss_note_icd9_diag_19_code for more information.

Column Name: ss_note_icd9_diag_20_code
Column Type: varchar
Max Length: 20
'SS Note ICD9 Diagnosis 20'

Column Name: ss_note_icd9_diag_20_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_20_code. See ss_note_icd9_diag_20_code for more information.

Column Name: ss_note_icd9_diag_21_code
Column Type: varchar
Max Length: 20
'SS Note ICD9 Diagnosis 21'

Column Name: ss_note_icd9_diag_21_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_21_code. See ss_note_icd9_diag_21_code for more information.

Column Name: ss_note_icd9_diag_22_code
Column Type: varchar
Max Length: 20
'SS Note ICD9 Diagnosis 22'

Column Name: ss_note_icd9_diag_22_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_22_code. See ss_note_icd9_diag_22_code for more information.

Column Name: ss_note_icd9_diag_23_code
Column Type: varchar
Max Length: 20
'SS Note ICD9 Diagnosis 23'

Column Name: ss_note_icd9_diag_23_value
Column Type: varchar
Max Length: 250

The description associated with `ss_note_icd9_diag_23_code`. See `ss_note_icd9_diag_23_code` for more information.

Column Name: `ss_note_icd9_diag_24_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 24'

Column Name: `ss_note_icd9_diag_24_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_24_code`. See `ss_note_icd9_diag_24_code` for more information.

Column Name: `ss_note_icd9_diag_25_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 25'

Column Name: `ss_note_icd9_diag_25_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_25_code`. See `ss_note_icd9_diag_25_code` for more information.

Column Name: `ss_note_icd9_diag_26_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 26'

Column Name: `ss_note_icd9_diag_26_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_26_code`. See `ss_note_icd9_diag_26_code` for more information.

Column Name: `ss_note_icd9_diag_27_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 27'

Column Name: `ss_note_icd9_diag_27_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_27_code`. See `ss_note_icd9_diag_27_code` for more information.

Column Name: `ss_note_icd9_diag_28_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 28'

Column Name: ss_note_icd9_diag_28_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_28_code. See ss_note_icd9_diag_28_code for more information.

Column Name: ss_note_icd9_diag_29_code

Column Type: varchar

Max Length: 20

'SS Note ICD9 Diagnosis 29'

Column Name: ss_note_icd9_diag_29_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_29_code. See ss_note_icd9_diag_29_code for more information.

Column Name: ss_note_icd9_diag_30_code

Column Type: varchar

Max Length: 20

'SS Note ICD9 Diagnosis 30'

Column Name: ss_note_icd9_diag_30_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_30_code. See ss_note_icd9_diag_30_code for more information.

Column Name: ss_note_multi_dict_11_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 11'

Column Name: ss_note_multi_dict_11_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_11_code. See ss_note_multi_dict_11_code for more information.

Column Name: ss_note_multi_dict_12_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 12'

Column Name: ss_note_multi_dict_12_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_12_code. See ss_note_multi_dict_12_code for more information.

Column Name: ss_note_multi_dict_13_code
Column Type: varchar
Max Length: 20
'SS Note Copy Multiple Response Dictionary 13'

Column Name: ss_note_multi_dict_13_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_13_code. See ss_note_multi_dict_13_code for more information.

Column Name: ss_note_multi_dict_14_code
Column Type: varchar
Max Length: 20
'SS Note Copy Multiple Response Dictionary 14'

Column Name: ss_note_multi_dict_14_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_14_code. See ss_note_multi_dict_14_code for more information.

Column Name: ss_note_multi_dict_15_code
Column Type: varchar
Max Length: 20
'SS Note Copy Multiple Response Dictionary 15'

Column Name: ss_note_multi_dict_15_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_15_code. See ss_note_multi_dict_15_code for more information.

Column Name: ss_note_multi_dict_16_code
Column Type: varchar
Max Length: 20
'SS Note Copy Multiple Response Dictionary 16'

Column Name: ss_note_multi_dict_16_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_16_code. See ss_note_multi_dict_16_code for more information.

Column Name: ss_note_multi_dict_17_code
Column Type: varchar
Max Length: 20

'SS Note Copy Multiple Response Dictionary 17'

Column Name: ss_note_multi_dict_17_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_17_code. See ss_note_multi_dict_17_code for more information.

Column Name: ss_note_multi_dict_18_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 18'

Column Name: ss_note_multi_dict_18_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_18_code. See ss_note_multi_dict_18_code for more information.

Column Name: ss_note_multi_dict_19_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 19'

Column Name: ss_note_multi_dict_19_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_19_code. See ss_note_multi_dict_19_code for more information.

Column Name: ss_note_multi_dict_20_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 20'

Column Name: ss_note_multi_dict_20_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_20_code. See ss_note_multi_dict_20_code for more information.

Column Name: ss_note_multi_dict_21_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 21'

Column Name: ss_note_multi_dict_21_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_21_code. See ss_note_multi_dict_21_code for more information.

Column Name: ss_note_multi_dict_22_code
Column Type: varchar
Max Length: 20
'SS Note Copy Multiple Response Dictionary 22'

Column Name: ss_note_multi_dict_22_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_22_code. See ss_note_multi_dict_22_code for more information.

Column Name: ss_note_multi_dict_23_code
Column Type: varchar
Max Length: 20
'SS Note Copy Multiple Response Dictionary 23'

Column Name: ss_note_multi_dict_23_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_23_code. See ss_note_multi_dict_23_code for more information.

Column Name: ss_note_multi_dict_24_code
Column Type: varchar
Max Length: 20
'SS Note Copy Multiple Response Dictionary 24'

Column Name: ss_note_multi_dict_24_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_24_code. See ss_note_multi_dict_24_code for more information.

Column Name: ss_note_multi_dict_25_code
Column Type: varchar
Max Length: 20
'SS Note Copy Multiple Response Dictionary 25'

Column Name: ss_note_multi_dict_25_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_25_code. See ss_note_multi_dict_25_code for more information.

Column Name: ss_note_multi_dict_26_code
Column Type: varchar
Max Length: 20

'SS Note Copy Multiple Response Dictionary 26'

Column Name: ss_note_multi_dict_26_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_26_code. See ss_note_multi_dict_26_code for more information.

Column Name: ss_note_multi_dict_27_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 27'

Column Name: ss_note_multi_dict_27_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_27_code. See ss_note_multi_dict_27_code for more information.

Column Name: ss_note_multi_dict_28_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 28'

Column Name: ss_note_multi_dict_28_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_28_code. See ss_note_multi_dict_28_code for more information.

Column Name: ss_note_multi_dict_29_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 29'

Column Name: ss_note_multi_dict_29_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_29_code. See ss_note_multi_dict_29_code for more information.

Column Name: ss_note_multi_dict_30_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 30'

Column Name: ss_note_multi_dict_30_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_30_code. See ss_note_multi_dict_30_code for more information.

Column Name: ss_note_scroll_text_11
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 11'

Column Type: varchar

Max Length: 32700
'SS Note Scrolling Free Text 30'

Column Name: ss_note_sing_dict_11_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 11'

Column Name: ss_note_sing_dict_11_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_single_dict_11_code. See ss_note_single_dict_11_code for more information.

Column Name: ss_note_sing_dict_12_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 12'

Column Name: ss_note_sing_dict_12_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_single_dict_12_code. See ss_note_single_dict_12_code for more information.

Column Name: ss_note_sing_dict_13_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 13'

Column Name: ss_note_sing_dict_13_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_single_dict_13_code. See ss_note_single_dict_13_code for more information.

Column Name: ss_note_sing_dict_14_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 14'

Column Name: ss_note_sing_dict_14_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_single_dict_14_code. See ss_note_single_dict_14_code for more information.

Column Name: ss_note_sing_dict_15_code
Column Type: varchar
Max Length: 50

'SS Note Single Response Dictionary 15'

Column Name: ss_note_sing_dict_15_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_15_code. See ss_note_single_dict_15_code for more information.

Column Name: ss_note_sing_dict_16_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 16'

Column Name: ss_note_sing_dict_16_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_16_code. See ss_note_single_dict_16_code for more information.

Column Name: ss_note_sing_dict_17_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 17'

Column Name: ss_note_sing_dict_17_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_17_code. See ss_note_single_dict_17_code for more information.

Column Name: ss_note_sing_dict_18_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 18'

Column Name: ss_note_sing_dict_18_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_18_code. See ss_note_single_dict_18_code for more information.

Column Name: ss_note_sing_dict_19_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 19'

Column Name: ss_note_sing_dict_19_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_19_code. See ss_note_single_dict_19_code for more information.

Column Name: ss_note_sing_dict_20_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 20'

Column Name: ss_note_sing_dict_20_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_20_code. See ss_note_single_dict_20_code for more information.

Column Name: ss_note_sing_dict_21_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 21'

Column Name: ss_note_sing_dict_21_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_21_code. See ss_note_single_dict_21_code for more information.

Column Name: ss_note_sing_dict_22_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 22'

Column Name: ss_note_sing_dict_22_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_22_code. See ss_note_single_dict_22_code for more information.

Column Name: ss_note_sing_dict_23_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 23'

Column Name: ss_note_sing_dict_23_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_23_code. See ss_note_single_dict_23_code for more information.

'SS Note Time 23'

Column Name: ss_note_time_24
Column Type: varchar
Max Length: 50
'SS Note Time 24'

Column Name: ss_note_time_25
Column Type: varchar
Max Length: 50
'SS Note Time 25'

Column Name: ss_note_time_26
Column Type: varchar
Max Length: 50
'SS Note Time 26'

Column Name: ss_note_time_27
Column Type: varchar
Max Length: 50
'SS Note Time 27'

Column Name: ss_note_time_28
Column Type: varchar
Max Length: 50
'SS Note Time 28'

Column Name: ss_note_time_29
Column Type: varchar
Max Length: 50
'SS Note Time 29'

Column Name: ss_note_time_30
Column Type: varchar
Max Length: 50
'SS Note Time 30'

Column Name: user_row_access_code
Column Type: integer
If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form:

[Ambulatory_Progress_Notes_\(Diagnosis_Entry\)](#)

Table Name: SYSTEM.cw_patient_notes_supp_1

Table Description: This table returns the site specific information stored in the 'Progress Notes (Group and Individual)', 'Inpatient Progress Notes', 'Inpatient Progress Notes (Diagnosis Entry)', 'Ambulatory Progress Notes', and 'Ambulatory Progress Notes (Diagnosis Entry)' forms.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: EPISODE_NUMBER

Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 50
'Progress Notes Pointer'

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: confidential_note
Column Type: varchar
Max Length: 50
'Confidential Notes'

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: notes_field
Column Type: varchar
Max Length: 32766
'Notes Field'

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 50
The unique ID of the form that last updated the row.

Column Name: ss_note_20_char_text_31
Column Type: varchar
Max Length: 20
'SS Note 20 Character 31'

Column Name: ss_note_20_char_text_32
Column Type: varchar
Max Length: 20
'SS Note 20 Character 32'

Column Name: ss_note_20_char_text_33
Column Type: varchar
Max Length: 20
'SS Note 20 Character 33'

Column Name: ss_note_20_char_text_34
Column Type: varchar
Max Length: 20
'SS Note 20 Character 34'

Column Name: ss_note_20_char_text_35
Column Type: varchar
Max Length: 20
'SS Note 20 Character 35'

Column Name: ss_note_20_char_text_36
Column Type: varchar
Max Length: 20
'SS Note 20 Character 36'

Column Name: ss_note_20_char_text_37
Column Type: varchar
Max Length: 20
'SS Note 20 Character 37'

Column Name: ss_note_20_char_text_38
Column Type: varchar
Max Length: 20
'SS Note 20 Character 38'

Column Name: ss_note_20_char_text_39
Column Type: varchar
Max Length: 20
'SS Note 20 Character 39'

Column Name: ss_note_20_char_text_40
Column Type: varchar
Max Length: 20
'SS Note 20 Character 40'

Column Name: ss_note_20_char_text_41
Column Type: varchar
Max Length: 20
'SS Note 20 Character 41'

Column Name: ss_note_20_char_text_42
Column Type: varchar
Max Length: 20
'SS Note 20 Character 42'

Column Name: ss_note_20_char_text_43
Column Type: varchar
Max Length: 20
'SS Note 20 Character 43'

Column Name: ss_note_20_char_text_44
Column Type: varchar
Max Length: 20
'SS Note 20 Character 44'

Column Name: ss_note_20_char_text_45
Column Type: varchar
Max Length: 20
'SS Note 20 Character 45'

Column Name: ss_note_20_char_text_46
Column Type: varchar
Max Length: 20
'SS Note 20 Character 46'

Column Name: ss_note_20_char_text_47
Column Type: varchar
Max Length: 20
'SS Note 20 Character 47'

Column Name: ss_note_20_char_text_48
Column Type: varchar
Max Length: 20
'SS Note 20 Character 48'

Column Name: ss_note_20_char_text_49
Column Type: varchar
Max Length: 20
'SS Note 20 Character 49'

Column Name: ss_note_20_char_text_50
Column Type: varchar
Max Length: 20
'SS Note 20 Character 50'

Column Name: ss_note_40_char_text_31
Column Type: varchar
Max Length: 40
'SS Note 40 Character 31'

Column Name: ss_note_40_char_text_32
Column Type: varchar
Max Length: 40
'SS Note 40 Character 32'

Column Name: ss_note_40_char_text_33
Column Type: varchar
Max Length: 40
'SS Note 40 Character 33'

Column Name: ss_note_40_char_text_34
Column Type: varchar
Max Length: 40
'SS Note 40 Character 34'

Column Name: ss_note_40_char_text_35
Column Type: varchar
Max Length: 40
'SS Note 40 Character 35'

Column Name: ss_note_40_char_text_36
Column Type: varchar
Max Length: 40
'SS Note 40 Character 36'

Column Name: ss_note_40_char_text_37
Column Type: varchar
Max Length: 40
'SS Note 40 Character 37'

Column Name: ss_note_dsm_diag_31_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 31'

Column Name: ss_note_dsm_diag_31_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_31_code. See ss_note_dsm_diag_31_code for more information.

Column Name: ss_note_dsm_diag_32_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 32'

Column Name: ss_note_dsm_diag_32_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_32_code. See ss_note_dsm_diag_32_code for more information.

Column Name: ss_note_dsm_diag_33_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 33'

Column Name: ss_note_dsm_diag_33_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_33_code. See ss_note_dsm_diag_33_code for more information.

Column Name: ss_note_dsm_diag_34_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 34'

Column Name: ss_note_dsm_diag_34_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_34_code. See ss_note_dsm_diag_34_code for more information.

Column Name: ss_note_dsm_diag_35_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 35'

Column Name: ss_note_dsm_diag_35_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_35_code. See ss_note_dsm_diag_35_code for more information.

Column Name: ss_note_dsm_diag_36_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 36'

Column Name: ss_note_dsm_diag_36_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_36_code. See ss_note_dsm_diag_36_code for more information.

Column Name: ss_note_dsm_diag_37_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 37'

Column Name: ss_note_dsm_diag_37_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_37_code. See ss_note_dsm_diag_37_code for more information.

Column Name: ss_note_dsm_diag_38_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 38'

Column Name: ss_note_dsm_diag_38_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_38_code. See ss_note_dsm_diag_38_code for more information.

Column Name: ss_note_dsm_diag_39_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 39'

Column Name: ss_note_dsm_diag_39_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_39_code. See ss_note_dsm_diag_39_code for more information.

Column Name: ss_note_dsm_diag_40_code

Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 40'

Column Name: ss_note_dsm_diag_40_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_40_code. See ss_note_dsm_diag_40_code for more information.

Column Name: ss_note_dsm_diag_41_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 41'

Column Name: ss_note_dsm_diag_41_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_41_code. See ss_note_dsm_diag_41_code for more information.

Column Name: ss_note_dsm_diag_42_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 42'

Column Name: ss_note_dsm_diag_42_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_42_code. See ss_note_dsm_diag_42_code for more information.

Column Name: ss_note_dsm_diag_43_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 43'

Column Name: ss_note_dsm_diag_43_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_43_code. See ss_note_dsm_diag_43_code for more information.

Column Name: ss_note_dsm_diag_44_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 44'

Column Name: ss_note_dsm_diag_44_value
Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_44_code. See ss_note_dsm_diag_44_code for more information.

Column Name: ss_note_dsm_diag_45_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 45'

Column Name: ss_note_dsm_diag_45_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_45_code. See ss_note_dsm_diag_45_code for more information.

Column Name: ss_note_dsm_diag_46_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 46'

Column Name: ss_note_dsm_diag_46_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_46_code. See ss_note_dsm_diag_46_code for more information.

Column Name: ss_note_dsm_diag_47_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 47'

Column Name: ss_note_dsm_diag_47_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_47_code. See ss_note_dsm_diag_47_code for more information.

Column Name: ss_note_dsm_diag_48_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 48'

Column Name: ss_note_dsm_diag_48_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_48_code. See ss_note_dsm_diag_48_code for more information.

Column Name: ss_note_dsm_diag_49_code

Column Type: varchar

Max Length: 20
'SS Note DSM IV Diagnosis 49'

Column Name: ss_note_dsm_diag_49_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_49_code. See ss_note_dsm_diag_49_code for more information.

Column Name: ss_note_dsm_diag_50_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 50'

Column Name: ss_note_dsm_diag_50_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_50_code. See ss_note_dsm_diag_50_code for more information.

Column Name: ss_note_icd9_diag_31_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 31'

Column Name: ss_note_icd9_diag_31_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_31_code. See ss_note_icd9_diag_31_code for more information.

Column Name: ss_note_icd9_diag_32_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 32'

Column Name: ss_note_icd9_diag_32_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_32_code. See ss_note_icd9_diag_32_code for more information.

Column Name: ss_note_icd9_diag_33_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 33'

Column Name: ss_note_icd9_diag_33_value
Column Type: varchar
Max Length: 250

The description associated with `ss_note_icd9_diag_33_code`. See `ss_note_icd9_diag_33_code` for more information.

Column Name: `ss_note_icd9_diag_34_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 34'

Column Name: `ss_note_icd9_diag_34_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_34_code`. See `ss_note_icd9_diag_34_code` for more information.

Column Name: `ss_note_icd9_diag_35_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 35'

Column Name: `ss_note_icd9_diag_35_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_35_code`. See `ss_note_icd9_diag_35_code` for more information.

Column Name: `ss_note_icd9_diag_36_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 36'

Column Name: `ss_note_icd9_diag_36_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_36_code`. See `ss_note_icd9_diag_36_code` for more information.

Column Name: `ss_note_icd9_diag_37_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 37'

Column Name: `ss_note_icd9_diag_37_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_37_code`. See `ss_note_icd9_diag_37_code` for more information.

Column Name: `ss_note_icd9_diag_38_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 38'

Column Name: ss_note_icd9_diag_38_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_38_code. See ss_note_icd9_diag_38_code for more information.

Column Name: ss_note_icd9_diag_39_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 39'

Column Name: ss_note_icd9_diag_39_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_39_code. See ss_note_icd9_diag_39_code for more information.

Column Name: ss_note_icd9_diag_40_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 40'

Column Name: ss_note_icd9_diag_40_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_40_code. See ss_note_icd9_diag_40_code for more information.

Column Name: ss_note_icd9_diag_41_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 41'

Column Name: ss_note_icd9_diag_41_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_41_code. See ss_note_icd9_diag_41_code for more information.

Column Name: ss_note_icd9_diag_42_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 42'

Column Name: ss_note_icd9_diag_42_value

Column Type: varchar

Max Length: 250

The description associated with `ss_note_icd9_diag_42_code`. See `ss_note_icd9_diag_42_code` for more information.

Column Name: `ss_note_icd9_diag_43_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 43'

Column Name: `ss_note_icd9_diag_43_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_43_code`. See `ss_note_icd9_diag_43_code` for more information.

Column Name: `ss_note_icd9_diag_44_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 44'

Column Name: `ss_note_icd9_diag_44_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_44_code`. See `ss_note_icd9_diag_44_code` for more information.

Column Name: `ss_note_icd9_diag_45_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 45'

Column Name: `ss_note_icd9_diag_45_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_45_code`. See `ss_note_icd9_diag_45_code` for more information.

Column Name: `ss_note_icd9_diag_46_code`

Column Name: ss_note_icd9_diag_50_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_50_code. See ss_note_icd9_diag_50_code for more information.

Column Name: ss_note_integer_1

Column Type: integer

'SS Note Integer 1'

Column Name: ss_note_integer_2

Column Type: integer

'SS Note Integer 2'

Column Name: ss_note_integer_3

Column Type: integer
'SS Note Integer 3'

Column Name: ss_note_integer_4
Column Type: integer
'SS Note Integer 4'

Column Name: ss_note_integer_5
Column Type: integer
'SS Note Integer 5'

Column Name: ss_note_integer_6
Column Type: integer
'SS Note Integer 6'

Column Name: ss_note_multi_dict_31_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 31'

Column Name: ss_note_multi_dict_31_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_31_code. See ss_note_multi_dict_31_code for more information.

Column Name: ss_note_multi_dict_32_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 32'

Column Name: ss_note_multi_dict_32_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_32_code. See ss_note_multi_dict_32_code for more information.

Column Name: ss_note_multi_dict_33_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 33'

Column Name: ss_note_multi_dict_33_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_33_code. See ss_note_multi_dict_33_code for more information.

Column Name: ss_note_multi_dict_34_code
Column Type: varchar

Max Length: 20
'SS Note Multi Response Dictionary 34'

Column Name: ss_note_multi_dict_34_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_34_code. See ss_note_multi_dict_34_code for more information.

Column Name: ss_note_multi_dict_35_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 35'

Column Name: ss_note_multi_dict_35_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_35_code. See ss_note_multi_dict_35_code for more information.

Column Name: ss_note_multi_dict_36_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 36'

Column Name: ss_note_multi_dict_36_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_36_code. See ss_note_multi_dict_36_code for more information.

Column Name: ss_note_multi_dict_37_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 37'

Column Name: ss_note_multi_dict_37_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_37_code. See ss_note_multi_dict_37_code for more information.

Column Name: ss_note_multi_dict_38_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 38'

Column Name: ss_note_multi_dict_38_value
Column Type: varchar
Max Length: 32700

The description associated with ss_note_multi_dict_38_code. See ss_note_multi_dict_38_code for more information.

Column Name: ss_note_multi_dict_39_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 39'

Column Name: ss_note_multi_dict_39_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_39_code. See ss_note_multi_dict_39_code for more information.

Column Name: ss_note_multi_dict_40_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 40'

Column Name: ss_note_multi_dict_40_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_40_code. See ss_note_multi_dict_40_code for more information.

Column Name: ss_note_multi_dict_41_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 41'

Column Name: ss_note_multi_dict_41_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_41_code. See ss_note_multi_dict_41_code for more information.

Column Name: ss_note_multi_dict_42_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 42'

Column Name: ss_note_multi_dict_42_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_42_code. See ss_note_multi_dict_42_code for more information.

Column Name: ss_note_multi_dict_43_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 43'

Column Name: ss_note_multi_dict_43_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_43_code. See ss_note_multi_dict_43_code for more information.

Column Name: ss_note_multi_dict_44_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 44'

Column Name: ss_note_multi_dict_44_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_44_code. See ss_note_multi_dict_44_code for more information.

Column Name: ss_note_multi_dict_45_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 45'

Column Name: ss_note_multi_dict_45_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_45_code. See ss_note_multi_dict_45_code for more information.

Column Name: ss_note_multi_dict_46_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 46'

Column Name: ss_note_multi_dict_46_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_46_code. See ss_note_multi_dict_46_code for more information.

Column Name: ss_note_multi_dict_47_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 47'

Column Name: ss_note_multi_dict_47_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_47_code. See ss_note_multi_dict_47_code for more information.

Column Name: ss_note_multi_dict_48_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 48'

Column Name: ss_note_multi_dict_48_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_48_code. See ss_note_multi_dict_48_code for more information.

Column Name: ss_note_multi_dict_49_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 49'

Column Name: ss_note_multi_dict_49_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_49_code. See ss_note_multi_dict_49_code for more information.

Column Name: ss_note_multi_dict_50_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 50'

Column Name: ss_note_multi_dict_50_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_50_code. See ss_note_multi_dict_50_code for more information.

Column Name: ss_note_scroll_text_31

Column Type: varchar

Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 50'

Column Name: ss_note_sing_dict_31_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 31'

Column Name: ss_note_sing_dict_31_value
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_31_code. See ss_note_sing_dict_31_code for more information.

Column Name: ss_note_sing_dict_32_code
Column Type: varchar
Max Length: 20

'SS Note Single Response Dictionary 32'

Column Name: ss_note_sing_dict_32_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_32_code. See ss_note_sing_dict_32_code for more information.

Column Name: ss_note_sing_dict_33_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 33'

Column Name: ss_note_sing_dict_33_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_33_code. See ss_note_sing_dict_33_code for more information.

Column Name: ss_note_sing_dict_34_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 34'

Column Name: ss_note_sing_dict_34_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_34_code. See ss_note_sing_dict_34_code for more information.

Column Name: ss_note_sing_dict_35_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 35'

Column Name: ss_note_sing_dict_35_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_35_code. See ss_note_sing_dict_35_code for more information.

Column Name: ss_note_sing_dict_36_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 36'

Column Name: ss_note_sing_dict_36_value

Column Type: varchar

Max Length: 80

The description associated with `ss_note_sing_dict_36_code`. See `ss_note_sing_dict_36_code` for more information.

Column Name: `ss_note_sing_dict_37_code`

Column Type: `varchar`

Max Length: 20

'SS Note Single Response Dictionary 37'

Column Name: `ss_note_sing_dict_37_value`

Column Type: `varchar`

Max Length: 80

The description associated with `ss_note_sing_dict_37_code`. See `ss_note_sing_dict_37_code` for more information.

Column Name: `ss_note_sing_dict_38_code`

Column Type: `varchar`

Max Length: 20

'SS Note Single Response Dictionary 38'

Column Name: `ss_note_sing_dict_38_value`

Column Type: `varchar`

Max Length: 80

The description associated with `ss_note_sing_dict_38_code`. See `ss_note_sing_dict_38_code` for more information.

Column Name: `ss_note_sing_dict_39_code`

Column Type: `varchar`

Max Length: 20

'SS Note Single Response Dictionary 39'

Column Name: `ss_note_sing_dict_39_value`

Column Type: `varchar`

Max Length: 80

The description associated with `ss_note_sing_dict_39_code`. See `ss_note_sing_dict_39_code` for more information.

Column Name: `ss_note_sing_dict_40_code`

Column Type: `varchar`

Max Length: 20

'SS Note Single Response Dictionary 40'

Column Name: `ss_note_sing_dict_40_value`

Column Type: `varchar`

Max Length: 80

The description associated with `ss_note_sing_dict_40_code`. See `ss_note_sing_dict_40_code` for more information.

Column Name: `ss_note_sing_dict_41_code`

Column Type: `varchar`

Max Length: 20

'SS Note Single Response Dictionary 41'

Column Name: ss_note_sing_dict_41_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_41_code. See ss_note_sing_dict_41_code for more information.

Column Name: ss_note_sing_dict_42_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 42'

Column Name: ss_note_sing_dict_42_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_42_code. See ss_note_sing_dict_42_code for more information.

'SS Note Time 47'

Column Name: ss_note_time_48
Column Type: varchar
Max Length: 50
'SS Note Time 48'

Column Name: ss_note_time_49
Column Type: varchar

Max Length: 50
'SS Note Time 49'

Column Name: ss_note_time_50
Column Type: varchar
Max Length: 50
'SS Note Time 50'

Column Name: user_row_access_code
Column Type: integer
If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form:

Ambulatory_Progress_Notes_(Diagnosis_Entry)

Table Name: SYSTEM.cw_patient_notes_supp_2

Table Description: This table returns the information stored in the 'Inpatient Progress Notes', 'Inpatient Progress Notes (Diagnosis Entry)', 'Progress Notes (Group and Individual)', 'Ambulatory Progress Notes', and 'Ambulatory Progress Notes (Diagnosis Entry)' forms.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 50
The unique ID associated with the note.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40

The user name who last updated the row.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: option_desc

Column Type: varchar

Max Length: 80

The name of the form that last updated the row.

Column Name: option_id

Column Type: varchar

Max Length: 20

The unique ID of the form that last updated the row.

Column Name: ss_note_integer_10

'SS Note Staff Member 44'

Column Name: ss_note_staff_45

Column Type: varchar

Max Length: 20

'SS Note Staff Member 45'

Column Name: ss_note_staff_46

Column Type: varchar

Max Length: 20

'SS Note Staff Member 46'

Column Name: ss_note_staff_47

Column Type: varchar

Max Length: 20

'SS Note Staff Member 47'

Column Name: ss_note_staff_48

Column Type: varchar

Max Length: 20

'SS Note Staff Member 48'

Column Name: ss_note_staff_49

Column Type: varchar

Max Length: 20

'SS Note Staff Member 49'

Column Name: ss_note_staff_50

Column Type: varchar

Max Length: 20

'SS Note Staff Member 50'

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form:

Ambulatory_Progress_Notes_(Diagnosis_Entry)

Table Name: SYSTEM.cw_patient_notes_supp_3

Table Description: This table returns the information stored in the 'Inpatient Progress Notes', 'Inpatient Progress Notes (Diagnosis Entry)', 'Progress Notes (Group and Individual)', 'Ambulatory Progress Notes', and 'Ambulatory Progress Notes (Diagnosis Entry)' forms.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 50
The unique ID associated with the note.

Column Name: PATID
Column Type: varchar

Max Length: 20

The client ID associated with the data.

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The user ID who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name who last updated the row.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: form_number

Column Type: varchar

Max Length: 50

The form number of the form that last updated the row.

Column Name: option_desc

Column Type: varchar

Max Length: 80

The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: ss_notec_multi_dict_10_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 10'

Column Name: ss_notec_multi_dict_10_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_10_code. See ss_notec_multi_dict_10_code for more information.

Column Name: ss_notec_multi_dict_11_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 11'

Column Name: ss_notec_multi_dict_11_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_11_code. See ss_notec_multi_dict_11_code for more information.

Column Name: ss_notec_multi_dict_12_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 12'

Column Name: ss_notec_multi_dict_12_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_12_code. See ss_notec_multi_dict_12_code for more information.

Column Name: ss_notec_multi_dict_13_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 13'

Column Name: ss_notec_multi_dict_13_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_13_code. See ss_notec_multi_dict_13_code for more information.

Column Name: ss_notec_multi_dict_14_code

Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 14'

Column Name: ss_notec_multi_dict_14_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_14_code. See ss_notec_multi_dict_14_code for more information.

Column Name: ss_notec_multi_dict_15_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 15'

Column Name: ss_notec_multi_dict_15_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_15_code. See ss_notec_multi_dict_15_code for more information.

Column Name: ss_notec_multi_dict_16_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 16'

Column Name: ss_notec_multi_dict_16_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_16_code. See ss_notec_multi_dict_16_code for more information.

Column Name: ss_notec_multi_dict_17_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 17'

Column Name: ss_notec_multi_dict_17_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_17_code. See ss_notec_multi_dict_17_code for more information.

Column Name: ss_notec_multi_dict_18_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 18'

Column Name: ss_notec_multi_dict_18_value
Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_18_code. See ss_notec_multi_dict_18_code for more information.

Column Name: ss_notec_multi_dict_19_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 19'

Column Name: ss_notec_multi_dict_19_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_19_code. See ss_notec_multi_dict_19_code for more information.

Column Name: ss_notec_multi_dict_1_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 1'

Column Name: ss_notec_multi_dict_1_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_1_code. See ss_notec_multi_dict_1_code for more information.

Column Name: ss_notec_multi_dict_20_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 20'

Column Name: ss_notec_multi_dict_20_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_20_code. See ss_notec_multi_dict_20_code for more information.

Column Name: ss_notec_multi_dict_21_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 21'

Column Name: ss_notec_multi_dict_21_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_21_code. See ss_notec_multi_dict_21_code for more information.

Column Name: ss_notec_multi_dict_22_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 22'

Column Name: ss_notec_multi_dict_22_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_22_code. See ss_notec_multi_dict_22_code for more information.

Column Name: ss_notec_multi_dict_23_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 23'

Column Name: ss_notec_multi_dict_23_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_23_code. See ss_notec_multi_dict_23_code for more information.

Column Name: ss_notec_multi_dict_24_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 24'

Column Name: ss_notec_multi_dict_24_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_24_code. See ss_notec_multi_dict_24_code for more information.

Column Name: ss_notec_multi_dict_25_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 25'

Column Name: ss_notec_multi_dict_25_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_25_code. See ss_notec_multi_dict_25_code for more information.

Column Name: ss_notec_multi_dict_26_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 26'

Column Name: ss_notec_multi_dict_26_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_26_code. See ss_notec_multi_dict_26_code for more information.

Column Name: ss_notec_multi_dict_27_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 27'

Column Name: ss_notec_multi_dict_27_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_27_code. See ss_notec_multi_dict_27_code for more information.

Column Name: ss_notec_multi_dict_28_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 28'

Column Name: ss_notec_multi_dict_28_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_28_code. See ss_notec_multi_dict_28_code for more information.

Column Name: ss_notec_multi_dict_29_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 29'

Column Name: ss_notec_multi_dict_29_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_29_code. See ss_notec_multi_dict_29_code for more information.

Column Name: ss_notec_multi_dict_2_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 2'

Column Name: ss_notec_multi_dict_2_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_2_code. See ss_notec_multi_dict_2_code for more information.

Column Name: ss_notec_multi_dict_30_code
Column Type: varchar
Max Length: 255

'SS Note Copy Multiple Response Dictionary 30'

Column Name: ss_notec_multi_dict_30_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_30_code. See ss_notec_multi_dict_30_code for more information.

Column Name: ss_notec_multi_dict_31_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 31'

Column Name: ss_notec_multi_dict_31_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_31_code. See ss_notec_multi_dict_31_code for more information.

Column Name: ss_notec_multi_dict_32_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 32'

Column Name: ss_notec_multi_dict_32_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_32_code. See ss_notec_multi_dict_32_code for more information.

Column Name: ss_notec_multi_dict_33_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 33'

Column Name: ss_notec_multi_dict_33_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_33_code. See ss_notec_multi_dict_33_code for more information.

Column Name: ss_notec_multi_dict_34_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 34'

Column Name: ss_notec_multi_dict_34_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_34_code. See ss_notec_multi_dict_34_code for more information.

Column Name: ss_notec_multi_dict_35_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 35'

Column Name: ss_notec_multi_dict_35_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_35_code. See ss_notec_multi_dict_35_code for more information.

Column Name: ss_notec_multi_dict_36_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 36'

Column Name: ss_notec_multi_dict_36_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_36_code. See ss_notec_multi_dict_36_code for more information.

Column Name: ss_notec_multi_dict_37_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 37'

Column Name: ss_notec_multi_dict_37_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_37_code. See ss_notec_multi_dict_37_code for more information.

Column Name: ss_notec_multi_dict_38_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 38'

Column Name: ss_notec_multi_dict_38_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_38_code. See ss_notec_multi_dict_38_code for more information.

Column Name: ss_notec_multi_dict_39_code
Column Type: varchar
Max Length: 255

'SS Note Copy Multiple Response Dictionary 39'

Column Name: ss_notec_multi_dict_39_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_39_code. See ss_notec_multi_dict_39_code for more information.

Column Name: ss_notec_multi_dict_3_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 3'

Column Name: ss_notec_multi_dict_3_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_3_code. See ss_notec_multi_dict_3_code for more information.

Column Name: ss_notec_multi_dict_40_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 40'

Column Name: ss_notec_multi_dict_40_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_40_code. See ss_notec_multi_dict_40_code for more information.

Column Name: ss_notec_multi_dict_41_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 41'

Column Name: ss_notec_multi_dict_41_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_41_code. See ss_notec_multi_dict_41_code for more information.

Column Name: ss_notec_multi_dict_42_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 42'

Column Name: ss_notec_multi_dict_42_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_42_code. See ss_notec_multi_dict_42_code for more information.

Column Name: ss_notec_multi_dict_43_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 43'

Column Name: ss_notec_multi_dict_43_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_43_code. See ss_notec_multi_dict_43_code for more information.

Column Name: ss_notec_multi_dict_44_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 44'

Column Name: ss_notec_multi_dict_44_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_44_code. See ss_notec_multi_dict_44_code for more information.

Column Name: ss_notec_multi_dict_45_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 45'

Column Name: ss_notec_multi_dict_45_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_45_code. See ss_notec_multi_dict_45_code for more information.

Column Name: ss_notec_multi_dict_46_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 46'

Column Name: ss_notec_multi_dict_46_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_46_code. See ss_notec_multi_dict_46_code for more information.

Column Name: ss_notec_multi_dict_47_code
Column Type: varchar
Max Length: 255

'SS Note Copy Multiple Response Dictionary 47'

Column Name: ss_notec_multi_dict_47_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_47_code. See ss_notec_multi_dict_47_code for more information.

Column Name: ss_notec_multi_dict_48_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 48'

Column Name: ss_notec_multi_dict_48_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_48_code. See ss_notec_multi_dict_48_code for more information.

Column Name: ss_notec_multi_dict_49_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 49'

Column Name: ss_notec_multi_dict_49_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_49_code. See ss_notec_multi_dict_49_code for more information.

Column Name: ss_notec_multi_dict_4_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 4'

Column Name: ss_notec_multi_dict_4_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_4_code. See ss_notec_multi_dict_4_code for more information.

Column Name: ss_notec_multi_dict_50_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 50'

Column Name: ss_notec_multi_dict_50_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_50_code. See ss_notec_multi_dict_50_code for more information.

Column Name: ss_notec_multi_dict_5_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 5'

Column Name: ss_notec_multi_dict_5_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_5_code. See ss_notec_multi_dict_5_code for more information.

Column Name: ss_notec_multi_dict_6_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 6'

Column Name: ss_notec_multi_dict_6_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_6_code. See ss_notec_multi_dict_6_code for more information.

Column Name: ss_notec_multi_dict_7_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 7'

Column Name: ss_notec_multi_dict_7_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_7_code. See ss_notec_multi_dict_7_code for more information.

Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 8'

Column Name: ss_notec_multi_dict_8_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_8_code. See ss_notec_multi_dict_8_code for more information.

Column Name: ss_notec_multi_dict_9_code
Column Type: varchar
Max Length: 255

'SS Note Copy Multiple Response Dictionary 9'

Column Name: ss_notec_multi_dict_9_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_9_code. See ss_notec_multi_dict_9_code for more information.

Column Name: ss_notec_sing_dict_10_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 10'

Column Name: ss_notec_sing_dict_10_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_10_code. See ss_notec_sing_dict_10_code for more information.

Column Name: ss_notec_sing_dict_11_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 11'

Column Name: ss_notec_sing_dict_11_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_11_code. See ss_notec_sing_dict_11_code for more information.

Column Name: ss_notec_sing_dict_12_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 12'

Column Name: ss_notec_sing_dict_12_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_12_code. See ss_notec_sing_dict_12_code for more information.

Column Name: ss_notec_sing_dict_13_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 13'

Column Name: ss_notec_sing_dict_13_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_13_code. See ss_notec_sing_dict_13_code for more information.

Column Name: ss_notec_sing_dict_14_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 14'

Column Name: ss_notec_sing_dict_14_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_14_code. See ss_notec_sing_dict_14_code for more information.

Column Name: ss_notec_sing_dict_15_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 15'

Column Name: ss_notec_sing_dict_15_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_15_code. See ss_notec_sing_dict_15_code for more information.

Column Name: ss_notec_sing_dict_16_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 16'

Column Name: ss_notec_sing_dict_16_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_16_code. See ss_notec_sing_dict_16_code for more information.

Column Name: ss_notec_sing_dict_17_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 17'

Column Name: ss_notec_sing_dict_17_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_17_code. See ss_notec_sing_dict_17_code for more information.

Column Name: ss_notec_sing_dict_18_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 18'

Column Name: ss_notec_sing_dict_18_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_18_code. See ss_notec_sing_dict_18_code for more information.

Column Name: ss_notec_sing_dict_19_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 19'

Column Name: ss_notec_sing_dict_19_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_19_code. See ss_notec_sing_dict_19_code for more information.

Column Name: ss_notec_sing_dict_1_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 1'

Column Name: ss_notec_sing_dict_1_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_1_code. See ss_notec_sing_dict_1_code for more information.

Column Name: ss_notec_sing_dict_20_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 20'

Column Name: ss_notec_sing_dict_20_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_20_code. See ss_notec_sing_dict_20_code for more information.

Column Name: ss_notec_sing_dict_21_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 21'

Column Name: ss_notec_sing_dict_21_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_21_code. See ss_notec_sing_dict_21_code for more information.

Column Name: ss_notec_sing_dict_22_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 22'

Column Name: ss_notec_sing_dict_22_value
Column Type: varchar
Max Length: 255
The description associated with ss_notec_sing_dict_22_code. See ss_notec_sing_dict_22_code for more information.

Column Name: ss_notec_sing_dict_23_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 23'

Column Name: ss_notec_sing_dict_23_value
Column Type: varchar
Max Length: 255
The description associated with ss_notec_sing_dict_23_code. See ss_notec_sing_dict_23_code for more information.

Column Name: ss_notec_sing_dict_24_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 24'

Column Name: ss_notec_sing_dict_24_value
Column Type: varchar
Max Length: 255
The description associated with ss_notec_sing_dict_24_code. See ss_notec_sing_dict_24_code for more information.

Column Name: ss_notec_sing_dict_25_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 25'

Column Name: ss_notec_sing_dict_25_value
Column Type: varchar
Max Length: 255
The description associated with ss_notec_sing_dict_25_code. See ss_notec_sing_dict_25_code for more information.

Column Name: ss_notec_sing_dict_26_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 26'

Column Name: ss_notec_sing_dict_26_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_26_code. See ss_notec_sing_dict_26_code for more information.

Column Name: ss_notec_sing_dict_27_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 27'

Column Name: ss_notec_sing_dict_27_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_27_code. See ss_notec_sing_dict_27_code for more information.

Column Name: ss_notec_sing_dict_28_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 28'

Column Name: ss_notec_sing_dict_28_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_28_code. See ss_notec_sing_dict_28_code for more information.

Column Name: ss_notec_sing_dict_29_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 29'

Column Name: ss_notec_sing_dict_29_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_29_code. See ss_notec_sing_dict_29_code for more information.

Column Name: ss_notec_sing_dict_2_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 2'

Column Name: ss_notec_sing_dict_2_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_2_code. See ss_notec_sing_dict_2_code for more information.

Column Name: ss_notec_sing_dict_30_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 30'

Column Name: ss_notec_sing_dict_30_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_30_code. See ss_notec_sing_dict_30_code for more information.

Column Name: ss_notec_sing_dict_31_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 31'

Column Name: ss_notec_sing_dict_31_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_31_code. See ss_notec_sing_dict_31_code for more information.

Column Name: ss_notec_sing_dict_32_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 32'

Column Name: ss_notec_sing_dict_32_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_32_code. See ss_notec_sing_dict_32_code for more information.

Column Name: ss_notec_sing_dict_33_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 33'

Column Name: ss_notec_sing_dict_33_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_33_code. See ss_notec_sing_dict_33_code for more information.

Column Name: ss_notec_sing_dict_34_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 34'

Column Name: ss_notec_sing_dict_34_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_34_code. See ss_notec_sing_dict_34_code for more information.

Column Name: ss_notec_sing_dict_35_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 35'

Column Name: ss_notec_sing_dict_35_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_35_code. See ss_notec_sing_dict_35_code for more information.

Column Name: ss_notec_sing_dict_36_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 36'

Column Name: ss_notec_sing_dict_36_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_36_code. See ss_notec_sing_dict_36_code for more information.

Column Name: ss_notec_sing_dict_37_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 37'

Column Name: ss_notec_sing_dict_37_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_37_code. See ss_notec_sing_dict_37_code for more information.

Column Name: ss_notec_sing_dict_38_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 38'

Column Name: ss_notec_sing_dict_38_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_38_code. See ss_notec_sing_dict_38_code for more information.

Column Name: ss_notec_sing_dict_39_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 39'

Column Name: ss_notec_sing_dict_39_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_39_code. See ss_notec_sing_dict_39_code for more information.

Column Name: ss_notec_sing_dict_3_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 3'

Column Name: ss_notec_sing_dict_3_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_3_code. See ss_notec_sing_dict_3_code for more information.

Column Name: ss_notec_sing_dict_40_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 40'

Column Name: ss_notec_sing_dict_40_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_40_code. See ss_notec_sing_dict_40_code for more information.

Column Name: ss_notec_sing_dict_41_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 41'

Column Name: ss_notec_sing_dict_41_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_41_code. See ss_notec_sing_dict_41_code for more information.

Column Name: ss_notec_sing_dict_42_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 42'

Column Name: ss_notec_sing_dict_42_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_42_code. See ss_notec_sing_dict_42_code for more information.

Column Name: ss_notec_sing_dict_43_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 43'

Column Name: ss_notec_sing_dict_43_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_43_code. See ss_notec_sing_dict_43_code for more information.

Column Name: ss_notec_sing_dict_44_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 44'

Column Name: ss_notec_sing_dict_44_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_44_code. See ss_notec_sing_dict_44_code for more information.

Column Name: ss_notec_sing_dict_45_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 45'

Column Name: ss_notec_sing_dict_45_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_45_code. See ss_notec_sing_dict_45_code for more information.

Column Name: ss_notec_sing_dict_46_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 46'

Column Name: ss_notec_sing_dict_46_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_46_code. See ss_notec_sing_dict_46_code for more information.

Column Name: ss_notec_sing_dict_47_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 47'

Column Name: ss_notec_sing_dict_47_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_47_code. See ss_notec_sing_dict_47_code for more information.

Column Name: ss_notec_sing_dict_48_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 48'

Column Name: ss_notec_sing_dict_48_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_48_code. See ss_notec_sing_dict_48_code for more information.

Column Name: ss_notec_sing_dict_49_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 49'

Column Name: ss_notec_sing_dict_49_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_49_code. See ss_notec_sing_dict_49_code for more information.

Column Name: ss_notec_sing_dict_4_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 4'

Column Name: ss_notec_sing_dict_4_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_4_code. See ss_notec_sing_dict_4_code for more information.

Column Name: ss_notec_sing_dict_50_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 50'

Column Name: ss_notec_sing_dict_50_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_50_code. See ss_notec_sing_dict_50_code for more information.

Column Name: ss_notec_sing_dict_5_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 5'

Column Name: ss_notec_sing_dict_5_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_5_code. See ss_notec_sing_dict_5_code for more information.

Column Name: ss_notec_sing_dict_6_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 6'

Column Name: ss_notec_sing_dict_6_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_6_code. See ss_notec_sing_dict_6_code for more information.

Column Name: ss_notec_sing_dict_7_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 7'

Column Name: ss_notec_sing_dict_7_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_7_code. See ss_notec_sing_dict_7_code for more information.

Column Name: ss_notec_sing_dict_8_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 8'

Column Name: ss_notec_sing_dict_8_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_8_code. See ss_notec_sing_dict_8_code for more information.

Column Name: ss_notec_sing_dict_9_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 9'

Column Name: ss_notec_sing_dict_9_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_9_code. See ss_notec_sing_dict_9_code for more information.

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form:

Ambulatory_Progress_Notes_(Diagnosis_Entry)

Table Name: SYSTEM.cw_patient_notes_supp_4

Table Description: This table returns the site specific information stored in the 'Progress Notes (Group and Individual)', 'Inpatient Progress Notes', 'Inpatient Progress Notes (Diagnosis Entry)', 'Ambulatory Progress Notes', and 'Ambulatory Progress Notes (Diagnosis Entry)' forms.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the service.

Column Name: data_entry_time

Column Type: varchar

Max Length: 10

The time the row was last updated.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The user name that last updated the row.

Column Name: EPISODE_NUMBER

Column Type: integer

The episode number associated with PATID.

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: NOT_uniqueid

Column Type: varchar

Max Length: 50

Unique ID for a progress note.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the data.

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40
The user ID who last updated the service.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the service.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: form_number
Column Type: varchar
Max Length: 50
'Form Number'

Column Name: option_desc
Column Type: varchar
Max Length: 81
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: ss_notc_mult_dic_51_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 51'

Column Name: ss_notc_mult_dic_51_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mult_dic_51_code. See ss_notc_mult_dic_51_code for more information.

Column Name: ss_notc_mult_dic_52_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 52'

Column Name: ss_notc_mult_dic_52_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mult_dic_52_code. See ss_notc_mult_dic_52_code for more information.

Column Name: ss_notc_mult_dic_53_code

Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 53'

Column Name: ss_notc_mult_dic_53_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mult_dic_53_code. See ss_notc_mult_dic_53_code for more information.

Column Name: ss_notc_mult_dic_54_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 54'

Column Name: ss_notc_mult_dic_54_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mult_dic_54_code. See ss_notc_mult_dic_54_code for more information.

Column Name: ss_notc_mult_dic_55_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 55'

Column Name: ss_notc_mult_dic_55_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mult_dic_55_code. See ss_notc_mult_dic_55_code for more information.

Column Name: ss_notc_mult_dic_56_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 56'

Column Name: ss_notc_mult_dic_56_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mult_dic_56_code. See ss_notc_mult_dic_56_code for more information.

Column Name: ss_notc_mult_dic_57_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 57'

Column Name: ss_notc_mult_dic_57_value
Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_57_code. See ss_notc_mult_dic_57_code for more information.

Column Name: ss_notc_mult_dic_58_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 58'

Column Name: ss_notc_mult_dic_58_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_58_code. See ss_notc_mult_dic_58_code for more information.

Column Name: ss_notc_mult_dic_59_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 59'

Column Name: ss_notc_mult_dic_59_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_59_code. See ss_notc_mult_dic_59_code for more information.

Column Name: ss_notc_mult_dic_60_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 60'

Column Name: ss_notc_mult_dic_60_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_60_code. See ss_notc_mult_dic_60_code for more information.

Column Name: ss_notc_mult_dic_61_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 61'

Column Name: ss_notc_mult_dic_61_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_61_code. See ss_notc_mult_dic_61_code for more information.

Column Name: ss_notc_mult_dic_62_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 62'

Column Name: ss_notc_mult_dic_62_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_62_code. See ss_notc_mult_dic_62_code for more information.

Column Name: ss_notc_mult_dic_63_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 63'

Column Name: ss_notc_mult_dic_63_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_63_code. See ss_notc_mult_dic_63_code for more information.

Column Name: ss_notc_mult_dic_64_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 64'

Column Name: ss_notc_mult_dic_64_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_64_code. See ss_notc_mult_dic_64_code for more information.

Column Name: ss_notc_mult_dic_65_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 65'

Column Name: ss_notc_mult_dic_65_value

Column Type: varchar

Max Length: 265

The description associated with ss_notc_mult_dic_65_code. See ss_notc_mult_dic_65_code for more information.

Column Name: ss_notc_mult_dic_66_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 66'

Column Name: ss_notc_mult_dic_66_value

Column Type: varchar

Max Length: 255

The description associated with `ss_notc_mult_dic_66_code`. See `ss_notc_mult_dic_66_code` for more information.

Column Name: `ss_notc_mult_dic_67_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 67'

Column Name: `ss_notc_mult_dic_67_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_67_code`. See `ss_notc_mult_dic_67_code` for more information.

Column Name: `ss_notc_mult_dic_68_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 68'

Column Name: `ss_notc_mult_dic_68_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_68_code`. See `ss_notc_mult_dic_68_code` for more information.

Column Name: `ss_notc_mult_dic_69_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 69'

Column Name: `ss_notc_mult_dic_69_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_69_code`. See `ss_notc_mult_dic_69_code` for more information.

Column Name: `ss_notc_mult_dic_70_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 70'

Column Name: `ss_notc_mult_dic_70_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_70_code`. See `ss_notc_mult_dic_70_code` for more information.

Column Name: `ss_notc_mult_dic_71_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 71'

Column Name: ss_notc_mult_dic_71_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_71_code. See ss_notc_mult_dic_71_code for more information.

Column Name: ss_notc_mult_dic_72_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 72'

Column Name: ss_notc_mult_dic_72_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_72_code. See ss_notc_mult_dic_72_code for more information.

Column Name: ss_notc_mult_dic_73_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 73'

Column Name: ss_notc_mult_dic_73_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_73_code. See ss_notc_mult_dic_73_code for more information.

Column Name: ss_notc_mult_dic_74_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 74'

Column Name: ss_notc_mult_dic_74_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_74_code. See ss_notc_mult_dic_74_code for more information.

Column Name: ss_notc_mult_dic_75_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 75'

Column Name: ss_notc_mult_dic_75_value

Column Type: varchar

Max Length: 275

The description associated with ss_notc_mult_dic_75_code. See ss_notc_mult_dic_75_code for more information.

Column Name: ss_notc_mult_dic_76_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 76'

Column Name: ss_notc_mult_dic_76_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_76_code. See ss_notc_mult_dic_76_code for more information.

Column Name: ss_notc_mult_dic_77_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 77'

Column Name: ss_notc_mult_dic_77_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_77_code. See ss_notc_mult_dic_77_code for more information.

Column Name: ss_notc_mult_dic_78_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 78'

Column Name: ss_notc_mult_dic_78_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_78_code. See ss_notc_mult_dic_78_code for more information.

Column Name: ss_notc_mult_dic_79_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 79'

Column Name: ss_notc_mult_dic_79_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_79_code. See ss_notc_mult_dic_79_code for more information.

Column Name: ss_notc_mult_dic_80_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 80'

Column Name: ss_notc_mult_dic_80_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_80_code. See ss_notc_mult_dic_80_code for more information.

Column Name: ss_notc_sin_dic_51_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 51'

Column Name: ss_notc_sin_dic_51_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_51_code. See ss_notc_sin_dic_51_code for more information.

Column Name: ss_notc_sin_dic_52_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 52'

Column Name: ss_notc_sin_dic_52_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_52_code. See ss_notc_sin_dic_52_code for more information.

Column Name: ss_notc_sin_dic_53_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 53'

Column Name: ss_notc_sin_dic_53_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_53_code. See ss_notc_sin_dic_53_code for more information.

Column Name: ss_notc_sin_dic_54_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 54'

Column Name: ss_notc_sin_dic_54_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_54_code. See ss_notc_sin_dic_54_code for more information.

Column Name: ss_notc_sin_dic_55_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 55'

Column Name: ss_notc_sin_dic_55_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_55_code. See ss_notc_sin_dic_55_code for more information.

Column Name: ss_notc_sin_dic_56_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 56'

Column Name: ss_notc_sin_dic_56_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_56_code. See ss_notc_sin_dic_56_code for more information.

Column Name: ss_notc_sin_dic_57_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 57'

Column Name: ss_notc_sin_dic_57_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_57_code. See ss_notc_sin_dic_57_code for more information.

Column Name: ss_notc_sin_dic_58_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 58'

Column Name: ss_notc_sin_dic_58_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_58_code. See ss_notc_sin_dic_58_code for more information.

Column Name: ss_notc_sin_dic_59_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 59'

Column Name: ss_notc_sin_dic_59_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_59_code. See ss_notc_sin_dic_59_code for more information.

Column Name: ss_notc_sin_dic_60_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 60'

Column Name: ss_notc_sin_dic_60_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_60_code. See ss_notc_sin_dic_60_code for more information.

Column Name: ss_notc_sin_dic_61_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 61'

Column Name: ss_notc_sin_dic_61_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_61_code. See ss_notc_sin_dic_61_code for more information.

Column Name: ss_notc_sin_dic_62_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 62'

Column Name: ss_notc_sin_dic_62_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_62_code. See ss_notc_sin_dic_62_code for more information.

Column Name: ss_notc_sin_dic_63_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 63'

Column Name: ss_notc_sin_dic_63_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_63_code. See ss_notc_sin_dic_63_code for more information.

Column Name: ss_notc_sin_dic_64_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 64'

Column Name: ss_notc_sin_dic_64_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_64_code. See ss_notc_sin_dic_64_code for more information.

Column Name: ss_notc_sin_dic_65_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 65'

Column Name: ss_notc_sin_dic_65_value
Column Type: varchar
Max Length: 265
The description associated with ss_notc_sin_dic_65_code. See ss_notc_sin_dic_65_code for more information.

Column Name: ss_notc_sin_dic_66_code
Column Type: varchar

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_63_code limited to 255 characters. See ss_note_mul_dict_63_code for more information.

Column Name: ss_note_mul_dict_63_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_63_code. See ss_note_mul_dict_63_code for more information.

Column Name: ss_note_mul_dict_64_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 64'

Column Name: ss_note_mul_dict_64_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_64_code limited to 255 characters. See ss_note_mul_dict_64_code for more information.

Column Name: ss_note_mul_dict_64_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_64_code. See ss_note_mul_dict_64_code for more information.

Column Name: ss_note_mul_dict_65_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 65'

Column Name: ss_note_mul_dict_65_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_65_code limited to 255 characters. See ss_note_mul_dict_65_code for more information.

Column Name: ss_note_mul_dict_65_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_65_code. See ss_note_mul_dict_65_code for more information.

Column Name: ss_note_mul_dict_66_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 66'

Column Name: ss_note_mul_dict_66_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_66_code limited to 255 characters. See ss_note_mul_dict_66_code for more information.

Column Name: ss_note_mul_dict_66_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_66_code. See ss_note_mul_dict_66_code for more information.

Column Name: ss_note_mul_dict_67_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 67'

Column Name: ss_note_mul_dict_67_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_67_code limited to 255 characters. See ss_note_mul_dict_67_code for more information.

Column Name: ss_note_mul_dict_67_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_67_code. See ss_note_mul_dict_67_code for more information.

Column Name: ss_note_mul_dict_68_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 68'

Column Name: ss_note_mul_dict_68_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_68_code limited to 255 characters. See ss_note_mul_dict_68_code for more information.

Column Name: ss_note_mul_dict_68_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_68_code. See ss_note_mul_dict_68_code for more information.

Column Name: ss_note_mul_dict_69_code

Column Type: varchar

Max Length: 20
'SS Note Multi Response Dictionary 69'

Column Name: ss_note_mul_dict_69_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_69_code limited to 255 characters. See ss_note_mul_dict_69_code for more information.

Column Name: ss_note_mul_dict_69_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_69_code. See ss_note_mul_dict_69_code for more information.

Column Name: ss_note_mul_dict_70_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 70'

Column Name: ss_note_mul_dict_70_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_70_code limited to 255 characters. See ss_note_mul_dict_70_code for more information.

Column Name: ss_note_mul_dict_70_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_70_code. See ss_note_mul_dict_70_code for more information.

Column Name: ss_note_mul_dict_71_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 71'

Column Name: ss_note_mul_dict_71_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_71_code limited to 255 characters. See ss_note_mul_dict_71_code for more information.

Column Name: ss_note_mul_dict_71_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_71_code. See ss_note_mul_dict_71_code for more information.

Column Name: ss_note_mul_dict_72_code

Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 72'

Column Name: ss_note_mul_dict_72_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_72_code limited to 255 characters. See ss_note_mul_dict_72_code for more information.

Column Name: ss_note_mul_dict_72_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_72_code. See ss_note_mul_dict_72_code for more information.

Column Name: ss_note_mul_dict_73_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 73'

Column Name: ss_note_mul_dict_73_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_73_code limited to 255 characters. See ss_note_mul_dict_73_code for more information.

Column Name: ss_note_mul_dict_73_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_73_code. See ss_note_mul_dict_73_code for more information.

Column Name: ss_note_mul_dict_74_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 74'

Column Name: ss_note_mul_dict_74_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_74_code limited to 255 characters. See ss_note_mul_dict_74_code for more information.

Column Name: ss_note_mul_dict_74_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_74_code. See ss_note_mul_dict_74_code for more information.

Column Name: ss_note_mul_dict_75_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 75'

Column Name: ss_note_mul_dict_75_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_75_code limited to 255 characters. See ss_note_mul_dict_75_code for more information.

Column Name: ss_note_mul_dict_75_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_75_code. See ss_note_mul_dict_75_code for more information.

Column Name: ss_note_mul_dict_76_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 76'

Column Name: ss_note_mul_dict_76_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_76_code limited to 255 characters. See ss_note_mul_dict_76_code for more information.

Column Name: ss_note_mul_dict_76_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_76_code. See ss_note_mul_dict_76_code for more information.

Column Name: ss_note_mul_dict_77_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 77'

Column Name: ss_note_mul_dict_77_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_77_code limited to 255 characters. See ss_note_mul_dict_77_code for more information.

Column Name: ss_note_mul_dict_77_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_77_code. See ss_note_mul_dict_77_code for more information.

Column Name: ss_note_mul_dict_78_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 78'

Column Name: ss_note_mul_dict_78_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_78_code limited to 255 characters. See ss_note_mul_dict_78_code for more information.

Column Name: ss_note_mul_dict_78_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_78_code. See ss_note_mul_dict_78_code for more information.

Column Name: ss_note_mul_dict_79_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 79'

Column Name: ss_note_mul_dict_79_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_79_code limited to 255 characters. See ss_note_mul_dict_79_code for more information.

Column Name: ss_note_mul_dict_79_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_79_code. See ss_note_mul_dict_79_code for more information.

Column Name: ss_note_mul_dict_80_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 80'

Column Name: ss_note_mul_dict_80_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_80_code limited to 255 characters. See ss_note_mul_dict_80_code for more information.

Column Name: ss_note_mul_dict_80_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_80_code. See ss_note_mul_dict_80_code for more information.

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 79'

Column Name: ss_note_sin_dict_79_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_79_code. See ss_note_sin_dict_79_code for more information.

Column Name: ss_note_sin_dict_80_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 80'

Column Name: ss_note_sin_dict_80_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_80_code. See ss_note_sin_dict_80_code for more information.

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form:

Ambulatory_Progress_Notes_(Diagnosis_Entry)

Table Name: SYSTEM.cw_patient_notes_supp_5

Table Description: This table returns the site specific information stored in the 'Progress Notes (Group and Individual)', 'Inpatient Progress Notes', 'Inpatient Progress Notes (Diagnosis Entry', 'Ambulatory Progress Notes', and 'Ambulatory Progress Notes (Diagnosis Entry)' forms.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the service.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 50
Unique ID for a note.

Column Name: PATID
Column Type: varchar

Max Length: 20
The client ID associated with the data.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the service.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the service.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: ebp_code
Column Type: varchar
Max Length: 50
'Evidence-Based Practices'

Column Name: ebp_element_code
Column Type: varchar
Max Length: 50
'Evidence-Based Practice Elements'

Column Name: ebp_element_value
Column Type: varchar
Max Length: 32000
The description associated with ebp_element_code

Column Name: ebp_value
Column Type: varchar
Max Length: 32000
The description associated with ebp_code

Column Name: form_number
Column Type: varchar
Max Length: 50
'Form Number'

Column Name: option_desc
Column Type: varchar
Max Length: 81
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: ss_notc_mul_dic_100_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 100'

Column Name: ss_notc_mul_dic_100_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_100_code. See ss_notc_mul_dic_100_code for more information.

Column Name: ss_notc_mul_dic_101_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 101'

Column Name: ss_notc_mul_dic_101_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_101_code. See ss_notc_mul_dic_101_code for more information.

Column Name: ss_notc_mul_dic_102_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 102'

Column Name: ss_notc_mul_dic_102_value
Column Type: varchar
Max Length: 255

The description associated with ss_notc_mul_dic_102_code. See ss_notc_mul_dic_102_code for more information.

Column Name: ss_notc_mul_dic_103_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 103'

Column Name: ss_notc_mul_dic_103_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_103_code. See ss_notc_mul_dic_103_code for more information.

Column Name: ss_notc_mul_dic_104_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 104'

Column Name: ss_notc_mul_dic_104_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_104_code. See ss_notc_mul_dic_104_code for more information.

Column Name: ss_notc_mul_dic_105_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 105'

Column Name: ss_notc_mul_dic_105_value
Column Type: varchar
Max Length: 275
The description associated with ss_notc_mul_dic_105_code. See ss_notc_mul_dic_105_code for more information.

Column Name: ss_notc_mul_dic_106_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 106'

Column Name: ss_notc_mul_dic_106_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_106_code. See ss_notc_mul_dic_106_code for more information.

Column Name: ss_notc_mul_dic_107_code
Column Type: varchar
Max Length: 50

'SS Note Copy Multiple Response Dictionary 107'

Column Name: ss_notc_mul_dic_107_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_107_code. See ss_notc_mul_dic_107_code for more information.

Column Name: ss_notc_mul_dic_108_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 108'

Column Name: ss_notc_mul_dic_108_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_108_code. See ss_notc_mul_dic_108_code for more information.

Column Name: ss_notc_mul_dic_109_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 109'

Column Name: ss_notc_mul_dic_109_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_109_code. See ss_notc_mul_dic_109_code for more information.

Column Name: ss_notc_mul_dic_110_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 110'

Column Name: ss_notc_mul_dic_110_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_110_code. See ss_notc_mul_dic_110_code for more information.

Column Name: ss_notc_mul_dic_81_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 81'

Column Name: ss_notc_mul_dic_81_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_81_code. See ss_notc_mul_dic_81_code for more information.

Column Name: ss_notc_mul_dic_82_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 82'

Column Name: ss_notc_mul_dic_82_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_82_code. See ss_notc_mul_dic_82_code for more information.

Column Name: ss_notc_mul_dic_83_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 83'

Column Name: ss_notc_mul_dic_83_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_83_code. See ss_notc_mul_dic_83_code for more information.

Column Name: ss_notc_mul_dic_84_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 84'

Column Name: ss_notc_mul_dic_84_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_84_code. See ss_notc_mul_dic_84_code for more information.

Column Name: ss_notc_mul_dic_85_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 85'

Column Name: ss_notc_mul_dic_85_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_85_code. See ss_notc_mul_dic_85_code for more information.

Column Name: ss_notc_mul_dic_86_code
Column Type: varchar
Max Length: 50

'SS Note Copy Multiple Response Dictionary 86'

Column Name: ss_notc_mul_dic_86_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_86_code. See ss_notc_mul_dic_86_code for more information.

Column Name: ss_notc_mul_dic_87_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 87'

Column Name: ss_notc_mul_dic_87_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_87_code. See ss_notc_mul_dic_87_code for more information.

Column Name: ss_notc_mul_dic_88_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 88'

Column Name: ss_notc_mul_dic_88_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_88_code. See ss_notc_mul_dic_88_code for more information.

Column Name: ss_notc_mul_dic_89_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 89'

Column Name: ss_notc_mul_dic_89_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_89_code. See ss_notc_mul_dic_89_code for more information.

Column Name: ss_notc_mul_dic_90_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 90'

Column Name: ss_notc_mul_dic_90_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_90_code. See ss_notc_mul_dic_90_code for more information.

Column Name: ss_notc_mul_dic_91_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 91'

Column Name: ss_notc_mul_dic_91_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_91_code. See ss_notc_mul_dic_91_code for more information.

Column Name: ss_notc_mul_dic_92_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 92'

Column Name: ss_notc_mul_dic_92_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_92_code. See ss_notc_mul_dic_92_code for more information.

Column Name: ss_notc_mul_dic_93_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 93'

Column Name: ss_notc_mul_dic_93_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_93_code. See ss_notc_mul_dic_93_code for more information.

Column Name: ss_notc_mul_dic_94_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 94'

Column Name: ss_notc_mul_dic_94_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_94_code. See ss_notc_mul_dic_94_code for more information.

Column Name: ss_notc_mul_dic_95_code
Column Type: varchar
Max Length: 50

'SS Note Copy Multiple Response Dictionary 95'

Column Name: ss_notc_mul_dic_95_value

Column Type: varchar

Max Length: 265

The description associated with ss_notc_mul_dic_95_code. See ss_notc_mul_dic_95_code for more information.

Column Name: ss_notc_mul_dic_96_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 96'

Column Name: ss_notc_mul_dic_96_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_96_code. See ss_notc_mul_dic_96_code for more information.

Column Name: ss_notc_mul_dic_97_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 97'

Column Name: ss_notc_mul_dic_97_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_97_code. See ss_notc_mul_dic_97_code for more information.

Column Name: ss_notc_mul_dic_98_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 98'

Column Name: ss_notc_mul_dic_98_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_98_code. See ss_notc_mul_dic_98_code for more information.

Column Name: ss_notc_mul_dic_99_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 99'

Column Name: ss_notc_mul_dic_99_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_99_code. See ss_notc_mul_dic_99_code for more information.

Column Name: ss_notc_sin_dic_100_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 100'

Column Name: ss_notc_sin_dic_100_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_100_code. See ss_notc_sin_dic_100_code for more information.

Column Name: ss_notc_sin_dic_101_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 101'

Column Name: ss_notc_sin_dic_101_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_101_code. See ss_notc_sin_dic_101_code for more information.

Column Name: ss_notc_sin_dic_102_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 102'

Column Name: ss_notc_sin_dic_102_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_102_code. See ss_notc_sin_dic_102_code for more information.

Column Name: ss_notc_sin_dic_103_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 103'

Column Name: ss_notc_sin_dic_103_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_103_code. See ss_notc_sin_dic_103_code for more information.

Column Name: ss_notc_sin_dic_104_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 104'

Column Name: ss_notc_sin_dic_104_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_104_code. See ss_notc_sin_dic_104_code for more information.

Column Name: ss_notc_sin_dic_105_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 105'

Column Name: ss_notc_sin_dic_105_value

Column Type: varchar

Max Length: 275

The description associated with ss_notc_sin_dic_105_code. See ss_notc_sin_dic_105_code for more information.

Column Name: ss_notc_sin_dic_106_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 106'

Column Name: ss_notc_sin_dic_106_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_106_code. See ss_notc_sin_dic_106_code for more information.

Column Name: ss_notc_sin_dic_107_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 107'

Column Name: ss_notc_sin_dic_107_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_107_code. See ss_notc_sin_dic_107_code for more information.

Column Name: ss_notc_sin_dic_108_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 108'

Column Name: ss_notc_sin_dic_108_value

Column Type: varchar

Max Length: 255

The description associated with `ss_notc_sin_dic_108_code`. See `ss_notc_sin_dic_108_code` for more information.

Column Name: `ss_notc_sin_dic_109_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Single Response Dictionary 109'

Column Name: `ss_notc_sin_dic_109_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_sin_dic_109_code`. See `ss_notc_sin_dic_109_code` for more information.

Column Name: `ss_notc_sin_dic_110_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Single Response Dictionary 110'

Column Name: `ss_notc_sin_dic_110_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_sin_dic_110_code`. See `ss_notc_sin_dic_110_code` for more information.

Column Name: `ss_notc_sin_dic_81_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Single Response Dictionary 81'

Column Name: `ss_notc_sin_dic_81_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_sin_dic_81_code`. See `ss_notc_sin_dic_81_code` for more information.

Column Name: `ss_notc_sin_dic_82_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Single Response Dictionary 82'

Column Name: `ss_notc_sin_dic_82_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_sin_dic_82_code`. See `ss_notc_sin_dic_82_code` for more information.

Column Name: `ss_notc_sin_dic_83_code`
Column Type: `varchar`
Max Length: 50

'SS Note Copy Single Response Dictionary 83'

Column Name: ss_notc_sin_dic_83_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_83_code. See ss_notc_sin_dic_83_code for more information.

Column Name: ss_notc_sin_dic_84_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 84'

Column Name: ss_notc_sin_dic_84_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_84_code. See ss_notc_sin_dic_84_code for more information.

Column Name: ss_notc_sin_dic_85_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 85'

Column Name: ss_notc_sin_dic_85_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_85_code. See ss_notc_sin_dic_85_code for more information.

Column Name: ss_notc_sin_dic_86_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 86'

Column Name: ss_notc_sin_dic_86_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_86_code. See ss_notc_sin_dic_86_code for more information.

Column Name: ss_notc_sin_dic_87_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 87'

Column Name: ss_notc_sin_dic_87_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_87_code. See ss_notc_sin_dic_87_code for more information.

Column Name: ss_notc_sin_dic_88_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 88'

Column Name: ss_notc_sin_dic_88_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_88_code. See ss_notc_sin_dic_88_code for more information.

Column Name: ss_notc_sin_dic_89_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 89'

Column Name: ss_notc_sin_dic_89_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_89_code. See ss_notc_sin_dic_89_code for more information.

Column Name: ss_notc_sin_dic_90_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 90'

Column Name: ss_notc_sin_dic_90_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_90_code. See ss_notc_sin_dic_90_code for more information.

Column Name: ss_notc_sin_dic_91_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 91'

Column Name: ss_notc_sin_dic_91_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_91_code. See ss_notc_sin_dic_91_code for more information.

Column Name: ss_notc_sin_dic_92_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 92'

Column Name: ss_notc_sin_dic_92_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_92_code. See ss_notc_sin_dic_92_code for more information.

Column Name: ss_notc_sin_dic_93_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 93'

Column Name: ss_notc_sin_dic_93_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_93_code. See ss_notc_sin_dic_93_code for more information.

Column Name: ss_notc_sin_dic_94_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 94'

Column Name: ss_notc_sin_dic_94_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_94_code. See ss_notc_sin_dic_94_code for more information.

Column Name: ss_notc_sin_dic_95_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 95'

Column Name: ss_notc_sin_dic_95_value

Column Type: varchar

Max Length: 265

The description associated with ss_notc_sin_dic_95_code. See ss_notc_sin_dic_95_code for more information.

Column Name: ss_notc_sin_dic_96_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 96'

Column Name: ss_notc_sin_dic_96_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_96_code. See ss_notc_sin_dic_96_code for more information.

Column Name: ss_notc_sin_dic_97_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 97'

Column Name: ss_notc_sin_dic_97_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_97_code. See ss_notc_sin_dic_97_code for more information.

Column Name: ss_notc_sin_dic_98_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 98'

Column Name: ss_notc_sin_dic_98_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_98_code. See ss_notc_sin_dic_98_code for more information.

Column Name: ss_notc_sin_dic_99_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 99'

Column Name: ss_notc_sin_dic_99_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_99_code. See ss_notc_sin_dic_99_code for more information.

Column Name: ss_note_mul_dic_100_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 100'

Column Name: ss_note_mul_dic_100_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dic_100_code limited to 255 characters. See ss_note_mul_dic_100_code for more information.

Column Name: ss_note_mul_dic_100_value
Column Type: varchar
Max Length: 32700

The description associated with ss_note_mul_dic_100_code. See ss_note_mul_dic_100_code for more information.

Column Name: ss_note_mul_dic_101_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 101'

Column Name: ss_note_mul_dic_101_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_101_code limited to 255 characters. See ss_note_mul_dic_101_code for more information.

Column Name: ss_note_mul_dic_101_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_101_code. See ss_note_mul_dic_101_code for more information.

Column Name: ss_note_mul_dic_102_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 102'

Column Name: ss_note_mul_dic_102_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_102_code limited to 255 characters. See ss_note_mul_dic_102_code for more information.

Column Name: ss_note_mul_dic_102_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_102_code. See ss_note_mul_dic_102_code for more information.

Column Name: ss_note_mul_dic_103_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 103'

Column Name: ss_note_mul_dic_103_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_103_code limited to 255 characters. See ss_note_mul_dic_103_code for more information.

Column Name: ss_note_mul_dic_103_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_103_code. See ss_note_mul_dic_103_code for more information.

Column Name: ss_note_mul_dic_104_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 104'

Column Name: ss_note_mul_dic_104_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_104_code limited to 255 characters. See ss_note_mul_dic_104_code for more information.

Column Name: ss_note_mul_dic_104_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_104_code. See ss_note_mul_dic_104_code for more information.

Column Name: ss_note_mul_dic_105_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 105'

Column Name: ss_note_mul_dic_105_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_105_code limited to 255 characters. See ss_note_mul_dic_105_code for more information.

Column Name: ss_note_mul_dic_105_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_105_code. See ss_note_mul_dic_105_code for more information.

Column Name: ss_note_mul_dic_106_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 106'

Column Name: ss_note_mul_dic_106_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_106_code limited to 255 characters. See ss_note_mul_dic_106_code for more information.

Column Name: ss_note_mul_dic_106_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_106_code. See ss_note_mul_dic_106_code for more information.

Column Name: ss_note_mul_dic_107_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 107'

Column Name: ss_note_mul_dic_107_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_107_code limited to 255 characters. See ss_note_mul_dic_107_code for more information.

Column Name: ss_note_mul_dic_107_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_107_code. See ss_note_mul_dic_107_code for more information.

Column Name: ss_note_mul_dic_108_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 108'

Column Name: ss_note_mul_dic_108_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_108_code limited to 255 characters. See ss_note_mul_dic_108_code for more information.

Column Name: ss_note_mul_dic_108_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_108_code. See ss_note_mul_dic_108_code for more information.

Column Name: ss_note_mul_dic_109_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 109'

Column Name: ss_note_mul_dic_109_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_109_code limited to 255 characters. See ss_note_mul_dic_109_code for more information.

Column Name: ss_note_mul_dic_109_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_109_code. See ss_note_mul_dic_109_code for more information.

Column Name: ss_note_mul_dic_110_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 110'

Column Name: ss_note_mul_dic_110_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_110_code limited to 255 characters. See ss_note_mul_dic_110_code for more information.

Column Name: ss_note_mul_dic_110_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_110_code. See ss_note_mul_dic_110_code for more information.

Column Name: ss_note_mul_dic_81_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 81'

Column Name: ss_note_mul_dic_81_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_81_code limited to 255 characters. See ss_note_mul_dic_81_code for more information.

Column Name: ss_note_mul_dic_81_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_81_code. See ss_note_mul_dic_81_code for more information.

Column Name: ss_note_mul_dic_82_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 82'

Column Name: ss_note_mul_dic_82_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_82_code limited to 255 characters. See ss_note_mul_dic_82_code for more information.

Column Name: ss_note_mul_dic_82_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_82_code. See ss_note_mul_dic_82_code for more information.

Column Name: ss_note_mul_dic_83_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 83'

Column Name: ss_note_mul_dic_83_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_83_code limited to 255 characters. See ss_note_mul_dic_83_code for more information.

Column Name: ss_note_mul_dic_83_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_83_code. See ss_note_mul_dic_83_code for more information.

Column Name: ss_note_mul_dic_84_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 84'

Column Name: ss_note_mul_dic_84_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_84_code limited to 255 characters. See ss_note_mul_dic_84_code for more information.

Column Name: ss_note_mul_dic_84_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_84_code. See ss_note_mul_dic_84_code for more information.

Column Name: ss_note_mul_dic_85_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 85'

Column Name: ss_note_mul_dic_85_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_85_code limited to 255 characters. See ss_note_mul_dic_85_code for more information.

Column Name: ss_note_mul_dic_85_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_85_code. See ss_note_mul_dic_85_code for more information.

Column Name: ss_note_mul_dic_86_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 86'

Column Name: ss_note_mul_dic_86_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_86_code limited to 255 characters. See ss_note_mul_dic_86_code for more information.

Column Name: ss_note_mul_dic_86_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_86_code. See ss_note_mul_dic_86_code for more information.

Column Name: ss_note_mul_dic_87_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 87'

Column Name: ss_note_mul_dic_87_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_87_code limited to 255 characters. See ss_note_mul_dic_87_code for more information.

Column Name: ss_note_mul_dic_87_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_87_code. See ss_note_mul_dic_87_code for more information.

Column Name: ss_note_mul_dic_88_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 88'

Column Name: ss_note_mul_dic_88_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_88_code limited to 255 characters. See ss_note_mul_dic_88_code for more information.

Column Name: ss_note_mul_dic_88_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_88_code. See ss_note_mul_dic_88_code for more information.

Column Name: ss_note_mul_dic_89_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 89'

Column Name: ss_note_mul_dic_89_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_89_code limited to 255 characters. See ss_note_mul_dic_89_code for more information.

Column Name: ss_note_mul_dic_89_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_89_code. See ss_note_mul_dic_89_code for more information.

Column Name: ss_note_mul_dic_90_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 90'

Column Name: ss_note_mul_dic_90_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_90_code limited to 255 characters. See ss_note_mul_dic_90_code for more information.

Column Name: ss_note_mul_dic_90_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_90_code. See ss_note_mul_dic_90_code for more information.

Column Name: ss_note_mul_dic_91_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 91'

Column Name: ss_note_mul_dic_91_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_91_code limited to 255 characters. See ss_note_mul_dic_91_code for more information.

Column Name: ss_note_mul_dic_91_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_91_code. See ss_note_mul_dic_91_code for more information.

Column Name: ss_note_mul_dic_92_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 92'

Column Name: ss_note_mul_dic_92_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_92_code limited to 255 characters. See ss_note_mul_dic_92_code for more information.

Column Name: ss_note_mul_dic_92_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_92_code. See ss_note_mul_dic_92_code for more information.

Column Name: ss_note_mul_dic_93_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 93'

Column Name: ss_note_mul_dic_93_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_93_code limited to 255 characters. See ss_note_mul_dic_93_code for more information.

Column Name: ss_note_mul_dic_93_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_93_code. See ss_note_mul_dic_93_code for more information.

Column Name: ss_note_mul_dic_94_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 94'

Column Name: ss_note_mul_dic_94_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_94_code limited to 255 characters. See ss_note_mul_dic_94_code for more information.

Column Name: ss_note_mul_dic_94_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_94_code. See ss_note_mul_dic_94_code for more information.

Column Name: ss_note_mul_dic_95_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 95'

Column Name: ss_note_mul_dic_95_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_95_code limited to 255 characters. See ss_note_mul_dic_95_code for more information.

Column Name: ss_note_mul_dic_95_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_95_code. See ss_note_mul_dic_95_code for more information.

Column Name: ss_note_mul_dic_96_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 96'

Column Name: ss_note_mul_dic_96_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_96_code limited to 255 characters. See ss_note_mul_dic_96_code for more information.

Column Name: ss_note_mul_dic_96_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_96_code. See ss_note_mul_dic_96_code for more information.

Column Name: ss_note_mul_dic_97_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 97'

Column Name: ss_note_mul_dic_97_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_97_code limited to 255 characters. See ss_note_mul_dic_97_code for more information.

Column Name: ss_note_mul_dic_97_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_97_code. See ss_note_mul_dic_97_code for more information.

Column Name: ss_note_mul_dic_98_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 98'

Column Name: ss_note_mul_dic_98_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_98_code limited to 255 characters. See ss_note_mul_dic_98_code for more information.

Column Name: ss_note_mul_dic_98_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_98_code. See ss_note_mul_dic_98_code for more information.

Column Name: ss_note_mul_dic_99_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 99'

Column Name: ss_note_mul_dic_99_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_99_code limited to 255 characters. See ss_note_mul_dic_99_code for more information.

Column Name: ss_note_mul_dic_99_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_99_code. See ss_note_mul_dic_99_code for more information.

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 97'

Column Name: ss_note_sin_dic_97_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_97_code. See ss_note_sin_dic_97_code for more information.

Column Name: ss_note_sin_dic_98_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 98'

Column Name: ss_note_sin_dic_98_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_98_code. See ss_note_sin_dic_98_code for more information.

Column Name: ss_note_sin_dic_99_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 99'

Column Name: ss_note_sin_dic_99_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_99_code. See ss_note_sin_dic_99_code for more information.

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form:

Ambulatory_Progress_Notes_(Diagnosis_Entry)

Table Name: SYSTEM.cw_patient_notes_supp_6

Table Description: This table returns the facility location fields stored in the 'Progress Notes (Group and Individual)', 'Inpatient Progress Notes', 'Inpatient Progress Notes (Diagnosis Entry)', 'Ambulatory Progress Notes', and 'Ambulatory Progress Notes (Diagnosis Entry)' forms.

Column Name: ID

Column Type: varchar
Max Length: 254

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the service.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 50
Unique ID for a note.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the service.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the service.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: facloc_address_1
Column Type: varchar
Max Length: 50
'Facility Location Address - Street'

Column Name: facloc_address_2
Column Type: varchar
Max Length: 50
'Facility Location Address - Street 2'

Column Name: facloc_city
Column Type: varchar
Max Length: 50
'Facility Location City'

Column Name: facloc_id_code
Column Type: varchar
Max Length: 50
'Facility Location Code Identifier'

Column Name: facloc_id_code_qual
Column Type: varchar
Max Length: 50
'Facility Location Code Qualifier'

Column Name: facloc_name
Column Type: varchar

Max Length: 50
'Facility Location Name'

Column Name: facloc_state
Column Type: varchar
Max Length: 50
'Facility Location State'

Column Name: facloc_zip_code
Column Type: varchar
Max Length: 50
'Facility Location Zip Code'

Column Name: form_number
Column Type: varchar
Max Length: 50
'Form Number'

Column Name: option_desc
Column Type: varchar
Max Length: 81
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: ss_note_20_char_text_51
Column Type: varchar
Max Length: 20
SS Note 20 Character 51

Column Name: ss_note_20_char_text_52
Column Type: varchar
Max Length: 20
SS Note 20 Character 52

Column Name: ss_note_20_char_text_53

Documentation for form:

Ambulatory_Progress_Notes_(Diagnosis_Entry)

Table Name: SYSTEM.cw_patient_notes_tpnotes

Table Description: This table returns the information stored for the treatment plan grid in progress notes forms.

Column Name: ID
Column Type: integer

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 20
The unique ID associated with the note.

Column Name: tp_notes_id
Column Type: integer
Id column for auditing purposes

Column Name: select_tp_version_code
Column Type: varchar
Max Length: 50
'Select T.P. Version'

Column Name: select_tp_version_value
Column Type: varchar
Max Length: 255
The description associated with select_tp_version_code. See select_tp_version_code for more information.

Column Name: note_add_which_tp_plan_prob
Column Type: varchar

Max Length: 32000

The treatment plan problem to add to the note.

Column Name: notes

Column Type: varchar

Max Length: 32000

Notes for the selected TP item.

Documentation for form: Amputations

Table Name: SYSTEM.amputations

Table Description: This table returns the finding information entered via the 'Amputations' form.

Column Name: ID

Column Type: integer

Column Name: FACILITY

Column Type: integer

'FACILITY'

Column Name: PATID

Column Type: varchar

Max Length: 20

'Patient ID'

Column Name: active_void_status

Column Type: varchar

Max Length: 50

'active_void_status'

Column Name: amputation_site

Column Type: varchar

Max Length: 50

'amputation_site'

Column Name: amputation_site_val

Column Type: varchar

Max Length: 40

value for amputation site

Column Name: client_name

Column Type: varchar

Max Length: 40

client name (2)

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
'data_entry_by'

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
'data_entry_time'

Documentation for form: Medication_Reconciliation_(2011_Edition)

Table Name: SYSTEM.cw_med_reconciliation_med

Table Description: This table returns the information stored in the 'Medication Reconciliation' form.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: LINK_TO_DMR
Column Type: varchar
Max Length: 50
'Link To DMR For Internal Use'

Column Name: MMR_uniqueid
Column Type: varchar
Max Length: 50
DMR Unique ID

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: comments
Column Type: varchar
Max Length: 1000
'Comments'

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the service.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar

Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the service.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the service.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: data_source
Column Type: varchar
Max Length: 255
'Data Source'

Column Name: disposition_code
Column Type: varchar
Max Length: 50
'Disposition'

Column Name: disposition_of_meds_code
Column Type: varchar
Max Length: 50
'Disposition Of Meds Brought In'

Column Name: disposition_of_meds_value

Column Type: varchar

Max Length: 40

The description associated with disposition_of_meds_code. See disposition_of_meds_code for more information.

Column Name: disposition_value

Column Type: varchar

Max Length: 40

The description associated with disposition_code. See disposition_code for more information.

Column Name: indication_for_medication

Column Type: varchar

Max Length: 2000

'Indication For Medication'

Column Name: last_dose_taken_date

Column Type: date

'Date of Last Dose Taken'

Column Name: last_dose_taken_time

Column Type: varchar

Max Length: 50

'Time of Last Dose Taken'

Column Name: medication

Column Type: varchar

Max Length: 1000

'Medication'

Column Name: option_desc

Column Type: varchar

Max Length: 80

The name of the form that last updated the row.

Column Name: option_id

Column Type: varchar

Max Length: 20

The unique ID of the form that last updated the row.

Column Name: reason_not_continue_code

Column Type: varchar

Max Length: 255

'Reason For Not Continuing'

Column Name: reason_not_continue_shval

Column Type: varchar

Max Length: 255

The description associated with reason_not_continue_code limited to 255 characters. See reason_not_continue_code for more information.

Column Name: reason_not_continue_value

Column Type: varchar

Max Length: 4096

The description associated with reason_not_continue_code. See reason_not_continue_code for more information.

Column Name: row_identifier

Column Type: varchar

Max Length: 2000

'Row Identifier'

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Medication_Reconciliation_(2011_Edition)

Table Name: SYSTEM.site_specific_med_rec

Table Description: This table returns site specific data from the 'Medication Reconciliation' form.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: EPISODE_NUMBER

Column Type: integer

The number of the associated episode.

Column Name: FACILITY

Column Type: integer

The system code the client is defined in.

Column Name: LINK_TO_DMR

Column Type: varchar

Max Length: 50

The unique ID of the non-site specific medication reconciliation data this data is associated with.

Column Name: MMR_uniqueid

Column Type: varchar

Max Length: 50

The unique ID of this site specific medication reconciliation record.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the reconciliation.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user name that last updated this row of data.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The user name that last updated this row of data.

Column Name: data_entry_date

Column Type: date

The date this row of data was last updated.

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The name of the form that last saved this row of data.

Column Name: data_entry_time

Column Type: varchar

Max Length: 10

The time this row of data was last updated.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar
Max Length: 40
The user ID that last updated this row of data.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The last user name that updated this row of data.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: option_desc
Column Type: varchar
Max Length: 80
The description of the form that last saved this row of data.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last saved this row of data.

Column Name: ss_dict_1_code
Column Type: varchar
Max Length: 50
The code for 'SS Medication Reconciliation Single Response Dictionary 1'.

Column Name: ss_dict_1_value
Column Type: varchar
Max Length: 40
The description associated with ss_dict_1_code. See ss_dict_1_code for more information.

Column Name: ss_dict_2_code
Column Type: varchar
Max Length: 50
The code for 'SS Medication Reconciliation Single Response Dictionary 2'.

Column Name: ss_dict_2_value
Column Type: varchar
Max Length: 40
The description associated with ss_dict_2_code. See ss_dict_2_code for more information.

Column Name: ss_dict_3_code
Column Type: varchar
Max Length: 50
The code for 'SS Medication Reconciliation Single Response Dictionary 3'.

Column Name: ss_dict_3_value
Column Type: varchar

Max Length: 40

The description associated with ss_dict_3_code. See ss_dict_3_code for more information.

Column Name: ss_dict_4_code

Column Type: varchar

Max Length: 50

The code for 'SS Medication Reconciliation Single Response Dictionary 4'.

Column Name: ss_dict_4_value

Column Type: varchar

Max Length: 40

The description associated with ss_dict_4_code. See ss_dict_4_code for more information.

Column Name: ss_dict_5_code

Column Type: varchar

Max Length: 50

The code for 'SS Medication Reconciliation Single Response Dictionary 5'.

Column Name: ss_dict_5_value

Column Type: varchar

Max Length: 40

The description associated with ss_dict_5_code. See ss_dict_5_code for more information.

Column Name: ss_freetext_40_1

Column Type: varchar

Max Length: 40

'SS Medication Reconciliation Free Text 1'.

Column Name: ss_freetext_40_2

Column Type: varchar

Max Length: 40

'SS Medication Reconciliation Free Text 2'.

Column Name: ss_freetext_40_3

Column Type: varchar

Max Length: 40

'SS Medication Reconciliation Free Text 3'.

Column Name: ss_freetext_40_4

Column Type: varchar

Max Length: 40

'SS Medication Reconciliation Free Text 4'.

Column Name: ss_freetext_40_5

Column Type: varchar

Max Length: 40

'SS Medication Reconciliation Free Text 5'.

Column Name: ss_mult_dict_1_codes_all

Column Type: varchar

Max Length: 255

The code for 'SS Medication Reconciliation Multiple Response Dictionary 1'.

Column Name: ss_mult_dict_1_shval

Column Type: varchar

Max Length: 255

The description associated with ss_mult_dict_1_code limited to 255 characters. See ss_mult_dict_1_code for more information.

Column Name: ss_mult_dict_1_value

Column Type: varchar

Max Length: 4096

The description associated with ss_mult_dict_1_code. See ss_mult_dict_1_code for more information.

Column Name: ss_mult_dict_2_codes_all

Column Type: varchar

Max Length: 255

The code for 'SS Medication Reconciliation Multiple Response Dictionary 2'.

Column Name: ss_mult_dict_2_shval

Column Type: varchar

Max Length: 255

The description associated with ss_mult_dict_2_code limited to 255 characters. See ss_mult_dict_2_code for more information.

Column Name: ss_mult_dict_2_value

Column Type: varchar

Max Length: 4096

The description associated with ss_mult_dict_2_code. See ss_mult_dict_2_code for more information.

Column Name: ss_mult_dict_3_codes_all

Column Type: varchar

Max Length: 255

The code for 'SS Medication Reconciliation Multiple Response Dictionary 3'.

Column Name: ss_mult_dict_3_shval

Column Type: varchar

Max Length: 255

The description associated with ss_mult_dict_3_code limited to 255 characters. See ss_mult_dict_3_code for more information.

Column Name: ss_mult_dict_3_value

Column Type: varchar

Max Length: 4096

The description associated with ss_mult_dict_3_code. See ss_mult_dict_3_code for more information.

Column Name: ss_mult_dict_4_codes_all

Column Type: varchar

Max Length: 255

The code for 'SS Medication Reconciliation Multiple Response Dictionary 4'.

Column Name: ss_mult_dict_4_shval

Column Type: varchar

Max Length: 255

The description associated with ss_mult_dict_4_code limited to 255 characters. See ss_mult_dict_4_code for more information.

Column Name: ss_mult_dict_4_value

Column Type: varchar

Max Length: 4096

The description associated with ss_mult_dict_4_code. See ss_mult_dict_4_code for more information.

Column Name: ss_mult_dict_5_codes_all

Column Type: varchar

Max Length: 255

The code for 'SS Medication Reconciliation Multiple Response Dictionary 5'.

Column Name: ss_mult_dict_5_shval

Column Type: varchar

Max Length: 255

The description associated with ss_mult_dict_5_code limited to 255 characters. See ss_mult_dict_5_code for more information.

Column Name: ss_mult_dict_5_value

Column Type: varchar

Max Length: 4096

The description associated with ss_mult_dict_5_code. See ss_mult_dict_5_code for more information.

Column Name: ss_scrolltext_1

Column Type: varchar

Max Length: 32766

'SS Medication Reconciliation Scrolling Free Text 1'.

Column Name: ss_scrolltext_2

Column Type: varchar

Max Length: 32766

'SS Medication Reconciliation Scrolling Free Text 2'.

Column Name: ss_scrolltext_3

Column Type: varchar

Max Length: 32766

'SS Medication Reconciliation Scrolling Free Text 3'.

Column Name: ss_scrolltext_4

Column Type: varchar

Max Length: 32766

'SS Medication Reconciliation Scrolling Free Text 4'.

Column Name: ss_scrolltext_5

Column Type: varchar

Max Length: 32766

'SS Medication Reconciliation Scrolling Free Text 5'.

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Clinical_Reconciliation

Table Name: SYSTEM.ccd_tempstorage

Table Description: Temporary storage table for imported CCDs

Column Name: ID

Column Type: integer

Column Name: EPISODE_NUMBER

Column Type: integer

The episode number the diagnosis is associated with.

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: JOIN_TO_DOCUMENT_IMAGE

Column Type: varchar

Max Length: 50

The id of the associated image in DocM.DocumentImage table (if provided)

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the data.

Column Name: client_name

Column Type: varchar

Max Length: 50

The name associated with PATID.

Column Name: confidentiality_code

Column Type: varchar

Column Name: confidentiality_code_sys
Column Type: varchar
Max Length: 50

Column Name: confidentiality_disp_name
Column Type: varchar
Max Length: 50

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The last user name to update this row of data.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The last user name to update this row of data.

Column Name: data_entry_date
Column Type: date
The date this row of data was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 15
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 20

The User ID who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 50

data_entry_user_name - The User Name who last updated the row.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: file_name

Column Type: varchar

Max Length: 2000

Column Name: file_name_no_path

Column Type: varchar

Max Length: 2000

The file name without the path.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 15
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar

Max Length: 20
The user ID who last updated the service.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
The user name who last updated the service.

Column Name: display_name
Column Type: varchar
Max Length: 255
Medication name

Column Name: dose_quantity
Column Type: varchar
Max Length: 50
Dose Qty

Column Name: dose_quantity_unit
Column Type: varchar
Max Length: 50
Dose Qty Unit

Column Name: end_date
Column Type: date
'End Date'

Column Name: form_code
Column Type: varchar
Max Length: 50
Form Code

Column Name: form_code_system
Column Type: varchar
Max Length: 50
Form code system

Column Name: form_display_name
Column Type: varchar
Max Length: 50
Form description

Column Name: last_recon_action_code
Column Type: varchar
Max Length: 50
The action was last taken.

Column Name: last_recon_action_value
Column Type: varchar
Max Length: 50

Action description was last taken.

Column Name: last_reconciliation_date
Column Type: date
Last Reconciliation Date Last Reconciliation Date

Column Name: last_reconciliation_id
Column Type: varchar
Max Length: 50
'Last Reconciliation ID' Last Reconciliation ID

Column Name: last_reviewed_date
Column Type: date
Last reviewed date (ccd>author>time)

Column Name: negationInd
Column Type: bit
Presents the no known medication status.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: rate_quantity
Column Type: varchar
Max Length: 50
Rate Qty

Column Name: rate_quantity_unit
Column Type: varchar
Max Length: 50
Rate Qty Unit

Column Name: route_code
Column Type: varchar
Max Length: 50
'Route code'

Column Name: route_code_system
Column Type: varchar
Max Length: 50
Route code system

Column Name: route_display_name
Column Type: varchar
Max Length: 50
Route description

Column Name: start_date

Column Type: date
'Start Date'

Documentation for form: Clinical_Reconciliation

Table Name: SYSTEM.ccd_tempstorage_problem

Table Description: Temporary storage table for imported CCDs (problem data)

Column Name: ID
Column Type: integer

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: JOIN_TO_DETAIL
Column Type: varchar
Max Length: 50
'JOIN TO DETAIL' JOIN_TO_DETAIL

Column Name: code
Column Type: varchar
Max Length: 50
Problem code corresponding to the code system

Column Name: code_system
Column Type: varchar
Max Length: 50
Problem code system

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the service.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_source

Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 15
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 20
The user ID who last updated the service.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
The user name who last updated the service.

Column Name: date_of_onset
Column Type: date
Date of Onset

Column Name: date_of_resolve
Column Type: date
Date of Resolve

Column Name: display_name
Column Type: varchar
Max Length: 50
Problem name

Column Name: last_recon_action_code
Column Type: varchar
Max Length: 50
The action was last taken.

Column Name: last_recon_action_value
Column Type: varchar
Max Length: 50
Action description was last taken.

Column Name: last_reconciliation_date
Column Type: date
Last Reconciliation Date Last Reconciliation Date

Column Name: last_reconciliation_id
Column Type: varchar
Max Length: 50
'Last Reconciliation ID' Last Reconciliation ID

Column Name: last_reviewed_date
Column Type: date
Last reviewed date (ccd>author>time)

Column Name: negationInd
Column Type: bit
Presents the no known problem status.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: status_active_code
Column Type: varchar
Max Length: 50
Active status code of the status code. CWS Dictionary #10038

Column Name: status_active_value
Column Type: varchar
Max Length: 50
Active status description of the status code. CWS Dictionary #10038

Column Name: status_avatar_code
Column Type: varchar
Max Length: 50
Associated Avatar status code of the status.

Column Name: status_avatar_value
Column Type: varchar
Max Length: 50
Associated Avatar status description of the status.

Column Name: status_code
Column Type: varchar
Max Length: 50
'Status'

Column Name: status_code_system
Column Type: varchar
Max Length: 50
Status code system

Column Name: status_display_name
Column Type: varchar
Max Length: 50
Status

Documentation for form: Clinical_Reconciliation

Table Name: SYSTEM.cw_client_clinical_info

Table Description: This table returns information regarding a Client's current clinical information.

Column Name: ID
Column Type: integer

Column Name: FACILITY
Column Type: integer
The system code that generated the data.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: client_name
Column Type: varchar
Max Length: 50
'Client Name'

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the data entry source that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 15

The time the row was last updated.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 20

The user ID who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 50

The user name who last updated the row.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: known_allergies_code

Column Type: varchar

Max Length: 50

This is only set by the CARECONSV.CWS.Allergies.AllergiesServiceV2

Column Name: known_allergies_value

Column Type: varchar

Max Length: 50

The description associated with known_allergies_code See known_allergies_code for more information.

Column Name: known_food_allergies_code

Column Type: varchar

Max Length: 50

Flag to keep the Client's known food allergies status

Column Name: known_food_allergies_value

Column Type: varchar

Max Length: 50

Known Food Allergies value

Column Name: known_med_allergies_code
Column Type: varchar
Max Length: 50
Flag to keep the Client's known medication allergies status

Column Name: known_med_allergies_value
Column Type: varchar
Max Length: 50
The description associated with known_med_allergies_code. See known_med_allergies_code for more information.

Column Name: known_medications_code
Column Type: varchar
Max Length: 50
Flag to keep the Client's known medication status

Column Name: known_medications_value
Column Type: varchar
Max Length: 50
The description associated with known_medications_code. See known_medications_code for more information.

Column Name: known_problems_code
Column Type: varchar
Max Length: 50
Flag to keep the Client's known problem status

Column Name: known_problems_value
Column Type: varchar
Max Length: 50
The description associated with known_problems_code. See known_problems_code for more information.

Column Name: last_reconciliation_id
Column Type: varchar
Max Length: 50
The Clinical Reconciliation Unique ID saved when the row is updated via 'Clinical Reconciliation'.

Column Name: no_known_allergies_code
Column Type: varchar
Max Length: 50
Flag to keep the Client's known allergy status

Column Name: no_known_allergies_value
Column Type: varchar
Max Length: 50
The description associated with no_known_allergies_code. See no_known_allergies_code for more information.

Column Name: option_id
Column Type: varchar

Max Length: 20

The unique ID of the form that last updated the row.

Documentation for form: Clinical_Reconciliation

Table Name: SYSTEM.cw_client_clinical_info_audit

Table Description: This table returns information regarding a Client's historical clinical information.

Column Name: ID

Column Type: integer

Column Name: FACILITY

Column Type: integer

The system code that generated the data.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the data.

Column Name: client_name

Column Type: varchar

Max Length: 50

'Client Name'

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The user name that last updated the row.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 15
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 20
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
The user name who last updated the row.

Column Name: known_med_allergies_code
Column Type: varchar
Max Length: 50
Flag to keep the Client's known medication allergies status

Column Name: known_med_allergies_value
Column Type: varchar
Max Length: 50
The description associated with known_med_allergies_code. See known_med_allergies_code for more information.

Column Name: known_medications_code
Column Type: varchar
Max Length: 50
Flag to keep the Client's known medication status

Column Name: known_medications_value
Column Type: varchar
Max Length: 50
The description associated with known_medications_code. See known_medications_code for more information.

Column Name: known_problems_code
Column Type: varchar
Max Length: 50
Flag to keep the Client's known problem status

Column Name: known_problems_value
Column Type: varchar
Max Length: 50
The description associated with known_problems_code. See known_problems_code for more information.

Column Name: last_reconciliation_id
Column Type: varchar
Max Length: 50
The Clinical Reconciliation Unique ID saved when the row is updated via 'Clinical Reconciliation'.

Column Name: no_known_allergies_code
Column Type: varchar
Max Length: 50
Flag to keep the Client's known allergy status

Column Name: no_known_allergies_value
Column Type: varchar
Max Length: 50
The description associated with no_known_allergies_code. See no_known_allergies_code for more information.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Documentation for form: Clinical_Reconciliation

Table Name: SYSTEM.cw_clinical_reconciliation

Table Description: This table returns data from the 'Clinical Reconciliation' form.

Column Name: ID

Column Type: integer

Column Name: JOIN_TO_TX_HISTORY

Column Type: varchar

Max Length: 40

The unique ID that joins the reconciliation to the visit.

Column Name: EPISODE_NUMBER

Column Type: integer

episode number associated with reconciliation

Column Name: FACILITY

Column Type: integer

The system code that data was generated for.

Column Name: JOIN_TO_DOCUMENT_IMAGE

Column Type: varchar

Max Length: 50

The id of the associated image in DocM.DocumentImage table (if provided)

Column Name: PATID

Column Type: varchar

Max Length: 20

The ID of the client.

Column Name: client_name

Column Type: varchar

Max Length: 50

The name of the client.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The username that last updated the row.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 15

The time the row was last updated.

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 20

The 'User ID' who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 50

The 'User Description' of the 'User ID'.

Column Name: option_id

Column Type: varchar

Max Length: 20

The form that last updated the row.

Column Name: performed_for_id

Column Type: varchar

Max Length: 50

The prescriber ID that the user performed the reconciliation on behalf of

Column Name: performed_for_name

Column Type: varchar

Max Length: 50

The description associated with performed_for_id. See performed_for_id for more information.

Column Name: reason_for_reconc_code

Column Type: varchar

Max Length: 50

The reason for reconciliation code.

Column Name: reason_for_reconc_value

Column Type: varchar

Max Length: 50

The description associated with reason_for_reconc_code. See reason_for_reconc_code for more information.

Column Name: reconciliation_date
Column Type: date
The date of reconciliation.

Column Name: reconciliation_type
Column Type: varchar
Max Length: 50
The type of reconciliation.

Column Name: rec_type_code
Column Type: varchar
Max Length: 50
reconciliation type code (either 'Admission' or 'General')

Column Name: rec_type_value
Column Type: varchar
Max Length: 50
reconciliation type value (either 'Admission' or 'General')

Column Name: transit_of_care_to_assoc
Column Type: integer
Episode Number (Transition of Care Record) to associate with the Medication Reconciliation. This is a requirement for the Medication Reconciliation Measures Reporting.

Documentation for form: Clinical_Reconciliation

Table Name: SYSTEM.cw_clinical_reconciliation_detail

Table Description: This table returns data from the 'Clinical Reconciliation' form.

Column Type: varchar
Max Length: 4096
'Home Medication Note'

Column Name: home_med_note_stream
Column Type: longvarchar
Max Length: 2147483647
Stream to enter home medication note.

Column Name: inactivated_list_item
Column Type: varchar
Max Length: 50
'Inactivated List Item'

Column Name: indication_for_medication
Column Type: varchar
Max Length: 2000
'Indication For Medication'

Column Name: indication_for_use

Column Type: varchar

Max Length: 50

'Indication for Use'

Column Name: item_with_clientfam_code

Column Type: varchar

Max Length: 50

'Item with Client/Family at Time of Admission code'

Column Name: item_with_clientfam_value

Column Type: varchar

Max Length: 50

The description of the associated item_with_clientfam_code See item_with_clientfam_code for more information.

Column Name: last_dose_verified_code

Column Type: varchar

Max Length: 50

Details if the last medication dose was verified code.

Column Name: last_dose_verified_value

Column Type: varchar

Max Length: 50

The description of the associated last_dose_verified_code See last_dose_verified_code for more information.

Column Name: last_reconciliation_id

Column Type: varchar

Max Length: 50

'Last Reconciliation ID'

Column Name: medication_comp_code

Column Type: varchar

Max Length: 50

'Medication Compliance code'. Details how the client is taking their medication.

Column Name: medication_comp_value

Column Type: varchar

Max Length: 50

The description of the associated medication_comp_code See medication_comp_code for more information.

Column Name: name_of_unlisted_med

Column Type: varchar

Max Length: 255

The name of an unlisted medication.

Column Name: option_desc

Column Type: varchar
Max Length: 50
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 50
The unique ID of the form that last updated the row.

Column Name: order_code
Column Type: varchar
Max Length: 50
'Order code'

Column Name: orderconnect_rx_id
Column Type: integer
'OrderConnect RX Id'

Column Name: order_description
Column Type: varchar
Max Length: 100
The description of the associated order_code. See order_code for more information.

Column Name: quantity_brought_to
Column Type: varchar
Max Length: 50
'Quantity Brought To Facility'

Column Name: route_of_admin_code
Column Type: varchar
Max Length: 50
'Route of Administration'

Column Name: route_of_admin_value
Column Type: varchar
Max Length: 50
The description of the associated route_of_admin_code See route_of_admin_code for more information.

Column Name: schedule
Column Type: varchar
Max Length: 512
'Schedule'

Column Name: source_code
Column Type: varchar
Max Length: 50
'Source code'. Will be (1) for "Client/Family/Caregiver" or (2) for "Agency".

Column Name: source_value
Column Type: varchar

Max Length: 50

The description associated with source_code. See source_code for more information.

Column Name: time_of_last_dose

Column Type: varchar

Max Length: 50

'Time of Last Dose'

Column Name: units

Column Type: varchar

Max Length: 50

'Units'

Documentation for form: NEW_Clinical_Reconciliation

Table Name: SYSTEM.cw_clinical_reconciliation

Table Description: This table returns data from the 'Clinical Reconciliation' form.

Column Name: ID

Column Type: integer

Column Name: JOIN_TO_TX_HISTORY

Column Type: varchar

Max Length: 40

The unique ID that joins the reconciliation to the visit.

Column Name: EPISODE_NUMBER

Column Type: integer

episode number associated with reconciliation

Column Name: FACILITY

Column Type: integer

The system code that data was generated for.

Column Name: JOIN_TO_DOCUMENT_IMAGE

Column Type: varchar

Max Length: 50

The id of the associated image in DocM.DocumentImage table (if provided)

Column Name: PATID

Column Type: varchar

Max Length: 20

The ID of the client.

Column Name: client_name

Column Type: varchar

Max Length: 50
The name of the client.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The username that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 15
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 20
The 'User ID' who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
The 'User Description' of the 'User ID'.

Column Name: option_id
Column Type: varchar
Max Length: 20
The form that last updated the row.

Column Name: performed_for_id
Column Type: varchar
Max Length: 50
The prescriber ID that the user performed the reconciliation on behalf of

Column Name: performed_for_name
Column Type: varchar
Max Length: 50

The description associated with performed_for_id. See performed_for_id for more information.

Column Name: reason_for_reconc_code

Column Type: varchar

Max Length: 50

The reason for reconciliation code.

Column Name: reason_for_reconc_value

Column Type: varchar

Max Length: 50

The description associated with reason_for_reconc_code. See reason_for_reconc_code for more information.

Column Name: reconciliation_date

Column Type: date

The date of reconciliation.

Column Name: reconciliation_type

Column Type: varchar

Max Length: 50

The type of reconciliation.

Column Name: rec_type_code

Column Type: varchar

Max Length: 50

reconciliation type code (either 'Admission' or 'General')

Column Name: rec_type_value

Column Type: varchar

Max Length: 50

reconciliation type value (either 'Admission' or 'General')

Column Name: transit_of_care_to_assoc

Column Type: integer

Episode Number (Transition of Care Record) to associate with the Medication Reconciliation. This is a requirement for the Medication Reconciliation Measures Reporting.

Documentation for form: Assessment_Problem_Planning

Table Name: SYSTEM.cw_assess_prob_plan_detail

Table Description: This table returns the detail information entered via the 'Assessment Problem Planning' form.

Column Name: AssessmentParent

Column Type: integer

parent assessment record

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The 'User Description' of the user which last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 15
The time the row was last updated.

Column Name: FACILITY
Column Type: integer
The system code in which the vitals were entered.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID for which the vitals were entered.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The 'User Description' of the user which last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The 'User ID' of the user which last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The 'User Description' of the user which last updated the row.

Column Name: date_of_onset
Column Type: date
The 'Date Of Onset'

Column Name: link_to_problem
Column Type: varchar
Max Length: 40
Problem Historic

Column Name: plan
Column Type: varchar
Max Length: 32000
The 'Plan'

Column Name: problem_code
Column Type: varchar
Max Length: 40
'Problem'

Column Name: problem_description
Column Type: varchar
Max Length: 200
The description for the 'Problem' code

Column Name: problem_number
Column Type: varchar
Max Length: 40
The 'Problem Order Number'

Column Name: status_code
Column Type: varchar
Max Length: 40
The 'Status Code'

Column Name: status_value
Column Type: varchar
Max Length: 40
Value for the 'Status Code'

Column Name: unique_problem_code
Column Type: varchar
Max Length: 50
'Unique Problem Search Code'

Column Name: unique_problem_description
Column Type: varchar
Max Length: 200
The description for the 'Unique Problem Search Code' code

Column Name: childsub
Column Type: integer

Documentation for form: Assessment_Problem_Planning

Table Name: SYSTEM.cw_assess_prob_plan_hdr

Table Description: This table returns the header information entered via the 'Assessment Problem Planning' form.

Column Name: ID
Column Type: integer

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The 'User Description' of the user which last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 15
The time the row was last updated.

Column Name: FACILITY
Column Type: integer
The system code in which the vitals were entered.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID for which the vitals were entered.

Column Name: assessment_date
Column Type: date
Assessment Date

Column Name: assessment_unique_id
Column Type: varchar
Max Length: 80
The 'Assessment Unique ID'

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The 'User Description' of the user which last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_source
Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The 'User ID' of the user which last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The 'User Description' of the user which last updated the row.

Documentation for form: Child_and_Adolescent_Needs_and_Strengths

Table Name: SYSTEM.cw_cans_assessment

Table Description: This table contains the data filed in the 'Child and Adolescent Needs and Strengths' Assessment form

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: FACILITY

Column Type: integer

The facility of the service.

Column Name: EPISODE_NUMBER

Column Type: integer

The client episode of the service.

Column Name: PATID

Column Type: varchar

Max Length: 20

The Avatar client ID associated with the assessment.

Column Name: adjustment_to_trauma

Column Type: integer

Child Behavioral Emotional Needs '9. Adjustment To Trauma'

Column Name: anger_control

Column Type: integer

Child Behavioral Emotional Needs '7. Anger Control'

Column Name: anxiety

Column Type: integer

Child Behavioral Emotional Needs '4. Anxiety'

Column Name: assessor

Column Type: varchar

Max Length: 50

The practitioner ID associated with the assessment.

Column Name: cans_unique_id

Column Type: varchar

Max Length: 50

An ID unique to a client and facility to identify a row of data.

Column Name: caregiver_1

Column Type: varchar

Max Length: 50

'Caregiver 1'

Column Name: caregiver_2

Column Type: varchar

Max Length: 50

'Caregiver 2'

Column Name: caregiver_3

Column Type: varchar

Max Length: 50

'Caregiver 3'

Column Name: caregiver_a_name

Column Type: varchar

Max Length: 50

'Caregiver Name'

Column Name: case_name

Column Type: varchar

Max Length: 50

'Case Name'

Column Name: case_number

Column Type: varchar

Max Length: 50

'Case Number'

Column Name: cga_developmental

Column Type: integer

Caregiver Resources and Needs '49a. Developmental'

Column Name: cga_involvement_with_care

Column Type: integer

Caregiver Resources and Needs '42a. Involvement with Care'

Column Name: cga_knowledge
Column Type: integer
Caregiver Resources and Needs '43a. Knowledge'

Column Name: cga_medical_physical
Column Type: integer
Caregiver Resources and Needs '46a. Medical Physical'

Column Name: cga_mental_health
Column Type: integer
Caregiver Resources and Needs '47a. Mental Health'

Column Name: cga_residential_stability
Column Type: integer
Caregiver Resources and Needs '45a. Residential Stability'

Column Name: cga_safety
Column Type: integer
Caregiver Resources and Needs '50a. Safety'

Column Name: cga_social_resources
Column Type: integer
Caregiver Resources and Needs '44a. Social Resources'

Column Name: cga_substance_use
Column Type: integer
Caregiver Resources and Needs '48a. Substance Use'

Column Name: cga_supervision
Column Type: integer
Caregiver Resources and Needs '41a. Supervision'

Column Name: community_life
Column Type: integer
Strengths Domain '38. Community Life'

Column Name: conduct
Column Type: integer
Child Behavioral Emotional Needs '6. Conduct'

Column Name: cultural_identity
Column Type: integer
Strengths Domain '37. Cultural Identity'

Column Name: cultural_stress
Column Type: integer
Cultural Factors '31. Cultural Stress'

Column Name: danger_to_others
Column Type: integer

Risk Behaviors '24. Danger to Others'

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user name that last updated this data row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 50

The user name that last updated this data row.

Column Name: data_entry_date

Column Type: date

The date when this data row was last updated.

Column Name: data_entry_offset

Column Type: numeric

The offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 50

The time when this data row was last updated.

Column Name: data_entry_time_j

Column Type: time

The time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

The time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

The short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 50

The user id that last updated this data row.

Column Name: data_entry_user_name

Column Type: varchar
Max Length: 50
The user name who last updated the service.

Column Name: data_entry_utc
Column Type: timestamp
The UTC date and time the data was saved.

Column Name: date_of_assessment
Column Type: date
'Date of Assessment'

Column Name: decision_making
Column Type: integer
Life Domain Functioning '14. Decision Making'

Column Name: delinquent_behavior
Column Type: integer
Risk Behaviors '26. Delinquent Behavior'

Column Name: depression
Column Type: integer
Child Behavioral Emotional Needs '3. Depression'

Column Name: dev_intellectual
Column Type: integer
Life Domain Functioning '13. Dev Intellectual'

Column Name: document_routing_status
Column Type: varchar
Max Length: 50
Status of the document

Column Name: draft_final_code
Column Type: varchar
Max Length: 50
'Draft/Final'

Column Name: draft_final_value
Column Type: varchar
Max Length: 50
Description associated with the code in 'draft_final_code'.

Column Name: educational_setting
Column Type: integer
Strengths Domain '34. Educational Setting'

Column Name: family_functioning
Column Type: integer
Life Domain Functioning '10. Family Functioning'

Column Name: family_strengths
Column Type: integer
Strengths Domain '32. Family Strengths'

Column Name: form_status_code
Column Type: varchar
Max Length: 50
'Form Status'

Column Name: form_status_value
Column Type: varchar
Max Length: 50
Description associated with the code in 'form_status_code'.

Column Name: impulsivity_hyperactivity
Column Type: integer
Child Behavioral Emotional Needs '2. Impulsivity Hyperactivity'

Column Name: intentional_misbehavior
Column Type: integer
Risk Behaviors '28. Intentional Misbehavior'

Column Name: interpersonal
Column Type: integer
Strengths Domain '33. Interpersonal'

Column Name: lang
Column Type: integer
Cultural Factors '29. Language'

Column Name: living_situation
Column Type: integer
Life Domain Functioning '11. Living Situation'

Column Name: medical_physical
Column Type: integer
Life Domain Functioning '18. Medical Physical'

Column Name: natural_supports
Column Type: integer
Strengths Domain '39. Natural Supports'

Column Name: no_known_caregiver_code
Column Type: varchar
Max Length: 50
'Youth has no known caregiver. Skip Caregiver Resources and Needs Domain.'

Column Name: no_known_caregiver_value
Column Type: varchar

Max Length: 50
Description associated with code in 'no_known_caregiver_code'

Column Name: non_sucid_self_injs_behav
Column Type: integer
Risk Behaviors '22. Non-Suicidal Self-Injurious Behavior'

Column Name: oppositional
Column Type: integer
Child Behavioral Emotional Needs '5. Oppositional'

Column Name: other_self_harm_recklsns
Column Type: integer
Risk Behaviors '23. Other Self-Harm (Recklessness)'

Column Name: psych_thought_disorder
Column Type: integer
Child Behavioral Emotional Needs '1. Psychosis (Thought Disorder)'

Column Name: resiliency
Column Type: integer
Strengths Domain '40. Resiliency'

Column Name: runaway
Column Type: integer
Risk Behaviors '27. Runaway'

Column Name: school_achievement
Column Type: integer
Life Domain Functioning '16. School Achievement'

Column Name: school_attendance
Column Type: integer
Life Domain Functioning '17. School Attendance'

Column Name: school_behavior
Column Type: integer
Life Domain Functioning '15. School Behavior'

Column Name: sexual_aggression
Column Type: integer
Risk Behaviors '25. Sexual Aggression'

Column Name: sexual_development
Column Type: integer
Life Domain Functioning '19. Sexual Development'

Column Name: sleep
Column Type: integer
Life Domain Functioning '20. Sleep'

Column Name: social_functioning
Column Type: integer
Life Domain Functioning '12. Social Functioning'

Column Name: spiritual_religious
Column Type: integer
Strengths Domain '36. Spiritual Religious'

Column Name: ss_cans_date1

'SS CANS Assessment Time 4'

Column Name: ss_cans_time5

Column Type: varchar
Max Length: 50
'SS CANS Assessment Time 5'

Column Name: status_flag
Column Type: varchar
Max Length: 50
Status of the compile process for particular row of data

Column Name: status_flag_value
Column Type: varchar
Max Length: 50
Description associated with 'status_flag'. See 'status_flag' form more information.

Column Name: substance_use
Column Type: integer
Child Behavioral Emotional Needs '8. Substance Use'

Column Name: suicide_risk
Column Type: integer
Risk Behaviors '21. Suicide Risk'

Column Name: talents_interests
Column Type: integer
Strengths Domain '35. Talents Interests'

Column Name: total_cben_score
Column Type: integer
'Total Child Behavioral/Emotional Needs Score'

Column Name: total_cf_score
Column Type: integer
'Total Cultural Factors Score'

Column Name: total_crn_score
Column Type: integer

Column Type: integer
'Total Strengths Domain Score'

Column Name: traditions_and_rituals
Column Type: integer
Cultural Factors '30. Traditions and Rituals'

Column Name: user_row_access_code
Column Type: integer
If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: CWSTEMP.cw_patient_notes

Table Description: This table is used as a pre-filing storage of the SYSTEM.cwpatientnotes table.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 20
The unique ID associated with the note.

Column Name: notes_field
Column Type: varchar
Max Length: 32700
The written note information.

Column Name: note_type_code
Column Type: varchar
Max Length: 50
'Note Type'

Column Name: note_type_value
Column Type: varchar
Max Length: 40

The description associated with note_type_code. See note_type_code for more information.

Column Name: note_time

Column Type: varchar

Max Length: 25

'Note Time'

Column Name: EPISODE_NUMBER

Column Type: integer

The episode number associated with PATID.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The user name that last updated the row.

Column Name: New_Existing_Service_code

Column Type: varchar

Max Length: 5

'Progress Note For'

Column Name: New_Existing_Service_value

Column Type: varchar

Max Length: 40

The description associated with New_Existing_Service_code. See New_Existing_Service_code for more information.

Column Name: service_program_value

Column Type: varchar

Max Length: 40

The description associated with service_program_code. See service_program_code for more information.

Column Name: note_addresses

Column Type: varchar

Max Length: 40

'Note Addresses Which Existing Service/Appointment'

Column Name: note_add_which_tp_plan_prob

Column Type: varchar

Max Length: 32700

The treatment plan problem to add to the note.

Column Name: Tx_Note_UniqueId
Column Type: varchar
Max Length: 40
The unique ID associated with the treatment.

Column Name: service_charge_value
Column Type: varchar
Max Length: 40
The description associated with service_charge_code. See service_charge_code for more information.

Column Name: GROUP_ID
Column Type: varchar
Max Length: 10
'Group Name Or Number'

Column Name: JOIN_TO_TX_HISTORY
Column Type: varchar
Max Length: 40
The unique ID that joins the note to the service.

Column Name: Option_Desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: Option_Id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: PREFILEID
Column Type: varchar
Max Length: 50
The unique ID associated with the prefiller.

Column Name: TODO_ID
Column Type: varchar
Max Length: 20
'To Do Id'

Column Name: add_on_notes
Column Type: varchar
Max Length: 32768
The add-on notes.

Column Name: add_svc_info_code
Column Type: varchar
Max Length: 40
The additional service information.

Column Name: add_svc_info_shval

Column Type: varchar

Max Length: 255

The description associated with add_svc_info_code limited to 255 characters. See add_svc_info_code for more information.

Column Name: add_svc_info_value

Column Type: varchar

Max Length: 4096

The description associated with add_svc_info_code. See add_svc_info_code for more information.

Column Name: aps_link

Column Type: varchar

Max Length: 40

'Note Addresses Which Existing Appointment'

Column Name: billing_status_code

Column Type: varchar

Max Length: 50

'Service Status'

Column Name: billing_status_value

Column Type: varchar

Max Length: 50

The description associated with billing_status_code. See billing_status_code for more information.

Column Name: calpm_ebpss_csi_code

Column Type: varchar

Max Length: 50

'Evidence-Based Practices / Service Strategies (CSI)'

Column Name: calpm_ebpss_csi_value

Column Type: varchar

Max Length: 200

The description associated with calpm_ebpss_csi_code. See calpm_ebpss_csi_code for more information.

Column Name: calpm_ebpss_csi_value_long

Column Type: varchar

Max Length: 4096

The description associated with calpm_ebpss_csi_value_code. See calpm_ebpss_csi_value_code for more information.

Column Name: client_prob_list_codes

Column Type: varchar

Max Length: 50

The codes associated with the client problem list.

Column Name: client_prob_list_shvals

Column Type: varchar

Max Length: 255

The description associated with client_prob_list_code limited to 255 characters. See client_prob_list_code for more information.

Column Name: client_prob_list_vals

Column Type: varchar

Max Length: 32700

The description associated with client_prob_list_code. See client_prob_list_code for more information.

Column Name: clinical_instructions

Column Type: varchar

Max Length: 32700

'Clinical Instructions'

Column Name: clinical_quality_code

Column Type: varchar

Max Length: 255

'Clinical Quality Indicators'

Column Name: clinical_quality_sh_val

Column Type: varchar

Max Length: 255

'The description associated with clinical_quality_code. See clinical_quality_code for more information.'

Column Name: clinical_quality_value

Column Type: varchar

Max Length: 4096

'The description associated with clinical_quality_code. See clinical_quality_code for more information.'

Column Name: confidential_note

Column Type: varchar

Max Length: 50

The confidential note.

Column Name: co_pract_duration

Column Type: numeric

The first co-practitioner duration.

Column Name: co_pract2_duration

Column Type: numeric

The second co-practitioner duration.

Column Name: co_practitioner_id

Column Type: varchar

Max Length: 15

The first co-practitioner ID.

Column Name: co_practitioner_id_2

Column Type: varchar

Max Length: 15

The second co-practitioner ID.

Column Name: co_practitioner_name

Column Type: varchar

Max Length: 40

The name associated with co_practitioner_id.

Column Name: co_practitioner_name_2

Column Type: varchar

Max Length: 40

The name associated with co_practitioner_id_2.

Column Name: co_sign_to_do_user

Column Type: varchar

Max Length: 50

'User To Send Co-Sign To Do Item To'

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar

Max Length: 40

The name of the form that last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 10

The time the row was last updated.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: date_of_group_service
Column Type: date
The date of the group service.

Column Name: date_of_note
Column Type: date
The date of the note.

Column Name: date_of_service
Column Type: date
The date of the service.

Column Name: discipline_code
Column Type: varchar
Max Length: 40
'Discipline'

Column Name: discipline_value
Column Type: varchar
Max Length: 40
The description associated with discipline_code. See discipline_code for more information.

Column Name: draft_final_code
Column Type: varchar
Max Length: 5
'Draft/Final'

Column Name: draft_final_value
Column Type: varchar
Max Length: 40
The description associated with draft_final_code. See draft_final_code for more information.

Column Name: ebps_code
Column Type: varchar
Max Length: 255
'Evidence Based Practices'

Column Name: ebps_sh_val
Column Type: varchar
Max Length: 255
'The description associated with ebps_code. See ebps_code for more information.'

Column Name: ebps_value

Column Type: varchar

Max Length: 4096

'The description associated with ebps_code. See ebps_code for more information.'

Column Name: external_system_id

Column Type: varchar

Max Length: 255

'External System Identifier'

Column Name: has_nonmed_diag_flg_code

Column Type: varchar

Max Length: 50

The non-medical diagnosis flag.

Column Name: has_nonmed_diag_flg_value

Column Type: varchar

Max Length: 50

The description associated with has_nonmed_diag_flg_code. See has_nonmed_diag_flg_code for more information.

Column Name: jointodiagnosisobject1

Column Type: varchar

Max Length: 40

'Diagnosis 1'

Column Name: jointodiagnosisobject2

Column Type: varchar

Max Length: 40

'Diagnosis 2'

Column Name: jointodiagnosisobject3

Column Type: varchar

Max Length: 40

'Diagnosis 3'

Column Name: jointodiagnosisobject4

Column Type: varchar

Max Length: 40

'Diagnosis 4'

Column Name: location_code

Column Type: varchar

Max Length: 15

The location of the service.

Column Name: location_value

Column Type: varchar

Max Length: 40

The description associated with location_code. See location_code for more information.

Column Name: medical_diag1_DSM_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag1_DSM_code. See medical_diag1_DSM_code for more information.

Column Name: medical_diag_1_icd10_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 1 ICD 10'

Column Name: medical_diag_1_icd10_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_1_icd10_code. See medical_diag_1_icd10_code for more information.

Column Name: medical_diag_1_icd9_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 1 ICD 9'

Column Name: medical_diag_1_icd9_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_1_icd9_code. See medical_diag_1_icd9_code for more information.

Column Name: medical_diag_1_imo_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_1_imo_code. See medical_diag_1_imo_code for more information.

Column Name: medical_diag2_DSM_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag2_DSM_code. See medical_diag2_DSM_code for more information.

Column Name: medical_diag_2_icd10_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 2 ICD 10'

Column Name: medical_diag_2_icd10_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_2_icd10_code. See medical_diag_2_icd10_code for more information.

Column Name: medical_diag_2_icd9_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 2 ICD 9'

Column Name: medical_diag_2_icd9_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_2_icd9_code. See medical_diag_2_icd9_code for more information.

Column Name: medical_diag_2_imo_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_2_imo_code. See medical_diag_2_imo_code for more information.

Column Name: medical_diag_3_icd10_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 3 ICD 10'

Column Name: medical_diag_3_icd10_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_3_icd10_code. See medical_diag_3_icd10_code for more information.

Column Name: medical_diag_3_icd9_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 3 ICD 9'

Column Name: medical_diag_3_icd9_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_3_icd9_code. See medical_diag_3_icd9_code for more information.

Column Name: medical_diag_3_imo_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_3_imo_code. See medical_diag_3_imo_code for more information.

Column Name: medical_diag_4_icd10_code

Column Type: varchar

Max Length: 40
'Medical Diagnosis 4 ICD 10'

Column Name: medical_diag_4_icd10_value
Column Type: varchar
Max Length: 40
The description associated with medical_diag_4_icd10_code. See medical_diag_4_icd10_code for more information.

Column Name: medical_diag_4_icd9_code
Column Type: varchar
Max Length: 40
'Medical Diagnosis 4 ICD 9'

Column Name: medical_diag_4_icd9_value
Column Type: varchar
Max Length: 40
The description associated with medical_diag_4_icd9_code. See medical_diag_4_icd9_code for more information.

Column Name: medical_diag_4_imo_value
Column Type: varchar
Max Length: 40
The description associated with medical_diag_4_imo_code. See medical_diag_4_imo_code for more information.

Column Name: medical_diagnosis_1_code
Column Type: varchar
Max Length: 40
'Medical Diagnosis 1'

Column Name: medical_diagnosis_1_value
Column Type: varchar
Max Length: 32700
The description associated with medical_diagnosis_1_code. See medical_diagnosis_1_code for more information.

Column Name: medical_diagnosis_2_code
Column Type: varchar
Max Length: 40
'Medical Diagnosis 2'

Column Name: medical_diagnosis_2_value
Column Type: varchar
Max Length: 32700
The description associated with medical_diagnosis_2_code. See medical_diagnosis_2_code for more information.

Column Name: medical_diagnosis_3_code
Column Type: varchar

Max Length: 50
'Medical Diagnosis 3'

Column Name: medical_diagnosis_3_value
Column Type: varchar
Max Length: 32700
The description associated with medical_diagnosis_3_code. See medical_diagnosis_3_code for more information.

Column Name: medical_diagnosis_4_code
Column Type: varchar
Max Length: 50
'Medical Diagnosis 4'

Column Name: medical_diagnosis_4_value
Column Type: varchar
Max Length: 32700
The description associated with medical_diagnosis_4_code. See medical_diagnosis_4_code for more information.

Column Name: notes_entry_index_nu
Column Type: varchar
Max Length: 50
The notes entry index.

Column Name: number_clients_in_group
Column Type: integer
'Number Of Clients In Group'

Column Name: orig_note_uniq_id_num
Column Type: varchar
Max Length: 20
'Original Note Unique ID Number'

Column Name: practitioner_id
Column Type: varchar
Max Length: 15
The practitioner associated with the note.

Column Name: practitioner_name
Column Type: varchar
Max Length: 40
The name associated with practitioner_id.

Column Name: psycho_add_on_duration
Column Type: integer
The psychotherapy add-on duration.

Column Name: reason_for_visit_code
Column Type: varchar

Max Length: 50
'Reason for Visit'

Column Name: reason_for_visit_value
Column Type: varchar
Max Length: 250
The description associated with reason_for_visit_code. See reason_for_visit_code for more information.

Column Name: recommended_decision
Column Type: varchar
Max Length: 32700
'Recommended Decision'

Column Name: select_tp_version_code
Column Type: varchar
Max Length: 5
'Select T.P. Version'

Column Name: select_tp_version_value
Column Type: varchar
Max Length: 40
The description associated with select_tp_version_code. See select_tp_version_code for more information.

Column Name: service_charge_code
Column Type: varchar
Max Length: 40
The service charge code.

Column Name: service_duration
Column Type: varchar
Max Length: 5
The duration of the service.

Column Name: service_end_time
Column Type: varchar
Max Length: 10
The end time of the service.

Column Name: service_program_code
Column Type: varchar
Max Length: 15
The program of the service.

Column Name: service_start_time
Column Type: varchar
Max Length: 10
The start time of the service.

Column Name: session_start_end_times
Column Type: varchar

Max Length: 32766

'Start/End Time(s)'

Column Name: ss_note_20_char_text_1

Column Type: varchar

Max Length: 20

'SS Note 20 Character 1'

Column Name: ss_note_20_char_text_10

Column Type: varchar

Max Length: 20

'SS Note 20 Character 10'

Column Name: ss_note_20_char_text_2

Column Type: varchar

Max Length: 20

'SS Note 20 Character 2'

Column Name: ss_note_20_char_text_3

Column Type: varchar

Max Length: 20

'SS Note 20 Character 3'

Column Name: ss_note_20_char_text_4

Column Type: varchar

Max Length: 20

'SS Note 20 Character 4'

Column Name: ss_note_20_char_text_5

Column Type: varchar

Max Length: 20

'SS Note 20 Character 5'

Column Name: ss_note_20_char_text_6

Column Type: varchar

Max Length: 20

'SS Note 20 Character 6'

Column Name: ss_note_20_char_text_7

Column Type: varchar

Max Length: 20

'SS Note 20 Character 7'

Column Name: ss_note_20_char_text_8

Column Type: varchar

Max Length: 20

'SS Note 20 Character 8'

Column Name: ss_note_20_char_text_9

Column Type: varchar

Max Length: 20
'SS Note 20 Character 9'

Column Name: ss_note_40_char_text_1
Column Type: varchar
Max Length: 40
'SS Note 40 Character 1'

Column Name: ss_note_40_char_text_10
Column Type: varchar
Max Length: 40
'SS Note 40 Character 10'

Column Name: ss_note_40_char_text_2
Column Type: varchar
Max Length: 40
'SS Note 40 Character 2'

Column Name: ss_note_40_char_text_3
Column Type: varchar
Max Length: 40
'SS Note 40 Character 3'

Column Name: ss_note_40_char_text_4
Column Type: varchar
Max Length: 40
'SS Note 40 Character 4'

Column Name: ss_note_40_char_text_5
Column Type: varchar
Max Length: 40
'SS Note 40 Character 5'

Column Name: ss_note_40_char_text_6
Column Type: varchar
Max Length: 40
'SS Note 40 Character 6'

Column Name: ss_note_40_char_text_7
Column Type: varchar
Max Length: 40
'SS Note 40 Character 7'

Column Name: ss_note_40_char_text_8
Column Type: varchar
Max Length: 40
'SS Note 40 Character 8'

Column Name: ss_note_40_char_text_9
Column Type: varchar

Max Length: 40
'SS Note 40 Character 9'

Column Name: ss_note_80_char_text_1
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 1'

Column Name: ss_note_80_char_text_10
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 10'

Column Name: ss_note_80_char_text_2
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 2'

Column Name: ss_note_80_char_text_3
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 3'

Column Name: ss_note_80_char_text_4
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 4'

Column Name: ss_note_80_char_text_5
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 5'

Column Name: ss_note_80_char_text_6
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 6'

Column Name: ss_note_80_char_text_7
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 7'

Column Name: ss_note_80_char_text_8
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 8'

Column Name: ss_note_80_char_text_9
Column Type: varchar

Max Length: 80
'SS Note 80 Character Text 9'

Column Name: ss_note_date_1
Column Type: date
'SS Note Date 1'

Column Name: ss_note_date_10
Column Type: date
'SS Note Date 10'

Column Name: ss_note_date_2
Column Type: date
'SS Note Date 2'

Column Name: ss_note_date_3
Column Type: date
'SS Note Date 3'

Column Name: ss_note_date_4
Column Type: date
'SS Note Date 4'

Column Name: ss_note_date_5
Column Type: date
'SS Note Date 5'

Column Name: ss_note_date_6
Column Type: date
'SS Note Date 6'

Column Name: ss_note_date_7
Column Type: date
'SS Note Date 7'

Column Name: ss_note_date_8
Column Type: date
'SS Note Date 8'

Column Name: ss_note_date_9
Column Type: date
'SS Note Date 9'

Column Name: ss_note_dsm_diag_10_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 10'

Column Name: ss_note_dsm_diag_10_value
Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_10_code. See ss_note_dsm_diag_10_code for more information.

Column Name: ss_note_dsm_diag_1_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 1'

Column Name: ss_note_dsm_diag_1_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_1_code. See ss_note_dsm_diag_1_code for more information.

Column Name: ss_note_dsm_diag_2_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 2'

Column Name: ss_note_dsm_diag_2_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_2_code. See ss_note_dsm_diag_2_code for more information.

Column Name: ss_note_dsm_diag_3_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 3'

Column Name: ss_note_dsm_diag_3_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_3_code. See ss_note_dsm_diag_3_code for more information.

Column Name: ss_note_dsm_diag_4_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 4'

Column Name: ss_note_dsm_diag_4_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_4_code. See ss_note_dsm_diag_4_code for more information.

Column Name: ss_note_dsm_diag_5_code

Column Type: varchar

Max Length: 20
'SS Note DSM IV Diagnosis 5'

Column Name: ss_note_dsm_diag_5_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_5_code. See ss_note_dsm_diag_5_code for more information.

Column Name: ss_note_dsm_diag_6_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 6'

Column Name: ss_note_dsm_diag_6_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_6_code. See ss_note_dsm_diag_6_code for more information.

Column Name: ss_note_dsm_diag_7_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 7'

Column Name: ss_note_dsm_diag_7_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_7_code. See ss_note_dsm_diag_7_code for more information.

Column Name: ss_note_dsm_diag_8_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 8'

Column Name: ss_note_dsm_diag_8_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_8_code. See ss_note_dsm_diag_8_code for more information.

Column Name: ss_note_dsm_diag_9_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 9'

Column Name: ss_note_dsm_diag_9_value
Column Type: varchar
Max Length: 250

The description associated with `ss_note_dsm_diag_9_code`. See `ss_note_dsm_diag_9_code` for more information.

Column Name: `ss_note_icd9_diag_10_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 10'

Column Name: `ss_note_icd9_diag_10_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_10_code`. See `ss_note_icd9_diag_10_code` for more information.

Column Name: `ss_note_icd9_diag_1_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 1'

Column Name: `ss_note_icd9_diag_1_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_1_code`. See `ss_note_icd9_diag_1_code` for more information.

Column Name: `ss_note_icd9_diag_2_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 2'

Column Name: `ss_note_icd9_diag_2_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_2_code`. See `ss_note_icd9_diag_2_code` for more information.

Column Name: `ss_note_icd9_diag_3_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 3'

Column Name: `ss_note_icd9_diag_3_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_3_code`. See `ss_note_icd9_diag_3_code` for more information.

Column Name: `ss_note_icd9_diag_4_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 4'

Column Name: ss_note_icd9_diag_4_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_4_code. See ss_note_icd9_diag_4_code for more information.

Column Name: ss_note_icd9_diag_5_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 5'

Column Name: ss_note_icd9_diag_5_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_5_code. See ss_note_icd9_diag_5_code for more information.

Column Name: ss_note_icd9_diag_6_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 6'

Column Name: ss_note_icd9_diag_6_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_6_code. See ss_note_icd9_diag_6_code for more information.

Column Name: ss_note_icd9_diag_7_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 7'

Column Name: ss_note_icd9_diag_7_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_7_code. See ss_note_icd9_diag_7_code for more information.

Column Name: ss_note_icd9_diag_8_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 8'

Column Name: ss_note_icd9_diag_8_value

Column Type: varchar

Max Length: 250

The description associated with `ss_note_icd9_diag_8_code`. See `ss_note_icd9_diag_8_code` for more information.

Column Name: `ss_note_icd9_diag_9_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 9'

Column Name: `ss_note_icd9_diag_9_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_9_code`. See `ss_note_icd9_diag_9_code` for more information.

Column Name: `ss_note_multi_dict_10_code`

Column Type: `varchar`

Max Length: 20

'SS Note Multi Response Dictionary 10'

Column Name: `ss_note_multi_dict_10_value`

Column Type: `varchar`

Max Length: 32700

The description associated with `ss_note_multi_dict_10_code`. See `ss_note_multi_dict_10_code` for more information.

Column Name: `ss_note_multi_dict_1_code`

Column Type: `varchar`

Max Length: 20

'SS Note Multi Response Dictionary 1'

Column Name: `ss_note_multi_dict_1_value`

Column Type: `varchar`

Max Length: 32700

The description associated with `ss_note_multi_dict_1_code`. See `ss_note_multi_dict_1_code` for more information.

Column Name: `ss_note_multi_dict_2_code`

Column Type: `varchar`

Max Length: 20

'SS Note Multi Response Dictionary 2'

Column Name: `ss_note_multi_dict_2_value`

Column Type: `varchar`

Max Length: 32700

The description associated with `ss_note_multi_dict_2_code`. See `ss_note_multi_dict_2_code` for more information.

Column Name: `ss_note_multi_dict_3_code`

Column Type: `varchar`

Max Length: 20

'SS Note Multi Response Dictionary 3'

Column Name: ss_note_multi_dict_3_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_3_code. See ss_note_multi_dict_3_code for more information.

Column Name: ss_note_multi_dict_4_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 4'

Column Name: ss_note_multi_dict_4_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_4_code. See ss_note_multi_dict_4_code for more information.

Column Name: ss_note_multi_dict_5_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 5'

Column Name: ss_note_multi_dict_5_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_5_code. See ss_note_multi_dict_5_code for more information.

Column Name: ss_note_multi_dict_6_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 6'

Column Name: ss_note_multi_dict_6_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_6_code. See ss_note_multi_dict_6_code for more information.

Column Name: ss_note_multi_dict_7_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 7'

Column Name: ss_note_multi_dict_7_value

Column Type: varchar

Max Length: 32700

The description associated with `ss_note_multi_dict_7_code`. See `ss_note_multi_dict_7_code` for more information.

Column Name: `ss_note_multi_dict_8_code`

Column Type: `varchar`

Max Length: 20

'SS Note Multi Response Dictionary 8'

Column Name: `ss_note_multi_dict_8_value`

Column Type: `varchar`

Max Length: 32700

The description associated with `ss_note_multi_dict_8_code`. See `ss_note_multi_dict_8_code` for more information.

Column Name: `ss_note_multi_dict_9_code`

Column Type: `varchar`

Max Length: 20

'SS Note Multi Response Dictionary 9'

Column Name: `ss_note_multi_dict_9_value`

Column Type: `varchar`

Max Length: 32700

The description associated with `ss_note_multi_dict_9_code`. See `ss_note_multi_dict_9_code` for more information.

Column Name: `ss_note_scroll_text_1`

Column Type: `varchar`

Max Length: 32700

'SS Note Scrolling Text 1'

Column Name: `ss_note_scroll_text_10`

Column Type: `varchar`

Max Length: 32700

'SS Note Scrolling Text 10'

Column Name: `ss_note_scroll_text_2`

Column Type: `varchar`

Max Length: 32700

'SS Note Scrolling Text 2'

Column Name: `ss_note_scroll_text_3`

Column Type: `varchar`

Max Length: 32700

'SS Note Scrolling Text 3'

Column Name: `ss_note_scroll_text_4`

Column Type: `varchar`

Max Length: 32700

'SS Note Scrolling Text 4'

Column Name: ss_note_scroll_text_5
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Text 5'

Column Name: ss_note_scroll_text_6
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Text 6'

Column Name: ss_note_scroll_text_7
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Text 7'

Column Name: ss_note_scroll_text_8
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Text 8'

Column Name: ss_note_scroll_text_9
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Text 9'

Column Name: ss_note_sing_dict_10_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 10'

Column Name: ss_note_sing_dict_10_value
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_10_code. See ss_note_sing_dict_10_code for more information.

Column Name: ss_note_sing_dict_1_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 1'

Column Name: ss_note_sing_dict_1_value
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_1_code. See ss_note_sing_dict_1_code for more information.

Column Name: ss_note_sing_dict_2_code
Column Type: varchar
Max Length: 20

'SS Note Single Response Dictionary 2'

Column Name: ss_note_sing_dict_2_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_2_code. See ss_note_sing_dict_2_code for more information.

Column Name: ss_note_sing_dict_3_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 3'

Column Name: ss_note_sing_dict_3_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_3_code. See ss_note_sing_dict_3_code for more information.

Column Name: ss_note_sing_dict_4_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 4'

Column Name: ss_note_sing_dict_4_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_4_code. See ss_note_sing_dict_4_code for more information.

Column Name: ss_note_sing_dict_5_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 5'

Column Name: ss_note_sing_dict_5_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_5_code. See ss_note_sing_dict_5_code for more information.

Column Name: ss_note_sing_dict_6_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 6'

Column Name: ss_note_sing_dict_6_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_6_code. See ss_note_sing_dict_6_code for more information.

Column Name: ss_note_sing_dict_7_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 7'

Column Name: ss_note_sing_dict_7_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_7_code. See ss_note_sing_dict_7_code for more information.

Column Name: ss_note_sing_dict_8_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 8'

Column Name: ss_note_sing_dict_8_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_8_code. See ss_note_sing_dict_8_code for more information.

Column Name: ss_note_sing_dict_9_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 9'

Column Name: ss_note_sing_dict_9_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_9_code. See ss_note_sing_dict_9_code for more information.

Column Name: ss_note_staff_1

Column Type: varchar

Max Length: 20

'SS Note Staff Member 1'

Column Name: ss_note_staff_10

Column Type: varchar

Max Length: 20

'SS Note Staff Member 10'

Column Name: ss_note_staff_2

Column Type: varchar

Max Length: 20

'SS Note Staff Member 2'

Column Name: ss_note_staff_3
Column Type: varchar
Max Length: 20
'SS Note Staff Member 3'

Column Name: ss_note_staff_4
Column Type: varchar
Max Length: 20
'SS Note Staff Member 4'

Column Name: ss_note_staff_5
Column Type: varchar
Max Length: 20
'SS Note Staff Member 5'

Column Name: ss_note_staff_6
Column Type: varchar
Max Length: 20
'SS Note Staff Member 6'

Column Name: ss_note_staff_7
Column Type: varchar
Max Length: 20
'SS Note Staff Member 7'

Column Name: ss_note_staff_8
Column Type: varchar
Max Length: 20
'SS Note Staff Member 8'

Column Name: ss_note_staff_9
Column Type: varchar
Max Length: 20
'SS Note Staff Member 9'

Column Name: ss_note_time_1
Column Type: varchar
Max Length: 10
'SS Note Time 1'

Column Name: ss_note_time_10
Column Type: varchar
Max Length: 10
'SS Note Time 10'

Column Name: ss_note_time_2
Column Type: varchar
Max Length: 10
'SS Note Time 2'

Column Name: ss_note_time_3
Column Type: varchar
Max Length: 10
'SS Note Time 3'

Column Name: ss_note_time_4
Column Type: varchar
Max Length: 10
'SS Note Time 4'

Column Name: ss_note_time_5
Column Type: varchar
Max Length: 10
'SS Note Time 5'

Column Name: ss_note_time_6
Column Type: varchar
Max Length: 10
'SS Note Time 6'

Column Name: ss_note_time_7
Column Type: varchar
Max Length: 10
'SS Note Time 7'

Column Name: ss_note_time_8
Column Type: varchar
Max Length: 10
'SS Note Time 8'

Column Name: ss_note_time_9
Column Type: varchar
Max Length: 10
'SS Note Time 9'

Column Name: transition_of_care_code
Column Type: varchar
Max Length: 1
'Is This A Transition Of Care?'

Column Name: transition_of_care_value
Column Type: varchar
Max Length: 80
'The description associated with transition_of_care_code. See transition_of_care_code for more information.'

Column Name: user_row_access_code
Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: CWSTEMP.cw_patient_notes_supp

Table Description: This table is used as a pre-filing storage of the SYSTEM.cwpatientnotessupp table.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: EPISODE_NUMBER

Column Type: integer

The episode number associated with PATID.

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: NOT_uniqueid

Column Type: varchar

Max Length: 50

The unique ID associated with the note.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the data.

Column Name: PREFILEID

Column Type: varchar

Max Length: 50

The unique ID associated with the prefiller.

Column Name: confidential_note

Column Type: varchar

Max Length: 50

Whether the note is confidential.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: notes_field
Column Type: varchar
Max Length: 32766
The contents of the notes field.

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 50
The unique ID of the form that last updated the row.

Column Name: ss_note_20_char_text_11
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 11'

Column Name: ss_note_20_char_text_12
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 12'

Column Name: ss_note_20_char_text_13
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 13'

Column Name: ss_note_20_char_text_14
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 14'

Column Name: ss_note_20_char_text_15
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 15'

Column Name: ss_note_20_char_text_16
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 16'

Column Name: ss_note_20_char_text_17
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 17'

Column Name: ss_note_20_char_text_18
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 18'

Column Name: ss_note_20_char_text_19
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 19'

Column Name: ss_note_20_char_text_20
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 20'

Column Name: ss_note_20_char_text_21
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 21'

Column Name: ss_note_20_char_text_22
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 22'

Max Length: 250

The description associated with ss_note_icd9_diag_13_code. See ss_note_icd9_diag_13_code for more information.

Column Name: ss_note_icd9_diag_14_code

Column Type: varchar
Max Length: 20
'SS Note ICD9 Diagnosis 14'

Column Name: ss_note_icd9_diag_14_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_14_code. See ss_note_icd9_diag_14_code for more information.

Column Name: ss_note_icd9_diag_15_code
Column Type: varchar
Max Length: 20
'SS Note ICD9 Diagnosis 15'

Column Name: ss_note_icd9_diag_15_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_15_code. See ss_note_icd9_diag_15_code for more information.

Column Name: ss_note_icd9_diag_16_code
Column Type: varchar
Max Length: 20
'SS Note ICD9 Diagnosis 16'

Column Name: ss_note_icd9_diag_16_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_16_code. See ss_note_icd9_diag_16_code for more information.

Column Name: ss_note_icd9_diag_17_code
Column Type: varchar
Max Length: 20
'SS Note ICD9 Diagnosis 17'

Column Name: ss_note_icd9_diag_17_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_17_code. See ss_note_icd9_diag_17_code for more information.

Column Name: ss_note_icd9_diag_18_code
Column Type: varchar
Max Length: 20
'SS Note ICD9 Diagnosis 18'

Column Name: ss_note_icd9_diag_18_value
Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_18_code. See ss_note_icd9_diag_18_code for more information.

Column Name: ss_note_icd9_diag_19_code

Column Type: varchar

Max Length: 20

'SS Note ICD9 Diagnosis 19'

Column Name: ss_note_icd9_diag_19_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_19_code. See ss_note_icd9_diag_19_code for more information.

Column Name: ss_note_icd9_diag_20_code

Column Type: varchar

Max Length: 20

'SS Note ICD9 Diagnosis 20'

Column Name: ss_note_icd9_diag_20_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_20_code. See ss_note_icd9_diag_20_code for more information.

Column Name: ss_note_icd9_diag_21_code

Column Type: varchar

Max Length: 20

'SS Note ICD9 Diagnosis 21'

Column Name: ss_note_icd9_diag_21_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_21_code. See ss_note_icd9_diag_21_code for more information.

Column Name: ss_note_icd9_diag_22_code

Column Type: varchar

Max Length: 20

'SS Note ICD9 Diagnosis 22'

Column Name: ss_note_icd9_diag_22_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_22_code. See ss_note_icd9_diag_22_code for more information.

Column Name: ss_note_icd9_diag_23_code

Column Type: varchar

Max Length: 20
'SS Note ICD9 Diagnosis 23'

Column Name: ss_note_icd9_diag_23_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_23_code. See ss_note_icd9_diag_23_code for more information.

Column Name: ss_note_icd9_diag_24_code
Column Type: varchar
Max Length: 20
'SS Note ICD9 Diagnosis 24'

Column Name: ss_note_icd9_diag_24_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_24_code. See ss_note_icd9_diag_24_code for more information.

Column Name: ss_note_icd9_diag_25_code
Column Type: varchar
Max Length: 20
'SS Note ICD9 Diagnosis 25'

Column Name: ss_note_icd9_diag_25_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_25_code. See ss_note_icd9_diag_25_code for more information.

Column Name: ss_note_icd9_diag_26_code
Column Type: varchar
Max Length: 20
'SS Note ICD9 Diagnosis 26'

Column Name: ss_note_icd9_diag_26_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_26_code. See ss_note_icd9_diag_26_code for more information.

Column Name: ss_note_icd9_diag_27_code
Column Type: varchar
Max Length: 20
'SS Note ICD9 Diagnosis 27'

Column Name: ss_note_icd9_diag_27_value
Column Type: varchar
Max Length: 250

The description associated with `ss_note_icd9_diag_27_code`. See `ss_note_icd9_diag_27_code` for more information.

Column Name: `ss_note_icd9_diag_28_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 28'

Column Name: `ss_note_icd9_diag_28_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_28_code`. See `ss_note_icd9_diag_28_code` for more information.

Column Name: `ss_note_icd9_diag_29_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 29'

Column Name: `ss_note_icd9_diag_29_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_29_code`. See `ss_note_icd9_diag_29_code` for more information.

Column Name: `ss_note_icd9_diag_30_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 30'

Column Name: `ss_note_icd9_diag_30_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_30_code`. See `ss_note_icd9_diag_30_code` for more information.

Column Name: `ss_note_multi_dict_11_code`

Column Type: `varchar`

Max Length: 20

'SS Note Copy Multiple Response Dictionary 11'

Column Name: `ss_note_multi_dict_11_value`

Column Type: `varchar`

Max Length: 32700

The description associated with `ss_note_multi_dict_11_code`. See `ss_note_multi_dict_11_code` for more information.

Column Name: `ss_note_multi_dict_12_code`

Column Type: `varchar`

Max Length: 20

'SS Note Copy Multiple Response Dictionary 12'

Column Name: ss_note_multi_dict_12_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_12_code. See ss_note_multi_dict_12_code for more information.

Column Name: ss_note_multi_dict_13_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 13'

Column Name: ss_note_multi_dict_13_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_13_code. See ss_note_multi_dict_13_code for more information.

Column Name: ss_note_multi_dict_14_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 14'

Column Name: ss_note_multi_dict_14_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_14_code. See ss_note_multi_dict_14_code for more information.

Column Name: ss_note_multi_dict_15_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 15'

Column Name: ss_note_multi_dict_15_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_15_code. See ss_note_multi_dict_15_code for more information.

Column Name: ss_note_multi_dict_16_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 16'

Column Name: ss_note_multi_dict_16_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_16_code. See ss_note_multi_dict_16_code for more information.

Column Name: ss_note_multi_dict_17_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 17'

Column Name: ss_note_multi_dict_17_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_17_code. See ss_note_multi_dict_17_code for more information.

Column Name: ss_note_multi_dict_18_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 18'

Column Name: ss_note_multi_dict_18_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_18_code. See ss_note_multi_dict_18_code for more information.

Column Name: ss_note_multi_dict_19_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 19'

Column Name: ss_note_multi_dict_19_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_19_code. See ss_note_multi_dict_19_code for more information.

Column Name: ss_note_multi_dict_20_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 20'

Column Name: ss_note_multi_dict_20_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_20_code. See ss_note_multi_dict_20_code for more information.

Column Name: ss_note_multi_dict_21_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 21'

Column Name: ss_note_multi_dict_21_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_21_code. See ss_note_multi_dict_21_code for more information.

Column Name: ss_note_multi_dict_22_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 22'

Column Name: ss_note_multi_dict_22_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_22_code. See ss_note_multi_dict_22_code for more information.

Column Name: ss_note_multi_dict_23_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 23'

Column Name: ss_note_multi_dict_23_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_23_code. See ss_note_multi_dict_23_code for more information.

Column Name: ss_note_multi_dict_24_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 24'

Column Name: ss_note_multi_dict_24_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_24_code. See ss_note_multi_dict_24_code for more information.

Column Name: ss_note_multi_dict_25_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 25'

Column Name: ss_note_multi_dict_25_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_25_code. See ss_note_multi_dict_25_code for more information.

Column Name: ss_note_multi_dict_26_code
Column Type: varchar
Max Length: 20
'SS Note Copy Multiple Response Dictionary 26'

Column Name: ss_note_multi_dict_26_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_26_code. See ss_note_multi_dict_26_code for more information.

Column Name: ss_note_multi_dict_27_code
Column Type: varchar
Max Length: 20
'SS Note Copy Multiple Response Dictionary 27'

Column Name: ss_note_multi_dict_27_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_27_code. See ss_note_multi_dict_27_code for more information.

Column Name: ss_note_multi_dict_28_code
Column Type: varchar
Max Length: 20
'SS Note Copy Multiple Response Dictionary 28'

Column Name: ss_note_multi_dict_28_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_28_code. See ss_note_multi_dict_28_code for more information.

Column Name: ss_note_multi_dict_29_code
Column Type: varchar
Max Length: 20
'SS Note Copy Multiple Response Dictionary 29'

Column Name: ss_note_multi_dict_29_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_29_code. See ss_note_multi_dict_29_code for more information.

Column Name: ss_note_multi_dict_30_code
Column Type: varchar
Max Length: 20

'SS Note Copy Multiple Response Dictionary 30'

Column Name: ss_note_multi_dict_30_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_30_code. See ss_note_multi_dict_30_code for more information.

Column Name: ss_note_time_29
Column Type: varchar
Max Length: 50
'SS Note Time 29'

Column Name: ss_note_time_30
Column Type: varchar
Max Length: 50
'SS Note Time 30'

Column Name: user_row_access_code
Column Type: integer
If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: CWSTEMP.cw_patient_notes_supp_1

Table Description: This table is used as a pre-filing storage of the SYSTEM.cwpatientnotessupp1 table.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 50
'Progress Notes Pointer'

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: PREFILEID
Column Type: varchar
Max Length: 50
The unique ID associated with the prefiler.

Column Name: confidential_note
Column Type: varchar
Max Length: 50
'Confidential Notes'

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: notes_field
Column Type: varchar
Max Length: 32766
'Notes Field'

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 50
The unique ID of the form that last updated the row.

Column Name: ss_note_20_char_text_31
Column Type: varchar

Max Length: 20
'SS Note 20 Character 31'

Column Name: ss_note_20_char_text_32
Column Type: varchar
Max Length: 20
'SS Note 20 Character 32'

Column Name: ss_note_20_char_text_33
Column Type: varchar
Max Length: 20
'SS Note 20 Character 33'

Column Name: ss_note_20_char_text_34
Column Type: varchar
Max Length: 20
'SS Note 20 Character 34'

Column Name: ss_note_20_char_text_35
Column Type: varchar
Max Length: 20
'SS Note 20 Character 35'

Column Name: ss_note_20_char_text_36
Column Type: varchar
Max Length: 20
'SS Note 20 Character 36'

Column Name: ss_note_20_char_text_37
Column Type: varchar
Max Length: 20
'SS Note 20 Character 37'

Column Name: ss_note_20_char_text_38
Column Type: varchar
Max Length: 20
'SS Note 20 Character 38'

Column Name: ss_note_20_char_text_39
Column Type: varchar
Max Length: 20
'SS Note 20 Character 39'

Column Name: ss_note_20_char_text_40
Column Type: varchar
Max Length: 20
'SS Note 20 Character 40'

Column Name: ss_note_20_char_text_41
Column Type: varchar

Max Length: 20
'SS Note 20 Character 41'

Column Name: ss_note_20_char_text_42
Column Type: varchar
Max Length: 20
'SS Note 20 Character 42'

Column Name: ss_note_20_char_text_43
Column Type: varchar
Max Length: 20
'SS Note 20 Character 43'

Column Name: ss_note_20_char_text_44
Column Type: varchar
Max Length: 20
'SS Note 20 Character 44'

Column Name: ss_note_20_char_text_45
Column Type: varchar
Max Length: 20
'SS Note 20 Character 45'

Column Name: ss_note_20_char_text_46
Column Type: varchar
Max Length: 20
'SS Note 20 Character 46'

Column Name: ss_note_20_char_text_47
Column Type: varchar
Max Length: 20
'SS Note 20 Character 47'

Column Name: ss_note_20_char_text_48
Column Type: varchar
Max Length: 20
'SS Note 20 Character 48'

Column Name: ss_note_20_char_text_49
Column Type: varchar
Max Length: 20
'SS Note 20 Character 49'

Column Name: ss_note_20_char_text_50
Column Type: varchar
Max Length: 20
'SS Note 20 Character 50'

Column Name: ss_note_40_char_text_31
Column Type: varchar

Max Length: 40
'SS Note 40 Character 31'

Column Name: ss_note_40_char_text_32
Column Type: varchar
Max Length: 40
'SS Note 40 Character 32'

Column Name: ss_note_40_char_text_33
Column Type: varchar
Max Length: 40
'SS Note 40 Character 33'

Column Name: ss_note_40_char_text_34
Column Type: varchar
Max Length: 40
'SS Note 40 Character 34'

Column Name: ss_note_40_char_text_35
Column Type: varchar
Max Length: 40
'SS Note 40 Character 35'

Column Name: ss_note_40_char_text_36
Column Type: varchar
Max Length: 40
'SS Note 40 Character 36'

Column Name: ss_note_40_char_text_37
Column Type: varchar
Max Length: 40
'SS Note 40 Character 37'

Column Name: ss_note_40_char_text_38
Column Type: varchar
Max Length: 40
'SS Note 40 Character 38'

Column Name: ss_note_40_char_text_39
Column Type: varchar
Max Length: 40
'SS Note 40 Character 39'

Column Name: ss_note_40_char_text_40
Column Type: varchar
Max Length: 40
'SS Note 40 Character 40'

Column Name: ss_note_40_char_text_41
Column Type: varchar

Max Length: 40
'SS Note 40 Character 41'

Column Name: ss_note_40_char_text_42
Column Type: varchar
Max Length: 40
'SS Note 40 Character 42'

Column Name: ss_note_40_char_text_43
Column Type: varchar
Max Length: 40
'SS Note 40 Character 43'

Column Name: ss_note_40_char_text_44
Column Type: varchar
Max Length: 40
'SS Note 40 Character 44'

Column Name: ss_note_40_char_text_45
Column Type: varchar
Max Length: 40
'SS Note 40 Character 45'

Column Name: ss_note_40_char_text_46
Column Type: varchar
Max Length: 40
'SS Note 40 Character 46'

Column Name: ss_note_40_char_text_47
Column Type: varchar
Max Length: 40
'SS Note 40 Character 47'

Column Name: ss_note_40_char_text_48
Column Type: varchar
Max Length: 40
'SS Note 40 Character 48'

Column Name: ss_note_40_char_text_49
Column Type: varchar
Max Length: 40
'SS Note 40 Character 49'

Column Name: ss_note_40_char_text_50
Column Type: varchar
Max Length: 40
'SS Note 40 Character 50'

Column Name: ss_note_80_char_text_31
Column Type: varchar

Max Length: 80
'SS Note 80 Character Text 31'

Column Name: ss_note_80_char_text_32
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 32'

Column Name: ss_note_80_char_text_33
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 33'

Column Name: ss_note_80_char_text_34
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 34'

Column Name: ss_note_80_char_text_35
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 35'

Column Name: ss_note_80_char_text_36
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 36'

Column Name: ss_note_80_char_text_37
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 37'

Column Name: ss_note_80_char_text_38
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 38'

Column Name: ss_note_80_char_text_39
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 39'

Column Name: ss_note_80_char_text_40
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 40'

Column Name: ss_note_80_char_text_41
Column Type: varchar

Max Length: 80
'SS Note 80 Character Text 41'

Column Name: ss_note_80_char_text_42
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 42'

Column Name: ss_note_80_char_text_43
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 43'

Column Name: ss_note_80_char_text_44
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 44'

Column Name: ss_note_80_char_text_45
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 45'

Column Name: ss_note_80_char_text_46
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 46'

Column Name: ss_note_80_char_text_47
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 47'

Column Name: ss_note_80_char_text_48
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 48'

Column Name: ss_note_80_char_text_49
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 49'

Column Name: ss_note_80_char_text_50
Column Type: varchar
Max Length: 80
'SS Note 80 Character Text 50'

Column Name: ss_note_date_31
Column Type: date

'SS Note Date 31'

'SS Note Date 50'

Column Name: ss_note_dsm_diag_31_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 31'

Column Name: ss_note_dsm_diag_31_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_31_code. See ss_note_dsm_diag_31_code for more information.

Column Name: ss_note_dsm_diag_32_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 32'

Column Name: ss_note_dsm_diag_32_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_32_code. See ss_note_dsm_diag_32_code for more information.

Column Name: ss_note_dsm_diag_33_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 33'

Column Name: ss_note_dsm_diag_33_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_33_code. See ss_note_dsm_diag_33_code for more information.

Column Name: ss_note_dsm_diag_34_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 34'

Column Name: ss_note_dsm_diag_34_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_34_code. See ss_note_dsm_diag_34_code for more information.

Column Name: ss_note_dsm_diag_35_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 35'

Column Name: ss_note_dsm_diag_35_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_35_code. See ss_note_dsm_diag_35_code for more information.

Column Name: ss_note_dsm_diag_36_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 36'

Column Name: ss_note_dsm_diag_36_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_36_code. See ss_note_dsm_diag_36_code for more information.

Column Name: ss_note_dsm_diag_37_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 37'

Column Name: ss_note_dsm_diag_37_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_37_code. See ss_note_dsm_diag_37_code for more information.

Column Name: ss_note_dsm_diag_38_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 38'

Column Name: ss_note_dsm_diag_38_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_38_code. See ss_note_dsm_diag_38_code for more information.

Column Name: ss_note_dsm_diag_39_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 39'

Column Name: ss_note_dsm_diag_39_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_39_code. See ss_note_dsm_diag_39_code for more information.

Column Name: ss_note_dsm_diag_40_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 40'

Column Name: ss_note_dsm_diag_40_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_40_code. See ss_note_dsm_diag_40_code for more information.

Column Name: ss_note_dsm_diag_41_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 41'

Column Name: ss_note_dsm_diag_41_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_41_code. See ss_note_dsm_diag_41_code for more information.

Column Name: ss_note_dsm_diag_42_code

Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 42'

Column Name: ss_note_dsm_diag_42_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_42_code. See ss_note_dsm_diag_42_code for more information.

Column Name: ss_note_dsm_diag_43_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 43'

Column Name: ss_note_dsm_diag_43_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_43_code. See ss_note_dsm_diag_43_code for more information.

Column Name: ss_note_dsm_diag_44_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 44'

Column Name: ss_note_dsm_diag_44_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_44_code. See ss_note_dsm_diag_44_code for more information.

Column Name: ss_note_dsm_diag_45_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 45'

Column Name: ss_note_dsm_diag_45_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_45_code. See ss_note_dsm_diag_45_code for more information.

Column Name: ss_note_dsm_diag_46_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 46'

Column Name: ss_note_dsm_diag_46_value
Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_46_code. See ss_note_dsm_diag_46_code for more information.

Column Name: ss_note_dsm_diag_47_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 47'

Column Name: ss_note_dsm_diag_47_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_47_code. See ss_note_dsm_diag_47_code for more information.

Column Name: ss_note_dsm_diag_48_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 48'

Column Name: ss_note_dsm_diag_48_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_48_code. See ss_note_dsm_diag_48_code for more information.

Column Name: ss_note_dsm_diag_49_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 49'

Column Name: ss_note_dsm_diag_49_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_49_code. See ss_note_dsm_diag_49_code for more information.

Column Name: ss_note_dsm_diag_50_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 50'

Column Name: ss_note_dsm_diag_50_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_50_code. See ss_note_dsm_diag_50_code for more information.

Column Name: ss_note_icd9_diag_31_code

Column Type: varchar

Max Length: 20
'SS Note ICD-9 Code 31'

Column Name: ss_note_icd9_diag_31_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_31_code. See ss_note_icd9_diag_31_code for more information.

Column Name: ss_note_icd9_diag_32_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 32'

Column Name: ss_note_icd9_diag_32_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_32_code. See ss_note_icd9_diag_32_code for more information.

Column Name: ss_note_icd9_diag_33_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 33'

Column Name: ss_note_icd9_diag_33_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_33_code. See ss_note_icd9_diag_33_code for more information.

Column Name: ss_note_icd9_diag_34_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 34'

Column Name: ss_note_icd9_diag_34_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_34_code. See ss_note_icd9_diag_34_code for more information.

Column Name: ss_note_icd9_diag_35_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 35'

Column Name: ss_note_icd9_diag_35_value
Column Type: varchar
Max Length: 250

The description associated with `ss_note_icd9_diag_35_code`. See `ss_note_icd9_diag_35_code` for more information.

Column Name: `ss_note_icd9_diag_36_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 36'

Column Name: `ss_note_icd9_diag_36_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_36_code`. See `ss_note_icd9_diag_36_code` for more information.

Column Name: `ss_note_icd9_diag_37_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 37'

Column Name: `ss_note_icd9_diag_37_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_37_code`. See `ss_note_icd9_diag_37_code` for more information.

Column Name: `ss_note_icd9_diag_38_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 38'

Column Name: `ss_note_icd9_diag_38_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_38_code`. See `ss_note_icd9_diag_38_code` for more information.

Column Name: `ss_note_icd9_diag_39_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 39'

Column Name: `ss_note_icd9_diag_39_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_39_code`. See `ss_note_icd9_diag_39_code` for more information.

Column Name: `ss_note_icd9_diag_40_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 40'

Column Name: ss_note_icd9_diag_40_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_40_code. See ss_note_icd9_diag_40_code for more information.

Column Name: ss_note_icd9_diag_41_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 41'

Column Name: ss_note_icd9_diag_41_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_41_code. See ss_note_icd9_diag_41_code for more information.

Column Name: ss_note_icd9_diag_42_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 42'

Column Name: ss_note_icd9_diag_42_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_42_code. See ss_note_icd9_diag_42_code for more information.

Column Name: ss_note_icd9_diag_43_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 43'

Column Name: ss_note_icd9_diag_43_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_43_code. See ss_note_icd9_diag_43_code for more information.

Column Name: ss_note_icd9_diag_44_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 44'

Column Name: ss_note_icd9_diag_44_value

Column Type: varchar

Max Length: 250

The description associated with `ss_note_icd9_diag_44_code`. See `ss_note_icd9_diag_44_code` for more information.

Column Name: `ss_note_icd9_diag_45_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 45'

Column Name: `ss_note_icd9_diag_45_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_45_code`. See `ss_note_icd9_diag_45_code` for more information.

Column Name: `ss_note_icd9_diag_46_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 46'

Column Name: `ss_note_icd9_diag_46_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_46_code`. See `ss_note_icd9_diag_46_code` for more information.

Column Name: `ss_note_icd9_diag_47_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 47'

Column Name: `ss_note_icd9_diag_47_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_47_code`. See `ss_note_icd9_diag_47_code` for more information.

Column Name: `ss_note_icd9_diag_48_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 48'

Column Name: `ss_note_icd9_diag_48_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_48_code`. See `ss_note_icd9_diag_48_code` for more information.

Column Name: `ss_note_icd9_diag_49_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 49'

Column Name: ss_note_icd9_diag_49_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_49_code. See ss_note_icd9_diag_49_code for more information.

Column Name: ss_note_icd9_diag_50_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 50'

Column Name: ss_note_icd9_diag_50_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_50_code. See ss_note_icd9_diag_50_code for more information.

Column Name: ss_note_integer_1

Column Type: integer

'SS Note Integer 1'

Column Name: ss_note_integer_2

Column Type: integer

'SS Note Integer 2'

Column Name: ss_note_integer_3

Column Type: integer

Column Name: ss_note_integer_5

Column Type: integer

'SS Note Integer 5'

Column Name: ss_note_integer_6

Column Type: integer

'SS Note Integer 6'

Column Name: ss_note_multi_dict_31_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 31'

Column Name: ss_note_multi_dict_31_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_31_code. See ss_note_multi_dict_31_code for more information.

Column Name: ss_note_multi_dict_32_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 32'

Column Name: ss_note_multi_dict_32_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_32_code. See ss_note_multi_dict_32_code for more information.

Column Name: ss_note_multi_dict_33_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 33'

Column Name: ss_note_multi_dict_33_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_33_code. See ss_note_multi_dict_33_code for more information.

Column Name: ss_note_multi_dict_34_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 34'

Column Name: ss_note_multi_dict_34_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_34_code. See ss_note_multi_dict_34_code for more information.

Column Name: ss_note_multi_dict_35_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 35'

Column Name: ss_note_multi_dict_35_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_35_code. See ss_note_multi_dict_35_code for more information.

Column Name: ss_note_multi_dict_36_code

Column Type: varchar

Max Length: 20
'SS Note Multi Response Dictionary 36'

Column Name: ss_note_multi_dict_36_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_36_code. See ss_note_multi_dict_36_code for more information.

Column Name: ss_note_multi_dict_37_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 37'

Column Name: ss_note_multi_dict_37_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_37_code. See ss_note_multi_dict_37_code for more information.

Column Name: ss_note_multi_dict_38_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 38'

Column Name: ss_note_multi_dict_38_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_38_code. See ss_note_multi_dict_38_code for more information.

Column Name: ss_note_multi_dict_39_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 39'

Column Name: ss_note_multi_dict_39_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_39_code. See ss_note_multi_dict_39_code for more information.

Column Name: ss_note_multi_dict_40_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 40'

Column Name: ss_note_multi_dict_40_value
Column Type: varchar
Max Length: 32700

The description associated with ss_note_multi_dict_40_code. See ss_note_multi_dict_40_code for more information.

Column Name: ss_note_multi_dict_41_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 41'

Column Name: ss_note_multi_dict_41_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_41_code. See ss_note_multi_dict_41_code for more information.

Column Name: ss_note_multi_dict_42_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 42'

Column Name: ss_note_multi_dict_42_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_42_code. See ss_note_multi_dict_42_code for more information.

Column Name: ss_note_multi_dict_43_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 43'

Column Name: ss_note_multi_dict_43_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_43_code. See ss_note_multi_dict_43_code for more information.

Column Name: ss_note_multi_dict_44_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 44'

Column Name: ss_note_multi_dict_44_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_44_code. See ss_note_multi_dict_44_code for more information.

Column Name: ss_note_multi_dict_45_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 45'

Column Name: ss_note_multi_dict_45_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_45_code. See ss_note_multi_dict_45_code for more information.

Column Name: ss_note_multi_dict_46_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 46'

Column Name: ss_note_multi_dict_46_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_46_code. See ss_note_multi_dict_46_code for more information.

Column Name: ss_note_multi_dict_47_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 47'

Column Name: ss_note_multi_dict_47_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_47_code. See ss_note_multi_dict_47_code for more information.

Column Name: ss_note_multi_dict_48_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 48'

Column Name: ss_note_multi_dict_48_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_48_code. See ss_note_multi_dict_48_code for more information.

Column Name: ss_note_multi_dict_49_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 49'

Column Name: ss_note_multi_dict_49_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_49_code. See ss_note_multi_dict_49_code for more information.

Column Name: ss_note_multi_dict_50_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 50'

Column Name: ss_note_multi_dict_50_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_50_code. See ss_note_multi_dict_50_code for more information.

Column Type: varchar
Max Length: 50
'SS Note Time 36'

Column Name: ss_note_time_37
Column Type: varchar
Max Length: 50
'SS Note Time 37'

Column Name: ss_note_time_38
Column Type: varchar
Max Length: 50
'SS Note Time 38'

Column Name: ss_note_time_39
Column Type: varchar
Max Length: 50
'SS Note Time 39'

Column Name: ss_note_time_40
Column Type: varchar
Max Length: 50
'SS Note Time 40'

Column Name: ss_note_time_41
Column Type: varchar
Max Length: 50
'SS Note Time 41'

Column Name: ss_note_time_42
Column Type: varchar
Max Length: 50
'SS Note Time 42'

Column Name: ss_note_time_43
Column Type: varchar
Max Length: 50
'SS Note Time 43'

Column Name: ss_note_time_44
Column Type: varchar
Max Length: 50
'SS Note Time 44'

Column Name: ss_note_time_45
Column Type: varchar
Max Length: 50
'SS Note Time 45'

Column Name: ss_note_time_46
Column Type: varchar
Max Length: 50
'SS Note Time 46'

Column Name: ss_note_time_47
Column Type: varchar
Max Length: 50
'SS Note Time 47'

Column Name: ss_note_time_48
Column Type: varchar
Max Length: 50
'SS Note Time 48'

Column Name: ss_note_time_49
Column Type: varchar
Max Length: 50
'SS Note Time 49'

Column Name: ss_note_time_50
Column Type: varchar
Max Length: 50
'SS Note Time 50'

Column Name: user_row_access_code
Column Type: integer
If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: CWSTEMP.cw_patient_notes_supp_2

Table Description: This table is used as a pre-filing storage of the SYSTEM.cwpatientnotessupp2 table.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 50
The unique ID associated with the note.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: PREFILEID
Column Type: varchar
Max Length: 50
The unique ID associated with the prefiler.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: ss_note_integer_10
Column Type: integer
'SS Note Integer 10'

Column Name: ss_note_integer_11
Column Type: integer
'SS Note Integer 11'

Column Name: ss_note_integer_12
Column Type: integer
'SS Note Integer 12'

Column Name: ss_note_integer_13
Column Type: integer
'SS Note Integer 13'

Column Name: ss_note_integer_14
Column Type: integer
'SS Note Integer 14'

Column Name: ss_note_integer_15
Column Type: integer
'SS Note Integer 15'

Column Name: ss_note_integer_16
Column Type: integer
'SS Note Integer 16'

Column Name: ss_note_integer_17
Column Type: integer
'SS Note Integer 17'

Column Name: ss_note_integer_18
Column Type: integer
'SS Note Integer 18'

Column Name: ss_note_integer_19
Column Type: integer
'SS Note Integer 19'

Column Name: ss_note_integer_20
Column Type: integer

Max Length: 20
'SS Note Staff Member 40'

Column Name: ss_note_staff_41
Column Type: varchar
Max Length: 20
'SS Note Staff Member 41'

Column Name: ss_note_staff_42
Column Type: varchar
Max Length: 20
'SS Note Staff Member 42'

Column Name: ss_note_staff_43
Column Type: varchar
Max Length: 20
'SS Note Staff Member 43'

Column Name: ss_note_staff_44
Column Type: varchar
Max Length: 20
'SS Note Staff Member 44'

Column Name: ss_note_staff_45
Column Type: varchar
Max Length: 20
'SS Note Staff Member 45'

Column Name: ss_note_staff_46
Column Type: varchar
Max Length: 20
'SS Note Staff Member 46'

Column Name: ss_note_staff_47
Column Type: varchar

Max Length: 20
'SS Note Staff Member 47'

Column Name: ss_note_staff_48
Column Type: varchar
Max Length: 20
'SS Note Staff Member 48'

Column Name: ss_note_staff_49
Column Type: varchar
Max Length: 20
'SS Note Staff Member 49'

Column Name: ss_note_staff_50
Column Type: varchar
Max Length: 20
'SS Note Staff Member 50'

Column Name: user_row_access_code
Column Type: integer
If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: CWSTEMP.cw_patient_notes_supp_3

Table Description: This table is used as a pre-filing storage of the SYSTEM.cwpatientnotessupp3 table.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 50
The unique ID associated with the note.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: PREFILEID
Column Type: varchar
Max Length: 50
The unique ID associated with the prefiller.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: form_number
Column Type: varchar
Max Length: 50
The form number of the form that last updated the row.

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: ss_notec_multi_dict_10_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 10'

Column Name: ss_notec_multi_dict_10_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_10_code. See ss_notec_multi_dict_10_code for more information.

Column Name: ss_notec_multi_dict_11_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 11'

Column Name: ss_notec_multi_dict_11_value
Column Type: varchar
Max Length: 32759

The description associated with `ss_notec_multi_dict_11_code`. See `ss_notec_multi_dict_11_code` for more information.

Column Name: `ss_notec_multi_dict_12_code`
Column Type: `varchar`
Max Length: 255
'SS Note Copy Multiple Response Dictionary 12'

Column Name: `ss_notec_multi_dict_12_value`
Column Type: `varchar`
Max Length: 32759
The description associated with `ss_notec_multi_dict_12_code`. See `ss_notec_multi_dict_12_code` for more information.

Column Name: `ss_notec_multi_dict_13_code`
Column Type: `varchar`
Max Length: 255
'SS Note Copy Multiple Response Dictionary 13'

Column Name: `ss_notec_multi_dict_13_value`
Column Type: `varchar`
Max Length: 32759
The description associated with `ss_notec_multi_dict_13_code`. See `ss_notec_multi_dict_13_code` for more information.

Column Name: `ss_notec_multi_dict_14_code`
Column Type: `varchar`
Max Length: 255
'SS Note Copy Multiple Response Dictionary 14'

Column Name: `ss_notec_multi_dict_14_value`
Column Type: `varchar`
Max Length: 32759
The description associated with `ss_notec_multi_dict_14_code`. See `ss_notec_multi_dict_14_code` for more information.

Column Name: `ss_notec_multi_dict_15_code`
Column Type: `varchar`
Max Length: 255
'SS Note Copy Multiple Response Dictionary 15'

Column Name: `ss_notec_multi_dict_15_value`
Column Type: `varchar`
Max Length: 32759
The description associated with `ss_notec_multi_dict_15_code`. See `ss_notec_multi_dict_15_code` for more information.

Column Name: `ss_notec_multi_dict_16_code`
Column Type: `varchar`
Max Length: 255

'SS Note Copy Multiple Response Dictionary 16'

Column Name: ss_notec_multi_dict_16_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_16_code. See ss_notec_multi_dict_16_code for more information.

Column Name: ss_notec_multi_dict_17_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 17'

Column Name: ss_notec_multi_dict_17_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_17_code. See ss_notec_multi_dict_17_code for more information.

Column Name: ss_notec_multi_dict_18_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 18'

Column Name: ss_notec_multi_dict_18_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_18_code. See ss_notec_multi_dict_18_code for more information.

Column Name: ss_notec_multi_dict_19_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 19'

Column Name: ss_notec_multi_dict_19_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_19_code. See ss_notec_multi_dict_19_code for more information.

Column Name: ss_notec_multi_dict_1_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 1'

Column Name: ss_notec_multi_dict_1_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_1_code. See ss_notec_multi_dict_1_code for more information.

Column Name: ss_notec_multi_dict_20_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 20'

Column Name: ss_notec_multi_dict_20_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_20_code. See ss_notec_multi_dict_20_code for more information.

Column Name: ss_notec_multi_dict_21_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 21'

Column Name: ss_notec_multi_dict_21_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_21_code. See ss_notec_multi_dict_21_code for more information.

Column Name: ss_notec_multi_dict_22_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 22'

Column Name: ss_notec_multi_dict_22_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_22_code. See ss_notec_multi_dict_22_code for more information.

Column Name: ss_notec_multi_dict_23_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 23'

Column Name: ss_notec_multi_dict_23_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_23_code. See ss_notec_multi_dict_23_code for more information.

Column Name: ss_notec_multi_dict_24_code
Column Type: varchar
Max Length: 255

'SS Note Copy Multiple Response Dictionary 24'

Column Name: ss_notec_multi_dict_24_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_24_code. See ss_notec_multi_dict_24_code for more information.

Column Name: ss_notec_multi_dict_25_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 25'

Column Name: ss_notec_multi_dict_25_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_25_code. See ss_notec_multi_dict_25_code for more information.

Column Name: ss_notec_multi_dict_26_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 26'

Column Name: ss_notec_multi_dict_26_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_26_code. See ss_notec_multi_dict_26_code for more information.

Column Name: ss_notec_multi_dict_27_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 27'

Column Name: ss_notec_multi_dict_27_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_27_code. See ss_notec_multi_dict_27_code for more information.

Column Name: ss_notec_multi_dict_28_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 28'

Column Name: ss_notec_multi_dict_28_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_28_code. See ss_notec_multi_dict_28_code for more information.

Column Name: ss_notec_multi_dict_29_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 29'

Column Name: ss_notec_multi_dict_29_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_29_code. See ss_notec_multi_dict_29_code for more information.

Column Name: ss_notec_multi_dict_2_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 2'

Column Name: ss_notec_multi_dict_2_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_2_code. See ss_notec_multi_dict_2_code for more information.

Column Name: ss_notec_multi_dict_30_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 30'

Column Name: ss_notec_multi_dict_30_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_30_code. See ss_notec_multi_dict_30_code for more information.

Column Name: ss_notec_multi_dict_31_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 31'

Column Name: ss_notec_multi_dict_31_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_31_code. See ss_notec_multi_dict_31_code for more information.

Column Name: ss_notec_multi_dict_32_code
Column Type: varchar
Max Length: 255

'SS Note Copy Multiple Response Dictionary 32'

Column Name: ss_notec_multi_dict_32_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_32_code. See ss_notec_multi_dict_32_code for more information.

Column Name: ss_notec_multi_dict_33_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 33'

Column Name: ss_notec_multi_dict_33_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_33_code. See ss_notec_multi_dict_33_code for more information.

Column Name: ss_notec_multi_dict_34_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 34'

Column Name: ss_notec_multi_dict_34_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_34_code. See ss_notec_multi_dict_34_code for more information.

Column Name: ss_notec_multi_dict_35_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 35'

Column Name: ss_notec_multi_dict_35_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_35_code. See ss_notec_multi_dict_35_code for more information.

Column Name: ss_notec_multi_dict_36_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 36'

Column Name: ss_notec_multi_dict_36_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_36_code. See ss_notec_multi_dict_36_code for more information.

Column Name: ss_notec_multi_dict_37_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 37'

Column Name: ss_notec_multi_dict_37_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_37_code. See ss_notec_multi_dict_37_code for more information.

Column Name: ss_notec_multi_dict_38_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 38'

Column Name: ss_notec_multi_dict_38_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_38_code. See ss_notec_multi_dict_38_code for more information.

Column Name: ss_notec_multi_dict_39_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 39'

Column Name: ss_notec_multi_dict_39_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_39_code. See ss_notec_multi_dict_39_code for more information.

Column Name: ss_notec_multi_dict_3_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 3'

Column Name: ss_notec_multi_dict_3_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_3_code. See ss_notec_multi_dict_3_code for more information.

Column Name: ss_notec_multi_dict_40_code
Column Type: varchar
Max Length: 255

'SS Note Copy Multiple Response Dictionary 40'

Column Name: ss_notec_multi_dict_40_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_40_code. See ss_notec_multi_dict_40_code for more information.

Column Name: ss_notec_multi_dict_41_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 41'

Column Name: ss_notec_multi_dict_41_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_41_code. See ss_notec_multi_dict_41_code for more information.

Column Name: ss_notec_multi_dict_42_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 42'

Column Name: ss_notec_multi_dict_42_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_42_code. See ss_notec_multi_dict_42_code for more information.

Column Name: ss_notec_multi_dict_43_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 43'

Column Name: ss_notec_multi_dict_43_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_43_code. See ss_notec_multi_dict_43_code for more information.

Column Name: ss_notec_multi_dict_44_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 44'

Column Name: ss_notec_multi_dict_44_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_44_code. See ss_notec_multi_dict_44_code for more information.

Column Name: ss_notec_multi_dict_45_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 45'

Column Name: ss_notec_multi_dict_45_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_45_code. See ss_notec_multi_dict_45_code for more information.

Column Name: ss_notec_multi_dict_46_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 46'

Column Name: ss_notec_multi_dict_46_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_46_code. See ss_notec_multi_dict_46_code for more information.

Column Name: ss_notec_multi_dict_47_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 47'

Column Name: ss_notec_multi_dict_47_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_47_code. See ss_notec_multi_dict_47_code for more information.

Column Name: ss_notec_multi_dict_48_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 48'

Column Name: ss_notec_multi_dict_48_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_48_code. See ss_notec_multi_dict_48_code for more information.

Column Name: ss_notec_multi_dict_49_code
Column Type: varchar
Max Length: 255

'SS Note Copy Multiple Response Dictionary 49'

Column Name: ss_notec_multi_dict_49_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_49_code. See ss_notec_multi_dict_49_code for more information.

Column Name: ss_notec_multi_dict_4_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 4'

Column Name: ss_notec_multi_dict_4_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_4_code. See ss_notec_multi_dict_4_code for more information.

Column Name: ss_notec_multi_dict_50_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 50'

Column Name: ss_notec_multi_dict_50_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_50_code. See ss_notec_multi_dict_50_code for more information.

Column Name: ss_notec_multi_dict_5_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 5'

Column Name: ss_notec_multi_dict_5_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_5_code. See ss_notec_multi_dict_5_code for more information.

Column Name: ss_notec_multi_dict_6_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 6'

Column Name: ss_notec_multi_dict_6_value

Column Type: varchar

Max Length: 32759

The description associated with `ss_notec_multi_dict_6_code`. See `ss_notec_multi_dict_6_code` for more information.

Column Name: `ss_notec_multi_dict_7_code`
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 7'

Column Name: `ss_notec_multi_dict_7_value`
Column Type: varchar
Max Length: 32759
The description associated with `ss_notec_multi_dict_7_code`. See `ss_notec_multi_dict_7_code` for more information.

Column Name: `ss_notec_multi_dict_8_code`
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 8'

Column Name: `ss_notec_multi_dict_8_value`
Column Type: varchar
Max Length: 32759
The description associated with `ss_notec_multi_dict_8_code`. See `ss_notec_multi_dict_8_code` for more information.

Column Name: `ss_notec_multi_dict_9_code`
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 9'

Column Name: `ss_notec_multi_dict_9_value`
Column Type: varchar
Max Length: 32759
The description associated with `ss_notec_multi_dict_9_code`. See `ss_notec_multi_dict_9_code` for more information.

Column Name: `ss_notec_sing_dict_10_code`
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 10'

Column Name: `ss_notec_sing_dict_10_value`
Column Type: varchar
Max Length: 255
The description associated with `ss_notec_sing_dict_10_code`. See `ss_notec_sing_dict_10_code` for more information.

Column Name: `ss_notec_sing_dict_11_code`
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 11'

Column Name: ss_notec_sing_dict_11_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_11_code. See ss_notec_sing_dict_11_code for more information.

Column Name: ss_notec_sing_dict_12_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 12'

Column Name: ss_notec_sing_dict_12_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_12_code. See ss_notec_sing_dict_12_code for more information.

Column Name: ss_notec_sing_dict_13_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 13'

Column Name: ss_notec_sing_dict_13_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_13_code. See ss_notec_sing_dict_13_code for more information.

Column Name: ss_notec_sing_dict_14_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 14'

Column Name: ss_notec_sing_dict_14_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_14_code. See ss_notec_sing_dict_14_code for more information.

Column Name: ss_notec_sing_dict_15_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 15'

Column Name: ss_notec_sing_dict_15_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_15_code. See ss_notec_sing_dict_15_code for more information.

Column Name: ss_notec_sing_dict_16_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 16'

Column Name: ss_notec_sing_dict_16_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_16_code. See ss_notec_sing_dict_16_code for more information.

Column Name: ss_notec_sing_dict_17_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 17'

Column Name: ss_notec_sing_dict_17_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_17_code. See ss_notec_sing_dict_17_code for more information.

Column Name: ss_notec_sing_dict_18_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 18'

Column Name: ss_notec_sing_dict_18_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_18_code. See ss_notec_sing_dict_18_code for more information.

Column Name: ss_notec_sing_dict_19_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 19'

Column Name: ss_notec_sing_dict_19_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_19_code. See ss_notec_sing_dict_19_code for more information.

Column Name: ss_notec_sing_dict_1_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 1'

Column Name: ss_notec_sing_dict_1_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_1_code. See ss_notec_sing_dict_1_code for more information.

Column Name: ss_notec_sing_dict_20_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 20'

Column Name: ss_notec_sing_dict_20_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_20_code. See ss_notec_sing_dict_20_code for more information.

Column Name: ss_notec_sing_dict_21_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 21'

Column Name: ss_notec_sing_dict_21_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_21_code. See ss_notec_sing_dict_21_code for more information.

Column Name: ss_notec_sing_dict_22_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 22'

Column Name: ss_notec_sing_dict_22_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_22_code. See ss_notec_sing_dict_22_code for more information.

Column Name: ss_notec_sing_dict_23_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 23'

Column Name: ss_notec_sing_dict_23_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_23_code. See ss_notec_sing_dict_23_code for more information.

Column Name: ss_notec_sing_dict_24_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 24'

Column Name: ss_notec_sing_dict_24_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_24_code. See ss_notec_sing_dict_24_code for more information.

Column Name: ss_notec_sing_dict_25_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 25'

Column Name: ss_notec_sing_dict_25_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_25_code. See ss_notec_sing_dict_25_code for more information.

Column Name: ss_notec_sing_dict_26_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 26'

Column Name: ss_notec_sing_dict_26_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_26_code. See ss_notec_sing_dict_26_code for more information.

Column Name: ss_notec_sing_dict_27_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 27'

Column Name: ss_notec_sing_dict_27_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_27_code. See ss_notec_sing_dict_27_code for more information.

Column Name: ss_notec_sing_dict_28_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 28'

Column Name: ss_notec_sing_dict_28_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_28_code. See ss_notec_sing_dict_28_code for more information.

Column Name: ss_notec_sing_dict_29_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 29'

Column Name: ss_notec_sing_dict_29_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_29_code. See ss_notec_sing_dict_29_code for more information.

Column Name: ss_notec_sing_dict_2_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 2'

Column Name: ss_notec_sing_dict_2_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_2_code. See ss_notec_sing_dict_2_code for more information.

Column Name: ss_notec_sing_dict_30_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 30'

Column Name: ss_notec_sing_dict_30_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_30_code. See ss_notec_sing_dict_30_code for more information.

Column Name: ss_notec_sing_dict_31_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 31'

Column Name: ss_notec_sing_dict_31_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_31_code. See ss_notec_sing_dict_31_code for more information.

Column Name: ss_notec_sing_dict_32_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 32'

Column Name: ss_notec_sing_dict_32_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_32_code. See ss_notec_sing_dict_32_code for more information.

Column Name: ss_notec_sing_dict_33_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 33'

Column Name: ss_notec_sing_dict_33_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_33_code. See ss_notec_sing_dict_33_code for more information.

Column Name: ss_notec_sing_dict_34_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 34'

Column Name: ss_notec_sing_dict_34_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_34_code. See ss_notec_sing_dict_34_code for more information.

Column Name: ss_notec_sing_dict_35_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 35'

Column Name: ss_notec_sing_dict_35_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_35_code. See ss_notec_sing_dict_35_code for more information.

Column Name: ss_notec_sing_dict_36_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 36'

Column Name: ss_notec_sing_dict_36_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_36_code. See ss_notec_sing_dict_36_code for more information.

Column Name: ss_notec_sing_dict_37_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 37'

Column Name: ss_notec_sing_dict_37_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_37_code. See ss_notec_sing_dict_37_code for more information.

Column Name: ss_notec_sing_dict_38_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 38'

Column Name: ss_notec_sing_dict_38_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_38_code. See ss_notec_sing_dict_38_code for more information.

Column Name: ss_notec_sing_dict_39_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 39'

Column Name: ss_notec_sing_dict_39_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_39_code. See ss_notec_sing_dict_39_code for more information.

Column Name: ss_notec_sing_dict_3_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 3'

Column Name: ss_notec_sing_dict_3_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_3_code. See ss_notec_sing_dict_3_code for more information.

Column Name: ss_notec_sing_dict_40_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 40'

Column Name: ss_notec_sing_dict_40_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_40_code. See ss_notec_sing_dict_40_code for more information.

Column Name: ss_notec_sing_dict_41_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 41'

Column Name: ss_notec_sing_dict_41_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_41_code. See ss_notec_sing_dict_41_code for more information.

Column Name: ss_notec_sing_dict_42_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 42'

Column Name: ss_notec_sing_dict_42_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_42_code. See ss_notec_sing_dict_42_code for more information.

Column Name: ss_notec_sing_dict_43_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 43'

Column Name: ss_notec_sing_dict_43_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_43_code. See ss_notec_sing_dict_43_code for more information.

Column Name: ss_notec_sing_dict_44_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 44'

Column Name: ss_notec_sing_dict_44_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_44_code. See ss_notec_sing_dict_44_code for more information.

Column Name: ss_notec_sing_dict_45_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 45'

Column Name: ss_notec_sing_dict_45_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_45_code. See ss_notec_sing_dict_45_code for more information.

Column Name: ss_notec_sing_dict_46_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 46'

Column Name: ss_notec_sing_dict_46_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_46_code. See ss_notec_sing_dict_46_code for more information.

Column Name: ss_notec_sing_dict_47_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 47'

Column Name: ss_notec_sing_dict_47_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_47_code. See ss_notec_sing_dict_47_code for more information.

Column Name: ss_notec_sing_dict_48_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 48'

Column Name: ss_notec_sing_dict_48_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_48_code. See ss_notec_sing_dict_48_code for more information.

Column Name: ss_notec_sing_dict_49_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 49'

Column Name: ss_notec_sing_dict_49_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_49_code. See ss_notec_sing_dict_49_code for more information.

Column Name: ss_notec_sing_dict_4_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 4'

Column Name: ss_notec_sing_dict_4_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_4_code. See ss_notec_sing_dict_4_code for more information.

Column Name: ss_notec_sing_dict_50_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 50'

Column Name: ss_notec_sing_dict_50_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_50_code. See ss_notec_sing_dict_50_code for more information.

Column Name: ss_notec_sing_dict_5_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 5'

Column Name: ss_notec_sing_dict_5_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_5_code. See ss_notec_sing_dict_5_code for more information.

Column Name: ss_notec_sing_dict_6_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 6'

Column Name: ss_notec_sing_dict_6_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_6_code. See ss_notec_sing_dict_6_code for more information.

Column Name: ss_notec_sing_dict_7_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 7'

Column Name: ss_notec_sing_dict_7_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_7_code. See ss_notec_sing_dict_7_code for more information.

Column Name: ss_notec_sing_dict_8_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 8'

Column Name: ss_notec_sing_dict_8_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_8_code. See ss_notec_sing_dict_8_code for more information.

Column Name: ss_notec_sing_dict_9_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 9'

Column Name: ss_notec_sing_dict_9_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_9_code. See ss_notec_sing_dict_9_code for more information.

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: CWSTEMP.cw_patient_notes_supp_4

Table Description: This table is used as a pre-filing storage of the SYSTEM.cwpatientnotessupp4 table.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the service.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 50
Unique ID for a progress note.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: PREFILEID
Column Type: varchar

Max Length: 50

The unique ID associated with the prefiller.

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The user ID who last updated the service.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name who last updated the service.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: form_number

Column Type: varchar

Max Length: 50

'Form Number'

Column Name: option_desc

Column Type: varchar

Max Length: 81

The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: ss_notc_mult_dic_51_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 51'

Column Name: ss_notc_mult_dic_51_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mult_dic_51_code. See ss_notc_mult_dic_51_code for more information.

Column Name: ss_notc_mult_dic_52_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 52'

Column Name: ss_notc_mult_dic_52_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mult_dic_52_code. See ss_notc_mult_dic_52_code for more information.

Column Name: ss_notc_mult_dic_53_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 53'

Column Name: ss_notc_mult_dic_53_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mult_dic_53_code. See ss_notc_mult_dic_53_code for more information.

Column Name: ss_notc_mult_dic_54_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 54'

Column Name: ss_notc_mult_dic_54_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mult_dic_54_code. See ss_notc_mult_dic_54_code for more information.

Column Name: ss_notc_mult_dic_55_code

Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 55'

Column Name: ss_notc_mult_dic_55_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mult_dic_55_code. See ss_notc_mult_dic_55_code for more information.

Column Name: ss_notc_mult_dic_56_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 56'

Column Name: ss_notc_mult_dic_56_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mult_dic_56_code. See ss_notc_mult_dic_56_code for more information.

Column Name: ss_notc_mult_dic_57_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 57'

Column Name: ss_notc_mult_dic_57_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mult_dic_57_code. See ss_notc_mult_dic_57_code for more information.

Column Name: ss_notc_mult_dic_58_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 58'

Column Name: ss_notc_mult_dic_58_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mult_dic_58_code. See ss_notc_mult_dic_58_code for more information.

Column Name: ss_notc_mult_dic_59_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 59'

Column Name: ss_notc_mult_dic_59_value
Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_59_code. See ss_notc_mult_dic_59_code for more information.

Column Name: ss_notc_mult_dic_60_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 60'

Column Name: ss_notc_mult_dic_60_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_60_code. See ss_notc_mult_dic_60_code for more information.

Column Name: ss_notc_mult_dic_61_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 61'

Column Name: ss_notc_mult_dic_61_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_61_code. See ss_notc_mult_dic_61_code for more information.

Column Name: ss_notc_mult_dic_62_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 62'

Column Name: ss_notc_mult_dic_62_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_62_code. See ss_notc_mult_dic_62_code for more information.

Column Name: ss_notc_mult_dic_63_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 63'

Column Name: ss_notc_mult_dic_63_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_63_code. See ss_notc_mult_dic_63_code for more information.

Column Name: ss_notc_mult_dic_64_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 64'

Column Name: ss_notc_mult_dic_64_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_64_code. See ss_notc_mult_dic_64_code for more information.

Column Name: ss_notc_mult_dic_65_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 65'

Column Name: ss_notc_mult_dic_65_value

Column Type: varchar

Max Length: 265

The description associated with ss_notc_mult_dic_65_code. See ss_notc_mult_dic_65_code for more information.

Column Name: ss_notc_mult_dic_66_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 66'

Column Name: ss_notc_mult_dic_66_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_66_code. See ss_notc_mult_dic_66_code for more information.

Column Name: ss_notc_mult_dic_67_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 67'

Column Name: ss_notc_mult_dic_67_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_67_code. See ss_notc_mult_dic_67_code for more information.

Column Name: ss_notc_mult_dic_68_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 68'

Column Name: ss_notc_mult_dic_68_value

Column Type: varchar

Max Length: 255

The description associated with `ss_notc_mult_dic_68_code`. See `ss_notc_mult_dic_68_code` for more information.

Column Name: `ss_notc_mult_dic_69_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 69'

Column Name: `ss_notc_mult_dic_69_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_69_code`. See `ss_notc_mult_dic_69_code` for more information.

Column Name: `ss_notc_mult_dic_70_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 70'

Column Name: `ss_notc_mult_dic_70_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_70_code`. See `ss_notc_mult_dic_70_code` for more information.

Column Name: `ss_notc_mult_dic_71_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 71'

Column Name: `ss_notc_mult_dic_71_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_71_code`. See `ss_notc_mult_dic_71_code` for more information.

Column Name: `ss_notc_mult_dic_72_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 72'

Column Name: `ss_notc_mult_dic_72_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_72_code`. See `ss_notc_mult_dic_72_code` for more information.

Column Name: `ss_notc_mult_dic_73_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 73'

Column Name: ss_notc_mult_dic_73_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_73_code. See ss_notc_mult_dic_73_code for more information.

Column Name: ss_notc_mult_dic_74_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 74'

Column Name: ss_notc_mult_dic_74_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_74_code. See ss_notc_mult_dic_74_code for more information.

Column Name: ss_notc_mult_dic_75_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 75'

Column Name: ss_notc_mult_dic_75_value

Column Type: varchar

Max Length: 275

The description associated with ss_notc_mult_dic_75_code. See ss_notc_mult_dic_75_code for more information.

Column Name: ss_notc_mult_dic_76_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 76'

Column Name: ss_notc_mult_dic_76_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_76_code. See ss_notc_mult_dic_76_code for more information.

Column Name: ss_notc_mult_dic_77_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 77'

Column Name: ss_notc_mult_dic_77_value

Column Type: varchar

Max Length: 255

The description associated with `ss_notc_mult_dic_77_code`. See `ss_notc_mult_dic_77_code` for more information.

Column Name: `ss_notc_mult_dic_78_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 78'

Column Name: `ss_notc_mult_dic_78_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_78_code`. See `ss_notc_mult_dic_78_code` for more information.

Column Name: `ss_notc_mult_dic_79_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 79'

Column Name: `ss_notc_mult_dic_79_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_79_code`. See `ss_notc_mult_dic_79_code` for more information.

Column Name: `ss_notc_mult_dic_80_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 80'

Column Name: `ss_notc_mult_dic_80_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_80_code`. See `ss_notc_mult_dic_80_code` for more information.

Column Name: `ss_notc_sin_dic_51_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Single Response Dictionary 51'

Column Name: `ss_notc_sin_dic_51_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_sin_dic_51_code`. See `ss_notc_sin_dic_51_code` for more information.

Column Name: `ss_notc_sin_dic_52_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Single Response Dictionary 52'

Column Name: ss_notc_sin_dic_52_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_52_code. See ss_notc_sin_dic_52_code for more information.

Column Name: ss_notc_sin_dic_53_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 53'

Column Name: ss_notc_sin_dic_53_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_53_code. See ss_notc_sin_dic_53_code for more information.

Column Name: ss_notc_sin_dic_54_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 54'

Column Name: ss_notc_sin_dic_54_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_54_code. See ss_notc_sin_dic_54_code for more information.

Column Name: ss_notc_sin_dic_55_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 55'

Column Name: ss_notc_sin_dic_55_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_55_code. See ss_notc_sin_dic_55_code for more information.

Column Name: ss_notc_sin_dic_56_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 56'

Column Name: ss_notc_sin_dic_56_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_56_code. See ss_notc_sin_dic_56_code for more information.

Column Name: ss_notc_sin_dic_57_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 57'

Column Name: ss_notc_sin_dic_57_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_57_code. See ss_notc_sin_dic_57_code for more information.

Column Name: ss_notc_sin_dic_58_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 58'

Column Name: ss_notc_sin_dic_58_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_58_code. See ss_notc_sin_dic_58_code for more information.

Column Name: ss_note_mul_dict_59_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 59'

Column Name: ss_note_mul_dict_59_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_59_code limited to 255 characters. See ss_note_mul_dict_59_code for more information.

Column Name: ss_note_mul_dict_59_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_59_code. See ss_note_mul_dict_59_code for more information.

Column Name: ss_note_mul_dict_60_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 60'

Column Name: ss_note_mul_dict_60_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_60_code limited to 255 characters. See ss_note_mul_dict_60_code for more information.

Column Name: ss_note_mul_dict_60_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_60_code. See ss_note_mul_dict_60_code for more information.

Column Name: ss_note_mul_dict_61_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 61'

Column Name: ss_note_mul_dict_61_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_61_code limited to 255 characters. See ss_note_mul_dict_61_code for more information.

Column Name: ss_note_mul_dict_61_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_61_code. See ss_note_mul_dict_61_code for more information.

Column Name: ss_note_mul_dict_62_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 62'

Column Name: ss_note_mul_dict_62_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_62_code limited to 255 characters. See ss_note_mul_dict_62_code for more information.

Column Name: ss_note_mul_dict_62_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_62_code. See ss_note_mul_dict_62_code for more information.

Column Name: ss_note_mul_dict_63_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 63'

Column Name: ss_note_mul_dict_63_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_63_code limited to 255 characters. See ss_note_mul_dict_63_code for more information.

Column Name: ss_note_mul_dict_63_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_63_code. See ss_note_mul_dict_63_code for more information.

Column Name: ss_note_mul_dict_64_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 64'

Column Name: ss_note_mul_dict_64_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_64_code limited to 255 characters. See ss_note_mul_dict_64_code for more information.

Column Name: ss_note_mul_dict_64_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_64_code. See ss_note_mul_dict_64_code for more information.

Column Name: ss_note_mul_dict_65_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 65'

Column Name: ss_note_mul_dict_65_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_65_code limited to 255 characters. See ss_note_mul_dict_65_code for more information.

Column Name: ss_note_mul_dict_65_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_65_code. See ss_note_mul_dict_65_code for more information.

Column Name: ss_note_mul_dict_66_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 66'

Column Name: ss_note_mul_dict_66_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_66_code limited to 255 characters. See ss_note_mul_dict_66_code for more information.

Column Name: ss_note_mul_dict_66_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_66_code. See ss_note_mul_dict_66_code for more information.

Column Name: ss_note_mul_dict_67_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 67'

Column Name: ss_note_mul_dict_67_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_67_code limited to 255 characters. See ss_note_mul_dict_67_code for more information.

Column Name: ss_note_mul_dict_67_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_67_code. See ss_note_mul_dict_67_code for more information.

Column Name: ss_note_mul_dict_68_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 68'

Column Name: ss_note_mul_dict_68_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_68_code limited to 255 characters. See ss_note_mul_dict_68_code for more information.

Column Name: ss_note_mul_dict_68_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_68_code. See ss_note_mul_dict_68_code for more information.

Column Name: ss_note_mul_dict_69_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 69'

Column Name: ss_note_mul_dict_69_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_69_code limited to 255 characters. See ss_note_mul_dict_69_code for more information.

Column Name: ss_note_mul_dict_69_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_69_code. See ss_note_mul_dict_69_code for more information.

Column Name: ss_note_mul_dict_70_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 70'

Column Name: ss_note_mul_dict_70_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_70_code limited to 255 characters. See ss_note_mul_dict_70_code for more information.

Column Name: ss_note_mul_dict_70_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_70_code. See ss_note_mul_dict_70_code for more information.

Column Name: ss_note_mul_dict_71_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 71'

Column Name: ss_note_mul_dict_71_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_71_code limited to 255 characters. See ss_note_mul_dict_71_code for more information.

Column Name: ss_note_mul_dict_71_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_71_code. See ss_note_mul_dict_71_code for more information.

Column Name: ss_note_mul_dict_72_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 72'

Column Name: ss_note_mul_dict_72_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_72_code limited to 255 characters. See ss_note_mul_dict_72_code for more information.

Column Name: ss_note_mul_dict_72_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_72_code. See ss_note_mul_dict_72_code for more information.

Column Name: ss_note_mul_dict_73_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 73'

Column Name: ss_note_mul_dict_73_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_73_code limited to 255 characters. See ss_note_mul_dict_73_code for more information.

Column Name: ss_note_mul_dict_73_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_73_code. See ss_note_mul_dict_73_code for more information.

Column Name: ss_note_mul_dict_74_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 74'

Column Name: ss_note_mul_dict_74_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_74_code limited to 255 characters. See ss_note_mul_dict_74_code for more information.

Column Name: ss_note_mul_dict_74_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_74_code. See ss_note_mul_dict_74_code for more information.

Column Name: ss_note_mul_dict_75_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 75'

Column Name: ss_note_mul_dict_75_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_75_code limited to 255 characters. See ss_note_mul_dict_75_code for more information.

Column Name: ss_note_mul_dict_75_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_75_code. See ss_note_mul_dict_75_code for more information.

Column Name: ss_note_mul_dict_76_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 76'

Column Name: ss_note_mul_dict_76_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_76_code limited to 255 characters. See ss_note_mul_dict_76_code for more information.

Column Name: ss_note_mul_dict_76_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_76_code. See ss_note_mul_dict_76_code for more information.

Column Name: ss_note_mul_dict_77_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 77'

Column Name: ss_note_mul_dict_77_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_77_code limited to 255 characters. See ss_note_mul_dict_77_code for more information.

Column Name: ss_note_mul_dict_77_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_77_code. See ss_note_mul_dict_77_code for more information.

Column Name: ss_note_mul_dict_78_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 78'

Column Name: ss_note_mul_dict_78_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_78_code limited to 255 characters. See ss_note_mul_dict_78_code for more information.

Column Name: ss_note_mul_dict_78_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_78_code. See ss_note_mul_dict_78_code for more information.

Column Name: ss_note_mul_dict_79_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 79'

Column Name: ss_note_mul_dict_79_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_79_code limited to 255 characters. See ss_note_mul_dict_79_code for more information.

Column Name: ss_note_mul_dict_79_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_79_code. See ss_note_mul_dict_79_code for more information.

Column Name: ss_note_mul_dict_80_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 80'

Column Name: ss_note_mul_dict_80_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_80_code limited to 255 characters. See ss_note_mul_dict_80_code for more information.

Column Name: ss_note_mul_dict_80_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_80_code. See ss_note_mul_dict_80_code for more information.

Column Name: ss_note_scroll_text_51

Column Type: varchar

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 75'

Column Name: ss_note_sin_dict_75_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_75_code. See ss_note_sin_dict_75_code for more information.

Column Name: ss_note_sin_dict_76_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 76'

Column Name: ss_note_sin_dict_76_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_76_code. See ss_note_sin_dict_76_code for more information.

Column Name: ss_note_sin_dict_77_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 77'

Column Name: ss_note_sin_dict_77_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_77_code. See ss_note_sin_dict_77_code for more information.

Column Name: ss_note_sin_dict_78_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 78'

Column Name: ss_note_sin_dict_78_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_78_code. See ss_note_sin_dict_78_code for more information.

Column Name: ss_note_sin_dict_79_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 79'

Column Name: ss_note_sin_dict_79_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_79_code. See ss_note_sin_dict_79_code for more information.

Column Name: ss_note_sin_dict_80_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 80'

Column Name: ss_note_sin_dict_80_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_80_code. See ss_note_sin_dict_80_code for more information.

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: CWSTEMP.cw_patient_notes_supp_5

Table Description: This table is used as a pre-filing storage of the SYSTEM.cwpatientnotessupp5 table.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the service.

Column Name: data_entry_time

Column Type: varchar

Max Length: 10

The time the row was last updated.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The user name that last updated the row.

Column Name: EPISODE_NUMBER

Column Type: integer

The episode number associated with PATID.

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: NOT_uniqueid

Column Type: varchar

Max Length: 50

Unique ID for a note.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the data.

Column Name: PREFILEID

Column Type: varchar

Max Length: 50

The unique ID associated with the prefiller.

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The user ID who last updated the service.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name who last updated the service.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: ebp_code

Column Type: varchar

Max Length: 50

'Evidence-Based Practices'

Column Name: ebp_element_code

Column Type: varchar

Max Length: 50

'Evidence-Based Practice Elements'

Column Name: ebp_element_value

Column Type: varchar

Max Length: 32000

The description associated with ebp_element_code

Column Name: ebp_value

Column Type: varchar

Max Length: 32000

The description associated with ebp_code

Column Name: form_number

Column Type: varchar

Max Length: 50

'Form Number'

Column Name: option_desc

Column Type: varchar

Max Length: 81

The name of the form that last updated the row.

Column Name: option_id

Column Type: varchar

Max Length: 20

The unique ID of the form that last updated the row.

Column Name: ss_notc_mul_dic_100_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 100'

Column Name: ss_notc_mul_dic_100_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_100_code. See ss_notc_mul_dic_100_code for more information.

Column Name: ss_notc_mul_dic_101_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 101'

Column Name: ss_notc_mul_dic_101_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_101_code. See ss_notc_mul_dic_101_code for more information.

Column Name: ss_notc_mul_dic_102_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 102'

Column Name: ss_notc_mul_dic_102_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_102_code. See ss_notc_mul_dic_102_code for more information.

Column Name: ss_notc_mul_dic_103_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 103'

Column Name: ss_notc_mul_dic_103_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_103_code. See ss_notc_mul_dic_103_code for more information.

Column Name: ss_notc_mul_dic_104_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 104'

Column Name: ss_notc_mul_dic_104_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_104_code. See ss_notc_mul_dic_104_code for more information.

Column Name: ss_notc_mul_dic_105_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 105'

Column Name: ss_notc_mul_dic_105_value

Column Type: varchar

Max Length: 275

The description associated with ss_notc_mul_dic_105_code. See ss_notc_mul_dic_105_code for more information.

Column Name: ss_notc_mul_dic_106_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 106'

Column Name: ss_notc_mul_dic_106_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_106_code. See ss_notc_mul_dic_106_code for more information.

Column Name: ss_notc_mul_dic_107_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 107'

Column Name: ss_notc_mul_dic_107_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_107_code. See ss_notc_mul_dic_107_code for more information.

Column Name: ss_notc_mul_dic_108_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 108'

Column Name: ss_notc_mul_dic_108_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_108_code. See ss_notc_mul_dic_108_code for more information.

Column Name: ss_notc_mul_dic_109_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 109'

Column Name: ss_notc_mul_dic_109_value

Column Type: varchar

Max Length: 255

The description associated with `ss_notc_mul_dic_109_code`. See `ss_notc_mul_dic_109_code` for more information.

Column Name: `ss_notc_mul_dic_110_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Multiple Response Dictionary 110'

Column Name: `ss_notc_mul_dic_110_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_mul_dic_110_code`. See `ss_notc_mul_dic_110_code` for more information.

Column Name: `ss_notc_mul_dic_81_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Multiple Response Dictionary 81'

Column Name: `ss_notc_mul_dic_81_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_mul_dic_81_code`. See `ss_notc_mul_dic_81_code` for more information.

Column Name: `ss_notc_mul_dic_82_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Multiple Response Dictionary 82'

Column Name: `ss_notc_mul_dic_82_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_mul_dic_82_code`. See `ss_notc_mul_dic_82_code` for more information.

Column Name: `ss_notc_mul_dic_83_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Multiple Response Dictionary 83'

Column Name: `ss_notc_mul_dic_83_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_mul_dic_83_code`. See `ss_notc_mul_dic_83_code` for more information.

Column Name: `ss_notc_mul_dic_84_code`
Column Type: `varchar`
Max Length: 50

'SS Note Copy Multiple Response Dictionary 84'

Column Name: ss_notc_mul_dic_84_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_84_code. See ss_notc_mul_dic_84_code for more information.

Column Name: ss_notc_mul_dic_85_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 85'

Column Name: ss_notc_mul_dic_85_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_85_code. See ss_notc_mul_dic_85_code for more information.

Column Name: ss_notc_mul_dic_86_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 86'

Column Name: ss_notc_mul_dic_86_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_86_code. See ss_notc_mul_dic_86_code for more information.

Column Name: ss_notc_mul_dic_87_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 87'

Column Name: ss_notc_mul_dic_87_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_87_code. See ss_notc_mul_dic_87_code for more information.

Column Name: ss_notc_mul_dic_88_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 88'

Column Name: ss_notc_mul_dic_88_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_88_code. See ss_notc_mul_dic_88_code for more information.

Column Name: ss_notc_mul_dic_89_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 89'

Column Name: ss_notc_mul_dic_89_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_89_code. See ss_notc_mul_dic_89_code for more information.

Column Name: ss_notc_mul_dic_90_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 90'

Column Name: ss_notc_mul_dic_90_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_90_code. See ss_notc_mul_dic_90_code for more information.

Column Name: ss_notc_mul_dic_91_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 91'

Column Name: ss_notc_mul_dic_91_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_91_code. See ss_notc_mul_dic_91_code for more information.

Column Name: ss_notc_mul_dic_92_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 92'

Column Name: ss_notc_mul_dic_92_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_92_code. See ss_notc_mul_dic_92_code for more information.

Column Name: ss_notc_mul_dic_93_code
Column Type: varchar
Max Length: 50

'SS Note Copy Multiple Response Dictionary 93'

Column Name: ss_notc_mul_dic_93_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_93_code. See ss_notc_mul_dic_93_code for more information.

Column Name: ss_notc_mul_dic_94_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 94'

Column Name: ss_notc_mul_dic_94_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_94_code. See ss_notc_mul_dic_94_code for more information.

Column Name: ss_notc_mul_dic_95_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 95'

Column Name: ss_notc_mul_dic_95_value

Column Type: varchar

Max Length: 265

The description associated with ss_notc_mul_dic_95_code. See ss_notc_mul_dic_95_code for more information.

Column Name: ss_notc_mul_dic_96_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 96'

Column Name: ss_notc_mul_dic_96_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_96_code. See ss_notc_mul_dic_96_code for more information.

Column Name: ss_notc_mul_dic_97_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 97'

Column Name: ss_notc_mul_dic_97_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_97_code. See ss_notc_mul_dic_97_code for more information.

Column Name: ss_notc_mul_dic_98_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 98'

Column Name: ss_notc_mul_dic_98_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_98_code. See ss_notc_mul_dic_98_code for more information.

Column Name: ss_notc_mul_dic_99_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 99'

Column Name: ss_notc_mul_dic_99_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_99_code. See ss_notc_mul_dic_99_code for more information.

Column Name: ss_notc_sin_dic_100_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 100'

Column Name: ss_notc_sin_dic_100_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_100_code. See ss_notc_sin_dic_100_code for more information.

Column Name: ss_notc_sin_dic_101_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 101'

Column Name: ss_notc_sin_dic_101_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_101_code. See ss_notc_sin_dic_101_code for more information.

Column Name: ss_notc_sin_dic_102_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 102'

Column Name: ss_notc_sin_dic_102_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_102_code. See ss_notc_sin_dic_102_code for more information.

Column Name: ss_notc_sin_dic_103_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 103'

Column Name: ss_notc_sin_dic_103_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_103_code. See ss_notc_sin_dic_103_code for more information.

Column Name: ss_notc_sin_dic_104_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 104'

Column Name: ss_notc_sin_dic_104_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_104_code. See ss_notc_sin_dic_104_code for more information.

Column Name: ss_notc_sin_dic_105_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 105'

Column Name: ss_notc_sin_dic_105_value

Column Type: varchar

Max Length: 275

The description associated with ss_notc_sin_dic_105_code. See ss_notc_sin_dic_105_code for more information.

Column Name: ss_notc_sin_dic_106_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 106'

Column Name: ss_notc_sin_dic_106_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_106_code. See ss_notc_sin_dic_106_code for more information.

Column Name: ss_notc_sin_dic_107_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 107'

Column Name: ss_notc_sin_dic_107_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_107_code. See ss_notc_sin_dic_107_code for more information.

Column Name: ss_notc_sin_dic_108_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 108'

Column Name: ss_notc_sin_dic_108_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_108_code. See ss_notc_sin_dic_108_code for more information.

Column Name: ss_notc_sin_dic_109_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 109'

Column Name: ss_notc_sin_dic_109_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_109_code. See ss_notc_sin_dic_109_code for more information.

Column Name: ss_notc_sin_dic_110_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 110'

Column Name: ss_notc_sin_dic_110_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_110_code. See ss_notc_sin_dic_110_code for more information.

Column Name: ss_notc_sin_dic_81_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 81'

Column Name: ss_notc_sin_dic_81_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_81_code. See ss_notc_sin_dic_81_code for more information.

Column Name: ss_notc_sin_dic_82_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 82'

Column Name: ss_notc_sin_dic_82_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_82_code. See ss_notc_sin_dic_82_code for more information.

Column Name: ss_notc_sin_dic_83_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 83'

Column Name: ss_notc_sin_dic_83_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_83_code. See ss_notc_sin_dic_83_code for more information.

Column Name: ss_notc_sin_dic_84_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 84'

Column Name: ss_notc_sin_dic_84_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_84_code. See ss_notc_sin_dic_84_code for more information.

Column Name: ss_notc_sin_dic_85_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 85'

Column Name: ss_notc_sin_dic_85_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_85_code. See ss_notc_sin_dic_85_code for more information.

Column Name: ss_notc_sin_dic_86_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 86'

Column Name: ss_notc_sin_dic_86_value
Column Type: varchar
Max Length: 255

Column Name: `ss_notc_sin_dic_95_value`
Column Type: `varchar`
Max Length: 265
The description associated with `ss_notc_sin_dic_95_code`. See `ss_notc_sin_dic_95_code` for more information.

Column Name: `ss_notc_sin_dic_96_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Single Response Dictionary 96'

Column Name: `ss_notc_sin_dic_96_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_sin_dic_96_code`. See `ss_notc_sin_dic_96_code` for more information.

Column Name: `ss_notc_sin_dic_97_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Single Response Dictionary 97'

Column Name: `ss_notc_sin_dic_97_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_sin_dic_97_code`. See `ss_notc_sin_dic_97_code` for more information.

Column Name: `ss_notc_sin_dic_98_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Single Response Dictionary 98'

Column Name: `ss_notc_sin_dic_98_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_sin_dic_98_code`. See `ss_notc_sin_dic_98_code` for more information.

Column Name: `ss_notc_sin_dic_99_code`
Column Type: `varchar`
Max Length: 50

'SS Note Copy Single Response Dictionary 99'

Column Name: ss_notc_sin_dic_99_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_99_code. See ss_notc_sin_dic_99_code for more information.

Column Name: ss_note_mul_dic_100_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 100'

Column Name: ss_note_mul_dic_100_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_100_code limited to 255 characters. See ss_note_mul_dic_100_code for more information.

Column Name: ss_note_mul_dic_100_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_100_code. See ss_note_mul_dic_100_code for more information.

Column Name: ss_note_mul_dic_101_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 101'

Column Name: ss_note_mul_dic_101_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_101_code limited to 255 characters. See ss_note_mul_dic_101_code for more information.

Column Name: ss_note_mul_dic_101_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_101_code. See ss_note_mul_dic_101_code for more information.

Column Name: ss_note_mul_dic_102_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 102'

Column Name: ss_note_mul_dic_102_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_102_code limited to 255 characters. See ss_note_mul_dic_102_code for more information.

Column Name: ss_note_mul_dic_102_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_102_code. See ss_note_mul_dic_102_code for more information.

Column Name: ss_note_mul_dic_103_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 103'

Column Name: ss_note_mul_dic_103_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_103_code limited to 255 characters. See ss_note_mul_dic_103_code for more information.

Column Name: ss_note_mul_dic_103_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_103_code. See ss_note_mul_dic_103_code for more information.

Column Name: ss_note_mul_dic_104_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 104'

Column Name: ss_note_mul_dic_104_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_104_code limited to 255 characters. See ss_note_mul_dic_104_code for more information.

Column Name: ss_note_mul_dic_104_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_104_code. See ss_note_mul_dic_104_code for more information.

Column Name: ss_note_mul_dic_105_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 105'

Column Name: ss_note_mul_dic_105_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_105_code limited to 255 characters. See ss_note_mul_dic_105_code for more information.

Column Name: ss_note_mul_dic_105_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_105_code. See ss_note_mul_dic_105_code for more information.

Column Name: ss_note_mul_dic_106_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 106'

Column Name: ss_note_mul_dic_106_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_106_code limited to 255 characters. See ss_note_mul_dic_106_code for more information.

Column Name: ss_note_mul_dic_106_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_106_code. See ss_note_mul_dic_106_code for more information.

Column Name: ss_note_mul_dic_107_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 107'

Column Name: ss_note_mul_dic_107_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_107_code limited to 255 characters. See ss_note_mul_dic_107_code for more information.

Column Name: ss_note_mul_dic_107_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_107_code. See ss_note_mul_dic_107_code for more information.

Column Name: ss_note_mul_dic_108_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 108'

Column Name: ss_note_mul_dic_108_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_108_code limited to 255 characters. See ss_note_mul_dic_108_code for more information.

Column Name: ss_note_mul_dic_108_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_108_code. See ss_note_mul_dic_108_code for more information.

Column Name: ss_note_mul_dic_109_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 109'

Column Name: ss_note_mul_dic_109_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_109_code limited to 255 characters. See ss_note_mul_dic_109_code for more information.

Column Name: ss_note_mul_dic_109_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_109_code. See ss_note_mul_dic_109_code for more information.

Column Name: ss_note_mul_dic_110_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 110'

Column Name: ss_note_mul_dic_110_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_110_code limited to 255 characters. See ss_note_mul_dic_110_code for more information.

Column Name: ss_note_mul_dic_110_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_110_code. See ss_note_mul_dic_110_code for more information.

Column Name: ss_note_mul_dic_81_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 81'

Column Name: ss_note_mul_dic_81_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_81_code limited to 255 characters. See ss_note_mul_dic_81_code for more information.

Column Name: ss_note_mul_dic_81_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_81_code. See ss_note_mul_dic_81_code for more information.

Column Name: ss_note_mul_dic_82_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 82'

Column Name: ss_note_mul_dic_82_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_82_code limited to 255 characters. See ss_note_mul_dic_82_code for more information.

Column Name: ss_note_mul_dic_82_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_82_code. See ss_note_mul_dic_82_code for more information.

Column Name: ss_note_mul_dic_83_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 83'

Column Name: ss_note_mul_dic_83_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_83_code limited to 255 characters. See ss_note_mul_dic_83_code for more information.

Column Name: ss_note_mul_dic_83_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_83_code. See ss_note_mul_dic_83_code for more information.

Column Name: ss_note_mul_dic_84_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 84'

Column Name: ss_note_mul_dic_84_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_84_code limited to 255 characters. See ss_note_mul_dic_84_code for more information.

Column Name: ss_note_mul_dic_84_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_84_code. See ss_note_mul_dic_84_code for more information.

Column Name: ss_note_mul_dic_85_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 85'

Column Name: ss_note_mul_dic_85_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_85_code limited to 255 characters. See ss_note_mul_dic_85_code for more information.

Column Name: ss_note_mul_dic_85_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_85_code. See ss_note_mul_dic_85_code for more information.

Column Name: ss_note_mul_dic_86_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 86'

Column Name: ss_note_mul_dic_86_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_86_code limited to 255 characters. See ss_note_mul_dic_86_code for more information.

Column Name: ss_note_mul_dic_86_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_86_code. See ss_note_mul_dic_86_code for more information.

Column Name: ss_note_mul_dic_87_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 87'

Column Name: ss_note_mul_dic_87_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_87_code limited to 255 characters. See ss_note_mul_dic_87_code for more information.

Column Name: ss_note_mul_dic_87_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_87_code. See ss_note_mul_dic_87_code for more information.

Column Name: ss_note_mul_dic_88_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 88'

Column Name: ss_note_mul_dic_88_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_88_code limited to 255 characters. See ss_note_mul_dic_88_code for more information.

Column Name: ss_note_mul_dic_88_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_88_code. See ss_note_mul_dic_88_code for more information.

Column Name: ss_note_mul_dic_89_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 89'

Column Name: ss_note_mul_dic_89_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_89_code limited to 255 characters. See ss_note_mul_dic_89_code for more information.

Column Name: ss_note_mul_dic_89_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_89_code. See ss_note_mul_dic_89_code for more information.

Column Name: ss_note_mul_dic_90_code

Column Type: varchar

Max Length: 20
'SS Note Multi Response Dictionary 90'

Column Name: ss_note_mul_dic_90_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dic_90_code limited to 255 characters. See ss_note_mul_dic_90_code for more information.

Column Name: ss_note_mul_dic_90_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dic_90_code. See ss_note_mul_dic_90_code for more information.

Column Name: ss_note_mul_dic_91_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 91'

Column Name: ss_note_mul_dic_91_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dic_91_code limited to 255 characters. See ss_note_mul_dic_91_code for more information.

Column Name: ss_note_mul_dic_91_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dic_91_code. See ss_note_mul_dic_91_code for more information.

Column Name: ss_note_mul_dic_92_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 92'

Column Name: ss_note_mul_dic_92_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dic_92_code limited to 255 characters. See ss_note_mul_dic_92_code for more information.

Column Name: ss_note_mul_dic_92_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dic_92_code. See ss_note_mul_dic_92_code for more information.

Column Name: ss_note_mul_dic_93_code

Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 93'

Column Name: ss_note_mul_dic_93_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dic_93_code limited to 255 characters. See ss_note_mul_dic_93_code for more information.

Column Name: ss_note_mul_dic_93_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dic_93_code. See ss_note_mul_dic_93_code for more information.

Column Name: ss_note_mul_dic_94_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 94'

Column Name: ss_note_mul_dic_94_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dic_94_code limited to 255 characters. See ss_note_mul_dic_94_code for more information.

Column Name: ss_note_mul_dic_94_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dic_94_code. See ss_note_mul_dic_94_code for more information.

Column Name: ss_note_mul_dic_95_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 95'

Column Name: ss_note_mul_dic_95_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dic_95_code limited to 255 characters. See ss_note_mul_dic_95_code for more information.

Column Name: ss_note_mul_dic_95_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dic_95_code. See ss_note_mul_dic_95_code for more information.

Column Name: ss_note_mul_dic_96_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 96'

Column Name: ss_note_mul_dic_96_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dic_96_code limited to 255 characters. See ss_note_mul_dic_96_code for more information.

Column Name: ss_note_mul_dic_96_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dic_96_code. See ss_note_mul_dic_96_code for more information.

Column Name: ss_note_mul_dic_97_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 97'

Column Name: ss_note_mul_dic_97_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dic_97_code limited to 255 characters. See ss_note_mul_dic_97_code for more information.

Column Name: ss_note_mul_dic_97_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dic_97_code. See ss_note_mul_dic_97_code for more information.

Column Name: ss_note_mul_dic_98_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 98'

Column Name: ss_note_mul_dic_98_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dic_98_code limited to 255 characters. See ss_note_mul_dic_98_code for more information.

Column Name: ss_note_mul_dic_98_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dic_98_code. See ss_note_mul_dic_98_code for more information.

The description associated with ss_note_sin_dic_103_code. See ss_note_sin_dic_103_code for more information.

Column Name: ss_note_sin_dic_104_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 104'

Column Name: ss_note_sin_dic_104_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_104_code. See ss_note_sin_dic_104_code for more information.

Column Name: ss_note_sin_dic_105_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 105'

Column Name: ss_note_sin_dic_105_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_105_code. See ss_note_sin_dic_105_code for more information.

Column Name: ss_note_sin_dic_106_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 106'

Column Name: ss_note_sin_dic_106_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_106_code. See ss_note_sin_dic_106_code for more information.

Column Name: ss_note_sin_dic_107_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 107'

Column Name: ss_note_sin_dic_107_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_107_code. See ss_note_sin_dic_107_code for more information.

Column Name: ss_note_sin_dic_108_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 108'

Column Name: ss_note_sin_dic_108_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_108_code. See ss_note_sin_dic_108_code for more information.

Column Name: ss_note_sin_dic_109_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 109'

Column Name: ss_note_sin_dic_109_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_109_code. See ss_note_sin_dic_109_code for more information.

Column Name: ss_note_sin_dic_110_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 110'

Column Name: ss_note_sin_dic_110_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_110_code. See ss_note_sin_dic_110_code for more information.

Column Name: ss_note_sin_dic_81_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 81'

Column Name: ss_note_sin_dic_81_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_81_code. See ss_note_sin_dic_81_code for more information.

Column Name: ss_note_sin_dic_82_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 82'

Column Name: ss_note_sin_dic_82_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dic_82_code. See ss_note_sin_dic_82_code for more information.

Column Name: ss_note_sin_dic_83_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 83'

Column Name: ss_note_sin_dic_83_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dic_83_code. See ss_note_sin_dic_83_code for more information.

Column Name: ss_note_sin_dic_84_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 84'

Column Name: ss_note_sin_dic_84_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dic_84_code. See ss_note_sin_dic_84_code for more information.

Column Name: ss_note_sin_dic_85_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 85'

Column Name: ss_note_sin_dic_85_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dic_85_code. See ss_note_sin_dic_85_code for more information.

Column Name: ss_note_sin_dic_86_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 86'

Column Name: ss_note_sin_dic_86_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_86_code. See ss_note_sin_dic_86_code for more information.

Column Name: ss_note_sin_dic_87_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 87'

Column Name: ss_note_sin_dic_87_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_87_code. See ss_note_sin_dic_87_code for more information.

Column Name: ss_note_sin_dic_88_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 88'

Column Name: ss_note_sin_dic_88_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_88_code. See ss_note_sin_dic_88_code for more information.

Column Name: ss_note_sin_dic_89_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 89'

Column Name: ss_note_sin_dic_89_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_89_code. See ss_note_sin_dic_89_code for more information.

Column Name: ss_note_sin_dic_90_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 90'

Column Name: ss_note_sin_dic_90_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_90_code. See ss_note_sin_dic_90_code for more information.

Column Name: ss_note_sin_dic_91_code

Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 91'

Column Name: ss_note_sin_dic_91_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dic_91_code. See ss_note_sin_dic_91_code for more information.

Column Name: ss_note_sin_dic_92_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 92'

Column Name: ss_note_sin_dic_92_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dic_92_code. See ss_note_sin_dic_92_code for more information.

Column Name: ss_note_sin_dic_93_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 93'

Column Name: ss_note_sin_dic_93_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dic_93_code. See ss_note_sin_dic_93_code for more information.

Column Name: ss_note_sin_dic_94_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 94'

Column Name: ss_note_sin_dic_94_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dic_94_code. See ss_note_sin_dic_94_code for more information.

Column Name: ss_note_sin_dic_95_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 95'

Column Name: ss_note_sin_dic_95_value
Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_95_code. See ss_note_sin_dic_95_code for more information.

Column Name: ss_note_sin_dic_96_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 96'

Column Name: ss_note_sin_dic_96_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_96_code. See ss_note_sin_dic_96_code for more information.

Column Name: ss_note_sin_dic_97_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 97'

Column Name: ss_note_sin_dic_97_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_97_code. See ss_note_sin_dic_97_code for more information.

Column Name: ss_note_sin_dic_98_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 98'

Column Name: ss_note_sin_dic_98_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_98_code. See ss_note_sin_dic_98_code for more information.

Column Name: ss_note_sin_dic_99_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 99'

Column Name: ss_note_sin_dic_99_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_99_code. See ss_note_sin_dic_99_code for more information.

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: CWSTEMP.cw_patient_notes_supp_6

Table Description: This table is used as a pre-filing storage of the SYSTEM.cwpatientnotessupp6 table.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the service.

Column Name: data_entry_time

Column Type: varchar

Max Length: 10

The time the row was last updated.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The user name that last updated the row.

Column Name: EPISODE_NUMBER

Column Type: integer

The episode number associated with PATID.

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: NOT_uniqueid

Column Type: varchar

Max Length: 50

Unique ID for a note.

Column Name: PATID

Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: PREFILEID
Column Type: varchar
Max Length: 50
The unique ID associated with the prefiler.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the service.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the service.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: form_number
Column Type: varchar
Max Length: 50
'Form Number'

Column Name: option_desc
Column Type: varchar
Max Length: 81
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: ss_note_20_char_text_51
Column Type: varchar
Max Length: 20
SS Note 20 Character 51

Column Name: ss_note_20_char_text_52
Column Type: varchar

Max Length: 255

Column Name: ebps_sh_val
Column Type: varchar
Max Length: 255

Column Name: ebps_value
Column Type: varchar
Max Length: 4096

Column Name: unique_note_id
Column Type: integer

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: SYSTEM.cw_note_to_do

Table Description: This table returns data stored with to-do's from progress notes.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer
The system code in which the data is stored.

Column Name: JOIN_TO_TX_HISTORY
Column Type: varchar
Max Length: 40
The unique ID for a row.

Column Name: PATID
Column Type: varchar
Max Length: 20
Client ID

Column Name: TODO_ID
Column Type: varchar
Max Length: 20
The unique ID for a to-do note.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: SYSTEM.cw_note_todo_link

Table Description: Progress Notes ToDo ID Link for ToDo's History.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer
The system code in which the data is stored.

Column Name: NOTuniqueid
Column Type: varchar
Max Length: 50
The unique ID for a progress note.

Column Name: PATID
Column Type: varchar
Max Length: 20
Client ID

Column Name: to_do_id
Column Type: varchar
Max Length: 20
Unique ID for a to-do note.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: SYSTEM.cw_patient_notes

Table Description: This table returns the information stored in the 'Inpatient Progress Notes', 'Inpatient Progress Notes (Diagnosis Entry)', 'Progress Notes (Group and Individual)', 'Ambulatory Progress Notes', and 'Ambulatory Progress Notes (Diagnosis Entry)' forms.

Column Name: blank_row_id
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 20
The unique ID associated with the note.

Column Name: notes_field
Column Type: varchar
Max Length: 32700
The written note information.

Column Name: note_type_code
Column Type: varchar
Max Length: 50
'Note Type'

Column Name: note_type_value

Column Type: varchar

Max Length: 40

The description associated with note_type_code. See note_type_code for more information.

Column Name: note_time

Column Type: varchar

Max Length: 25

'Note Time'

Column Name: EPISODE_NUMBER

Column Type: integer

The episode number associated with PATID.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The user name that last updated the row.

Column Name: New_Existing_Service_code

Column Type: varchar

Max Length: 5

'Progress Note For'

Column Name: New_Existing_Service_value

Column Type: varchar

Max Length: 40

The description associated with New_Existing_Service_code. See New_Existing_Service_code for more information.

Column Name: service_program_value

Column Type: varchar

Max Length: 40

The description associated with service_program_code. See service_program_code for more information.

Column Name: note_addresses

Column Type: varchar

Max Length: 40

'Note Addresses Which Existing Service/Appointment'

Column Name: note_add_which_tp_plan_prob

Column Type: varchar
Max Length: 32700
The treatment plan problem to add to the note.

Column Name: Tx_Note_UniqueId
Column Type: varchar
Max Length: 40
The unique ID associated with the treatment.

Column Name: service_charge_value
Column Type: varchar
Max Length: 40
The description associated with service_charge_code. See service_charge_code for more information.

Column Name: GROUP_ID
Column Type: varchar
Max Length: 10
'Group Name Or Number'

Column Name: JOIN_TO_TX_HISTORY
Column Type: varchar
Max Length: 40
The unique ID that joins the note to the service.

Column Name: Option_Desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: Option_Id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: TODO_ID
Column Type: varchar
Max Length: 20
'To Do Id'

Column Name: add_on_notes
Column Type: varchar
Max Length: 32768
The add-on notes.

Column Name: add_svc_info_code
Column Type: varchar
Max Length: 40
The additional service information.

Column Name: add_svc_info_shval

Column Type: varchar

Max Length: 255

The description associated with add_svc_info_code limited to 255 characters. See add_svc_info_code for more information.

Column Name: add_svc_info_value

Column Type: varchar

Max Length: 4096

The description associated with add_svc_info_code. See add_svc_info_code for more information.

Column Name: aps_link

Column Type: varchar

Max Length: 40

'Note Addresses Which Existing Appointment'

Column Name: billing_status_code

Column Type: varchar

Max Length: 50

'Service Status'

Column Name: billing_status_value

Column Type: varchar

Max Length: 50

The description associated with billing_status_code. See billing_status_code for more information.

Column Name: calpm_ebpss_csi_code

Column Type: varchar

Max Length: 50

'Evidence-Based Practices / Service Strategies (CSI)'

Column Name: calpm_ebpss_csi_value

Column Type: varchar

Max Length: 200

The description associated with calpm_ebpss_csi_code. See calpm_ebpss_csi_code for more information.

Column Name: calpm_ebpss_csi_value_long

Column Type: varchar

Max Length: 4096

The description associated with calpm_ebpss_csi_value_code. See calpm_ebpss_csi_value_code for more information.

Column Name: client_prob_list_codes

Column Type: varchar

Max Length: 50

The codes associated with the client problem list.

Column Name: client_prob_list_shvals

Column Type: varchar

Max Length: 255

The description associated with client_prob_list_code limited to 255 characters. See client_prob_list_code for more information.

Column Name: client_prob_list_vals

Column Type: varchar

Max Length: 32700

The description associated with client_prob_list_code. See client_prob_list_code for more information.

Column Name: clinical_instructions

Column Type: varchar

Max Length: 32700

'Clinical Instructions'

Column Name: clinical_quality_code

Column Type: varchar

Max Length: 255

'Clinical Quality Indicators'

Column Name: clinical_quality_sh_val

Column Type: varchar

Max Length: 255

'The description associated with clinical_quality_code. See clinical_quality_code for more information.'

Column Name: clinical_quality_value

Column Type: varchar

Max Length: 4096

'The description associated with clinical_quality_code. See clinical_quality_code for more information.'

Column Name: confidential_note

Column Type: varchar

Max Length: 50

The confidential note.

Column Name: co_pract_duration

Column Type: numeric

The first co-practitioner duration.

Column Name: co_pract2_duration

Column Type: numeric

The second co-practitioner duration.

Column Name: co_practitioner_id

Column Type: varchar

Max Length: 15

The first co-practitioner ID.

Column Name: co_practitioner_id_2

Column Type: varchar

Max Length: 15

The second co-practitioner ID.

Column Name: co_practitioner_name
Column Type: varchar
Max Length: 40
The name associated with co_practitioner_id.

Column Name: co_practitioner_name_2
Column Type: varchar
Max Length: 40
The name associated with co_practitioner_id_2.

Column Name: co_sign_to_do_user
Column Type: varchar
Max Length: 50
'User To Send Co-Sign To Do Item To'

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 40
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: date_of_group_service
Column Type: date
The date of the group service.

Column Name: date_of_note
Column Type: date
The date of the note.

Column Name: date_of_service
Column Type: date
The date of the service.

Column Name: discipline_code
Column Type: varchar
Max Length: 40
'Discipline'

Column Name: discipline_value
Column Type: varchar
Max Length: 40
The description associated with discipline_code. See discipline_code for more information.

Column Name: document_routing_status
Column Type: varchar
Max Length: 50
Status of the document

Column Name: draft_final_code
Column Type: varchar
Max Length: 5
'Draft/Final'

Column Name: draft_final_value
Column Type: varchar
Max Length: 40
The description associated with draft_final_code. See draft_final_code for more information.

Column Name: ebps_code
Column Type: varchar
Max Length: 255
'Evidence Based Practices'

Column Name: ebps_sh_val

Column Type: varchar

Max Length: 255

'The description associated with ebps_code. See ebps_code for more information.'

Column Name: ebps_value

Column Type: varchar

Max Length: 4096

'The description associated with ebps_code. See ebps_code for more information.'

Column Name: external_system_id

Column Type: varchar

Max Length: 255

'External System Identifier'

Column Name: finalized_signature

Column Type: varchar

Max Length: 255

'Finalized Signature'

Column Name: has_nonmed_diag_flg_code

Column Type: varchar

Max Length: 50

The non-medical diagnosis flag.

Column Name: has_nonmed_diag_flg_value

Column Type: varchar

Max Length: 50

The description associated with has_nonmed_diag_flg_code. See has_nonmed_diag_flg_code for more information.

Column Name: jointodiagnosisobject1

Column Type: varchar

Max Length: 40

'Diagnosis 1'

Column Name: jointodiagnosisobject2

Column Type: varchar

Max Length: 40

'Diagnosis 2'

Column Name: jointodiagnosisobject3

Column Type: varchar

Max Length: 40

'Diagnosis 3'

Column Name: jointodiagnosisobject4

Column Type: varchar

Max Length: 40

'Diagnosis 4'

Column Name: location_code

Column Type: varchar

Max Length: 50

The location of the service.

Column Name: location_value

Column Type: varchar

Max Length: 40

The description associated with location_code. See location_code for more information.

Column Name: medical_diag1_DSM_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag1_DSM_code. See medical_diag1_DSM_code for more information.

Column Name: medical_diag_1_icd10_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 1 ICD 10'

Column Name: medical_diag_1_icd10_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_1_icd10_code. See medical_diag_1_icd10_code for more information.

Column Name: medical_diag_1_icd9_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 1 ICD 9'

Column Name: medical_diag_1_icd9_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_1_icd9_code. See medical_diag_1_icd9_code for more information.

Column Name: medical_diag_1_imo_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_1_imo_code. See medical_diag_1_imo_code for more information.

Column Name: medical_diag2_DSM_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag2_DSM_code. See medical_diag2_DSM_code for more information.

Column Name: medical_diag_2_icd10_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 2 ICD 10'

Column Name: medical_diag_2_icd10_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_2_icd10_code. See medical_diag_2_icd10_code for more information.

Column Name: medical_diag_2_icd9_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 2 ICD 9'

Column Name: medical_diag_2_icd9_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_2_icd9_code. See medical_diag_2_icd9_code for more information.

Column Name: medical_diag_2_imo_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_2_imo_code. See medical_diag_2_imo_code for more information.

Column Name: medical_diag_3_icd10_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 3 ICD 10'

Column Name: medical_diag_3_icd10_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_3_icd10_code. See medical_diag_3_icd10_code for more information.

Column Name: medical_diag_3_icd9_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 3 ICD 9'

Column Name: medical_diag_3_icd9_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_3_icd9_code. See medical_diag_3_icd9_code for more information.

Column Name: medical_diag_3_imo_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_3_imo_code. See medical_diag_3_imo_code for more information.

Column Name: medical_diag_4_icd10_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 4 ICD 10'

Column Name: medical_diag_4_icd10_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_4_icd10_code. See medical_diag_4_icd10_code for more information.

Column Name: medical_diag_4_icd9_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 4 ICD 9'

Column Name: medical_diag_4_icd9_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_4_icd9_code. See medical_diag_4_icd9_code for more information.

Column Name: medical_diag_4_imo_value

Column Type: varchar

Max Length: 40

The description associated with medical_diag_4_imo_code. See medical_diag_4_imo_code for more information.

Column Name: medical_diagnosis_1_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 1'

Column Name: medical_diagnosis_1_value

Column Type: varchar

Max Length: 32700

The description associated with medical_diagnosis_1_code. See medical_diagnosis_1_code for more information.

Column Name: medical_diagnosis_2_code

Column Type: varchar

Max Length: 40

'Medical Diagnosis 2'

Column Name: medical_diagnosis_2_value

Column Type: varchar

Max Length: 32700

The description associated with medical_diagnosis_2_code. See medical_diagnosis_2_code for more information.

Column Name: medical_diagnosis_3_code

Column Type: varchar

Max Length: 50

'Medical Diagnosis 3'

Column Name: medical_diagnosis_3_value

Column Type: varchar

Max Length: 32700

The description associated with medical_diagnosis_3_code. See medical_diagnosis_3_code for more information.

Column Name: medical_diagnosis_4_code

Column Type: varchar

Max Length: 50

'Medical Diagnosis 4'

Column Name: medical_diagnosis_4_value

Column Type: varchar

Max Length: 32700

The description associated with medical_diagnosis_4_code. See medical_diagnosis_4_code for more information.

Column Name: notes_entry_index_nu

Column Type: varchar

Max Length: 50

The notes entry index.

Column Name: number_clients_in_group

Column Type: integer

'Number Of Clients In Group'

Column Name: orig_note_uniq_id_num

Column Type: varchar

Max Length: 20

'Original Note Unique ID Number'

Column Name: practitioner_id

Column Type: varchar

Max Length: 15

The practitioner associated with the note.

Column Name: practitioner_name

Column Type: varchar

Max Length: 40

The name associated with practitioner_id.

Column Name: psycho_add_on_duration

Column Type: integer

The psychotherapy add-on duration.

Column Name: reason_for_visit_code

Column Type: varchar

Max Length: 50

'Reason for Visit'

Column Name: reason_for_visit_value

Column Type: varchar

Max Length: 250

The description associated with reason_for_visit_code. See reason_for_visit_code for more information.

Column Name: recommended_decision

Column Type: varchar

Max Length: 32700

'Recommended Decision'

Column Name: release_type_code

Column Type: varchar

Max Length: 50

The value entered in the field 'Are you releasing to myHealthPointe or External providers?'

Column Name: release_type_value

Column Type: varchar

Max Length: 40

The description associated with release_type_code.

Column Name: select_tp_version_code

Column Type: varchar

Max Length: 5

'Select T.P. Version'

Column Name: select_tp_version_value

Column Type: varchar

Max Length: 40

The description associated with select_tp_version_code. See select_tp_version_code for more information.

Column Name: service_charge_code

Column Type: varchar

Max Length: 40

The service charge code.

Column Name: service_duration

Column Type: varchar

Max Length: 5

The duration of the service.

Column Name: service_end_time

Column Type: varchar

Max Length: 10

The end time of the service.

Column Name: service_program_code

Column Type: varchar

Max Length: 15

The program of the service.

Column Name: service_start_time

Column Type: varchar

Max Length: 10

The start time of the service.

Column Name: session_start_end_times

Column Type: varchar

Max Length: 32766

'Start/End Time(s)'

Column Name: ss_note_20_char_text_1

Column Type: varchar

Max Length: 20

'SS Note 20 Character 1'

Column Name: ss_note_20_char_text_10

Column Type: varchar

Max Length: 20

'SS Note 20 Character 10'

Column Name: ss_note_20_char_text_2

Column Type: varchar

Max Length: 20

'SS Note 20 Character 2'

Column Name: ss_note_20_char_text_3

Column Type: varchar

Max Length: 20

'SS Note 20 Character 3'

Column Name: ss_note_20_char_text_4

Column Type: varchar

Max Length: 20

'SS Note 20 Character 4'

Column Name: ss_note_20_char_text_5

Column Type: varchar

Max Length: 20

'SS Note 20 Character 5'

Column Name: ss_note_20_char_text_6

Column Type: varchar

Max Length: 20

'SS Note 20 Character 6'

Column Name: ss_note_20_char_text_7

Column Type: varchar

Max Length: 20

'SS Note 20 Character 7'

Column Name: ss_note_20_char_text_8

Column Type: varchar

Max Length: 20

'SS Note 20 Character 8'

Column Name: ss_note_20_char_text_9

Column Type: varchar

Max Length: 20

'SS Note 20 Character 9'

Column Name: ss_note_40_char_text_1

Column Type: varchar

Max Length: 40

'SS Note 40 Character 1'

Column Name: ss_note_40_char_text_10

Column Type: varchar

Max Length: 40

'SS Note 40 Character 10'

Column Name: ss_note_40_char_text_2

Column Type: varchar

Max Length: 40

'SS Note 40 Character 2'

Column Name: ss_note_40_char_text_3

Column Type: varchar

Max Length: 40

'SS Note 40 Character 3'

Column Name: ss_note_40_char_text_4

Column Type: varchar

Max Length: 40

'SS Note 40 Character 4'

Column Name: ss_note_40_char_text_5

Column Type: varchar

Max Length: 40

'SS Note 40 Character 5'

Column Name: ss_note_40_char_text_6

Column Type: varchar

Max Length: 40

'SS Note 40 Character 6'

Column Name: ss_note_40_char_text_7

Column Type: varchar

Max Length: 40

'SS Note 40 Character 7'

Column Name: ss_note_40_char_text_8

Column Type: varchar

Max Length: 40

'SS Note 40 Character 8'

Column Name: ss_note_40_char_text_9

Column Type: varchar

Max Length: 40

'SS Note 40 Character 9'

Column Name: ss_note_80_char_text_1

Column Type: varchar

Max Length: 80

'SS Note 80 Character Text 1'

Column Name: ss_note_80_char_text_10

Column Type: varchar

Max Length: 80

'SS Note 80 Character Text 10'

'SS Note Time 9'

Column Name: transcription_note
Column Type: bit
Is this is Transcription note

Column Name: transition_of_care_code
Column Type: varchar
Max Length: 1
'Is This A Transition Of Care?'

Column Name: transition_of_care_value
Column Type: varchar
Max Length: 80
'The description associated with transition_of_care_code. See transition_of_care_code for more information.

Column Name: user_row_access_code
Column Type: integer
If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: SYSTEM.cw_patient_notes_supp

Table Description: This table returns the site specific information stored in the 'Progress Notes (Group and Individual)', 'Inpatient Progress Notes', 'Inpatient Progress Notes (Diagnosis Entry', 'Ambulatory Progress Notes', and 'Ambulatory Progress Notes (Diagnosis Entry)' forms.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: NOT_uniqueid
Column Type: varchar

Max Length: 50

The unique ID associated with the note.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the data.

Column Name: confidential_note

Column Type: varchar

Max Length: 50

Whether the note is confidential.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 50

The user name that last updated the row.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 50

The time the row was last updated.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: notes_field
Column Type: varchar
Max Length: 32700
The contents of the notes field.

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 50
The unique ID of the form that last updated the row.

Column Name: ss_note_20_char_text_11
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 11'

Column Name: ss_note_20_char_text_12
Column Type: varchar
Max Length: 20
'SS Note 20 Character Text 12'

Column Name: ss_note_dsm_diag_11_code

Column Type: varchar

Max Length: 20

'SS Note DSM Diagnosis 11'

Column Name: ss_note_dsm_diag_11_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_11_code. See ss_note_dsm_diag_11_code for more information.

Column Name: ss_note_dsm_diag_12_code

Column Type: varchar

Max Length: 20

'SS Note DSM Diagnosis 12'

Column Name: ss_note_dsm_diag_12_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_12_code. See ss_note_dsm_diag_12_code for more information.

Column Name: ss_note_dsm_diag_13_code

Column Type: varchar

Max Length: 20

'SS Note DSM Diagnosis 13'

Column Name: ss_note_dsm_diag_13_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_13_code. See ss_note_dsm_diag_13_code for more information.

Column Name: ss_note_dsm_diag_14_code

Column Type: varchar

Max Length: 20

'SS Note DSM Diagnosis 14'

Column Name: ss_note_dsm_diag_14_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_14_code. See ss_note_dsm_diag_14_code for more information.

Column Name: ss_note_dsm_diag_15_code

Column Type: varchar

Max Length: 20

'SS Note DSM Diagnosis 15'

Column Name: ss_note_dsm_diag_15_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_15_code. See ss_note_dsm_diag_15_code for more information.

Column Name: ss_note_dsm_diag_16_code

Column Type: varchar

Max Length: 20

'SS Note DSM Diagnosis 16'

Column Name: ss_note_dsm_diag_16_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_16_code. See ss_note_dsm_diag_16_code for more information.

Column Name: ss_note_dsm_diag_17_code

Column Type: varchar

Max Length: 20

'SS Note DSM Diagnosis 17'

Column Name: ss_note_dsm_diag_17_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_17_code. See ss_note_dsm_diag_17_code for more information.

Column Name: ss_note_dsm_diag_18_code

Column Type: varchar

Max Length: 20

'SS Note DSM Diagnosis 18'

Column Name: ss_note_dsm_diag_18_value

Column Type: varchar

Max Length: 250

The description associated with `ss_note_dsm_diag_18_code`. See `ss_note_dsm_diag_18_code` for more information.

Column Name: `ss_note_dsm_diag_19_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM Diagnosis 19'

Column Name: `ss_note_dsm_diag_19_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_19_code`. See `ss_note_dsm_diag_19_code` for more information.

Column Name: `ss_note_dsm_diag_20_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM Diagnosis 20'

Column Name: `ss_note_dsm_diag_20_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_20_code`. See `ss_note_dsm_diag_20_code` for more information.

Column Name: `ss_note_dsm_diag_21_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM Diagnosis 21'

Column Name: `ss_note_dsm_diag_21_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_21_code`. See `ss_note_dsm_diag_21_code` for more information.

Column Name: `ss_note_dsm_diag_22_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM Diagnosis 22'

Column Name: `ss_note_dsm_diag_22_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_22_code`. See `ss_note_dsm_diag_22_code` for more information.

Column Name: `ss_note_dsm_diag_23_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM Diagnosis 23'

Column Name: ss_note_dsm_diag_23_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_23_code. See ss_note_dsm_diag_23_code for more information.

Column Name: ss_note_dsm_diag_24_code

Column Type: varchar

Max Length: 20

'SS Note DSM Diagnosis 24'

Column Name: ss_note_dsm_diag_24_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_24_code. See ss_note_dsm_diag_24_code for more information.

Column Name: ss_note_dsm_diag_25_code

Column Type: varchar

Max Length: 20

'SS Note DSM Diagnosis 25'

Column Name: ss_note_dsm_diag_25_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_25_code. See ss_note_dsm_diag_25_code for more information.

Column Name: ss_note_dsm_diag_26_code

Column Type: varchar

Max Length: 20

'SS Note DSM Diagnosis 26'

Column Name: ss_note_dsm_diag_26_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_26_code. See ss_note_dsm_diag_26_code for more information.

Column Name: ss_note_dsm_diag_27_code

Column Type: varchar

Max Length: 20

'SS Note DSM Diagnosis 27'

Column Name: ss_note_dsm_diag_27_value

Column Type: varchar

Max Length: 250

The description associated with `ss_note_dsm_diag_27_code`. See `ss_note_dsm_diag_27_code` for more information.

Column Name: `ss_note_dsm_diag_28_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM Diagnosis 28'

Column Name: `ss_note_dsm_diag_28_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_28_code`. See `ss_note_dsm_diag_28_code` for more information.

Column Name: `ss_note_dsm_diag_29_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM Diagnosis 29'

Column Name: `ss_note_dsm_diag_29_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_29_code`. See `ss_note_dsm_diag_29_code` for more information.

Column Name: `ss_note_dsm_diag_30_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM Diagnosis 30'

Column Name: `ss_note_dsm_diag_30_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_30_code`. See `ss_note_dsm_diag_30_code` for more information.

Column Name: `ss_note_icd9_diag_11_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 11'

Column Name: `ss_note_icd9_diag_11_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_11_code`. See `ss_note_icd9_diag_11_code` for more information.

Column Name: `ss_note_icd9_diag_12_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 12'

Column Name: ss_note_icd9_diag_12_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_12_code. See ss_note_icd9_diag_12_code for more information.

Column Name: ss_note_icd9_diag_13_code

Column Type: varchar

Max Length: 20

'SS Note ICD9 Diagnosis 13'

Column Name: ss_note_icd9_diag_13_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_13_code. See ss_note_icd9_diag_13_code for more information.

Column Name: ss_note_icd9_diag_14_code

Column Type: varchar

Max Length: 20

'SS Note ICD9 Diagnosis 14'

Column Name: ss_note_icd9_diag_14_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_14_code. See ss_note_icd9_diag_14_code for more information.

Column Name: ss_note_icd9_diag_15_code

Column Type: varchar

Max Length: 20

'SS Note ICD9 Diagnosis 15'

Column Name: ss_note_icd9_diag_15_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_15_code. See ss_note_icd9_diag_15_code for more information.

Column Name: ss_note_icd9_diag_16_code

Column Type: varchar

Max Length: 20

'SS Note ICD9 Diagnosis 16'

Column Name: ss_note_icd9_diag_16_value

Column Type: varchar

Max Length: 250

The description associated with `ss_note_icd9_diag_16_code`. See `ss_note_icd9_diag_16_code` for more information.

Column Name: `ss_note_icd9_diag_17_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 17'

Column Name: `ss_note_icd9_diag_17_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_17_code`. See `ss_note_icd9_diag_17_code` for more information.

Column Name: `ss_note_icd9_diag_18_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 18'

Column Name: `ss_note_icd9_diag_18_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_18_code`. See `ss_note_icd9_diag_18_code` for more information.

Column Name: `ss_note_icd9_diag_19_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 19'

Column Name: `ss_note_icd9_diag_19_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_19_code`. See `ss_note_icd9_diag_19_code` for more information.

Column Name: `ss_note_icd9_diag_20_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 20'

Column Name: `ss_note_icd9_diag_20_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_20_code`. See `ss_note_icd9_diag_20_code` for more information.

Column Name: `ss_note_icd9_diag_21_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 21'

Column Name: ss_note_icd9_diag_21_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_21_code. See ss_note_icd9_diag_21_code for more information.

Column Name: ss_note_icd9_diag_22_code

Column Type: varchar

Max Length: 20

'SS Note ICD9 Diagnosis 22'

Column Name: ss_note_icd9_diag_22_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_22_code. See ss_note_icd9_diag_22_code for more information.

Column Name: ss_note_icd9_diag_23_code

Column Type: varchar

Max Length: 20

'SS Note ICD9 Diagnosis 23'

Column Name: ss_note_icd9_diag_23_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_23_code. See ss_note_icd9_diag_23_code for more information.

Column Name: ss_note_icd9_diag_24_code

Column Type: varchar

Max Length: 20

'SS Note ICD9 Diagnosis 24'

Column Name: ss_note_icd9_diag_24_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_24_code. See ss_note_icd9_diag_24_code for more information.

Column Name: ss_note_icd9_diag_25_code

Column Type: varchar

Max Length: 20

'SS Note ICD9 Diagnosis 25'

Column Name: ss_note_icd9_diag_25_value

Column Type: varchar

Max Length: 250

The description associated with `ss_note_icd9_diag_25_code`. See `ss_note_icd9_diag_25_code` for more information.

Column Name: `ss_note_icd9_diag_26_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 26'

Column Name: `ss_note_icd9_diag_26_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_26_code`. See `ss_note_icd9_diag_26_code` for more information.

Column Name: `ss_note_icd9_diag_27_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 27'

Column Name: `ss_note_icd9_diag_27_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_27_code`. See `ss_note_icd9_diag_27_code` for more information.

Column Name: `ss_note_icd9_diag_28_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 28'

Column Name: `ss_note_icd9_diag_28_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_28_code`. See `ss_note_icd9_diag_28_code` for more information.

Column Name: `ss_note_icd9_diag_29_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 29'

Column Name: `ss_note_icd9_diag_29_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_29_code`. See `ss_note_icd9_diag_29_code` for more information.

Column Name: `ss_note_icd9_diag_30_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD9 Diagnosis 30'

Column Name: ss_note_icd9_diag_30_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_30_code. See ss_note_icd9_diag_30_code for more information.

Column Name: ss_note_multi_dict_11_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 11'

Column Name: ss_note_multi_dict_11_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_11_code. See ss_note_multi_dict_11_code for more information.

Column Name: ss_note_multi_dict_12_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 12'

Column Name: ss_note_multi_dict_12_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_12_code. See ss_note_multi_dict_12_code for more information.

Column Name: ss_note_multi_dict_13_code

Column Type: varchar

Max Length: 20

'SS Note Copy Multiple Response Dictionary 13'

Column Name: ss_note_multi_dict_13_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_13_code. See ss_note_multi_dict_13_code for more information.

Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 11'

Column Name: ss_note_sing_dict_11_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_single_dict_11_code. See ss_note_single_dict_11_code for more information.

Column Name: ss_note_sing_dict_12_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 12'

Column Name: ss_note_sing_dict_12_value
Column Type: varchar
Max Length: 50

The description associated with ss_note_single_dict_12_code. See ss_note_single_dict_12_code for more information.

Column Name: ss_note_sing_dict_13_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 13'

Column Name: ss_note_sing_dict_13_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_13_code. See ss_note_single_dict_13_code for more information.

Column Name: ss_note_sing_dict_14_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 14'

Column Name: ss_note_sing_dict_14_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_14_code. See ss_note_single_dict_14_code for more information.

Column Name: ss_note_sing_dict_15_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 15'

Column Name: ss_note_sing_dict_15_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_15_code. See ss_note_single_dict_15_code for more information.

Column Name: ss_note_sing_dict_16_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 16'

Column Name: ss_note_sing_dict_16_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_16_code. See ss_note_single_dict_16_code for more information.

Column Name: ss_note_sing_dict_17_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 17'

Column Name: ss_note_sing_dict_17_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_17_code. See ss_note_single_dict_17_code for more information.

Column Name: ss_note_sing_dict_18_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 18'

Column Name: ss_note_sing_dict_18_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_18_code. See ss_note_single_dict_18_code for more information.

Column Name: ss_note_sing_dict_19_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 19'

Column Name: ss_note_sing_dict_19_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_19_code. See ss_note_single_dict_19_code for more information.

Column Name: ss_note_sing_dict_20_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 20'

Column Name: ss_note_sing_dict_20_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_20_code. See ss_note_single_dict_20_code for more information.

Column Name: ss_note_sing_dict_21_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 21'

Column Name: ss_note_sing_dict_21_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_21_code. See ss_note_single_dict_21_code for more information.

Column Name: ss_note_sing_dict_22_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 22'

Column Name: ss_note_sing_dict_22_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_22_code. See ss_note_single_dict_22_code for more information.

Column Name: ss_note_sing_dict_23_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 23'

Column Name: ss_note_sing_dict_23_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_23_code. See ss_note_single_dict_23_code for more information.

Column Name: ss_note_sing_dict_24_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 24'

Column Name: ss_note_sing_dict_24_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_24_code. See ss_note_single_dict_24_code for more information.

Column Name: ss_note_sing_dict_25_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 25'

Column Name: ss_note_sing_dict_25_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_25_code. See ss_note_single_dict_25_code for more information.

Column Name: ss_note_sing_dict_26_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 26'

Column Name: ss_note_sing_dict_26_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_26_code. See ss_note_single_dict_26_code for more information.

Column Name: ss_note_sing_dict_27_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 27'

Column Name: ss_note_sing_dict_27_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_27_code. See ss_note_single_dict_27_code for more information.

Column Name: ss_note_sing_dict_28_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 28'

Column Name: ss_note_sing_dict_28_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_28_code. See ss_note_single_dict_28_code for more information.

Column Name: ss_note_sing_dict_29_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 29'

Column Name: ss_note_sing_dict_29_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_29_code. See ss_note_single_dict_29_code for more information.

Column Name: ss_note_sing_dict_30_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 30'

Column Name: ss_note_sing_dict_30_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_single_dict_30_code. See ss_note_single_dict_30_code for more information.

Column Name: ss_note_time_11
Column Type: varchar
Max Length: 50
'SS Note Time 11'

Column Name: ss_note_time_12
Column Type: varchar
Max Length: 50
'SS Note Time 12'

Column Name: ss_note_time_13
Column Type: varchar
Max Length: 50
'SS Note Time 13'

Column Name: ss_note_time_14
Column Type: varchar
Max Length: 50
'SS Note Time 14'

Column Name: ss_note_time_15
Column Type: varchar

Max Length: 50
'SS Note Time 16'

Column Name: ss_note_time_17
Column Type: varchar
Max Length: 50
'SS Note Time 17'

Column Name: ss_note_time_18
Column Type: varchar
Max Length: 50
'SS Note Time 18'

Column Name: ss_note_time_19
Column Type: varchar
Max Length: 50
'SS Note Time 19'

Column Name: ss_note_time_20
Column Type: varchar

Max Length: 50
'SS Note Time 20'

Column Name: ss_note_time_21
Column Type: varchar
Max Length: 50
'SS Note Time 21'

Column Name: ss_note_time_22
Column Type: varchar
Max Length: 50
'SS Note Time 22'

Column Name: ss_note_time_23
Column Type: varchar
Max Length: 50
'SS Note Time 23'

Column Name: ss_note_time_24
Column Type: varchar
Max Length: 50
'SS Note Time 24'

Column Name: ss_note_time_25
Column Type: varchar
Max Length: 50
'SS Note Time 25'

Column Name: ss_note_time_26
Column Type: varchar
Max Length: 50
'SS Note Time 26'

Column Name: ss_note_time_27
Column Type: varchar
Max Length: 50
'SS Note Time 27'

Column Name: ss_note_time_28
Column Type: varchar
Max Length: 50
'SS Note Time 28'

Column Name: ss_note_time_29
Column Type: varchar
Max Length: 50
'SS Note Time 29'

Column Name: ss_note_time_30
Column Type: varchar

Max Length: 50
'SS Note Time 30'

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: SYSTEM.cw_patient_notes_supp_1

Table Description: This table returns the site specific information stored in the 'Progress Notes (Group and Individual)', 'Inpatient Progress Notes', 'Inpatient Progress Notes (Diagnosis Entry', 'Ambulatory Progress Notes', and 'Ambulatory Progress Notes (Diagnosis Entry)' forms.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: EPISODE_NUMBER

Column Type: integer

The episode number associated with PATID.

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: NOT_uniqueid

Column Type: varchar

Max Length: 50

'Progress Notes Pointer'

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the data.

Column Name: confidential_note

Column Type: varchar

Max Length: 50

'Confidential Notes'

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 50

The user name that last updated the row.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 50

The time the row was last updated.

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 50

The user ID who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name who last updated the row.

Column Name: notes_field

Column Type: varchar

Max Length: 32766

'Notes Field'

Column Name: option_desc

Column Type: varchar

Max Length: 80

The name of the form that last updated the row.

Column Name: option_id

Column Type: varchar

Max Length: 50

The unique ID of the form that last updated the row.

Column Name: ss_note_20_char_text_31

Column Type: varchar

Max Length: 20

'SS Note 20 Character 31'

Column Name: ss_note_20_char_text_32
Column Type: varchar
Max Length: 20

Column Name: ss_note_dsm_diag_31_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 31'

Column Name: ss_note_dsm_diag_31_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_31_code. See ss_note_dsm_diag_31_code for more information.

Column Name: ss_note_dsm_diag_32_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 32'

Column Name: ss_note_dsm_diag_32_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_32_code. See ss_note_dsm_diag_32_code for more information.

Column Name: ss_note_dsm_diag_33_code

Column Type: varchar

Max Length: 20
'SS Note DSM IV Diagnosis 33'

Column Name: ss_note_dsm_diag_33_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_33_code. See ss_note_dsm_diag_33_code for more information.

Column Name: ss_note_dsm_diag_34_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 34'

Column Name: ss_note_dsm_diag_34_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_34_code. See ss_note_dsm_diag_34_code for more information.

Column Name: ss_note_dsm_diag_35_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 35'

Column Name: ss_note_dsm_diag_35_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_35_code. See ss_note_dsm_diag_35_code for more information.

Column Name: ss_note_dsm_diag_36_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 36'

Column Name: ss_note_dsm_diag_36_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_36_code. See ss_note_dsm_diag_36_code for more information.

Column Name: ss_note_dsm_diag_37_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 37'

Column Name: ss_note_dsm_diag_37_value
Column Type: varchar
Max Length: 250

The description associated with `ss_note_dsm_diag_37_code`. See `ss_note_dsm_diag_37_code` for more information.

Column Name: `ss_note_dsm_diag_38_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM IV Diagnosis 38'

Column Name: `ss_note_dsm_diag_38_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_38_code`. See `ss_note_dsm_diag_38_code` for more information.

Column Name: `ss_note_dsm_diag_39_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM IV Diagnosis 39'

Column Name: `ss_note_dsm_diag_39_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_39_code`. See `ss_note_dsm_diag_39_code` for more information.

Column Name: `ss_note_dsm_diag_40_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM IV Diagnosis 40'

Column Name: `ss_note_dsm_diag_40_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_40_code`. See `ss_note_dsm_diag_40_code` for more information.

Column Name: `ss_note_dsm_diag_41_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM IV Diagnosis 41'

Column Name: `ss_note_dsm_diag_41_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_41_code`. See `ss_note_dsm_diag_41_code` for more information.

Column Name: `ss_note_dsm_diag_42_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM IV Diagnosis 42'

Column Name: ss_note_dsm_diag_42_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_42_code. See ss_note_dsm_diag_42_code for more information.

Column Name: ss_note_dsm_diag_43_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 43'

Column Name: ss_note_dsm_diag_43_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_43_code. See ss_note_dsm_diag_43_code for more information.

Column Name: ss_note_dsm_diag_44_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 44'

Column Name: ss_note_dsm_diag_44_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_44_code. See ss_note_dsm_diag_44_code for more information.

Column Name: ss_note_dsm_diag_45_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 45'

Column Name: ss_note_dsm_diag_45_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_45_code. See ss_note_dsm_diag_45_code for more information.

Column Name: ss_note_dsm_diag_46_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 46'

Column Name: ss_note_dsm_diag_46_value

Column Type: varchar

Max Length: 250

The description associated with `ss_note_dsm_diag_46_code`. See `ss_note_dsm_diag_46_code` for more information.

Column Name: `ss_note_dsm_diag_47_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM IV Diagnosis 47'

Column Name: `ss_note_dsm_diag_47_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_47_code`. See `ss_note_dsm_diag_47_code` for more information.

Column Name: `ss_note_dsm_diag_48_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM IV Diagnosis 48'

Column Name: `ss_note_dsm_diag_48_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_48_code`. See `ss_note_dsm_diag_48_code` for more information.

Column Name: `ss_note_dsm_diag_49_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM IV Diagnosis 49'

Column Name: `ss_note_dsm_diag_49_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_49_code`. See `ss_note_dsm_diag_49_code` for more information.

Column Name: `ss_note_dsm_diag_50_code`

Column Type: `varchar`

Max Length: 20

'SS Note DSM IV Diagnosis 50'

Column Name: `ss_note_dsm_diag_50_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_dsm_diag_50_code`. See `ss_note_dsm_diag_50_code` for more information.

Column Name: `ss_note_icd9_diag_31_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 31'

Column Name: ss_note_icd9_diag_31_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_31_code. See ss_note_icd9_diag_31_code for more information.

Column Name: ss_note_icd9_diag_32_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 32'

Column Name: ss_note_icd9_diag_32_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_32_code. See ss_note_icd9_diag_32_code for more information.

Column Name: ss_note_icd9_diag_33_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 33'

Column Name: ss_note_icd9_diag_33_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_33_code. See ss_note_icd9_diag_33_code for more information.

Column Name: ss_note_icd9_diag_34_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 34'

Column Name: ss_note_icd9_diag_34_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_34_code. See ss_note_icd9_diag_34_code for more information.

Column Name: ss_note_icd9_diag_35_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 35'

Column Name: ss_note_icd9_diag_35_value

Column Type: varchar

Max Length: 250

The description associated with `ss_note_icd9_diag_35_code`. See `ss_note_icd9_diag_35_code` for more information.

Column Name: `ss_note_icd9_diag_36_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 36'

Column Name: `ss_note_icd9_diag_36_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_36_code`. See `ss_note_icd9_diag_36_code` for more information.

Column Name: `ss_note_icd9_diag_37_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 37'

Column Name: `ss_note_icd9_diag_37_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_37_code`. See `ss_note_icd9_diag_37_code` for more information.

Column Name: `ss_note_icd9_diag_38_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 38'

Column Name: `ss_note_icd9_diag_38_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_38_code`. See `ss_note_icd9_diag_38_code` for more information.

Column Name: `ss_note_icd9_diag_39_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 39'

Column Name: `ss_note_icd9_diag_39_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_39_code`. See `ss_note_icd9_diag_39_code` for more information.

Column Name: `ss_note_icd9_diag_40_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 40'

Column Name: ss_note_icd9_diag_40_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_40_code. See ss_note_icd9_diag_40_code for more information.

Column Name: ss_note_icd9_diag_41_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 41'

Column Name: ss_note_icd9_diag_41_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_41_code. See ss_note_icd9_diag_41_code for more information.

Column Name: ss_note_icd9_diag_42_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 42'

Column Name: ss_note_icd9_diag_42_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_42_code. See ss_note_icd9_diag_42_code for more information.

Column Name: ss_note_icd9_diag_43_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 43'

Column Name: ss_note_icd9_diag_43_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_43_code. See ss_note_icd9_diag_43_code for more information.

Column Name: ss_note_icd9_diag_44_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 44'

Column Name: ss_note_icd9_diag_44_value

Column Type: varchar

Max Length: 250

The description associated with `ss_note_icd9_diag_44_code`. See `ss_note_icd9_diag_44_code` for more information.

Column Name: `ss_note_icd9_diag_45_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 45'

Column Name: `ss_note_icd9_diag_45_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_45_code`. See `ss_note_icd9_diag_45_code` for more information.

Column Name: `ss_note_icd9_diag_46_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 46'

Column Name: `ss_note_icd9_diag_46_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_46_code`. See `ss_note_icd9_diag_46_code` for more information.

Column Name: `ss_note_icd9_diag_47_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 47'

Column Name: `ss_note_icd9_diag_47_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_47_code`. See `ss_note_icd9_diag_47_code` for more information.

Column Name: `ss_note_icd9_diag_48_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 48'

Column Name: `ss_note_icd9_diag_48_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_48_code`. See `ss_note_icd9_diag_48_code` for more information.

Column Name: `ss_note_icd9_diag_49_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 49'

Column Name: ss_note_icd9_diag_49_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_49_code. See ss_note_icd9_diag_49_code for more information.

Column Name: ss_note_icd9_diag_50_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 50'

Column Name: ss_note_icd9_diag_50_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_50_code. See ss_note_icd9_diag_50_code for more information.

'SS Note Time 49'

Column Name: ss_note_time_50
Column Type: varchar
Max Length: 50
'SS Note Time 50'

Column Name: user_row_access_code
Column Type: integer
If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: SYSTEM.cw_patient_notes_supp_2

Table Description: This table returns the information stored in the 'Inpatient Progress Notes', 'Inpatient Progress Notes (Diagnosis Entry)', 'Progress Notes (Group and Individual)', 'Ambulatory Progress Notes', and 'Ambulatory Progress Notes (Diagnosis Entry)' forms.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 50
The unique ID associated with the note.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: SYSTEM.cw_patient_notes_supp_3

Table Description: This table returns the information stored in the 'Inpatient Progress Notes', 'Inpatient Progress Notes (Diagnosis Entry)', 'Progress Notes (Group and Individual)', 'Ambulatory Progress Notes', and 'Ambulatory Progress Notes (Diagnosis Entry)' forms.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_time

Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 50
The unique ID associated with the note.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: form_number
Column Type: varchar
Max Length: 50
The form number of the form that last updated the row.

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_11_code. See ss_notec_multi_dict_11_code for more information.

Column Name: ss_notec_multi_dict_12_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 12'

Column Name: ss_notec_multi_dict_12_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_12_code. See ss_notec_multi_dict_12_code for more information.

Column Name: ss_notec_multi_dict_13_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 13'

Column Name: ss_notec_multi_dict_13_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_13_code. See ss_notec_multi_dict_13_code for more information.

Column Name: ss_notec_multi_dict_14_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 14'

Column Name: ss_notec_multi_dict_14_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_14_code. See ss_notec_multi_dict_14_code for more information.

Column Name: ss_notec_multi_dict_15_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 15'

Column Name: ss_notec_multi_dict_15_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_15_code. See ss_notec_multi_dict_15_code for more information.

Column Name: ss_notec_multi_dict_16_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 16'

Column Name: ss_notec_multi_dict_16_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_16_code. See ss_notec_multi_dict_16_code for more information.

Column Name: ss_notec_multi_dict_17_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 17'

Column Name: ss_notec_multi_dict_17_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_17_code. See ss_notec_multi_dict_17_code for more information.

Column Name: ss_notec_multi_dict_18_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 18'

Column Name: ss_notec_multi_dict_18_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_18_code. See ss_notec_multi_dict_18_code for more information.

Column Name: ss_notec_multi_dict_19_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 19'

Column Name: ss_notec_multi_dict_19_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_19_code. See ss_notec_multi_dict_19_code for more information.

Column Name: ss_notec_multi_dict_1_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 1'

Column Name: ss_notec_multi_dict_1_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_1_code. See ss_notec_multi_dict_1_code for more information.

Column Name: ss_notec_multi_dict_20_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 20'

Column Name: ss_notec_multi_dict_20_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_20_code. See ss_notec_multi_dict_20_code for more information.

Column Name: ss_notec_multi_dict_21_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 21'

Column Name: ss_notec_multi_dict_21_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_21_code. See ss_notec_multi_dict_21_code for more information.

Column Name: ss_notec_multi_dict_22_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 22'

Column Name: ss_notec_multi_dict_22_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_22_code. See ss_notec_multi_dict_22_code for more information.

Column Name: ss_notec_multi_dict_23_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 23'

Column Name: ss_notec_multi_dict_23_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_23_code. See ss_notec_multi_dict_23_code for more information.

Column Name: ss_notec_multi_dict_24_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 24'

Column Name: ss_notec_multi_dict_24_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_24_code. See ss_notec_multi_dict_24_code for more information.

Column Name: ss_notec_multi_dict_25_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 25'

Column Name: ss_notec_multi_dict_25_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_25_code. See ss_notec_multi_dict_25_code for more information.

Column Name: ss_notec_multi_dict_26_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 26'

Column Name: ss_notec_multi_dict_26_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_26_code. See ss_notec_multi_dict_26_code for more information.

Column Name: ss_notec_multi_dict_27_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 27'

Column Name: ss_notec_multi_dict_27_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_27_code. See ss_notec_multi_dict_27_code for more information.

Column Name: ss_notec_multi_dict_28_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 28'

Column Name: ss_notec_multi_dict_28_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_28_code. See ss_notec_multi_dict_28_code for more information.

Column Name: ss_notec_multi_dict_29_code

Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 29'

Column Name: ss_notec_multi_dict_29_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_29_code. See ss_notec_multi_dict_29_code for more information.

Column Name: ss_notec_multi_dict_2_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 2'

Column Name: ss_notec_multi_dict_2_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_2_code. See ss_notec_multi_dict_2_code for more information.

Column Name: ss_notec_multi_dict_30_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 30'

Column Name: ss_notec_multi_dict_30_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_30_code. See ss_notec_multi_dict_30_code for more information.

Column Name: ss_notec_multi_dict_31_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 31'

Column Name: ss_notec_multi_dict_31_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_31_code. See ss_notec_multi_dict_31_code for more information.

Column Name: ss_notec_multi_dict_32_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 32'

Column Name: ss_notec_multi_dict_32_value
Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_32_code. See ss_notec_multi_dict_32_code for more information.

Column Name: ss_notec_multi_dict_33_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 33'

Column Name: ss_notec_multi_dict_33_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_33_code. See ss_notec_multi_dict_33_code for more information.

Column Name: ss_notec_multi_dict_34_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 34'

Column Name: ss_notec_multi_dict_34_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_34_code. See ss_notec_multi_dict_34_code for more information.

Column Name: ss_notec_multi_dict_35_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 35'

Column Name: ss_notec_multi_dict_35_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_35_code. See ss_notec_multi_dict_35_code for more information.

Column Name: ss_notec_multi_dict_36_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 36'

Column Name: ss_notec_multi_dict_36_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_36_code. See ss_notec_multi_dict_36_code for more information.

Column Name: ss_notec_multi_dict_37_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 37'

Column Name: ss_notec_multi_dict_37_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_37_code. See ss_notec_multi_dict_37_code for more information.

Column Name: ss_notec_multi_dict_38_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 38'

Column Name: ss_notec_multi_dict_38_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_38_code. See ss_notec_multi_dict_38_code for more information.

Column Name: ss_notec_multi_dict_39_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 39'

Column Name: ss_notec_multi_dict_39_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_39_code. See ss_notec_multi_dict_39_code for more information.

Column Name: ss_notec_multi_dict_3_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 3'

Column Name: ss_notec_multi_dict_3_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_3_code. See ss_notec_multi_dict_3_code for more information.

Column Name: ss_notec_multi_dict_40_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 40'

Column Name: ss_notec_multi_dict_40_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_40_code. See ss_notec_multi_dict_40_code for more information.

Column Name: ss_notec_multi_dict_41_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 41'

Column Name: ss_notec_multi_dict_41_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_41_code. See ss_notec_multi_dict_41_code for more information.

Column Name: ss_notec_multi_dict_42_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 42'

Column Name: ss_notec_multi_dict_42_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_42_code. See ss_notec_multi_dict_42_code for more information.

Column Name: ss_notec_multi_dict_43_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 43'

Column Name: ss_notec_multi_dict_43_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_43_code. See ss_notec_multi_dict_43_code for more information.

Column Name: ss_notec_multi_dict_44_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 44'

Column Name: ss_notec_multi_dict_44_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_44_code. See ss_notec_multi_dict_44_code for more information.

Column Name: ss_notec_multi_dict_45_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 45'

Column Name: ss_notec_multi_dict_45_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_45_code. See ss_notec_multi_dict_45_code for more information.

Column Name: ss_notec_multi_dict_46_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 46'

Column Name: ss_notec_multi_dict_46_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_46_code. See ss_notec_multi_dict_46_code for more information.

Column Name: ss_notec_multi_dict_47_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 47'

Column Name: ss_notec_multi_dict_47_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_47_code. See ss_notec_multi_dict_47_code for more information.

Column Name: ss_notec_multi_dict_48_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 48'

Column Name: ss_notec_multi_dict_48_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_48_code. See ss_notec_multi_dict_48_code for more information.

Column Name: ss_notec_multi_dict_49_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 49'

Column Name: ss_notec_multi_dict_49_value

Column Type: varchar

Max Length: 32759

The description associated with `ss_notec_multi_dict_49_code`. See `ss_notec_multi_dict_49_code` for more information.

Column Name: `ss_notec_multi_dict_4_code`
Column Type: `varchar`
Max Length: 255
'SS Note Copy Multiple Response Dictionary 4'

Column Name: `ss_notec_multi_dict_4_value`
Column Type: `varchar`
Max Length: 32759
The description associated with `ss_notec_multi_dict_4_code`. See `ss_notec_multi_dict_4_code` for more information.

Column Name: `ss_notec_multi_dict_50_code`
Column Type: `varchar`
Max Length: 255
'SS Note Copy Multiple Response Dictionary 50'

Column Name: `ss_notec_multi_dict_50_value`
Column Type: `varchar`
Max Length: 32759
The description associated with `ss_notec_multi_dict_50_code`. See `ss_notec_multi_dict_50_code` for more information.

Column Name: `ss_notec_multi_dict_5_code`
Column Type: `varchar`
Max Length: 255
'SS Note Copy Multiple Response Dictionary 5'

Column Name: `ss_notec_multi_dict_5_value`
Column Type: `varchar`
Max Length: 32759
The description associated with `ss_notec_multi_dict_5_code`. See `ss_notec_multi_dict_5_code` for more information.

Column Name: `ss_notec_multi_dict_6_code`
Column Type: `varchar`
Max Length: 255
'SS Note Copy Multiple Response Dictionary 6'

Column Name: `ss_notec_multi_dict_6_value`
Column Type: `varchar`
Max Length: 32759
The description associated with `ss_notec_multi_dict_6_code`. See `ss_notec_multi_dict_6_code` for more information.

Column Name: `ss_notec_multi_dict_7_code`
Column Type: `varchar`
Max Length: 255

'SS Note Copy Multiple Response Dictionary 7'

Column Name: ss_notec_multi_dict_7_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_7_code. See ss_notec_multi_dict_7_code for more information.

Column Name: ss_notec_multi_dict_8_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 8'

Column Name: ss_notec_multi_dict_8_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_8_code. See ss_notec_multi_dict_8_code for more information.

Column Name: ss_notec_multi_dict_9_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 9'

Column Name: ss_notec_multi_dict_9_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_9_code. See ss_notec_multi_dict_9_code for more information.

Column Name: ss_notec_sing_dict_10_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 10'

Column Name: ss_notec_sing_dict_10_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_10_code. See ss_notec_sing_dict_10_code for more information.

Column Name: ss_notec_sing_dict_11_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 11'

Column Name: ss_notec_sing_dict_11_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_11_code. See ss_notec_sing_dict_11_code for more information.

Column Name: ss_notec_sing_dict_12_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 12'

Column Name: ss_notec_sing_dict_12_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_12_code. See ss_notec_sing_dict_12_code for more information.

Column Name: ss_notec_sing_dict_13_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 13'

Column Name: ss_notec_sing_dict_13_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_13_code. See ss_notec_sing_dict_13_code for more information.

Column Name: ss_notec_sing_dict_14_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 14'

Column Name: ss_notec_sing_dict_14_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_14_code. See ss_notec_sing_dict_14_code for more information.

Column Name: ss_notec_sing_dict_15_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 15'

Column Name: ss_notec_sing_dict_15_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_15_code. See ss_notec_sing_dict_15_code for more information.

Column Name: ss_notec_sing_dict_16_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 16'

Column Name: ss_notec_sing_dict_16_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_16_code. See ss_notec_sing_dict_16_code for more information.

Column Name: ss_notec_sing_dict_17_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 17'

Column Name: ss_notec_sing_dict_17_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_17_code. See ss_notec_sing_dict_17_code for more information.

Column Name: ss_notec_sing_dict_18_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 18'

Column Name: ss_notec_sing_dict_18_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_18_code. See ss_notec_sing_dict_18_code for more information.

Column Name: ss_notec_sing_dict_19_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 19'

Column Name: ss_notec_sing_dict_19_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_19_code. See ss_notec_sing_dict_19_code for more information.

Column Name: ss_notec_sing_dict_1_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 1'

Column Name: ss_notec_sing_dict_1_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_1_code. See ss_notec_sing_dict_1_code for more information.

Column Name: ss_notec_sing_dict_20_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 20'

Column Name: ss_notec_sing_dict_20_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_20_code. See ss_notec_sing_dict_20_code for more information.

Column Name: ss_notec_sing_dict_21_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 21'

Column Name: ss_notec_sing_dict_21_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_21_code. See ss_notec_sing_dict_21_code for more information.

Column Name: ss_notec_sing_dict_22_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 22'

Column Name: ss_notec_sing_dict_22_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_22_code. See ss_notec_sing_dict_22_code for more information.

Column Name: ss_notec_sing_dict_23_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 23'

Column Name: ss_notec_sing_dict_23_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_23_code. See ss_notec_sing_dict_23_code for more information.

Column Name: ss_notec_sing_dict_24_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 24'

Column Name: ss_notec_sing_dict_24_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_24_code. See ss_notec_sing_dict_24_code for more information.

Column Name: ss_notec_sing_dict_25_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 25'

Column Name: ss_notec_sing_dict_25_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_25_code. See ss_notec_sing_dict_25_code for more information.

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_29_code. See ss_notec_sing_dict_29_code for more information.

Column Name: ss_notec_sing_dict_2_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 2'

Column Name: ss_notec_sing_dict_2_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_2_code. See ss_notec_sing_dict_2_code for more information.

Column Name: ss_notec_sing_dict_30_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 30'

Column Name: ss_notec_sing_dict_30_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_30_code. See ss_notec_sing_dict_30_code for more information.

Column Name: ss_notec_sing_dict_31_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 31'

Column Name: ss_notec_sing_dict_31_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_31_code. See ss_notec_sing_dict_31_code for more information.

Column Name: ss_notec_sing_dict_32_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 32'

Column Name: ss_notec_sing_dict_32_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_32_code. See ss_notec_sing_dict_32_code for more information.

Column Name: ss_notec_sing_dict_33_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 33'

Column Name: ss_notec_sing_dict_33_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_33_code. See ss_notec_sing_dict_33_code for more information.

Column Name: ss_notec_sing_dict_34_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 34'

Column Name: ss_notec_sing_dict_34_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_34_code. See ss_notec_sing_dict_34_code for more information.

Column Name: ss_notec_sing_dict_35_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 35'

Column Name: ss_notec_sing_dict_35_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_35_code. See ss_notec_sing_dict_35_code for more information.

Column Name: ss_notec_sing_dict_36_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 36'

Column Name: ss_notec_sing_dict_36_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_36_code. See ss_notec_sing_dict_36_code for more information.

Column Name: ss_notec_sing_dict_37_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 37'

Column Name: ss_notec_sing_dict_37_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_37_code. See ss_notec_sing_dict_37_code for more information.

Column Name: ss_notec_sing_dict_38_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 38'

Column Name: ss_notec_sing_dict_38_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_38_code. See ss_notec_sing_dict_38_code for more information.

Column Name: ss_notec_sing_dict_39_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 39'

Column Name: ss_notec_sing_dict_39_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_39_code. See ss_notec_sing_dict_39_code for more information.

Column Name: ss_notec_sing_dict_3_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 3'

Column Name: ss_notec_sing_dict_3_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_3_code. See ss_notec_sing_dict_3_code for more information.

Column Name: ss_notec_sing_dict_40_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 40'

Column Name: ss_notec_sing_dict_40_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_40_code. See ss_notec_sing_dict_40_code for more information.

Column Name: ss_notec_sing_dict_41_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 41'

Column Name: ss_notec_sing_dict_41_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_41_code. See ss_notec_sing_dict_41_code for more information.

Column Name: ss_notec_sing_dict_42_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 42'

Column Name: ss_notec_sing_dict_42_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_42_code. See ss_notec_sing_dict_42_code for more information.

Column Name: ss_notec_sing_dict_43_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 43'

Column Name: ss_notec_sing_dict_43_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_43_code. See ss_notec_sing_dict_43_code for more information.

Column Name: ss_notec_sing_dict_44_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 44'

Column Name: ss_notec_sing_dict_44_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_44_code. See ss_notec_sing_dict_44_code for more information.

Column Name: ss_notec_sing_dict_45_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 45'

Column Name: ss_notec_sing_dict_45_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_45_code. See ss_notec_sing_dict_45_code for more information.

Column Name: ss_notec_sing_dict_46_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 46'

Column Name: ss_notec_sing_dict_46_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_46_code. See ss_notec_sing_dict_46_code for more information.

Column Name: ss_notec_sing_dict_47_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 47'

Column Name: ss_notec_sing_dict_47_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_47_code. See ss_notec_sing_dict_47_code for more information.

Column Name: ss_notec_sing_dict_48_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 48'

Column Name: ss_notec_sing_dict_48_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_48_code. See ss_notec_sing_dict_48_code for more information.

Column Name: ss_notec_sing_dict_49_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 49'

Column Name: ss_notec_sing_dict_49_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_49_code. See ss_notec_sing_dict_49_code for more information.

Column Name: ss_notec_sing_dict_4_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 4'

Column Name: ss_notec_sing_dict_4_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_4_code. See ss_notec_sing_dict_4_code for more information.

Column Name: ss_notec_sing_dict_50_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 50'

Column Name: ss_notec_sing_dict_50_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_50_code. See ss_notec_sing_dict_50_code for more information.

Column Name: ss_notec_sing_dict_5_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 5'

Column Name: ss_notec_sing_dict_5_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_5_code. See ss_notec_sing_dict_5_code for more information.

Column Name: ss_notec_sing_dict_6_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 6'

Column Name: ss_notec_sing_dict_6_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_6_code. See ss_notec_sing_dict_6_code for more information.

Column Name: ss_notec_sing_dict_7_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 7'

Column Name: ss_notec_sing_dict_7_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_7_code. See ss_notec_sing_dict_7_code for more information.

Column Name: ss_notec_sing_dict_8_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 8'

Column Name: ss_notec_sing_dict_8_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_8_code. See ss_notec_sing_dict_8_code for more information.

Column Name: ss_notec_sing_dict_9_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 9'

Column Name: ss_notec_sing_dict_9_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_9_code. See ss_notec_sing_dict_9_code for more information.

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: SYSTEM.cw_patient_notes_supp_4

Table Description: This table returns the site specific information stored in the 'Progress Notes (Group and Individual)', 'Inpatient Progress Notes', 'Inpatient Progress Notes (Diagnosis Entry)', 'Ambulatory Progress Notes', and 'Ambulatory Progress Notes (Diagnosis Entry)' forms.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the service.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 50
Unique ID for a progress note.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the service.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the service.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: form_number
Column Type: varchar
Max Length: 50
'Form Number'

Column Name: option_desc
Column Type: varchar
Max Length: 81
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: ss_notc_mult_dic_51_code
Column Type: varchar
Max Length: 50

'SS Note Copy Multiple Response Dictionary 51'

Column Name: ss_notc_mult_dic_51_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_51_code. See ss_notc_mult_dic_51_code for more information.

Column Name: ss_notc_mult_dic_52_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 52'

Column Name: ss_notc_mult_dic_52_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_52_code. See ss_notc_mult_dic_52_code for more information.

Column Name: ss_notc_mult_dic_53_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 53'

Column Name: ss_notc_mult_dic_53_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_53_code. See ss_notc_mult_dic_53_code for more information.

Column Name: ss_notc_mult_dic_54_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 54'

Column Name: ss_notc_mult_dic_54_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_54_code. See ss_notc_mult_dic_54_code for more information.

Column Name: ss_notc_mult_dic_55_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 55'

Column Name: ss_notc_mult_dic_55_value

Column Type: varchar

Max Length: 255

The description associated with `ss_notc_mult_dic_55_code`. See `ss_notc_mult_dic_55_code` for more information.

Column Name: `ss_notc_mult_dic_56_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Multiple Response Dictionary 56'

Column Name: `ss_notc_mult_dic_56_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_mult_dic_56_code`. See `ss_notc_mult_dic_56_code` for more information.

Column Name: `ss_notc_mult_dic_57_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Multiple Response Dictionary 57'

Column Name: `ss_notc_mult_dic_57_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_mult_dic_57_code`. See `ss_notc_mult_dic_57_code` for more information.

Column Name: `ss_notc_mult_dic_58_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Multiple Response Dictionary 58'

Column Name: `ss_notc_mult_dic_58_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_mult_dic_58_code`. See `ss_notc_mult_dic_58_code` for more information.

Column Name: `ss_notc_mult_dic_59_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Multiple Response Dictionary 59'

Column Name: `ss_notc_mult_dic_59_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_mult_dic_59_code`. See `ss_notc_mult_dic_59_code` for more information.

Column Name: `ss_notc_mult_dic_60_code`
Column Type: `varchar`
Max Length: 50

'SS Note Copy Multiple Response Dictionary 60'

Column Name: ss_notc_mult_dic_60_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_60_code. See ss_notc_mult_dic_60_code for more information.

Column Name: ss_notc_mult_dic_61_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 61'

Column Name: ss_notc_mult_dic_61_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_61_code. See ss_notc_mult_dic_61_code for more information.

Column Name: ss_notc_mult_dic_62_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 62'

Column Name: ss_notc_mult_dic_62_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_62_code. See ss_notc_mult_dic_62_code for more information.

Column Name: ss_notc_mult_dic_63_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 63'

Column Name: ss_notc_mult_dic_63_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_63_code. See ss_notc_mult_dic_63_code for more information.

Column Name: ss_notc_mult_dic_64_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 64'

Column Name: ss_notc_mult_dic_64_value

Column Type: varchar

Max Length: 255

The description associated with `ss_notc_mult_dic_64_code`. See `ss_notc_mult_dic_64_code` for more information.

Column Name: `ss_notc_mult_dic_65_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Multiple Response Dictionary 65'

Column Name: `ss_notc_mult_dic_65_value`
Column Type: `varchar`
Max Length: 265
The description associated with `ss_notc_mult_dic_65_code`. See `ss_notc_mult_dic_65_code` for more information.

Column Name: `ss_notc_mult_dic_66_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Multiple Response Dictionary 66'

Column Name: `ss_notc_mult_dic_66_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_mult_dic_66_code`. See `ss_notc_mult_dic_66_code` for more information.

Column Name: `ss_notc_mult_dic_67_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Multiple Response Dictionary 67'

Column Name: `ss_notc_mult_dic_67_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_mult_dic_67_code`. See `ss_notc_mult_dic_67_code` for more information.

Column Name: `ss_notc_mult_dic_68_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Multiple Response Dictionary 68'

Column Name: `ss_notc_mult_dic_68_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_mult_dic_68_code`. See `ss_notc_mult_dic_68_code` for more information.

Column Name: `ss_notc_mult_dic_69_code`
Column Type: `varchar`
Max Length: 50

'SS Note Copy Multiple Response Dictionary 69'

Column Name: ss_notc_mult_dic_69_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_69_code. See ss_notc_mult_dic_69_code for more information.

Column Name: ss_notc_mult_dic_70_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 70'

Column Name: ss_notc_mult_dic_70_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_70_code. See ss_notc_mult_dic_70_code for more information.

Column Name: ss_notc_mult_dic_71_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 71'

Column Name: ss_notc_mult_dic_71_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_71_code. See ss_notc_mult_dic_71_code for more information.

Column Name: ss_notc_mult_dic_72_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 72'

Column Name: ss_notc_mult_dic_72_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_72_code. See ss_notc_mult_dic_72_code for more information.

Column Name: ss_notc_mult_dic_73_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 73'

Column Name: ss_notc_mult_dic_73_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_73_code. See ss_notc_mult_dic_73_code for more information.

Column Name: ss_notc_mult_dic_74_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 74'

Column Name: ss_notc_mult_dic_74_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_74_code. See ss_notc_mult_dic_74_code for more information.

Column Name: ss_notc_mult_dic_75_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 75'

Column Name: ss_notc_mult_dic_75_value

Column Type: varchar

Max Length: 275

The description associated with ss_notc_mult_dic_75_code. See ss_notc_mult_dic_75_code for more information.

'SS Note Copy Single Response Dictionary 54'

Column Name: ss_notc_sin_dic_54_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_54_code. See ss_notc_sin_dic_54_code for more information.

Column Name: ss_notc_sin_dic_55_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 55'

Column Name: ss_notc_sin_dic_55_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_55_code. See ss_notc_sin_dic_55_code for more information.

Column Name: ss_notc_sin_dic_56_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 56'

Column Name: ss_notc_sin_dic_56_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_56_code. See ss_notc_sin_dic_56_code for more information.

Column Name: ss_notc_sin_dic_57_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 57'

Column Name: ss_notc_sin_dic_57_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_57_code. See ss_notc_sin_dic_57_code for more information.

Column Name: ss_notc_sin_dic_58_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 58'

Column Name: ss_notc_sin_dic_58_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_58_code. See ss_notc_sin_dic_58_code for more information.

Column Name: ss_notc_sin_dic_59_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 59'

Column Name: ss_notc_sin_dic_59_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_59_code. See ss_notc_sin_dic_59_code for more information.

Column Name: ss_notc_sin_dic_60_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 60'

Column Name: ss_notc_sin_dic_60_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_60_code. See ss_notc_sin_dic_60_code for more information.

Column Name: ss_notc_sin_dic_61_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 61'

Column Name: ss_notc_sin_dic_61_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_61_code. See ss_notc_sin_dic_61_code for more information.

Column Name: ss_notc_sin_dic_62_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 62'

Column Name: ss_notc_sin_dic_62_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_62_code. See ss_notc_sin_dic_62_code for more information.

Column Name: ss_notc_sin_dic_63_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 63'

Column Name: ss_notc_sin_dic_63_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_63_code. See ss_notc_sin_dic_63_code for more information.

Column Name: ss_notc_sin_dic_64_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 64'

Column Name: ss_notc_sin_dic_64_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_64_code. See ss_notc_sin_dic_64_code for more information.

Column Name: ss_notc_sin_dic_65_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 65'

Column Name: ss_notc_sin_dic_65_value
Column Type: varchar
Max Length: 265
The description associated with ss_notc_sin_dic_65_code. See ss_notc_sin_dic_65_code for more information.

Column Name: ss_notc_sin_dic_66_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 66'

Column Name: ss_notc_sin_dic_66_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_66_code. See ss_notc_sin_dic_66_code for more information.

Column Name: ss_notc_sin_dic_67_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 67'

Column Name: ss_notc_sin_dic_67_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_67_code. See ss_notc_sin_dic_67_code for more information.

Column Name: ss_notc_sin_dic_68_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 68'

Column Name: ss_notc_sin_dic_68_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_68_code. See ss_notc_sin_dic_68_code for more information.

Column Name: ss_notc_sin_dic_69_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 69'

Column Name: ss_notc_sin_dic_69_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_69_code. See ss_notc_sin_dic_69_code for more information.

Column Name: ss_notc_sin_dic_70_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 70'

Column Name: ss_notc_sin_dic_70_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_70_code. See ss_notc_sin_dic_70_code for more information.

Column Name: ss_notc_sin_dic_71_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 71'

Column Name: ss_notc_sin_dic_71_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_71_code. See ss_notc_sin_dic_71_code for more information.

Column Name: ss_notc_sin_dic_72_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 72'

Column Name: ss_notc_sin_dic_72_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_72_code. See ss_notc_sin_dic_72_code for more information.

Column Name: ss_notc_sin_dic_73_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 73'

Column Name: ss_notc_sin_dic_73_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_73_code. See ss_notc_sin_dic_73_code for more information.

Column Name: ss_notc_sin_dic_74_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 74'

Column Name: ss_notc_sin_dic_74_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_74_code. See ss_notc_sin_dic_74_code for more information.

Column Name: ss_notc_sin_dic_75_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 75'

Column Name: ss_notc_sin_dic_75_value

Column Type: varchar

Max Length: 275

The description associated with ss_notc_sin_dic_75_code. See ss_notc_sin_dic_75_code for more information.

Column Name: ss_notc_sin_dic_76_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 76'

Column Name: ss_notc_sin_dic_76_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_76_code. See ss_notc_sin_dic_76_code for more information.

Column Name: ss_notc_sin_dic_77_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 77'

Column Name: ss_notc_sin_dic_77_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_77_code. See ss_notc_sin_dic_77_code for more information.

Column Name: ss_notc_sin_dic_78_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 78'

Column Name: ss_notc_sin_dic_78_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_78_code. See ss_notc_sin_dic_78_code for more information.

Column Name: ss_notc_sin_dic_79_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 79'

Column Name: ss_notc_sin_dic_79_value

Column Type: varchar

Max Length: 255

The description associated with `ss_notc_sin_dic_79_code`. See `ss_notc_sin_dic_79_code` for more information.

Column Name: `ss_notc_sin_dic_80_code`
Column Type: `varchar`
Max Length: 50
'SS Note Copy Single Response Dictionary 80'

Column Name: `ss_notc_sin_dic_80_value`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_notc_sin_dic_80_code`. See `ss_notc_sin_dic_80_code` for more information.

Column Name: `ss_note_mul_dict_51_code`
Column Type: `varchar`
Max Length: 20
'SS Note Multi Response Dictionary 51'

Column Name: `ss_note_mul_dict_51_shval`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_note_mul_dict_51_code` limited to 255 characters. See `ss_note_mul_dict_51_code` for more information.

Column Name: `ss_note_mul_dict_51_value`
Column Type: `varchar`
Max Length: 32700
The description associated with `ss_note_mul_dict_51_code`. See `ss_note_mul_dict_51_code` for more information.

Column Name: `ss_note_mul_dict_52_code`
Column Type: `varchar`
Max Length: 20
'SS Note Multi Response Dictionary 52'

Column Name: `ss_note_mul_dict_52_shval`
Column Type: `varchar`
Max Length: 255
The description associated with `ss_note_mul_dict_52_code` limited to 255 characters. See `ss_note_mul_dict_52_code` for more information.

Column Name: `ss_note_mul_dict_52_value`
Column Type: `varchar`
Max Length: 32700
The description associated with `ss_note_mul_dict_52_code`. See `ss_note_mul_dict_52_code` for more information.

Column Name: `ss_note_mul_dict_53_code`
Column Type: `varchar`

Max Length: 20
'SS Note Multi Response Dictionary 53'

Column Name: ss_note_mul_dict_53_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_53_code limited to 255 characters. See ss_note_mul_dict_53_code for more information.

Column Name: ss_note_mul_dict_53_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_53_code. See ss_note_mul_dict_53_code for more information.

Column Name: ss_note_mul_dict_54_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 54'

Column Name: ss_note_mul_dict_54_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_54_code limited to 255 characters. See ss_note_mul_dict_54_code for more information.

Column Name: ss_note_mul_dict_54_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_54_code. See ss_note_mul_dict_54_code for more information.

Column Name: ss_note_mul_dict_55_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 55'

Column Name: ss_note_mul_dict_55_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_55_code limited to 255 characters. See ss_note_mul_dict_55_code for more information.

Column Name: ss_note_mul_dict_55_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_55_code. See ss_note_mul_dict_55_code for more information.

Column Name: ss_note_mul_dict_56_code

Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 56'

Column Name: ss_note_mul_dict_56_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_56_code limited to 255 characters. See ss_note_mul_dict_56_code for more information.

Column Name: ss_note_mul_dict_56_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_56_code. See ss_note_mul_dict_56_code for more information.

Column Name: ss_note_mul_dict_57_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 57'

Column Name: ss_note_mul_dict_57_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_57_code limited to 255 characters. See ss_note_mul_dict_57_code for more information.

Column Name: ss_note_mul_dict_57_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_57_code. See ss_note_mul_dict_57_code for more information.

Column Name: ss_note_mul_dict_58_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 58'

Column Name: ss_note_mul_dict_58_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_58_code limited to 255 characters. See ss_note_mul_dict_58_code for more information.

Column Name: ss_note_mul_dict_58_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_58_code. See ss_note_mul_dict_58_code for more information.

Column Name: ss_note_mul_dict_59_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 59'

Column Name: ss_note_mul_dict_59_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_59_code limited to 255 characters. See ss_note_mul_dict_59_code for more information.

Column Name: ss_note_mul_dict_59_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_59_code. See ss_note_mul_dict_59_code for more information.

Column Name: ss_note_mul_dict_60_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 60'

Column Name: ss_note_mul_dict_60_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_60_code limited to 255 characters. See ss_note_mul_dict_60_code for more information.

Column Name: ss_note_mul_dict_60_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_60_code. See ss_note_mul_dict_60_code for more information.

Column Name: ss_note_mul_dict_61_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 61'

Column Name: ss_note_mul_dict_61_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_61_code limited to 255 characters. See ss_note_mul_dict_61_code for more information.

Column Name: ss_note_mul_dict_61_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_61_code. See ss_note_mul_dict_61_code for more information.

Column Name: ss_note_mul_dict_62_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 62'

Column Name: ss_note_mul_dict_62_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_62_code limited to 255 characters. See ss_note_mul_dict_62_code for more information.

Column Name: ss_note_mul_dict_62_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_62_code. See ss_note_mul_dict_62_code for more information.

Column Name: ss_note_mul_dict_63_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 63'

Column Name: ss_note_mul_dict_63_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_63_code limited to 255 characters. See ss_note_mul_dict_63_code for more information.

Column Name: ss_note_mul_dict_63_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_63_code. See ss_note_mul_dict_63_code for more information.

Column Name: ss_note_mul_dict_64_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 64'

Column Name: ss_note_mul_dict_64_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_64_code limited to 255 characters. See ss_note_mul_dict_64_code for more information.

Column Name: ss_note_mul_dict_64_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_64_code. See ss_note_mul_dict_64_code for more information.

Column Name: ss_note_mul_dict_65_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 65'

Column Name: ss_note_mul_dict_65_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_65_code limited to 255 characters. See ss_note_mul_dict_65_code for more information.

Column Name: ss_note_mul_dict_65_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_65_code. See ss_note_mul_dict_65_code for more information.

Column Name: ss_note_mul_dict_66_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 66'

Column Name: ss_note_mul_dict_66_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_66_code limited to 255 characters. See ss_note_mul_dict_66_code for more information.

Column Name: ss_note_mul_dict_66_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_66_code. See ss_note_mul_dict_66_code for more information.

Column Name: ss_note_mul_dict_67_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 67'

Column Name: ss_note_mul_dict_67_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_67_code limited to 255 characters. See ss_note_mul_dict_67_code for more information.

Column Name: ss_note_mul_dict_67_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_67_code. See ss_note_mul_dict_67_code for more information.

Column Name: ss_note_mul_dict_68_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 68'

Column Name: ss_note_mul_dict_68_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_68_code limited to 255 characters. See ss_note_mul_dict_68_code for more information.

Column Name: ss_note_mul_dict_68_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_68_code. See ss_note_mul_dict_68_code for more information.

Column Name: ss_note_mul_dict_69_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 69'

Column Name: ss_note_mul_dict_69_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_69_code limited to 255 characters. See ss_note_mul_dict_69_code for more information.

Column Name: ss_note_mul_dict_69_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_69_code. See ss_note_mul_dict_69_code for more information.

Column Name: ss_note_mul_dict_70_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 70'

Column Name: ss_note_mul_dict_70_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_70_code limited to 255 characters. See ss_note_mul_dict_70_code for more information.

Column Name: ss_note_mul_dict_70_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_70_code. See ss_note_mul_dict_70_code for more information.

Column Name: ss_note_mul_dict_71_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 71'

Column Name: ss_note_mul_dict_71_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_71_code limited to 255 characters. See ss_note_mul_dict_71_code for more information.

Column Name: ss_note_mul_dict_71_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_71_code. See ss_note_mul_dict_71_code for more information.

Column Name: ss_note_mul_dict_72_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 72'

Column Name: ss_note_mul_dict_72_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_72_code limited to 255 characters. See ss_note_mul_dict_72_code for more information.

Column Name: ss_note_mul_dict_72_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_72_code. See ss_note_mul_dict_72_code for more information.

'SS Note Multi Response Dictionary 77'

Column Name: ss_note_mul_dict_77_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_77_code limited to 255 characters. See ss_note_mul_dict_77_code for more information.

Column Name: ss_note_mul_dict_77_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_77_code. See ss_note_mul_dict_77_code for more information.

Column Name: ss_note_mul_dict_78_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 78'

Column Name: ss_note_mul_dict_78_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_78_code limited to 255 characters. See ss_note_mul_dict_78_code for more information.

Column Name: ss_note_mul_dict_78_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_78_code. See ss_note_mul_dict_78_code for more information.

Column Name: ss_note_mul_dict_79_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 79'

Column Name: ss_note_mul_dict_79_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_79_code limited to 255 characters. See ss_note_mul_dict_79_code for more information.

Column Name: ss_note_mul_dict_79_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_79_code. See ss_note_mul_dict_79_code for more information.

Column Name: ss_note_mul_dict_80_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 80'

Column Name: ss_note_mul_dict_80_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_80_code limited to 255 characters. See ss_note_mul_dict_80_code for more information.

Column Name: ss_note_mul_dict_80_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_80_code. See ss_note_mul_dict_80_code for more information.

Column Name: ss_note_scroll_text_51

Column Type: varchar

Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 80'

Column Name: ss_note_sin_dict_51_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 51'

Column Name: ss_note_sin_dict_51_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_51_code. See ss_note_sin_dict_51_code for more information.

Column Name: ss_note_sin_dict_52_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 52'

Column Name: ss_note_sin_dict_52_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_52_code. See ss_note_sin_dict_52_code for more information.

Column Name: ss_note_sin_dict_53_code
Column Type: varchar

Max Length: 50
'SS Note Single Response Dictionary 53'

Column Name: ss_note_sin_dict_53_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_53_code. See ss_note_sin_dict_53_code for more information.

Column Name: ss_note_sin_dict_54_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 54'

Column Name: ss_note_sin_dict_54_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_54_code. See ss_note_sin_dict_54_code for more information.

Column Name: ss_note_sin_dict_55_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 55'

Column Name: ss_note_sin_dict_55_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_55_code. See ss_note_sin_dict_55_code for more information.

Column Name: ss_note_sin_dict_56_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 56'

Column Name: ss_note_sin_dict_56_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_56_code. See ss_note_sin_dict_56_code for more information.

Column Name: ss_note_sin_dict_57_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 57'

Column Name: ss_note_sin_dict_57_value
Column Type: varchar
Max Length: 50

The description associated with ss_note_sin_dict_57_code. See ss_note_sin_dict_57_code for more information.

Column Name: ss_note_sin_dict_58_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 58'

Column Name: ss_note_sin_dict_58_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_58_code. See ss_note_sin_dict_58_code for more information.

Column Name: ss_note_sin_dict_59_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 59'

Column Name: ss_note_sin_dict_59_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_59_code. See ss_note_sin_dict_59_code for more information.

Column Name: ss_note_sin_dict_60_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 60'

Column Name: ss_note_sin_dict_60_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_60_code. See ss_note_sin_dict_60_code for more information.

Column Name: ss_note_sin_dict_61_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 61'

Column Name: ss_note_sin_dict_61_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_61_code. See ss_note_sin_dict_61_code for more information.

Column Name: ss_note_sin_dict_62_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 62'

Column Name: ss_note_sin_dict_62_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_62_code. See ss_note_sin_dict_62_code for more information.

Column Name: ss_note_sin_dict_63_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 63'

Column Name: ss_note_sin_dict_63_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_63_code. See ss_note_sin_dict_63_code for more information.

Column Name: ss_note_sin_dict_64_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 64'

Column Name: ss_note_sin_dict_64_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_64_code. See ss_note_sin_dict_64_code for more information.

Column Name: ss_note_sin_dict_65_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 65'

Column Name: ss_note_sin_dict_65_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_65_code. See ss_note_sin_dict_65_code for more information.

Column Name: ss_note_sin_dict_66_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 66'

Column Name: ss_note_sin_dict_66_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_66_code. See ss_note_sin_dict_66_code for more information.

Column Name: ss_note_sin_dict_67_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 67'

Column Name: ss_note_sin_dict_67_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_67_code. See ss_note_sin_dict_67_code for more information.

Column Name: ss_note_sin_dict_68_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 68'

Column Name: ss_note_sin_dict_68_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_68_code. See ss_note_sin_dict_68_code for more information.

Column Name: ss_note_sin_dict_69_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 69'

Column Name: ss_note_sin_dict_69_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_69_code. See ss_note_sin_dict_69_code for more information.

Column Name: ss_note_sin_dict_70_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 70'

Column Name: ss_note_sin_dict_70_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_70_code. See ss_note_sin_dict_70_code for more information.

Column Name: ss_note_sin_dict_71_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 71'

Column Name: ss_note_sin_dict_71_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_71_code. See ss_note_sin_dict_71_code for more information.

Column Name: ss_note_sin_dict_72_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 72'

Column Name: ss_note_sin_dict_72_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_72_code. See ss_note_sin_dict_72_code for more information.

Column Name: ss_note_sin_dict_73_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 73'

Column Name: ss_note_sin_dict_73_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_73_code. See ss_note_sin_dict_73_code for more information.

Column Name: ss_note_sin_dict_74_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 74'

Column Name: ss_note_sin_dict_74_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_74_code. See ss_note_sin_dict_74_code for more information.

Column Name: ss_note_sin_dict_75_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 75'

Column Name: ss_note_sin_dict_75_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_75_code. See ss_note_sin_dict_75_code for more information.

Column Name: ss_note_sin_dict_76_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 76'

Column Name: ss_note_sin_dict_76_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_76_code. See ss_note_sin_dict_76_code for more information.

Column Name: ss_note_sin_dict_77_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 77'

Column Name: ss_note_sin_dict_77_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_77_code. See ss_note_sin_dict_77_code for more information.

Column Name: ss_note_sin_dict_78_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 78'

Column Name: ss_note_sin_dict_78_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_78_code. See ss_note_sin_dict_78_code for more information.

Column Name: ss_note_sin_dict_79_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 79'

Column Name: ss_note_sin_dict_79_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_79_code. See ss_note_sin_dict_79_code for more information.

Column Name: ss_note_sin_dict_80_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 80'

Column Name: ss_note_sin_dict_80_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_80_code. See ss_note_sin_dict_80_code for more information.

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: SYSTEM.cw_patient_notes_supp_5

Table Description: This table returns the site specific information stored in the 'Progress Notes (Group and Individual)', 'Inpatient Progress Notes', 'Inpatient Progress Notes (Diagnosis Entry)', 'Ambulatory Progress Notes', and 'Ambulatory Progress Notes (Diagnosis Entry)' forms.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the service.

Column Name: data_entry_time

Column Type: varchar

Max Length: 10

The time the row was last updated.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The user name that last updated the row.

Column Name: EPISODE_NUMBER

Column Type: integer

The episode number associated with PATID.

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: NOT_uniqueid

Column Type: varchar

Max Length: 50

Unique ID for a note.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the data.

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The user ID who last updated the service.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name who last updated the service.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: ebp_code

Column Type: varchar
Max Length: 50
'Evidence-Based Practices'

Column Name: ebp_element_code
Column Type: varchar
Max Length: 50
'Evidence-Based Practice Elements'

Column Name: ebp_element_value
Column Type: varchar
Max Length: 32000
The description associated with ebp_element_code

Column Name: ebp_value
Column Type: varchar
Max Length: 32000
The description associated with ebp_code

Column Name: form_number
Column Type: varchar
Max Length: 50
'Form Number'

Column Name: option_desc
Column Type: varchar
Max Length: 81
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: ss_notc_mul_dic_100_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 100'

Column Name: ss_notc_mul_dic_100_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_100_code. See ss_notc_mul_dic_100_code for more information.

Column Name: ss_notc_mul_dic_101_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 101'

Column Name: ss_notc_mul_dic_101_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_101_code. See ss_notc_mul_dic_101_code for more information.

Column Name: ss_notc_mul_dic_102_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 102'

Column Name: ss_notc_mul_dic_102_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_102_code. See ss_notc_mul_dic_102_code for more information.

Column Name: ss_notc_mul_dic_103_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 103'

Column Name: ss_notc_mul_dic_103_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_103_code. See ss_notc_mul_dic_103_code for more information.

Column Name: ss_notc_mul_dic_104_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 104'

Column Name: ss_notc_mul_dic_104_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_104_code. See ss_notc_mul_dic_104_code for more information.

Column Name: ss_notc_mul_dic_105_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 105'

Column Name: ss_notc_mul_dic_105_value

Column Type: varchar

Max Length: 275

The description associated with ss_notc_mul_dic_105_code. See ss_notc_mul_dic_105_code for more information.

Column Name: ss_notc_mul_dic_106_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 106'

Column Name: ss_notc_mul_dic_106_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_106_code. See ss_notc_mul_dic_106_code for more information.

Column Name: ss_notc_mul_dic_107_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 107'

Column Name: ss_notc_mul_dic_107_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_107_code. See ss_notc_mul_dic_107_code for more information.

Column Name: ss_notc_mul_dic_108_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 108'

Column Name: ss_notc_mul_dic_108_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_108_code. See ss_notc_mul_dic_108_code for more information.

Column Name: ss_notc_mul_dic_109_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 109'

Column Name: ss_notc_mul_dic_109_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_109_code. See ss_notc_mul_dic_109_code for more information.

Column Name: ss_notc_mul_dic_110_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 110'

Column Name: ss_notc_mul_dic_110_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_110_code. See ss_notc_mul_dic_110_code for more information.

Column Name: ss_notc_mul_dic_81_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 81'

Column Name: ss_notc_mul_dic_81_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_81_code. See ss_notc_mul_dic_81_code for more information.

Column Name: ss_notc_mul_dic_82_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 82'

Column Name: ss_notc_mul_dic_82_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_82_code. See ss_notc_mul_dic_82_code for more information.

Column Name: ss_notc_mul_dic_83_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 83'

Column Name: ss_notc_mul_dic_83_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_83_code. See ss_notc_mul_dic_83_code for more information.

Column Name: ss_notc_mul_dic_84_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 84'

Column Name: ss_notc_mul_dic_84_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_84_code. See ss_notc_mul_dic_84_code for more information.

Column Name: ss_notc_mul_dic_85_code

Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 85'

Column Name: ss_notc_mul_dic_85_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_85_code. See ss_notc_mul_dic_85_code for more information.

Column Name: ss_notc_mul_dic_86_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 86'

Column Name: ss_notc_mul_dic_86_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_86_code. See ss_notc_mul_dic_86_code for more information.

Column Name: ss_notc_mul_dic_87_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 87'

Column Name: ss_notc_mul_dic_87_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_87_code. See ss_notc_mul_dic_87_code for more information.

Column Name: ss_notc_mul_dic_88_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 88'

Column Name: ss_notc_mul_dic_88_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_88_code. See ss_notc_mul_dic_88_code for more information.

Column Name: ss_notc_mul_dic_89_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 89'

Column Name: ss_notc_mul_dic_89_value
Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_89_code. See ss_notc_mul_dic_89_code for more information.

Column Name: ss_notc_mul_dic_90_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 90'

Column Name: ss_notc_mul_dic_90_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_90_code. See ss_notc_mul_dic_90_code for more information.

Column Name: ss_notc_mul_dic_91_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 91'

Column Name: ss_notc_mul_dic_91_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_91_code. See ss_notc_mul_dic_91_code for more information.

Column Name: ss_notc_mul_dic_92_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 92'

Column Name: ss_notc_mul_dic_92_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_92_code. See ss_notc_mul_dic_92_code for more information.

Column Name: ss_notc_mul_dic_93_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 93'

Column Name: ss_notc_mul_dic_93_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_93_code. See ss_notc_mul_dic_93_code for more information.

Column Name: ss_notc_mul_dic_94_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 94'

Column Name: ss_notc_mul_dic_94_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_94_code. See ss_notc_mul_dic_94_code for more information.

Column Name: ss_notc_mul_dic_95_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 95'

Column Name: ss_notc_mul_dic_95_value

Column Type: varchar

Max Length: 265

The description associated with ss_notc_mul_dic_95_code. See ss_notc_mul_dic_95_code for more information.

Column Name: ss_notc_mul_dic_96_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 96'

Column Name: ss_notc_mul_dic_96_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_96_code. See ss_notc_mul_dic_96_code for more information.

Column Name: ss_notc_mul_dic_97_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 97'

Column Name: ss_notc_mul_dic_97_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_97_code. See ss_notc_mul_dic_97_code for more information.

Column Name: ss_notc_mul_dic_98_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 98'

Column Name: ss_notc_mul_dic_98_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_98_code. See ss_notc_mul_dic_98_code for more information.

Column Name: ss_notc_mul_dic_99_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 99'

Column Name: ss_notc_mul_dic_99_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_99_code. See ss_notc_mul_dic_99_code for more information.

Column Name: ss_notc_sin_dic_100_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 100'

Column Name: ss_notc_sin_dic_100_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_100_code. See ss_notc_sin_dic_100_code for more information.

Column Name: ss_notc_sin_dic_101_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 101'

Column Name: ss_notc_sin_dic_101_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_101_code. See ss_notc_sin_dic_101_code for more information.

Column Name: ss_notc_sin_dic_102_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 102'

Column Name: ss_notc_sin_dic_102_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_102_code. See ss_notc_sin_dic_102_code for more information.

Column Name: ss_notc_sin_dic_103_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 103'

Column Name: ss_notc_sin_dic_103_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_103_code. See ss_notc_sin_dic_103_code for more information.

Column Name: ss_notc_sin_dic_104_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 104'

Column Name: ss_notc_sin_dic_104_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_104_code. See ss_notc_sin_dic_104_code for more information.

Column Name: ss_notc_sin_dic_105_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 105'

Column Name: ss_notc_sin_dic_105_value

Column Type: varchar

Max Length: 275

The description associated with ss_notc_sin_dic_105_code. See ss_notc_sin_dic_105_code for more information.

Column Name: ss_notc_sin_dic_106_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 106'

Column Name: ss_notc_sin_dic_106_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_106_code. See ss_notc_sin_dic_106_code for more information.

Column Name: ss_notc_sin_dic_107_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 107'

Column Name: ss_notc_sin_dic_107_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_107_code. See ss_notc_sin_dic_107_code for more information.

Column Name: ss_notc_sin_dic_108_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 108'

Column Name: ss_notc_sin_dic_108_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_108_code. See ss_notc_sin_dic_108_code for more information.

Column Name: ss_notc_sin_dic_109_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 109'

Column Name: ss_notc_sin_dic_109_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_109_code. See ss_notc_sin_dic_109_code for more information.

Column Name: ss_notc_sin_dic_110_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 110'

Column Name: ss_notc_sin_dic_110_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_110_code. See ss_notc_sin_dic_110_code for more information.

Column Name: ss_notc_sin_dic_81_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 81'

Column Name: ss_notc_sin_dic_81_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_81_code. See ss_notc_sin_dic_81_code for more information.

Column Name: ss_notc_sin_dic_82_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 82'

Column Name: ss_notc_sin_dic_82_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_82_code. See ss_notc_sin_dic_82_code for more information.

Column Name: ss_notc_sin_dic_83_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 83'

Column Name: ss_notc_sin_dic_83_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_83_code. See ss_notc_sin_dic_83_code for more information.

Column Name: ss_notc_sin_dic_84_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 84'

Column Name: ss_notc_sin_dic_84_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_84_code. See ss_notc_sin_dic_84_code for more information.

Column Name: ss_notc_sin_dic_85_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 85'

Column Name: ss_notc_sin_dic_85_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_85_code. See ss_notc_sin_dic_85_code for more information.

Column Name: ss_notc_sin_dic_86_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 86'

Column Name: ss_notc_sin_dic_86_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_86_code. See ss_notc_sin_dic_86_code for more information.

Column Name: ss_notc_sin_dic_87_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 87'

Column Name: ss_notc_sin_dic_87_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_87_code. See ss_notc_sin_dic_87_code for more information.

Column Name: ss_notc_sin_dic_88_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 88'

Column Name: ss_notc_sin_dic_88_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_88_code. See ss_notc_sin_dic_88_code for more information.

Column Name: ss_notc_sin_dic_89_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 89'

Column Name: ss_notc_sin_dic_89_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_89_code. See ss_notc_sin_dic_89_code for more information.

Column Name: ss_notc_sin_dic_90_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 90'

Column Name: ss_notc_sin_dic_90_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_90_code. See ss_notc_sin_dic_90_code for more information.

Column Name: ss_notc_sin_dic_91_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 91'

Column Name: ss_notc_sin_dic_91_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_91_code. See ss_notc_sin_dic_91_code for more information.

Column Name: ss_notc_sin_dic_92_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 92'

Column Name: ss_notc_sin_dic_92_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_92_code. See ss_notc_sin_dic_92_code for more information.

Column Name: ss_notc_sin_dic_93_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 93'

Column Name: ss_notc_sin_dic_93_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_93_code. See ss_notc_sin_dic_93_code for more information.

Column Name: ss_notc_sin_dic_94_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 94'

Column Name: ss_notc_sin_dic_94_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_94_code. See ss_notc_sin_dic_94_code for more information.

Column Name: ss_notc_sin_dic_95_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 95'

Column Name: ss_notc_sin_dic_95_value

Column Type: varchar

Max Length: 265

The description associated with ss_notc_sin_dic_95_code. See ss_notc_sin_dic_95_code for more information.

Column Name: ss_notc_sin_dic_96_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 96'

Column Name: ss_notc_sin_dic_96_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_96_code. See ss_notc_sin_dic_96_code for more information.

Column Name: ss_notc_sin_dic_97_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 97'

Column Name: ss_notc_sin_dic_97_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_97_code. See ss_notc_sin_dic_97_code for more information.

Column Name: ss_notc_sin_dic_98_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 98'

Column Name: ss_notc_sin_dic_98_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_98_code. See ss_notc_sin_dic_98_code for more information.

Column Name: ss_notc_sin_dic_99_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 99'

Column Name: ss_notc_sin_dic_99_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_99_code. See ss_notc_sin_dic_99_code for more information.

Column Name: ss_note_mul_dic_100_code
Column Type: varchar
Max Length: 20

'SS Note Multi Response Dictionary 100'

Column Name: ss_note_mul_dic_100_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_100_code limited to 255 characters. See ss_note_mul_dic_100_code for more information.

Column Name: ss_note_mul_dic_100_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_100_code. See ss_note_mul_dic_100_code for more information.

Column Name: ss_note_mul_dic_101_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 101'

Column Name: ss_note_mul_dic_101_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_101_code limited to 255 characters. See ss_note_mul_dic_101_code for more information.

Column Name: ss_note_mul_dic_101_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_101_code. See ss_note_mul_dic_101_code for more information.

Column Name: ss_note_mul_dic_102_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 102'

Column Name: ss_note_mul_dic_102_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_102_code limited to 255 characters. See ss_note_mul_dic_102_code for more information.

Column Name: ss_note_mul_dic_102_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_102_code. See ss_note_mul_dic_102_code for more information.

Column Name: ss_note_mul_dic_103_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 103'

Column Name: ss_note_mul_dic_103_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_103_code limited to 255 characters. See ss_note_mul_dic_103_code for more information.

Column Name: ss_note_mul_dic_103_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_103_code. See ss_note_mul_dic_103_code for more information.

Column Name: ss_note_mul_dic_104_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 104'

Column Name: ss_note_mul_dic_104_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_104_code limited to 255 characters. See ss_note_mul_dic_104_code for more information.

Column Name: ss_note_mul_dic_104_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_104_code. See ss_note_mul_dic_104_code for more information.

Column Name: ss_note_mul_dic_105_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 105'

Column Name: ss_note_mul_dic_105_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_105_code limited to 255 characters. See ss_note_mul_dic_105_code for more information.

Column Name: ss_note_mul_dic_105_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_105_code. See ss_note_mul_dic_105_code for more information.

Column Name: ss_note_mul_dic_106_code

Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 106'

Column Name: ss_note_mul_dic_106_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dic_106_code limited to 255 characters. See ss_note_mul_dic_106_code for more information.

Column Name: ss_note_mul_dic_106_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dic_106_code. See ss_note_mul_dic_106_code for more information.

Column Name: ss_note_mul_dic_107_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 107'

Column Name: ss_note_mul_dic_107_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dic_107_code limited to 255 characters. See ss_note_mul_dic_107_code for more information.

Column Name: ss_note_mul_dic_107_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dic_107_code. See ss_note_mul_dic_107_code for more information.

Column Name: ss_note_mul_dic_108_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 108'

Column Name: ss_note_mul_dic_108_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dic_108_code limited to 255 characters. See ss_note_mul_dic_108_code for more information.

Column Name: ss_note_mul_dic_108_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dic_108_code. See ss_note_mul_dic_108_code for more information.

Column Name: ss_note_mul_dic_109_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 109'

Column Name: ss_note_mul_dic_109_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dic_109_code limited to 255 characters. See ss_note_mul_dic_109_code for more information.

Column Name: ss_note_mul_dic_109_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dic_109_code. See ss_note_mul_dic_109_code for more information.

Column Name: ss_note_mul_dic_110_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 110'

Column Name: ss_note_mul_dic_110_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dic_110_code limited to 255 characters. See ss_note_mul_dic_110_code for more information.

Column Name: ss_note_mul_dic_110_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dic_110_code. See ss_note_mul_dic_110_code for more information.

Column Name: ss_note_mul_dic_81_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 81'

Column Name: ss_note_mul_dic_81_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dic_81_code limited to 255 characters. See ss_note_mul_dic_81_code for more information.

Column Name: ss_note_mul_dic_81_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dic_81_code. See ss_note_mul_dic_81_code for more information.

Column Name: ss_note_mul_dic_82_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 82'

Column Name: ss_note_mul_dic_82_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_82_code limited to 255 characters. See ss_note_mul_dic_82_code for more information.

Column Name: ss_note_mul_dic_82_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_82_code. See ss_note_mul_dic_82_code for more information.

Column Name: ss_note_mul_dic_83_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 83'

Column Name: ss_note_mul_dic_83_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_83_code limited to 255 characters. See ss_note_mul_dic_83_code for more information.

Column Name: ss_note_mul_dic_83_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_83_code. See ss_note_mul_dic_83_code for more information.

Column Name: ss_note_mul_dic_84_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 84'

Column Name: ss_note_mul_dic_84_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_84_code limited to 255 characters. See ss_note_mul_dic_84_code for more information.

Column Name: ss_note_mul_dic_84_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_84_code. See ss_note_mul_dic_84_code for more information.

Column Name: ss_note_mul_dic_85_code

Column Type: varchar

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_85_code limited to 255 characters. See ss_note_mul_dic_85_code for more information.

Column Name: ss_note_mul_dic_85_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_85_code. See ss_note_mul_dic_85_code for more information.

Column Name: ss_note_mul_dic_86_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 86'

Column Name: ss_note_mul_dic_86_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_86_code limited to 255 characters. See ss_note_mul_dic_86_code for more information.

Column Name: ss_note_mul_dic_86_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_86_code. See ss_note_mul_dic_86_code for more information.

Column Name: ss_note_mul_dic_87_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 87'

Column Name: ss_note_mul_dic_87_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_87_code limited to 255 characters. See ss_note_mul_dic_87_code for more information.

Column Name: ss_note_mul_dic_87_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_87_code. See ss_note_mul_dic_87_code for more information.

Column Name: ss_note_mul_dic_88_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 88'

Column Name: ss_note_mul_dic_88_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_88_code limited to 255 characters. See ss_note_mul_dic_88_code for more information.

Column Name: ss_note_mul_dic_88_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_88_code. See ss_note_mul_dic_88_code for more information.

Column Name: ss_note_mul_dic_89_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 89'

Column Name: ss_note_mul_dic_89_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_89_code limited to 255 characters. See ss_note_mul_dic_89_code for more information.

Column Name: ss_note_mul_dic_89_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_89_code. See ss_note_mul_dic_89_code for more information.

Column Name: ss_note_mul_dic_90_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 90'

Column Name: ss_note_mul_dic_90_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_90_code limited to 255 characters. See ss_note_mul_dic_90_code for more information.

Column Name: ss_note_mul_dic_90_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_90_code. See ss_note_mul_dic_90_code for more information.

Column Name: ss_note_mul_dic_91_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 91'

Column Name: ss_note_mul_dic_91_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_91_code limited to 255 characters. See ss_note_mul_dic_91_code for more information.

Column Name: ss_note_mul_dic_91_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_91_code. See ss_note_mul_dic_91_code for more information.

Column Name: ss_note_mul_dic_92_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 92'

Column Name: ss_note_mul_dic_92_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_92_code limited to 255 characters. See ss_note_mul_dic_92_code for more information.

Column Name: ss_note_mul_dic_92_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_92_code. See ss_note_mul_dic_92_code for more information.

Column Name: ss_note_mul_dic_93_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 93'

Column Name: ss_note_mul_dic_93_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_93_code limited to 255 characters. See ss_note_mul_dic_93_code for more information.

Column Name: ss_note_mul_dic_93_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_93_code. See ss_note_mul_dic_93_code for more information.

Column Name: ss_note_mul_dic_94_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 94'

Column Name: ss_note_mul_dic_94_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_94_code limited to 255 characters. See ss_note_mul_dic_94_code for more information.

Column Name: ss_note_mul_dic_94_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_94_code. See ss_note_mul_dic_94_code for more information.

Column Name: ss_note_mul_dic_95_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 95'

Column Name: ss_note_mul_dic_95_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_95_code limited to 255 characters. See ss_note_mul_dic_95_code for more information.

Column Name: ss_note_mul_dic_95_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_95_code. See ss_note_mul_dic_95_code for more information.

Column Name: ss_note_mul_dic_96_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 96'

Column Name: ss_note_mul_dic_96_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_96_code limited to 255 characters. See ss_note_mul_dic_96_code for more information.

Column Name: ss_note_mul_dic_96_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_96_code. See ss_note_mul_dic_96_code for more information.

Column Name: ss_note_mul_dic_97_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 97'

Column Name: ss_note_mul_dic_97_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_97_code limited to 255 characters. See ss_note_mul_dic_97_code for more information.

Column Name: ss_note_mul_dic_97_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_97_code. See ss_note_mul_dic_97_code for more information.

Column Name: ss_note_mul_dic_98_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 98'

Column Name: ss_note_mul_dic_98_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_98_code limited to 255 characters. See ss_note_mul_dic_98_code for more information.

Column Name: ss_note_mul_dic_98_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_98_code. See ss_note_mul_dic_98_code for more information.

Column Name: ss_note_mul_dic_99_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 99'

Column Name: ss_note_mul_dic_99_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_99_code limited to 255 characters. See ss_note_mul_dic_99_code for more information.

Column Name: ss_note_mul_dic_99_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_99_code. See ss_note_mul_dic_99_code for more information.

Column Name: ss_note_scroll_text_100

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Free Text 100'

Column Name: ss_note_scroll_text_101

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Free Text 101'

Column Name: ss_note_sin_dic_100_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 100'

Column Name: ss_note_sin_dic_100_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dic_100_code. See ss_note_sin_dic_100_code for more information.

Column Name: ss_note_sin_dic_101_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 101'

Column Name: ss_note_sin_dic_101_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dic_101_code. See ss_note_sin_dic_101_code for more information.

Column Name: ss_note_sin_dic_102_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 102'

Column Name: ss_note_sin_dic_102_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dic_102_code. See ss_note_sin_dic_102_code for more information.

Column Name: ss_note_sin_dic_103_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 103'

Column Name: ss_note_sin_dic_103_value
Column Type: varchar
Max Length: 50

The description associated with `ss_note_sin_dic_103_code`. See `ss_note_sin_dic_103_code` for more information.

Column Name: `ss_note_sin_dic_104_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 104'

Column Name: `ss_note_sin_dic_104_value`

Column Type: `varchar`

Max Length: 50

The description associated with `ss_note_sin_dic_104_code`. See `ss_note_sin_dic_104_code` for more information.

Column Name: `ss_note_sin_dic_105_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 105'

Column Name: `ss_note_sin_dic_105_value`

Column Type: `varchar`

Max Length: 50

The description associated with `ss_note_sin_dic_105_code`. See `ss_note_sin_dic_105_code` for more information.

Column Name: `ss_note_sin_dic_106_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 106'

Column Name: `ss_note_sin_dic_106_value`

Column Type: `varchar`

Max Length: 50

The description associated with `ss_note_sin_dic_106_code`. See `ss_note_sin_dic_106_code` for more information.

Column Name: `ss_note_sin_dic_107_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 107'

Column Name: `ss_note_sin_dic_107_value`

Column Type: `varchar`

Max Length: 50

The description associated with `ss_note_sin_dic_107_code`. See `ss_note_sin_dic_107_code` for more information.

Column Name: `ss_note_sin_dic_108_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 108'

Column Name: ss_note_sin_dic_108_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_108_code. See ss_note_sin_dic_108_code for more information.

Column Name: ss_note_sin_dic_109_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 109'

Column Name: ss_note_sin_dic_109_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_109_code. See ss_note_sin_dic_109_code for more information.

Column Name: ss_note_sin_dic_110_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 110'

Column Name: ss_note_sin_dic_110_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_110_code. See ss_note_sin_dic_110_code for more information.

Column Name: ss_note_sin_dic_81_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 81'

Column Name: ss_note_sin_dic_81_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_81_code. See ss_note_sin_dic_81_code for more information.

Column Name: ss_note_sin_dic_82_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 82'

Column Name: ss_note_sin_dic_82_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_82_code. See ss_note_sin_dic_82_code for more information.

Column Name: ss_note_sin_dic_83_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 83'

Column Name: ss_note_sin_dic_83_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_83_code. See ss_note_sin_dic_83_code for more information.

Column Name: ss_note_sin_dic_84_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 84'

Column Name: ss_note_sin_dic_84_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_84_code. See ss_note_sin_dic_84_code for more information.

Column Name: ss_note_sin_dic_85_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 85'

Column Name: ss_note_sin_dic_85_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_85_code. See ss_note_sin_dic_85_code for more information.

Column Name: ss_note_sin_dic_86_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 86'

Column Name: ss_note_sin_dic_86_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_86_code. See ss_note_sin_dic_86_code for more information.

Column Name: ss_note_sin_dic_87_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 87'

Column Name: ss_note_sin_dic_87_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_87_code. See ss_note_sin_dic_87_code for more information.

Column Name: ss_note_sin_dic_88_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 88'

Column Name: ss_note_sin_dic_88_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_88_code. See ss_note_sin_dic_88_code for more information.

Column Name: ss_note_sin_dic_89_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 89'

Column Name: ss_note_sin_dic_89_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_89_code. See ss_note_sin_dic_89_code for more information.

Column Name: ss_note_sin_dic_90_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 90'

Column Name: ss_note_sin_dic_90_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_90_code. See ss_note_sin_dic_90_code for more information.

Column Name: ss_note_sin_dic_91_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 91'

Column Name: ss_note_sin_dic_91_value

Column Type: varchar

Max Length: 50

The description associated with `ss_note_sin_dic_91_code`. See `ss_note_sin_dic_91_code` for more information.

Column Name: `ss_note_sin_dic_92_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 92'

Column Name: `ss_note_sin_dic_92_value`

Column Type: `varchar`

Max Length: 50

The description associated with `ss_note_sin_dic_92_code`. See `ss_note_sin_dic_92_code` for more information.

Column Name: `ss_note_sin_dic_93_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 93'

Column Name: `ss_note_sin_dic_93_value`

Column Type: `varchar`

Max Length: 50

The description associated with `ss_note_sin_dic_93_code`. See `ss_note_sin_dic_93_code` for more information.

Column Name: `ss_note_sin_dic_94_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 94'

Column Name: `ss_note_sin_dic_94_value`

Column Type: `varchar`

Max Length: 50

The description associated with `ss_note_sin_dic_94_code`. See `ss_note_sin_dic_94_code` for more information.

Column Name: `ss_note_sin_dic_95_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 95'

Column Name: `ss_note_sin_dic_95_value`

Column Type: `varchar`

Max Length: 50

The description associated with `ss_note_sin_dic_95_code`. See `ss_note_sin_dic_95_code` for more information.

Column Name: `ss_note_sin_dic_96_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 96'

Column Name: ss_note_sin_dic_96_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_96_code. See ss_note_sin_dic_96_code for more information.

Column Name: ss_note_sin_dic_97_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 97'

Column Name: ss_note_sin_dic_97_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_97_code. See ss_note_sin_dic_97_code for more information.

Column Name: ss_note_sin_dic_98_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 98'

Column Name: ss_note_sin_dic_98_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_98_code. See ss_note_sin_dic_98_code for more information.

Column Name: ss_note_sin_dic_99_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 99'

Column Name: ss_note_sin_dic_99_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_99_code. See ss_note_sin_dic_99_code for more information.

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: SYSTEM.cw_patient_notes_supp_6

Table Description: This table returns the facility location fields stored in the 'Progress Notes (Group and Individual)', 'Inpatient Progress Notes', 'Inpatient Progress Notes (Diagnosis Entry)', 'Ambulatory Progress Notes', and 'Ambulatory Progress Notes (Diagnosis Entry)' forms.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the service.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 50
Unique ID for a note.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the service.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the service.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: facloc_address_1
Column Type: varchar
Max Length: 50
'Facility Location Address - Street'

Column Name: facloc_address_2
Column Type: varchar
Max Length: 50
'Facility Location Address - Street 2'

Column Name: facloc_city
Column Type: varchar
Max Length: 50
'Facility Location City'

Column Name: facloc_id_code
Column Type: varchar

Max Length: 50
'Facility Location Code Identifier'

Column Name: facloc_id_code_qual
Column Type: varchar
Max Length: 50
'Facility Location Code Qualifier'

Column Name: facloc_name
Column Type: varchar
Max Length: 50
'Facility Location Name'

Column Name: facloc_state
Column Type: varchar
Max Length: 50
'Facility Location State'

Column Name: facloc_zip_code
Column Type: varchar
Max Length: 50
'Facility Location Zip Code'

Column Name: form_number
Column Type: varchar
Max Length: 50
'Form Number'

Column Name: option_desc
Column Type: varchar
Max Length: 81
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: ss_note_20_char_text_51
Column Type: varchar
Max Length: 20
SS Note 20 Character 51

Column Name: ss_note_20_char_text_52
Column Type: varchar
Max Length: 20
SS Note 20 Character 52

Column Name: ss_note_20_char_text_53
Column Type: varchar

Max Length: 20
SS Note 20 Character 53

Column Name: ss_note_20_char_text_54
Column Type: varchar
Max Length: 20
SS Note 20 Character 54

Column Name: ss_note_20_char_text_55
Column Type: varchar
Max Length: 20
SS Note 20 Character 55

Column Name: ss_note_20_char_text_56
Column Type: varchar
Max Length: 20
SS Note 20 Character 56

Column Name: ss_note_20_char_text_57
Column Type: varchar
Max Length: 20
SS Note 20 Character 57

Column Name: ss_note_20_char_text_58
Column Type: varchar
Max Length: 20
SS Note 20 Character 58

Column Name: ss_note_20_char_text_59
Column Type: varchar
Max Length: 20
SS Note 20 Character 59

Column Name: ss_note_20_char_text_60
Column Type: varchar
Max Length: 20
SS Note 20 Character 60

Column Name: ss_note_20_char_text_61
Column Type: varchar
Max Length: 20
SS Note 20 Character 61

Column Name: ss_note_20_char_text_62
Column Type: varchar
Max Length: 20
SS Note 20 Character 62

Column Name: ss_note_20_char_text_63
Column Type: varchar

Max Length: 20
SS Note 20 Character 63

Column Name: ss_note_20_char_text_64
Column Type: varchar
Max Length: 20
SS Note 20 Character 64

Column Name: ss_note_20_char_text_65
Column Type: varchar
Max Length: 20
SS Note 20 Character 65

Column Name: ss_note_20_char_text_66
Column Type: varchar
Max Length: 20
SS Note 20 Character 66

Column Name: ss_note_20_char_text_67
Column Type: varchar
Max Length: 20
SS Note 20 Character 67

Column Name: ss_note_20_char_text_68
Column Type: varchar
Max Length: 20
SS Note 20 Character 68

Column Name: ss_note_20_char_text_69
Column Type: varchar
Max Length: 20
SS Note 20 Character 69

Column Name: ss_note_20_char_text_70
Column Type: varchar
Max Length: 20
SS Note 20 Character 70

Column Name: ss_note_20_char_text_71
Column Type: varchar
Max Length: 20
SS Note 20 Character 71

Column Name: ss_note_20_char_text_72
Column Type: varchar
Max Length: 20
SS Note 20 Character 72

Column Name: ss_note_20_char_text_73
Column Type: varchar

Max Length: 20
SS Note 20 Character 73

Column Name: ss_note_20_char_text_74
Column Type: varchar

SS Note Time 57

Column Name: ss_note_time_58
Column Type: varchar
Max Length: 10
SS Note Time 58

Column Name: ss_note_time_59
Column Type: varchar

Max Length: 10
SS Note Time 59

Column Name: ss_note_time_60
Column Type: varchar
Max Length: 10
SS Note Time 60

Column Name: user_row_access_code
Column Type: integer
If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: SYSTEM.cw_patient_notes_tnotes

Table Description: This table returns the information stored for the treatment plan grid in progress notes forms.

Column Name: ID
Column Type: integer

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: NOT_uniqueid
Column Type: varchar
Max Length: 20
The unique ID associated with the note.

Column Name: tp_notes_id
Column Type: integer
Id column for auditing purposes

Column Name: select_tp_version_code
Column Type: varchar
Max Length: 50
'Select T.P. Version'

Column Name: select_tp_version_value

Column Type: varchar

Max Length: 255

The description associated with select_tp_version_code. See select_tp_version_code for more information.

Column Name: note_add_which_tp_plan_prob

Column Type: varchar

Max Length: 32000

The treatment plan problem to add to the note.

Column Name: notes

Column Type: varchar

Max Length: 32000

Notes for the selected TP item.

Documentation for form: Progress_Notes_(Group_and_Individual)

Table Name: SYSTEM.cw_scratch_notes

Table Description: This table returns the information stored in the 'Enter Default Group Note' and 'Progress Notes (Group and Individual)' forms.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The user name that last updated the row.

Column Name: JOIN_TO_TX_HISTORY

Column Type: varchar

Max Length: 40

The unique ID that joins the note to the service.

Column Name: EPISODE_NUMBER

Column Type: integer

The episode number.

Column Name: FACILITY

Column Type: integer

The system code in which the data is stored.

Column Name: Option_Desc

Column Type: varchar
Max Length: 80
The description of the form that filed the note.

Column Name: Option_Id
Column Type: varchar
Max Length: 20
The unique identifier of the form that filed the note.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client id.

Column Name: SNOTuniqueid
Column Type: varchar
Max Length: 50
The unique ID that identifies the scratch note.

Column Name: TODO_ID
Column Type: varchar
Max Length: 20
The unique ID associated with the To-Do.

Column Name: clinical_quality_code
Column Type: varchar
Max Length: 255
'Clinical Quality Indicators'

Column Name: clinical_quality_sh_val
Column Type: varchar
Max Length: 255
'The description associated with clinical_quality_code. See clinical_quality_code for more information.'

Column Name: clinical_quality_value
Column Type: varchar
Max Length: 4096
'The description associated with clinical_quality_code. See clinical_quality_code for more information.'

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 50

The time the row was last updated.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The user ID who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name who last updated the row.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: ebps_code

Column Type: varchar

Max Length: 255

'Evidence Based Practices'

Column Name: ebps_sh_val

Column Type: varchar

Max Length: 255

'The description associated with ebps_code. See ebps_code for more information.'

Column Name: ebps_value

Column Type: varchar

Max Length: 4096

'The description associated with ebps_code. See ebps_code for more information.

Column Name: external_system_id

Column Type: varchar

Max Length: 255

'External System Identifier'

Column Name: group_name_or_number

Column Type: varchar

Max Length: 50

The group this note is for.

Column Name: note_addresses

Column Type: varchar

Max Length: 40

Service that this note addresses.

Column Name: notes_field

Column Type: varchar

Max Length: 32766

The full note detail.

Column Name: note_time

Column Type: varchar

Max Length: 50

The time of the note.

Column Name: note_type_code

Column Type: varchar

Max Length: 50

The type of note (dictionary code).

Column Name: note_type_value

Column Type: varchar

Max Length: 50

The type of note (description).

Column Name: transition_of_care_code

Column Type: varchar

Max Length: 1

'Is This A Transition Of Care?'

Column Name: transition_of_care_value

Column Type: varchar

Max Length: 80

'The description associated with transition_of_care_code. See transition_of_care_code for more information.

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Column Name: user_to_send_cosign__code

Column Type: varchar

Max Length: 50

User to send a cosign notification to.

Column Name: user_to_send_scratch_code

Column Type: varchar

Max Length: 50

User to send the scratch to.

Documentation for form: MH_Outcomes

Table Name: CWSSF.florida_fsr_mh_outcomes

Table Description: This table returns information stored in the FSR 'MH Outcomes' form.

Column Name: blank_row_id

Column Type: varchar

Max Length: 254

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the record.

Column Name: FMO_uniqueid

Column Type: varchar

Max Length: 12

The unique ID for the MH Outcomes record.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_by

Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: admission_type_code
Column Type: varchar
Max Length: 50
'Admission type' code.

Column Name: admission_type_value
Column Type: varchar
Max Length: 40
The value of the 'admission_type_code'.

Column Name: adult_or_child_code
Column Type: varchar
Max Length: 50
'Adult or Child' code.

Column Name: adult_or_child_value
Column Type: varchar
Max Length: 40
The value of the 'adult_or_child_code'.

Column Name: annual_family_income
Column Type: varchar
Max Length: 5
'Annual Family Income'.

Column Name: at_risk_emot_dist_code
Column Type: varchar
Max Length: 50
'At-Risk of Emotional Disturbance' code.

Column Name: at_risk_emot_dist_value
Column Type: varchar
Max Length: 40
The value of the 'at_risk_emot_dist_code'.

Column Name: cgas_scale_rating

Column Type: varchar
Max Length: 5
'CGAS Scale Rating of Client'.

Column Name: client_name
Column Type: varchar
Max Length: 50
The client name.

Column Name: client_pid
Column Type: varchar
Max Length: 50
The client padded ID.

Column Name: commit_dpt_juv_just_code
Column Type: varchar
Max Length: 50
'Was the Child Committed or Recommitted to the Department of Juvenile Justice (in the last 90 days)' code.

Column Name: commit_dpt_juv_just_value
Column Type: varchar
Max Length: 40
The value of the 'commit_dpt_juv_just_code'.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The source that last updated the row.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40

The user ID who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name who last updated the row.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: def_from_prev_rec_code

Column Type: varchar

Max Length: 50

'Default from previous record' code.

Column Name: def_from_prev_rec_value

Column Type: varchar

Max Length: 40

The value of 'def_from_prev_rec_code'.

Column Name: depend_crim_status_code

Column Type: varchar

Max Length: 50

'Dependency/Criminal Status' code.

Column Name: depend_crim_status_value

Column Type: varchar

Max Length: 100

The value of 'depend_crim_status_code' code.

Column Name: develop_disab_code

Column Type: varchar

Max Length: 50

'Developmentally Disabled?' code.

Column Name: develop_disab_value

Column Type: varchar

Max Length: 40

The value of 'develop_disab_code'.

Column Name: discharge_reason_code

Column Type: varchar

Max Length: 50

'Discharge Reason' code.

Column Name: discharge_reason_value

Column Type: varchar

Max Length: 100

The value of 'discharge_reason_code'.

Column Name: employment_status_code
Column Type: varchar
Max Length: 50
'Employment Status' code.

Column Name: employment_status_value
Column Type: varchar
Max Length: 255
The value of 'employment_status_code'.

Column Name: evaluation_by
Column Type: varchar
Max Length: 20
'Evaluation By' code.

Column Name: evaluation_by_name
Column Type: varchar
Max Length: 50
The name associatd with 'evaluation_by'.

Column Name: evaluation_date
Column Type: date
'Evaluation Date'.

Column Name: evidence_mh_probs_code
Column Type: varchar
Max Length: 50
'Evidence of Mental Health Problems' code.

Column Name: evidence_mh_probs_value
Column Type: varchar
Max Length: 100
The value of 'evidence_mh_probs_code'.

Column Name: family_size
Column Type: varchar
Max Length: 5
'Family Size'.

Column Name: file_generation_date
Column Type: date
'File Generation Date'.

Column Name: hearing_impaired_code
Column Type: varchar
Max Length: 50
'Hearing Impaired?' code.

Column Name: hearing_impaired_value

Column Type: varchar
Max Length: 40
The value of 'hearing_impaired_code'.

Column Name: high_school_grade_code
Column Type: varchar
Max Length: 50
'Highest School Grade (Education Level)' code.

Column Name: high_school_grade_value
Column Type: varchar
Max Length: 255
The value of 'high_school_grade_code'.

Column Name: initial_perf_eval_date
Column Type: date
'Initial Performance Evaluation Date'.

Column Name: limited_english_code
Column Type: varchar
Max Length: 50
'Limited English?' code.

Column Name: limited_english_value
Column Type: varchar
Max Length: 40
The value of 'limited_english_code'.

Column Name: marital_status_code
Column Type: varchar
Max Length: 50
'Marital Status' code.

Column Name: marital_status_value
Column Type: varchar
Max Length: 255
The value of 'marital_status_code'.

Column Name: meets_baker_act_code
Column Type: varchar
Max Length: 50
'Meets Baker Act Criteria' code.

Column Name: meets_baker_act_value
Column Type: varchar
Max Length: 40
The value of 'meets_baker_act_code'.

Column Name: mh_diagnosis
Column Type: varchar

Max Length: 50
'MH Diagnosis' code.

Column Name: mh_diagnosis_desc
Column Type: varchar
Max Length: 50
The value of 'mh_diagnosis' code.

Column Name: mh_diagnosis_icd10
Column Type: varchar
Max Length: 50
'MH Diagnosis ICD-10' code.

Column Name: mh_diagnosis_icd10_desc
Column Type: varchar
Max Length: 50
The value of 'mh_diagnosis_icd10' code.

Column Name: mh_outcomes_status_code
Column Type: varchar
Max Length: 50
'MH Outcomes Status' code.

Column Name: mh_outcomes_status_value
Column Type: varchar
Max Length: 40
The value of 'mh_outcomes_status_code'.

Column Name: monthly_inc_govt_src
Column Type: varchar
Max Length: 5
'Monthly Income from Government Sources'.

Column Name: monthly_inc_other_src
Column Type: varchar
Max Length: 5
'Monthly Income from Other Sources'.

Column Name: monthly_inc_paid_emp
Column Type: varchar
Max Length: 5
'Monthly Income from Paid Employment'.

Column Name: next_review_date
Column Type: date
'Next Review Date'.

Column Name: non_ambulatory_code
Column Type: varchar
Max Length: 50

'Non-Ambulatory' code.

Column Name: non_ambulatory_value

Column Type: varchar

Max Length: 40

The value of 'non_ambulatory_code'.

Column Name: number_days_spent_commun

Column Type: varchar

Max Length: 5

'Number of Days Spent in the Community (in the last 30 days)'.

Column Name: option_desc

Column Type: varchar

Max Length: 80

The name of the form that last updated the row.

Column Name: option_id

Column Type: varchar

Max Length: 20

The unique ID of the form that last updated the row.

Column Name: physically_disab_code

Column Type: varchar

Max Length: 50

'Physically Disabled?' code.

Column Name: physically_disab_value

Column Type: varchar

Max Length: 40

The value of 'physically_disab_code'.

Column Name: prim_income_source_code

Column Type: varchar

Max Length: 50

'Primary Income Source' code.

Column Name: prim_income_source_value

Column Type: varchar

Max Length: 40

The value of 'prim_income_source_code'.

Column Name: prognosis_code

Column Type: varchar

Max Length: 50

'Prognosis' code.

Column Name: prognosis_value

Column Type: varchar

Max Length: 40

The value of 'prognosis_code'.

Column Name: purp_of_perf_eval_code
Column Type: varchar
Max Length: 50
'Purpose of Performance Evaluation' code.

Column Name: purp_of_perf_eval_value
Column Type: varchar
Max Length: 40
The value of 'purp_of_perf_eval_code'.

Column Name: reassigned_to_do_id
Column Type: integer
Reassigned internal To Do Id.

Column Name: received_med_idp_code
Column Type: varchar
Max Length: 50
'Received Medication through Indigent Drug Program(IDP)?' code.

Column Name: received_med_idp_value
Column Type: varchar
Max Length: 40
The value of 'received_med_idp_code'.

Column Name: received_med_pap_code
Column Type: varchar
Max Length: 50
'Received Medication through Patient Assistance Program (PAP)?' code.

Column Name: received_med_pap_value
Column Type: varchar
Max Length: 40
The value of 'received_med_pap_code'.

Column Name: rec_psych_dis_inc_code
Column Type: varchar
Max Length: 50
'Receives Psychiatric Disability Income' code.

Column Name: rec_psych_dis_inc_value
Column Type: varchar
Max Length: 40
The value of 'rec_psych_dis_inc_code'.

Column Name: referral_source_code
Column Type: varchar
Max Length: 50
'Referral Source' code.

Column Name: referral_source_value
Column Type: varchar
Max Length: 255
The value of 'referral_source_code'.

Column Name: residential_status_code
Column Type: varchar
Max Length: 50
'Residential Status' code.

Column Name: residential_status_value
Column Type: varchar
Max Length: 255
The value of 'residential_status_code'.

Column Name: sa_diagnosis
Column Type: varchar
Max Length: 150
'SA Diagnosis' code.

Column Name: sa_diagnosis_desc
Column Type: varchar
Max Length: 50
The value of 'sa_diagnosis'.

Column Name: sa_diagnosis_icd10
Column Type: varchar
Max Length: 150
'SA Diagnosis ICD-10' code.

Column Name: sa_diagnosis_icd10_desc
Column Type: varchar
Max Length: 50
The value of 'sa_diagnosis_icd10'.

Column Name: school_attendance_code
Column Type: varchar
Max Length: 50
'School Attendance (Suspended / Expelled in the last 30 days)' code.

Column Name: school_attendance_value
Column Type: varchar
Max Length: 50
The value of 'school_attendance_code'.

Column Name: school_days_attended
Column Type: varchar
Max Length: 5
'School Days Attended (in the last 90 days)' code.

Column Name: soc_connectedness_code
Column Type: varchar
Max Length: 50
'Social Connectedness' code.

Column Name: soc_connectedness_value
Column Type: varchar
Max Length: 60
The value of 'soc_connectedness_code'.

Column Name: take_atyp_antipsyc_code
Column Type: varchar
Max Length: 50
'Taking Atypical Antipsychotic Medication?' code.

Column Name: take_atyp_antipsyc_value
Column Type: varchar
Max Length: 40
The value of 'take_atyp_antipsyc_code'.

Column Name: tanf_status_code
Column Type: varchar
Max Length: 50
'TANF Status?' code.

Column Name: tanf_status_value
Column Type: varchar
Max Length: 40
The value of 'tanf_status_code'.

Column Name: team_member_notify
Column Type: varchar
Max Length: 20
'Team Member To Notify' user id.

Column Name: team_member_notify_name
Column Type: varchar
Max Length: 50
'Team Member To Notify' user name.

Column Name: times_arrested
Column Type: integer
'Times Arrested (in the last 30 days)'.

Column Name: total_days_worked
Column Type: varchar
Max Length: 5
'Total Days Worked (in the last 30 days)'.

Column Name: total_school_days_avail
Column Type: varchar
Max Length: 5
'Total School Days Available (in the last 90 days)'.

Column Name: unable_to_perf_ind_code
Column Type: varchar
Max Length: 50
'Unable to Perform Independently?' code.

Column Name: unable_to_perf_ind_value
Column Type: varchar
Max Length: 40
The value of 'unable_to_perf_ind_code'.

Column Name: veteran_status_code
Column Type: varchar
Max Length: 50
'Veteran Status' code.

Column Name: veteran_status_value
Column Type: varchar
Max Length: 255
The value of 'veteran_status_code'.

Column Name: visually_impaired_code
Column Type: varchar
Max Length: 50
'Visually Impaired?' code.

Column Name: visually_impaired_value
Column Type: varchar
Max Length: 40
The value of 'visually_impaired_code'.

Documentation for form: Task_Definitions

Table Name: SYSTEM.task

Table Description: Patient tasks.

Column Name: ID
Column Type: integer

Column Name: allowable_window
Column Type: varchar

Max Length: 50

Column Name: allowable_window_units

Column Type: varchar

Max Length: 50

Column Name: allowable_window_unit_val

Column Type: varchar

Max Length: 50

Column Name: CanComplete

Column Type: varchar

Max Length: 50

Internal use only, is not a persistent property.

Column Name: CanReschedule

Column Type: varchar

Max Length: 50

Internal use only, is not a persistent property.

Column Name: days_of_week

Column Type: varchar

Max Length: 50

Column Name: end_date_time

Column Type: timestamp

Column Name: episode

Column Type: integer

Column Name: FACILITY

Column Type: integer

Column Name: frequency_per_period

Column Type: varchar

Max Length: 50

Column Name: group_entry_id

Column Type: integer

What group entry created this task

Column Name: group_task_id

Column Type: integer
What group created this task

Column Name: last_performed_date_time
Column Type: timestamp

Column Name: last_success_date_time
Column Type: timestamp

Column Name: next_available_date_time
Column Type: timestamp

Column Name: oe_frequency_code
Column Type: varchar
Max Length: 50

Column Name: offset_event
Column Type: varchar
Max Length: 50
This is the offset event associated to the group. Will be blank if a group did not create the task

Column Name: one_time_only
Column Type: varchar
Max Length: 50
Whether or not the task is only to be done once.

Column Name: order_type
Column Type: varchar
Max Length: 50
Order Type

Column Name: PATID
Column Type: varchar
Max Length: 20

Column Name: PRN_interval
Column Type: varchar
Max Length: 50
PRN Interval

Column Name: PRN_interval_units
Column Type: varchar
Max Length: 50
PRN Interval Units

Column Name: PRN_max_per_period
Column Type: varchar
Max Length: 50
PRN Max Per Period

Column Name: PRN_max_period
Column Type: varchar
Max Length: 50
PRN Max Period

Column Name: PRN_max_period_unit
Column Type: varchar
Max Length: 50
PRN Max Period Unit

Column Name: parent_task_group_id
Column Type: integer

Column Name: period
Column Type: integer

Column Name: period_unit
Column Type: varchar
Max Length: 50

Column Name: priority_value
Column Type: varchar
Max Length: 50
Priority Value

Column Name: ReadOnly
Column Type: varchar
Max Length: 50
Internal use only, is not a persistent property.

Column Name: rescheduled_first_occ
Column Type: timestamp
Datetime of the first occurrence of a task if it differs from the scheduled time indicated by the timing/frequency.

Column Name: rescheduled_second_occ
Column Type: timestamp
Datetime of the second occurrence of a task if it differs from the scheduled time indicated by the timing/frequency.

Column Name: responsible_category
Column Type: varchar

Max Length: 1000

Column Name: responsible_category_value

Column Type: varchar

Max Length: 1000

Column Name: shift_period

Column Type: varchar

Max Length: 1000

Column Name: shift_period_code

Column Type: varchar

Max Length: 50

Column Name: source_description

Column Type: varchar

Max Length: 1000

User-facing description of the source/event which created the task.

Column Name: source_event

Column Type: varchar

Max Length: 50

Column Name: source_id

Column Type: varchar

Max Length: 100

Column Name: source_type

Column Type: varchar

Max Length: 50

Column Name: start_date_time

Column Type: timestamp

Column Name: task_action_identifier

Column Type: varchar

Max Length: 50

Column Name: task_action_type

Column Type: varchar

Max Length: 50

Column Name: task_action_type_value
Column Type: varchar
Max Length: 50

Column Name: task_code
Column Type: varchar
Max Length: 50

Column Name: task_description
Column Type: varchar
Max Length: 10000

Column Name: TaskID
Column Type: integer
This is the ID created when a Task is created. It will be used primarily for XML payload

Column Name: TaskOccurrence
Column Type: varchar
Max Length: 4096
Internal use only, is not a persistent property. Only used to generate XML payload of task occurrences which are created by a "parent" Task.

Column Name: task_title
Column Type: varchar
Max Length: 50

Column Name: time_of_day
Column Type: varchar
Max Length: 5000

Column Name: timing_code
Column Type: varchar
Max Length: 50

Column Name: timing_description
Column Type: varchar
Max Length: 50

Column Name: data_entry_by
Column Type: varchar
Max Length: 40

The user who last updated the row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The user name that last updated the row.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar

Max Length: 50

The name of the form that last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 15

The time the row was last updated.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The user ID who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name who last updated the row.

Column Name: data_entry_utc

Column Type: timestamp
the UTC date and time the data was saved.

Column Name: is_PRN
Column Type: varchar
Max Length: 50
is this a PRN task

Column Name: is_STAT
Column Type: varchar
Max Length: 50
is this a STAT task

Column Name: priority
Column Type: varchar
Max Length: 50
Priority Code

The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Documentation for form: Task_Definitions

Table Name: SYSTEM.task_event

Table Description: Task events

Column Name: ID
Column Type: integer

Column Name: FACILITY
Column Type: integer
The system code in which the task event was stored.

Column Name: PATID
Column Type: varchar
Max Length: 20
Client ID

Column Name: STAFFID
Column Type: varchar
Max Length: 50
Staff ID

Column Name: comments
Column Type: varchar
Max Length: 32766
Comments of the task event

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user name that last updated this data row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated this data row.

Column Name: data_entry_date
Column Type: date
The date when this data row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The source that last updated this data row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 15
The time when this data row was last updated.

Column Name: data_entry_time_j

Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user id that last updated this data row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name that last updated this data row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: event_date_time
Column Type: timestamp
Date of the task event

Column Name: event_reason_code
Column Type: varchar
Max Length: 50
Reason Code associated to the task event

Column Name: event_reason_text
Column Type: varchar
Max Length: 32766
Reason text of the task event

Column Name: event_reason_value
Column Type: varchar
Max Length: 50
The description associated with field event_reason_code. See field event_reason_code for more information.

Column Name: parent_task_ID
Column Type: varchar
Max Length: 100

parent task ID

Column Name: status_code

Column Type: varchar

Max Length: 50

Status of the task event

Column Name: status_value

Column Type: varchar

Max Length: 50

The description associated with field status_code. See field status_code for more information.

Column Name: task_occurrence_id

Column Type: integer

Task Occurrence Row ID

Column Name: void_STAFFID

Column Type: varchar

Max Length: 50

Void Staff ID

Column Name: void_data_entry_by

Column Type: varchar

Max Length: 40

The user name that last updated this data row.

Column Name: void_data_entry_by_option

Column Type: varchar

Max Length: 40

The user name that last updated this data row.

Column Name: void_data_entry_date

Column Type: date

The date when this data row was last updated.

Column Name: void_data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: void_data_entry_source

Column Type: varchar

Max Length: 255

The source that last updated this data row.

Column Name: void_data_entry_time

Column Type: varchar

Max Length: 15

The time when this data row was last updated.

Column Name: void_data_entry_time_j

Column Type: time
the time with fractional seconds when the data was saved.

Column Name: void_data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: void_data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: void_data_entry_user_id
Column Type: varchar
Max Length: 40
The user id that last updated this data row.

Column Name: void_data_entry_user_name
Column Type: varchar
Max Length: 40
The user name that last updated this data row.

Column Name: void_data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: voided
Column Type: bit

Column Name: voided_reason_code
Column Type: varchar
Max Length: 50
Reason for voiding the task event

Column Name: voided_reason_text
Column Type: varchar
Max Length: 32766
Reason for voiding the task event

Column Name: voided_reason_value
Column Type: varchar
Max Length: 50
The description associated with field voided_reason_code. See field voided_reason_code for more information.

Documentation for form: Void_Progress_Notes

Table Name: SYSTEM.cw_append_notes_voided

Table Description: This table returns information associated with edits of voided progress notes.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: EPISODE_NUMBER
Column Type: integer
'Episode Number'.

Column Name: FACILITY
Column Type: integer
The facility in which the progress note edit was voided.

Column Name: FILING_COUNTER
Column Type: integer
The number of times this edit was voided.

Column Name: NOT_filing_counter
Column Type: integer
The number of times this note was voided.

Column Name: NTAuniqueid
Column Type: varchar
Max Length: 50
Reference to information associated to the edit of the voided note.

Column Name: PATID
Column Type: varchar
Max Length: 20
'Client ID'.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date

The date the row was last updated.

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 50

The time the row was last updated.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The User ID who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The username who last updated the row.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: list_of_notes_code

Column Type: varchar

Max Length: 50

Reference code to information associated with the voided note.

Column Name: list_of_notes_value

Column Type: varchar

Max Length: 50

The value of list_of_notes_code. See list_of_notes_code for more information.

Column Name: new_comms_to_be_append

Column Type: varchar

Max Length: 32766

'Comments'.

Column Name: notes_entry_index_nu

Column Type: varchar

Max Length: 50

Reference to information associated with the voided note.

Column Name: note_type_code

Column Type: varchar

Max Length: 50

Note Type Code.

Column Name: note_type_value

Column Type: varchar

Max Length: 50

The value of note_type_code. See note_type_code for more information.

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Column Name: void_data_entry_by

Column Type: varchar

Max Length: 40

The user who voided the row.

Column Name: void_data_entry_by_option

Column Type: varchar

Max Length: 40

The user name that voided the row.

Column Name: void_data_entry_date

Column Type: date

The date the row was voided.

Column Name: void_data_entry_time

Column Type: varchar

Max Length: 10

The time the row was voided.

Column Name: void_data_entry_user_id

Column Type: varchar
Max Length: 40
The 'User ID' who voided the row.

Column Name: void_data_entry_user_name
Column Type: varchar
Max Length: 40
The username who voided the row.

Column Name: void_option_desc
Column Type: varchar
Max Length: 80
The name of the form that voided the row.

Column Name: void_option_id
Column Type: varchar
Max Length: 40
The unique ID of the form that voided the row.

Documentation for form: Void_Progress_Notes

Table Name: SYSTEM.cw_notes_voided

Table Description: This table returns voided progress notes.

Column Name: blank_row_id
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: Filing_Hist
Column Type: varchar
Max Length: 20
Unique historic where the data will be stored.

Column Name: notes_field
Column Type: varchar
Max Length: 32759

'Notes Field'

Column Name: note_type_code

Column Type: varchar

Max Length: 50

'Note Type code'

Column Name: note_type_value

Column Type: varchar

Max Length: 40

The description associated with note_type_code. See note_type_code for more information.

Column Name: note_time

Column Type: varchar

Max Length: 25

'Note Time'

Column Name: EPISODE_NUMBER

Column Type: integer

The episode number associated with PATID.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The user name that last updated the row.

Column Name: new_existing_svc_code

Column Type: varchar

Max Length: 5

'New Existing Service Code For. (Progress Note For)'

Column Name: new_existing_svc_value

Column Type: varchar

Max Length: 40

The description associated with new_existing_svc_code. See new_existing_svc_code for more information.

Column Name: service_charge_code

Column Type: varchar

Max Length: 40

'Service Charge Code'

Column Name: service_program_code
Column Type: varchar
Max Length: 6
'Service Program code'

Column Name: service_program_value
Column Type: varchar
Max Length: 40
The description associated with service_program_code. See service_program_code for more information.

Column Name: service_duration
Column Type: varchar
Max Length: 5
'Service Duration'

Column Name: note_addresses
Column Type: varchar
Max Length: 40
'Note Addresses Which Existing Service/Appointment'

Column Name: note_add_wh_tp_plan_prob
Column Type: varchar
Max Length: 32759
'Note Addresses Which Treatment Plan Problem'

Column Name: Tx_Note_UniqueId
Column Type: varchar
Max Length: 40
Unique ID for a service note.

Column Name: FILING_COUNTER
Column Type: integer
'Filing Counter'

Column Name: GROUP_ID
Column Type: varchar
Max Length: 10
'Group Name Or Number'

Column Name: JOIN_TO_TX_HISTORY
Column Type: varchar
Max Length: 40
Unique ID for a service.

Column Name: TODO_ID
Column Type: varchar
Max Length: 20
'To Do Id'

Column Name: aps_link

Column Type: varchar
Max Length: 40
'Note Addresses Which Existing Appointment'

Column Name: clinical_quality_code
Column Type: varchar
Max Length: 255
'Clinical Quality Indicators'

Column Name: clinical_quality_sh_val
Column Type: varchar
Max Length: 255
'The description associated with clinical_quality_code. See clinical_quality_code for more information.'

Column Name: clinical_quality_value
Column Type: varchar
Max Length: 4096
'The description associated with clinical_quality_code. See clinical_quality_code for more information.'

Column Name: co_sign_to_do_user
Column Type: varchar
Max Length: 50
'User To Send Co-Sign To Do Item To'

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The user ID who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name who last updated the row.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: date_of_group_service

Column Type: date

Date of service for group.

Column Name: draft_final_code

Column Type: varchar

Max Length: 5

'Draft/Final code'

Column Name: draft_final_value

Column Type: varchar

Max Length: 40

The description associated with draft_final_code. See draft_final_code for more information.

Column Name: ebps_code

Column Type: varchar

Max Length: 255

'Evidence Based Practices'

Column Name: ebps_sh_val

Column Type: varchar

Max Length: 255

'The description associated with ebps_code. See ebps_code for more information.

Column Name: ebps_value

Column Type: varchar

Max Length: 4096

'The description associated with ebps_code. See ebps_code for more information.

Column Name: external_system_id

Column Type: varchar

Max Length: 255

'External System Identifier'

Column Name: finalized_signature
Column Type: varchar
Max Length: 255
'Finalized Signature'

Column Name: medical_diagnosis_1_code
Column Type: varchar
Max Length: 50
'Medical Diagnosis 1 code'

Column Name: medical_diagnosis_1_value
Column Type: varchar
Max Length: 32759
The description associated with medical_diagnosis_1_code. See medical_diagnosis_1_code for more information.

Column Name: medical_diagnosis_2_code
Column Type: varchar
Max Length: 50
'Medical Diagnosis 2 code'

Column Name: medical_diagnosis_2_value
Column Type: varchar
Max Length: 32759
The description associated with medical_diagnosis_2_code. See medical_diagnosis_2_code for more information.

Column Name: notes_entry_index_num
Column Type: varchar
Max Length: 50
'Notes Entry Index Number for Internal Use'

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: orig_note_uniq_id_num
Column Type: varchar
Max Length: 20
'Original Note Unique ID Number'

Column Name: reason_for_void_code
Column Type: varchar
Max Length: 50

'Reason For Voiding The Note code'

Column Name: reason_for_void_value

Column Type: varchar

Max Length: 50

The description associated with reason_for_void_code. See reason_for_void_code for more information.

Column Name: select_tp_version_code

Column Type: varchar

Max Length: 5

'Select T.P. Version code'

Column Name: select_tp_version_value

Column Type: varchar

Max Length: 40

The description associated with select_tp_version_code. See select_tp_version_code for more information.

Column Name: session_start_end_times

Column Type: varchar

Max Length: 32759

'Start/End Time(s)'

Column Name: ss_note_20_char_text_1

Column Type: varchar

Max Length: 20

'SS Note 20 Character Text 1'

Column Name: ss_note_20_char_text_10

Column Type: varchar

Max Length: 20

'SS Note 20 Character Text 10'

Column Name: ss_note_20_char_text_2

Column Type: varchar

Max Length: 20

'SS Note 20 Character Text 2'

Column Name: ss_note_20_char_text_3

Column Type: varchar

Max Length: 20

'SS Note 20 Character Text 3'

Column Name: ss_note_20_char_text_4

Column Type: varchar

Max Length: 20

'SS Note 20 Character Text 4'

Column Name: ss_note_20_char_text_5

Column Type: varchar

Max Length: 20

'SS Note 20 Character Text 5'

Column Name: ss_note_20_char_text_6

Column Type: varchar

Max Length: 20

'SS Note 20 Character Text 6'

Column Name: ss_note_20_char_text_7

Column Type: varchar

Max Length: 20

'SS Note 20 Character Text 7'

Column Name: ss_note_20_char_text_8

Column Type: varchar

Max Length: 20

'SS Note 20 Character Text 8'

Column Name: ss_note_20_char_text_9

Column Type: varchar

Max Length: 20

'SS Note 20 Character Text 9'

Column Name: ss_note_40_char_text_1

Column Type: varchar

Max Length: 40

'SS Note 40 Character Text 1'

Column Name: ss_note_40_char_text_10

Column Type: varchar

Max Length: 40

'SS Note 40 Character Text 10'

Column Name: ss_note_40_char_text_2

Column Type: varchar

Max Length: 40

'SS Note 40 Character Text 2'

Column Name: ss_note_40_char_text_3

Column Type: varchar

Max Length: 40

'SS Note 40 Character Text 3'

Column Name: ss_note_40_char_text_4

Column Type: varchar

Max Length: 40

'SS Note 40 Character Text 4'

Column Name: ss_note_40_char_text_5

Column Type: varchar

Max Length: 40

'SS Note 40 Character Text 5'

Column Name: ss_note_40_char_text_6

Column Type: varchar

Max Length: 40

'SS Note 40 Character Text 6'

Column Name: ss_note_40_char_text_7

Column Type: varchar

Max Length: 40

'SS Note 40 Character Text 7'

Column Name: ss_note_40_char_text_8

Column Type: varchar

Max Length: 40

'SS Note 40 Character Text 8'

Column Name: ss_note_40_char_text_9

Column Type: varchar

Max Length: 40

'SS Note 40 Character Text 9'

Column Name: ss_note_80_char_text_1

Column Type: varchar

Max Length: 80

'SS Note 80 Character Text 1'

Column Name: ss_note_80_char_text_10

Column Type: varchar

Max Length: 80

'SS Note 80 Character Text 10'

Column Name: ss_note_80_char_text_2

Column Type: varchar

Max Length: 80

'SS Note 80 Character Text 2'

Column Name: ss_note_80_char_text_3

Column Type: varchar

Max Length: 80

'SS Note 80 Character Text 3'

Column Name: ss_note_80_char_text_4

Column Type: varchar

Max Length: 80

'SS Note 80 Character Text 4'

Column Name: ss_note_80_char_text_5

Column Type: varchar

Max Length: 80

'SS Note 80 Character Text 5'

Column Name: ss_note_80_char_text_6

Column Type: varchar

Max Length: 80

'SS Note 80 Character Text 6'

Column Name: ss_note_80_char_text_7

Column Type: varchar

Max Length: 80

'SS Note 80 Character Text 7'

Column Name: ss_note_80_char_text_8

Column Type: varchar

Max Length: 80

'SS Note 80 Character Text 8'

Column Name: ss_note_80_char_text_9

Column Type: varchar

Max Length: 80

'SS Note 80 Character Text 9'

Column Name: ss_note_date_1

Column Type: date

'SS Note Date 1'

Column Name: ss_note_date_10

Column Type: date

'SS Note Date 10'

Column Name: ss_note_date_2

Column Type: date

'SS Note Date 2'

Column Name: ss_note_date_3

Column Type: date

'SS Note Date 3'

Column Name: ss_note_date_4

Column Type: date

'SS Note Date 4'

Column Name: ss_note_date_5

Column Type: date

'SS Note Date 5'

Column Name: ss_note_date_6

Column Type: date

'SS Note Date 6'

Column Name: ss_note_date_7
Column Type: date
'SS Note Date 7'

Column Name: ss_note_date_8
Column Type: date
'SS Note Date 8'

Column Name: ss_note_date_9
Column Type: date
'SS Note Date 9'

Column Name: ss_note_dsm_diag_10_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 10 code'

Column Name: ss_note_dsm_diag_10_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_10_code. See ss_note_dsm_diag_10_code for more information.

Column Name: ss_note_dsm_diag_1_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 1 code'

Column Name: ss_note_dsm_diag_1_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_1_code. See ss_note_dsm_diag_1_code for more information.

Column Name: ss_note_dsm_diag_2_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 2 code'

Column Name: ss_note_dsm_diag_2_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_2_code. See ss_note_dsm_diag_2_code for more information.

Column Name: ss_note_dsm_diag_3_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 3 code'

Column Name: ss_note_dsm_diag_3_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_3_code. See ss_note_dsm_diag_3_code for more information.

Column Name: ss_note_dsm_diag_4_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 4 code'

Column Name: ss_note_dsm_diag_4_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_4_code. See ss_note_dsm_diag_4_code for more information.

Column Name: ss_note_dsm_diag_5_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 5 code'

Column Name: ss_note_dsm_diag_5_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_5_code. See ss_note_dsm_diag_5_code for more information.

Column Name: ss_note_dsm_diag_6_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 6 code'

Column Name: ss_note_dsm_diag_6_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_6_code. See ss_note_dsm_diag_6_code for more information.

Column Name: ss_note_dsm_diag_7_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 7 code'

Column Name: ss_note_dsm_diag_7_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_7_code. See ss_note_dsm_diag_7_code for more information.

Column Name: ss_note_dsm_diag_8_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 8 code'

Column Name: ss_note_dsm_diag_8_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_8_code. See ss_note_dsm_diag_8_code for more information.

Column Name: ss_note_dsm_diag_9_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 9 code'

Column Name: ss_note_dsm_diag_9_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_9_code. See ss_note_dsm_diag_9_code for more information.

Column Name: ss_note_icd9_diag_10_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Diagnosis 10 code'

Column Name: ss_note_icd9_diag_10_val
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_10_code. See ss_note_icd9_diag_10_code for more information.

Column Name: ss_note_icd9_diag_1_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Diagnosis 1 code'

Column Name: ss_note_icd9_diag_1_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_1_code. See ss_note_icd9_diag_1_code for more information.

Column Name: ss_note_icd9_diag_2_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Diagnosis 2 code'

Column Name: ss_note_icd9_diag_2_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_2_code. See ss_note_icd9_diag_2_code for more information.

Column Name: ss_note_icd9_diag_3_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Diagnosis 3 code'

Column Name: ss_note_icd9_diag_3_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_3_code. See ss_note_icd9_diag_3_code for more information.

Column Name: ss_note_icd9_diag_4_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Diagnosis 4 code'

Column Name: ss_note_icd9_diag_4_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_4_code. See ss_note_icd9_diag_4_code for more information.

Column Name: ss_note_icd9_diag_5_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Diagnosis 5 code'

Column Name: ss_note_icd9_diag_5_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_5_code. See ss_note_icd9_diag_5_code for more information.

Column Name: ss_note_icd9_diag_6_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Diagnosis 6 code'

Column Name: ss_note_icd9_diag_6_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_6_code. See ss_note_icd9_diag_6_code for more information.

Column Name: ss_note_icd9_diag_7_code

Column Type: varchar
Max Length: 20
'SS Note ICD-9 Diagnosis 7 code'

Column Name: ss_note_icd9_diag_7_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_7_code. See ss_note_icd9_diag_7_code for more information.

Column Name: ss_note_icd9_diag_8_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Diagnosis 8 code'

Column Name: ss_note_icd9_diag_8_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_8_code. See ss_note_icd9_diag_8_code for more information.

Column Name: ss_note_icd9_diag_9_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Diagnosis 9 code'

Column Name: ss_note_icd9_diag_9_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_9_code. See ss_note_icd9_diag_9_code for more information.

Column Name: ss_note_multi_dict_10_cod
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 10 code'

Column Name: ss_note_multi_dict_10_val
Column Type: varchar
Max Length: 32759
The description associated with ss_note_multi_dict_10_code. See ss_note_multi_dict_10_code for more information.

Column Name: ss_note_multi_dict_1_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 1 code'

Column Name: ss_note_multi_dict_1_val
Column Type: varchar

Max Length: 32759

The description associated with ss_note_multi_dict_1_code. See ss_note_multi_dict_1_code for more information.

Column Name: ss_note_multi_dict_2_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 2 code'

Column Name: ss_note_multi_dict_2_val

Column Type: varchar

Max Length: 32759

The description associated with ss_note_multi_dict_2_code. See ss_note_multi_dict_2_code for more information.

Column Name: ss_note_multi_dict_3_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 3 code'

Column Name: ss_note_multi_dict_3_val

Column Type: varchar

Max Length: 32759

The description associated with ss_note_multi_dict_3_code. See ss_note_multi_dict_3_code for more information.

Column Name: ss_note_multi_dict_4_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 4 code'

Column Name: ss_note_multi_dict_4_val

Column Type: varchar

Max Length: 32759

The description associated with ss_note_multi_dict_4_code. See ss_note_multi_dict_4_code for more information.

Column Name: ss_note_multi_dict_5_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 5 code'

Column Name: ss_note_multi_dict_5_val

Column Type: varchar

Max Length: 32759

The description associated with ss_note_multi_dict_5_code. See ss_note_multi_dict_5_code for more information.

Column Name: ss_note_multi_dict_6_code

Column Type: varchar

Max Length: 20
'SS Note Multi Response Dictionary 6 code'

Column Name: ss_note_multi_dict_6_val
Column Type: varchar
Max Length: 32759
The description associated with ss_note_multi_dict_6_code. See ss_note_multi_dict_6_code for more information.

Column Name: ss_note_multi_dict_7_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 7 code'

Column Name: ss_note_multi_dict_7_val
Column Type: varchar
Max Length: 32759
The description associated with ss_note_multi_dict_7_code. See ss_note_multi_dict_7_code for more information.

Column Name: ss_note_multi_dict_8_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 8 code'

Column Name: ss_note_multi_dict_8_val
Column Type: varchar
Max Length: 32759
The description associated with ss_note_multi_dict_8_code. See ss_note_multi_dict_8_code for more information.

Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 9 code'

Column Name: ss_note_multi_dict_9_val
Column Type: varchar
Max Length: 32759
The description associated with ss_note_multi_dict_9_code. See ss_note_multi_dict_9_code for more information.

Column Name: ss_note_scroll_text_1
Column Type: varchar
Max Length: 32759
'SS Note Scrolling Free Text 1'

Column Name: ss_note_scroll_text_10
Column Type: varchar
Max Length: 32759

'SS Note Scrolling Free Text 10'

Column Name: ss_note_scroll_text_2

Column Type: varchar

Max Length: 32759

'SS Note Scrolling Free Text 2'

Column Name: ss_note_scroll_text_3

Column Type: varchar

Max Length: 32759

'SS Note Scrolling Free Text 3'

Column Name: ss_note_scroll_text_4

Column Type: varchar

Max Length: 32759

'SS Note Scrolling Free Text 4'

Column Name: ss_note_scroll_text_5

Column Type: varchar

Max Length: 32759

'SS Note Scrolling Free Text 5'

Column Name: ss_note_scroll_text_6

Column Type: varchar

Max Length: 32759

'SS Note Scrolling Free Text 6'

Column Name: ss_note_scroll_text_7

Column Type: varchar

Max Length: 32759

'SS Note Scrolling Free Text 7'

Column Name: ss_note_scroll_text_8

Column Type: varchar

Max Length: 32759

'SS Note Scrolling Free Text 8'

Column Name: ss_note_scroll_text_9

Column Type: varchar

Max Length: 32759

'SS Note Scrolling Free Text 9'

Column Name: ss_note_sing_dict_10_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 10 code'

Column Name: ss_note_sing_dict_10_val

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_10_code. See ss_note_sing_dict_10_code for more information.

Column Name: ss_note_sing_dict_1_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 1 code'

Column Name: ss_note_sing_dict_1_value
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_1_code. See ss_note_sing_dict_1_code for more information.

Column Name: ss_note_sing_dict_2_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 2 code'

Column Name: ss_note_sing_dict_2_value
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_2_code. See ss_note_sing_dict_2_code for more information.

Column Name: ss_note_sing_dict_3_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 3 code'

Column Name: ss_note_sing_dict_3_value
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_3_code. See ss_note_sing_dict_3_code for more information.

Column Name: ss_note_sing_dict_4_code
Column Type: varchar
Max Length: 20
'SS Note Single Response Dictionary 4 code'

Column Name: ss_note_sing_dict_4_value
Column Type: varchar
Max Length: 80
The description associated with ss_note_sing_dict_4_code. See ss_note_sing_dict_4_code for more information.

Column Name: ss_note_sing_dict_5_code
Column Type: varchar
Max Length: 20

'SS Note Single Response Dictionary 5 code'

Column Name: ss_note_sing_dict_5_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_5_code. See ss_note_sing_dict_5_code for more information.

Column Name: ss_note_sing_dict_6_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 6 code'

Column Name: ss_note_sing_dict_6_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_6_code. See ss_note_sing_dict_6_code for more information.

Column Name: ss_note_sing_dict_7_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 7 code'

Column Name: ss_note_sing_dict_7_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_7_code. See ss_note_sing_dict_7_code for more information.

Column Name: ss_note_sing_dict_8_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 8 code'

Column Name: ss_note_sing_dict_8_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_8_code. See ss_note_sing_dict_8_code for more information.

Column Name: ss_note_sing_dict_9_code

Column Type: varchar

Max Length: 20

'SS Note Single Response Dictionary 9 code'

Column Name: ss_note_sing_dict_9_value

Column Type: varchar

Max Length: 80

The description associated with ss_note_sing_dict_9_code. See ss_note_sing_dict_9_code for more information.

Column Name: ss_note_staff_1
Column Type: varchar
Max Length: 20
'SS Note Staff Member 1'

Column Name: ss_note_staff_10
Column Type: varchar
Max Length: 20
'SS Note Staff Member 10'

Column Name: ss_note_staff_2
Column Type: varchar
Max Length: 20
'SS Note Staff Member 2'

Column Name: ss_note_staff_3
Column Type: varchar
Max Length: 20
'SS Note Staff Member 3'

Column Name: ss_note_staff_4
Column Type: varchar
Max Length: 20
'SS Note Staff Member 4'

Column Name: ss_note_staff_5
Column Type: varchar
Max Length: 20
'SS Note Staff Member 5'

Column Name: ss_note_staff_6
Column Type: varchar
Max Length: 20
'SS Note Staff Member 6'

Column Name: ss_note_staff_7
Column Type: varchar
Max Length: 20
'SS Note Staff Member 7'

Column Name: ss_note_staff_8
Column Type: varchar
Max Length: 20
'SS Note Staff Member 8'

Column Name: ss_note_staff_9
Column Type: varchar

Max Length: 20
'SS Note Staff Member 9'

Column Name: ss_note_time_1
Column Type: varchar
Max Length: 10
'SS Note Time 1'

Column Name: ss_note_time_10
Column Type: varchar
Max Length: 10
'SS Note Time 10'

Column Name: ss_note_time_2
Column Type: varchar
Max Length: 10
'SS Note Time 2'

Column Name: ss_note_time_3
Column Type: varchar
Max Length: 10
'SS Note Time 3'

Column Name: ss_note_time_4
Column Type: varchar
Max Length: 10
'SS Note Time 4'

Column Name: ss_note_time_5
Column Type: varchar
Max Length: 10
'SS Note Time 5'

Column Name: ss_note_time_6
Column Type: varchar
Max Length: 10
'SS Note Time 6'

Column Name: ss_note_time_7
Column Type: varchar
Max Length: 10
'SS Note Time 7'

Column Name: ss_note_time_8
Column Type: varchar
Max Length: 10
'SS Note Time 8'

Column Name: ss_note_time_9
Column Type: varchar

Max Length: 10
'SS Note Time 9'

Column Name: transcription_note
Column Type: bit
Is this is Transcription note

Column Name: transition_of_care_code
Column Type: varchar
Max Length: 1
'Is This A Transition Of Care?'

Column Name: transition_of_care_value
Column Type: varchar
Max Length: 80
'The description associated with transition_of_care_code. See transition_of_care_code for more information.'

Column Name: user_row_access_code
Column Type: integer
If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Column Name: void_comments
Column Type: varchar
Max Length: 32759
'Void Comments'

Column Name: void_data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row for a void.

Column Name: void_data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row for a void.

Column Name: void_data_entry_date
Column Type: date
The date the row was voided.

Column Name: void_data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row for a void.

Column Name: void_data_entry_time
Column Type: varchar

Max Length: 10

The time the row was last updated for a void.

Column Name: void_data_entry_user_id

Column Type: varchar

Max Length: 40

The 'User ID' that last updated the row for a void.

Column Name: void_data_entry_user_name

Column Type: varchar

Max Length: 40

The 'User Description' of the 'User ID' for a void.

Column Name: void_option_desc

Column Type: varchar

Max Length: 80

The name of the form that last updated the row for a void.

Column Name: void_option_id

Column Type: varchar

Max Length: 40

The unique ID of the form that last updated the row for a void.

Documentation for form: Void_Progress_Notes

Table Name: SYSTEM.cw_patient_not_void_sup_4

Table Description: This table returns supplemental information stored in the 'Void Progress Notes' form.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 10

The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: FILING_COUNTER
Column Type: integer
Filing Counter

Column Name: Filing_Hist
Column Type: varchar
Max Length: 50
Unique Identifier used for filing.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: form_number
Column Type: varchar
Max Length: 50
The unique identifier for a form.

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: ss_notc_mult_dic_51_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 51 code'

Column Name: ss_notc_mult_dic_51_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mult_dic_51_code. See ss_notc_mult_dic_51_code for more information.

Column Name: ss_notc_mult_dic_52_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 52 code'

Column Name: ss_notc_mult_dic_52_value
Column Type: varchar
Max Length: 255

The description associated with `ss_notc_mult_dic_52_code`. See `ss_notc_mult_dic_52_code` for more information.

Column Name: `ss_notc_mult_dic_53_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 53 code'

Column Name: `ss_notc_mult_dic_53_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_53_code`. See `ss_notc_mult_dic_53_code` for more information.

Column Name: `ss_notc_mult_dic_54_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 54 code'

Column Name: `ss_notc_mult_dic_54_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_54_code`. See `ss_notc_mult_dic_54_code` for more information.

Column Name: `ss_notc_mult_dic_55_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 55 code'

Column Name: `ss_notc_mult_dic_55_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_55_code`. See `ss_notc_mult_dic_55_code` for more information.

Column Name: `ss_notc_mult_dic_56_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 56 code'

Column Name: `ss_notc_mult_dic_56_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_56_code`. See `ss_notc_mult_dic_56_code` for more information.

Column Name: `ss_notc_mult_dic_57_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 57 code'

Column Name: ss_notc_mult_dic_57_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_57_code. See ss_notc_mult_dic_57_code for more information.

Column Name: ss_notc_mult_dic_58_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 58 code'

Column Name: ss_notc_mult_dic_58_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_58_code. See ss_notc_mult_dic_58_code for more information.

Column Name: ss_notc_mult_dic_59_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 59 code'

Column Name: ss_notc_mult_dic_59_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_59_code. See ss_notc_mult_dic_59_code for more information.

Column Name: ss_notc_mult_dic_60_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 60 code'

Column Name: ss_notc_mult_dic_60_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_60_code. See ss_notc_mult_dic_60_code for more information.

Column Name: ss_notc_mult_dic_61_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 61 code'

Column Name: ss_notc_mult_dic_61_value

Column Type: varchar

Max Length: 255

The description associated with `ss_notc_mult_dic_61_code`. See `ss_notc_mult_dic_61_code` for more information.

Column Name: `ss_notc_mult_dic_62_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 62 code'

Column Name: `ss_notc_mult_dic_62_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_62_code`. See `ss_notc_mult_dic_62_code` for more information.

Column Name: `ss_notc_mult_dic_63_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 63 code'

Column Name: `ss_notc_mult_dic_63_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_63_code`. See `ss_notc_mult_dic_63_code` for more information.

Column Name: `ss_notc_mult_dic_64_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 64 code'

Column Name: `ss_notc_mult_dic_64_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_64_code`. See `ss_notc_mult_dic_64_code` for more information.

Column Name: `ss_notc_mult_dic_65_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 65 code'

Column Name: `ss_notc_mult_dic_65_value`

Column Type: `varchar`

Max Length: 265

The description associated with `ss_notc_mult_dic_65_code`. See `ss_notc_mult_dic_65_code` for more information.

Column Name: `ss_notc_mult_dic_66_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 66 code'

Column Name: ss_notc_mult_dic_66_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_66_code. See ss_notc_mult_dic_66_code for more information.

Column Name: ss_notc_mult_dic_67_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 67 code'

Column Name: ss_notc_mult_dic_67_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_67_code. See ss_notc_mult_dic_67_code for more information.

Column Name: ss_notc_mult_dic_68_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 68 code'

Column Name: ss_notc_mult_dic_68_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_68_code. See ss_notc_mult_dic_68_code for more information.

Column Name: ss_notc_mult_dic_69_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 69 code'

Column Name: ss_notc_mult_dic_69_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_69_code. See ss_notc_mult_dic_69_code for more information.

Column Name: ss_notc_mult_dic_70_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 70 code'

Column Name: ss_notc_mult_dic_70_value

Column Type: varchar

Max Length: 255

The description associated with `ss_notc_mult_dic_70_code`. See `ss_notc_mult_dic_70_code` for more information.

Column Name: `ss_notc_mult_dic_71_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 71 code'

Column Name: `ss_notc_mult_dic_71_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_71_code`. See `ss_notc_mult_dic_71_code` for more information.

Column Name: `ss_notc_mult_dic_72_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 72 code'

Column Name: `ss_notc_mult_dic_72_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_72_code`. See `ss_notc_mult_dic_72_code` for more information.

Column Name: `ss_notc_mult_dic_73_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 73 code'

Column Name: `ss_notc_mult_dic_73_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_73_code`. See `ss_notc_mult_dic_73_code` for more information.

Column Name: `ss_notc_mult_dic_74_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 74 code'

Column Name: `ss_notc_mult_dic_74_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_74_code`. See `ss_notc_mult_dic_74_code` for more information.

Column Name: `ss_notc_mult_dic_75_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 75 code'

Column Name: ss_notc_mult_dic_75_value

Column Type: varchar

Max Length: 275

The description associated with ss_notc_mult_dic_75_code. See ss_notc_mult_dic_75_code for more information.

Column Name: ss_notc_mult_dic_76_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 76 code'

Column Name: ss_notc_mult_dic_76_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_76_code. See ss_notc_mult_dic_76_code for more information.

Column Name: ss_notc_mult_dic_77_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 77 code'

Column Name: ss_notc_mult_dic_77_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_77_code. See ss_notc_mult_dic_77_code for more information.

Column Name: ss_notc_mult_dic_78_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 78 code'

Column Name: ss_notc_mult_dic_78_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mult_dic_78_code. See ss_notc_mult_dic_78_code for more information.

Column Name: ss_notc_mult_dic_79_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 79 code'

Column Name: ss_notc_mult_dic_79_value

Column Type: varchar

Max Length: 255

The description associated with `ss_notc_mult_dic_79_code`. See `ss_notc_mult_dic_79_code` for more information.

Column Name: `ss_notc_mult_dic_80_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Multiple Response Dictionary 80 code'

Column Name: `ss_notc_mult_dic_80_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_mult_dic_80_code`. See `ss_notc_mult_dic_80_code` for more information.

Column Name: `ss_notc_sin_dic_51_code`

Column Type: `varchar`

Max Length: 50

'SS Note Copy Single Response Dictionary 51 code'

Column Name: `ss_notc_sin_dic_51_value`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_notc_sin_dic_51_code`. See `ss_notc_sin_dic_51_code` for more information.

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_58_code. See ss_notc_sin_dic_58_code for more information.

Column Name: ss_notc_sin_dic_59_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 59 code'

Column Name: ss_notc_sin_dic_59_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_59_code. See ss_notc_sin_dic_59_code for more information.

Column Name: ss_notc_sin_dic_60_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 60 code'

Column Name: ss_notc_sin_dic_60_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_60_code. See ss_notc_sin_dic_60_code for more information.

Column Name: ss_notc_sin_dic_61_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 61 code'

Column Name: ss_notc_sin_dic_61_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_61_code. See ss_notc_sin_dic_61_code for more information.

Column Name: ss_notc_sin_dic_62_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 62 code'

Column Name: ss_notc_sin_dic_62_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_62_code. See ss_notc_sin_dic_62_code for more information.

Column Name: ss_notc_sin_dic_63_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 63 code'

Column Name: ss_notc_sin_dic_63_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_63_code. See ss_notc_sin_dic_63_code for more information.

Column Name: ss_notc_sin_dic_64_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 64 code'

Column Name: ss_notc_sin_dic_64_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_64_code. See ss_notc_sin_dic_64_code for more information.

Column Name: ss_notc_sin_dic_65_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 65 code'

Column Name: ss_notc_sin_dic_65_value

Column Type: varchar

Max Length: 265

The description associated with ss_notc_sin_dic_65_code. See ss_notc_sin_dic_65_code for more information.

Column Name: ss_notc_sin_dic_66_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 66 code'

Column Name: ss_notc_sin_dic_66_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_66_code. See ss_notc_sin_dic_66_code for more information.

Column Name: ss_notc_sin_dic_67_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 67 code'

Column Name: ss_notc_sin_dic_67_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_67_code. See ss_notc_sin_dic_67_code for more information.

Column Name: ss_notc_sin_dic_68_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 68 code'

Column Name: ss_notc_sin_dic_68_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_68_code. See ss_notc_sin_dic_68_code for more information.

Column Name: ss_notc_sin_dic_69_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 69 code'

Column Name: ss_notc_sin_dic_69_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_69_code. See ss_notc_sin_dic_69_code for more information.

Column Name: ss_notc_sin_dic_70_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 70 code'

Column Name: ss_notc_sin_dic_70_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_70_code. See ss_notc_sin_dic_70_code for more information.

Column Name: ss_notc_sin_dic_71_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 71 code'

Column Name: ss_notc_sin_dic_71_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_71_code. See ss_notc_sin_dic_71_code for more information.

Column Name: ss_notc_sin_dic_72_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 72 code'

Column Name: ss_notc_sin_dic_72_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_72_code. See ss_notc_sin_dic_72_code for more information.

Column Name: ss_notc_sin_dic_73_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 73 code'

Column Name: ss_notc_sin_dic_73_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_73_code. See ss_notc_sin_dic_73_code for more information.

Column Name: ss_notc_sin_dic_74_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 74 code'

Column Name: ss_notc_sin_dic_74_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_74_code. See ss_notc_sin_dic_74_code for more information.

Column Name: ss_notc_sin_dic_75_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 75 code'

Column Name: ss_notc_sin_dic_75_value

Column Type: varchar

Max Length: 275

The description associated with ss_notc_sin_dic_75_code. See ss_notc_sin_dic_75_code for more information.

Column Name: ss_notc_sin_dic_76_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 76 code'

Column Name: ss_notc_sin_dic_76_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_76_code. See ss_notc_sin_dic_76_code for more information.

Column Name: ss_notc_sin_dic_77_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 77 code'

Column Name: ss_notc_sin_dic_77_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_77_code. See ss_notc_sin_dic_77_code for more information.

Column Name: ss_notc_sin_dic_78_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 78 code'

Column Name: ss_notc_sin_dic_78_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_78_code. See ss_notc_sin_dic_78_code for more information.

Column Name: ss_notc_sin_dic_79_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 79 code'

Column Name: ss_notc_sin_dic_79_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_79_code. See ss_notc_sin_dic_79_code for more information.

Column Name: ss_notc_sin_dic_80_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 80 code'

Column Name: ss_notc_sin_dic_80_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_80_code. See ss_notc_sin_dic_80_code for more information.

Column Name: ss_note_mul_dict_51_code
Column Type: varchar
Max Length: 20

'SS Note Multi Response Dictionary 51 code'

Column Name: ss_note_mul_dict_51_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_51_code limited to 255 characters. See ss_note_mul_dict_51_code for more information.

Column Name: ss_note_mul_dict_51_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_51_code. See ss_note_mul_dict_51_code for more information.

Column Name: ss_note_mul_dict_52_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 52 code'

Column Name: ss_note_mul_dict_52_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_52_code limited to 255 characters. See ss_note_mul_dict_52_code for more information.

Column Name: ss_note_mul_dict_52_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_52_code. See ss_note_mul_dict_52_code for more information.

Column Name: ss_note_mul_dict_53_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 53 code'

Column Name: ss_note_mul_dict_53_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_53_code limited to 255 characters. See ss_note_mul_dict_53_code for more information.

Column Name: ss_note_mul_dict_53_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_53_code. See ss_note_mul_dict_53_code for more information.

Column Name: ss_note_mul_dict_54_code

Column Type: varchar

Max Length: 20
'SS Note Multi Response Dictionary 54 code'

Column Name: ss_note_mul_dict_54_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_54_code limited to 255 characters. See ss_note_mul_dict_54_code for more information.

Column Name: ss_note_mul_dict_54_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_54_code. See ss_note_mul_dict_54_code for more information.

Column Name: ss_note_mul_dict_55_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 55 code'

Column Name: ss_note_mul_dict_55_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_55_code limited to 255 characters. See ss_note_mul_dict_55_code for more information.

Column Name: ss_note_mul_dict_55_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_55_code. See ss_note_mul_dict_55_code for more information.

Column Name: ss_note_mul_dict_56_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 56 code'

Column Name: ss_note_mul_dict_56_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_56_code limited to 255 characters. See ss_note_mul_dict_56_code for more information.

Column Name: ss_note_mul_dict_56_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_56_code. See ss_note_mul_dict_56_code for more information.

Column Name: ss_note_mul_dict_57_code

Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 57 code'

Column Name: ss_note_mul_dict_57_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_57_code limited to 255 characters. See ss_note_mul_dict_57_code for more information.

Column Name: ss_note_mul_dict_57_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_57_code. See ss_note_mul_dict_57_code for more information.

Column Name: ss_note_mul_dict_58_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 58 code'

Column Name: ss_note_mul_dict_58_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_58_code limited to 255 characters. See ss_note_mul_dict_58_code for more information.

Column Name: ss_note_mul_dict_58_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_58_code. See ss_note_mul_dict_58_code for more information.

Column Name: ss_note_mul_dict_59_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 59 code'

Column Name: ss_note_mul_dict_59_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_59_code limited to 255 characters. See ss_note_mul_dict_59_code for more information.

Column Name: ss_note_mul_dict_59_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_59_code. See ss_note_mul_dict_59_code for more information.

Column Name: ss_note_mul_dict_60_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 60 code'

Column Name: ss_note_mul_dict_60_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_60_code limited to 255 characters. See ss_note_mul_dict_60_code for more information.

Column Name: ss_note_mul_dict_60_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_60_code. See ss_note_mul_dict_60_code for more information.

Column Name: ss_note_mul_dict_61_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 61 code'

Column Name: ss_note_mul_dict_61_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_61_code limited to 255 characters. See ss_note_mul_dict_61_code for more information.

Column Name: ss_note_mul_dict_61_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_61_code. See ss_note_mul_dict_61_code for more information.

Column Name: ss_note_mul_dict_62_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 62 code'

Column Name: ss_note_mul_dict_62_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_62_code limited to 255 characters. See ss_note_mul_dict_62_code for more information.

Column Name: ss_note_mul_dict_62_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_62_code. See ss_note_mul_dict_62_code for more information.

Column Name: ss_note_mul_dict_63_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 63 code'

Column Name: ss_note_mul_dict_63_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_63_code limited to 255 characters. See ss_note_mul_dict_63_code for more information.

Column Name: ss_note_mul_dict_63_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_63_code. See ss_note_mul_dict_63_code for more information.

Column Name: ss_note_mul_dict_64_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 64 code'

Column Name: ss_note_mul_dict_64_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_64_code limited to 255 characters. See ss_note_mul_dict_64_code for more information.

Column Name: ss_note_mul_dict_64_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_mul_dict_64_code. See ss_note_mul_dict_64_code for more information.

Column Name: ss_note_mul_dict_65_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 65 code'

Column Name: ss_note_mul_dict_65_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dict_65_code limited to 255 characters. See ss_note_mul_dict_65_code for more information.

Column Name: ss_note_mul_dict_65_value
Column Type: varchar
Max Length: 32700

The description associated with ss_note_mul_dict_65_code. See ss_note_mul_dict_65_code for more information.

Column Name: ss_note_mul_dict_66_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 66 code'

Column Name: ss_note_mul_dict_66_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_66_code limited to 255 characters. See ss_note_mul_dict_66_code for more information.

Column Name: ss_note_mul_dict_66_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_66_code. See ss_note_mul_dict_66_code for more information.

Column Name: ss_note_mul_dict_67_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 67 code'

Column Name: ss_note_mul_dict_67_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_67_code limited to 255 characters. See ss_note_mul_dict_67_code for more information.

Column Name: ss_note_mul_dict_67_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_67_code. See ss_note_mul_dict_67_code for more information.

Column Name: ss_note_mul_dict_68_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 68 code'

Column Name: ss_note_mul_dict_68_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_68_code limited to 255 characters. See ss_note_mul_dict_68_code for more information.

Column Name: ss_note_mul_dict_68_value

Column Type: varchar

Max Length: 32700

The description associated with `ss_note_mul_dict_68_code`. See `ss_note_mul_dict_68_code` for more information.

Column Name: `ss_note_mul_dict_69_code`

Column Type: `varchar`

Max Length: 20

'SS Note Multi Response Dictionary 69 code'

Column Name: `ss_note_mul_dict_69_shval`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_note_mul_dict_69_code` limited to 255 characters. See `ss_note_mul_dict_69_code` for more information.

Column Name: `ss_note_mul_dict_69_value`

Column Type: `varchar`

Max Length: 32700

The description associated with `ss_note_mul_dict_69_code`. See `ss_note_mul_dict_69_code` for more information.

Column Name: `ss_note_mul_dict_70_code`

Column Type: `varchar`

Max Length: 20

'SS Note Multi Response Dictionary 70 code'

Column Name: `ss_note_mul_dict_70_shval`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_note_mul_dict_70_code` limited to 255 characters. See `ss_note_mul_dict_70_code` for more information.

Column Name: `ss_note_mul_dict_70_value`

Column Type: `varchar`

Max Length: 32700

The description associated with `ss_note_mul_dict_70_code`. See `ss_note_mul_dict_70_code` for more information.

Column Name: `ss_note_mul_dict_71_code`

Column Type: `varchar`

Max Length: 20

'SS Note Multi Response Dictionary 71 code'

Column Name: `ss_note_mul_dict_71_shval`

Column Type: `varchar`

Max Length: 255

The description associated with `ss_note_mul_dict_71_code` limited to 255 characters. See `ss_note_mul_dict_71_code` for more information.

Column Name: `ss_note_mul_dict_71_value`

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_71_code. See ss_note_mul_dict_71_code for more information.

Column Name: ss_note_mul_dict_72_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 72 code'

Column Name: ss_note_mul_dict_72_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_72_code limited to 255 characters. See ss_note_mul_dict_72_code for more information.

Column Name: ss_note_mul_dict_72_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_72_code. See ss_note_mul_dict_72_code for more information.

Column Name: ss_note_mul_dict_73_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 73 code'

Column Name: ss_note_mul_dict_73_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_73_code limited to 255 characters. See ss_note_mul_dict_73_code for more information.

Column Name: ss_note_mul_dict_73_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_73_code. See ss_note_mul_dict_73_code for more information.

Column Name: ss_note_mul_dict_74_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 74 code'

Column Name: ss_note_mul_dict_74_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_74_code limited to 255 characters. See ss_note_mul_dict_74_code for more information.

Column Name: ss_note_mul_dict_74_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_74_code. See ss_note_mul_dict_74_code for more information.

Column Name: ss_note_mul_dict_75_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 75 code'

Column Name: ss_note_mul_dict_75_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_75_code limited to 255 characters. See ss_note_mul_dict_75_code for more information.

Column Name: ss_note_mul_dict_75_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_75_code. See ss_note_mul_dict_75_code for more information.

Column Name: ss_note_mul_dict_76_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 76 code'

Column Name: ss_note_mul_dict_76_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_76_code limited to 255 characters. See ss_note_mul_dict_76_code for more information.

Column Name: ss_note_mul_dict_76_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_76_code. See ss_note_mul_dict_76_code for more information.

Column Name: ss_note_mul_dict_77_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 77 code'

Column Name: ss_note_mul_dict_77_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_77_code limited to 255 characters. See ss_note_mul_dict_77_code for more information.

Column Name: ss_note_mul_dict_77_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_77_code. See ss_note_mul_dict_77_code for more information.

Column Name: ss_note_mul_dict_78_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 78 code'

Column Name: ss_note_mul_dict_78_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_78_code limited to 255 characters. See ss_note_mul_dict_78_code for more information.

Column Name: ss_note_mul_dict_78_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_78_code. See ss_note_mul_dict_78_code for more information.

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 79 code'

Column Name: ss_note_mul_dict_79_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_79_code limited to 255 characters. See ss_note_mul_dict_79_code for more information.

Column Name: ss_note_mul_dict_79_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_79_code. See ss_note_mul_dict_79_code for more information.

Column Name: ss_note_mul_dict_80_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 80 code'

Column Name: ss_note_mul_dict_80_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dict_80_code limited to 255 characters. See ss_note_mul_dict_80_code for more information.

Column Name: ss_note_mul_dict_80_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dict_80_code. See ss_note_mul_dict_80_code for more information.

Column Name: ss_note_scroll_text_51

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Free Text 51'

Column Name: ss_note_scroll_text_52

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Free Text 52'

Column Name: ss_note_scroll_text_53

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Free Text 53'

Column Name: ss_note_scroll_text_54

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Free Text 54'

Column Name: ss_note_scroll_text_55

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Free Text 55'

Column Name: ss_note_scroll_text_56

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Free Text 56'

Column Name: ss_note_scroll_text_57

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Free Text 57'

Column Name: ss_note_scroll_text_58

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Free Text 58'

Column Name: ss_note_scroll_text_59

Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 59'

Column Name: ss_note_scroll_text_60
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 60'

Column Name: ss_note_scroll_text_61
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 61'

Column Name: ss_note_scroll_text_62
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 62'

Column Name: ss_note_scroll_text_63
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 63'

Column Name: ss_note_scroll_text_64
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 64'

Column Name: ss_note_scroll_text_65
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 65'

Column Name: ss_note_scroll_text_66
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 66'

Column Name: ss_note_scroll_text_67
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 67'

Column Name: ss_note_scroll_text_68
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 68'

Column Name: ss_note_scroll_text_69

Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 69'

Column Name: ss_note_scroll_text_70
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 70'

Column Name: ss_note_scroll_text_71
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 71'

Column Name: ss_note_scroll_text_72
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 72'

Column Name: ss_note_scroll_text_73
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 73'

Column Name: ss_note_scroll_text_74
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 74'

Column Name: ss_note_scroll_text_75
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 75'

Column Name: ss_note_scroll_text_76
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 76'

Column Name: ss_note_scroll_text_77
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 77'

Column Name: ss_note_scroll_text_78
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 78'

Column Name: ss_note_scroll_text_79

Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 79'

Column Name: ss_note_scroll_text_80
Column Type: varchar
Max Length: 32700
'SS Note Scrolling Free Text 80'

Column Name: ss_note_sin_dict_51_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 51 code'

Column Name: ss_note_sin_dict_51_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_51_code. See ss_note_sin_dict_51_code for more information.

Column Name: ss_note_sin_dict_52_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 52 code'

Column Name: ss_note_sin_dict_52_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_52_code. See ss_note_sin_dict_52_code for more information.

Column Name: ss_note_sin_dict_53_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 53 code'

Column Name: ss_note_sin_dict_53_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_53_code. See ss_note_sin_dict_53_code for more information.

Column Name: ss_note_sin_dict_54_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 54 code'

Column Name: ss_note_sin_dict_54_value
Column Type: varchar
Max Length: 50

The description associated with ss_note_sin_dict_54_code. See ss_note_sin_dict_54_code for more information.

Column Name: ss_note_sin_dict_55_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 55 code'

Column Name: ss_note_sin_dict_55_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_55_code. See ss_note_sin_dict_55_code for more information.

Column Name: ss_note_sin_dict_56_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 56 code'

Column Name: ss_note_sin_dict_56_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_56_code. See ss_note_sin_dict_56_code for more information.

Column Name: ss_note_sin_dict_57_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 57 code'

Column Name: ss_note_sin_dict_57_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_57_code. See ss_note_sin_dict_57_code for more information.

Column Name: ss_note_sin_dict_58_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 58 code'

Column Name: ss_note_sin_dict_58_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_58_code. See ss_note_sin_dict_58_code for more information.

Column Name: ss_note_sin_dict_59_code
Column Type: varchar
Max Length: 50

'SS Note Single Response Dictionary 59 code'

Column Name: ss_note_sin_dict_59_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_59_code. See ss_note_sin_dict_59_code for more information.

Column Name: ss_note_sin_dict_60_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 60 code'

Column Name: ss_note_sin_dict_60_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_60_code. See ss_note_sin_dict_60_code for more information.

Column Name: ss_note_sin_dict_61_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 61 code'

Column Name: ss_note_sin_dict_61_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_61_code. See ss_note_sin_dict_61_code for more information.

Column Name: ss_note_sin_dict_62_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 62 code'

Column Name: ss_note_sin_dict_62_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_62_code. See ss_note_sin_dict_62_code for more information.

Column Name: ss_note_sin_dict_63_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 63 code'

Column Name: ss_note_sin_dict_63_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_63_code. See ss_note_sin_dict_63_code for more information.

Column Name: ss_note_sin_dict_64_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 64 code'

Column Name: ss_note_sin_dict_64_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_64_code. See ss_note_sin_dict_64_code for more information.

Column Name: ss_note_sin_dict_65_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 65 code'

Column Name: ss_note_sin_dict_65_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_65_code. See ss_note_sin_dict_65_code for more information.

Column Name: ss_note_sin_dict_66_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 66 code'

Column Name: ss_note_sin_dict_66_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_66_code. See ss_note_sin_dict_66_code for more information.

Column Name: ss_note_sin_dict_67_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 67 code'

Column Name: ss_note_sin_dict_67_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_67_code. See ss_note_sin_dict_67_code for more information.

Column Name: ss_note_sin_dict_68_code
Column Type: varchar
Max Length: 50

'SS Note Single Response Dictionary 68 code'

Column Name: ss_note_sin_dict_68_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_68_code. See ss_note_sin_dict_68_code for more information.

Column Name: ss_note_sin_dict_69_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 69 code'

Column Name: ss_note_sin_dict_69_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_69_code. See ss_note_sin_dict_69_code for more information.

Column Name: ss_note_sin_dict_70_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 70 code'

Column Name: ss_note_sin_dict_70_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_70_code. See ss_note_sin_dict_70_code for more information.

Column Name: ss_note_sin_dict_71_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 71 code'

Column Name: ss_note_sin_dict_71_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_71_code. See ss_note_sin_dict_71_code for more information.

Column Name: ss_note_sin_dict_72_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 72 code'

Column Name: ss_note_sin_dict_72_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_72_code. See ss_note_sin_dict_72_code for more information.

Column Name: ss_note_sin_dict_73_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 73 code'

Column Name: ss_note_sin_dict_73_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_73_code. See ss_note_sin_dict_73_code for more information.

Column Name: ss_note_sin_dict_74_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 74 code'

Column Name: ss_note_sin_dict_74_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_74_code. See ss_note_sin_dict_74_code for more information.

Column Name: ss_note_sin_dict_75_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 75 code'

Column Name: ss_note_sin_dict_75_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_75_code. See ss_note_sin_dict_75_code for more information.

Column Name: ss_note_sin_dict_76_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 76 code'

Column Name: ss_note_sin_dict_76_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dict_76_code. See ss_note_sin_dict_76_code for more information.

Column Name: ss_note_sin_dict_77_code
Column Type: varchar
Max Length: 50

'SS Note Single Response Dictionary 77 code'

Column Name: ss_note_sin_dict_77_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_77_code. See ss_note_sin_dict_77_code for more information.

Column Name: ss_note_sin_dict_78_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 78 code'

Column Name: ss_note_sin_dict_78_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_78_code. See ss_note_sin_dict_78_code for more information.

Column Name: ss_note_sin_dict_79_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 79 code'

Column Name: ss_note_sin_dict_79_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_79_code. See ss_note_sin_dict_79_code for more information.

Column Name: ss_note_sin_dict_80_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 80 code'

Column Name: ss_note_sin_dict_80_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dict_80_code. See ss_note_sin_dict_80_code for more information.

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Void_Progress_Notes

Table Name: SYSTEM.cw_patient_not_void_sup_5

Table Description: This table returns supplemental information stored in the 'Void Progress Notes' form.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: FILING_COUNTER
Column Type: integer
Filing Counter

Column Name: Filing_Hist
Column Type: varchar
Max Length: 50
Unique Identifier used for filing.

Column Name: PATID
Column Type: varchar

Max Length: 20
The client ID associated with the data.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: ebp_code
Column Type: varchar
Max Length: 50
'Evidence-Based Practices'

Column Name: ebp_element_code
Column Type: varchar
Max Length: 50
'Evidence-Based Practice Elements'

Column Name: ebp_element_value
Column Type: varchar
Max Length: 32000
The description associated with ebp_element_code

Column Name: ebp_value
Column Type: varchar
Max Length: 32000
The description associated with ebp_code

Column Name: form_number
Column Type: varchar
Max Length: 50
The unique identifier for a form.

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: ss_notc_mul_dic_100_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 100 code'

Column Name: ss_notc_mul_dic_100_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_100_code. See ss_notc_mul_dic_100_code for more information.

Column Name: ss_notc_mul_dic_101_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 101 code'

Column Name: ss_notc_mul_dic_101_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_mul_dic_101_code. See ss_notc_mul_dic_101_code for more information.

Column Name: ss_notc_mul_dic_102_code
Column Type: varchar
Max Length: 50
'SS Note Copy Multiple Response Dictionary 102 code'

Column Name: ss_notc_mul_dic_102_value
Column Type: varchar
Max Length: 255

The description associated with ss_notc_mul_dic_102_code. See ss_notc_mul_dic_102_code for more information.

Column Name: ss_notc_mul_dic_103_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 103 code'

Column Name: ss_notc_mul_dic_103_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_103_code. See ss_notc_mul_dic_103_code for more information.

Column Name: ss_notc_mul_dic_104_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 104 code'

Column Name: ss_notc_mul_dic_104_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_104_code. See ss_notc_mul_dic_104_code for more information.

Column Name: ss_notc_mul_dic_105_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 105 code'

Column Name: ss_notc_mul_dic_105_value

Column Type: varchar

Max Length: 275

The description associated with ss_notc_mul_dic_105_code. See ss_notc_mul_dic_105_code for more information.

Column Name: ss_notc_mul_dic_106_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 106 code'

Column Name: ss_notc_mul_dic_106_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_106_code. See ss_notc_mul_dic_106_code for more information.

Column Name: ss_notc_mul_dic_107_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 107 code'

Column Name: ss_notc_mul_dic_107_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_107_code. See ss_notc_mul_dic_107_code for more information.

Column Name: ss_notc_mul_dic_108_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 108 code'

Column Name: ss_notc_mul_dic_108_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_108_code. See ss_notc_mul_dic_108_code for more information.

Column Name: ss_notc_mul_dic_109_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 109 code'

Column Name: ss_notc_mul_dic_109_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_109_code. See ss_notc_mul_dic_109_code for more information.

Column Name: ss_notc_mul_dic_110_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 110 code'

Column Name: ss_notc_mul_dic_110_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_110_code. See ss_notc_mul_dic_110_code for more information.

Column Name: ss_notc_mul_dic_81_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 81 code'

Column Name: ss_notc_mul_dic_81_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_81_code. See ss_notc_mul_dic_81_code for more information.

Column Name: ss_notc_mul_dic_82_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 82 code'

Column Name: ss_notc_mul_dic_82_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_82_code. See ss_notc_mul_dic_82_code for more information.

Column Name: ss_notc_mul_dic_83_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 83 code'

Column Name: ss_notc_mul_dic_83_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_83_code. See ss_notc_mul_dic_83_code for more information.

Column Name: ss_notc_mul_dic_84_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 84 code'

Column Name: ss_notc_mul_dic_84_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_84_code. See ss_notc_mul_dic_84_code for more information.

Column Name: ss_notc_mul_dic_85_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 85 code'

Column Name: ss_notc_mul_dic_85_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_85_code. See ss_notc_mul_dic_85_code for more information.

Column Name: ss_notc_mul_dic_86_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 86 code'

Column Name: ss_notc_mul_dic_86_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_86_code. See ss_notc_mul_dic_86_code for more information.

Column Name: ss_notc_mul_dic_87_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 87 code'

Column Name: ss_notc_mul_dic_87_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_87_code. See ss_notc_mul_dic_87_code for more information.

Column Name: ss_notc_mul_dic_88_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 88 code'

Column Name: ss_notc_mul_dic_88_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_88_code. See ss_notc_mul_dic_88_code for more information.

Column Name: ss_notc_mul_dic_89_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 89 code'

Column Name: ss_notc_mul_dic_89_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_89_code. See ss_notc_mul_dic_89_code for more information.

Column Name: ss_notc_mul_dic_90_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 90 code'

Column Name: ss_notc_mul_dic_90_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_90_code. See ss_notc_mul_dic_90_code for more information.

Column Name: ss_notc_mul_dic_91_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 91 code'

Column Name: ss_notc_mul_dic_91_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_91_code. See ss_notc_mul_dic_91_code for more information.

Column Name: ss_notc_mul_dic_92_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 92 code'

Column Name: ss_notc_mul_dic_92_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_92_code. See ss_notc_mul_dic_92_code for more information.

Column Name: ss_notc_mul_dic_93_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 93 code'

Column Name: ss_notc_mul_dic_93_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_93_code. See ss_notc_mul_dic_93_code for more information.

Column Name: ss_notc_mul_dic_94_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 94 code'

Column Name: ss_notc_mul_dic_94_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_94_code. See ss_notc_mul_dic_94_code for more information.

Column Name: ss_notc_mul_dic_95_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 95 code'

Column Name: ss_notc_mul_dic_95_value

Column Type: varchar

Max Length: 265

The description associated with ss_notc_mul_dic_95_code. See ss_notc_mul_dic_95_code for more information.

Column Name: ss_notc_mul_dic_96_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 96 code'

Column Name: ss_notc_mul_dic_96_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_96_code. See ss_notc_mul_dic_96_code for more information.

Column Name: ss_notc_mul_dic_97_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 97 code'

Column Name: ss_notc_mul_dic_97_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_97_code. See ss_notc_mul_dic_97_code for more information.

Column Name: ss_notc_mul_dic_98_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 98 code'

Column Name: ss_notc_mul_dic_98_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_98_code. See ss_notc_mul_dic_98_code for more information.

Column Name: ss_notc_mul_dic_99_code

Column Type: varchar

Max Length: 50

'SS Note Copy Multiple Response Dictionary 99 code'

Column Name: ss_notc_mul_dic_99_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_mul_dic_99_code. See ss_notc_mul_dic_99_code for more information.

Column Name: ss_notc_sin_dic_100_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 100 code'

Column Name: ss_notc_sin_dic_100_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_100_code. See ss_notc_sin_dic_100_code for more information.

Column Name: ss_notc_sin_dic_101_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 101 code'

Column Name: ss_notc_sin_dic_101_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_101_code. See ss_notc_sin_dic_101_code for more information.

Column Name: ss_notc_sin_dic_102_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 102 code'

Column Name: ss_notc_sin_dic_102_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_102_code. See ss_notc_sin_dic_102_code for more information.

Column Name: ss_notc_sin_dic_103_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 103 code'

Column Name: ss_notc_sin_dic_103_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_103_code. See ss_notc_sin_dic_103_code for more information.

Column Name: ss_notc_sin_dic_104_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 104 code'

Column Name: ss_notc_sin_dic_104_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_104_code. See ss_notc_sin_dic_104_code for more information.

Column Name: ss_notc_sin_dic_105_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 105 code'

Column Name: ss_notc_sin_dic_105_value

Column Type: varchar

Max Length: 275

The description associated with ss_notc_sin_dic_105_code. See ss_notc_sin_dic_105_code for more information.

Column Name: ss_notc_sin_dic_106_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 106 code'

Column Name: ss_notc_sin_dic_106_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_106_code. See ss_notc_sin_dic_106_code for more information.

Column Name: ss_notc_sin_dic_107_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 107 code'

Column Name: ss_notc_sin_dic_107_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_107_code. See ss_notc_sin_dic_107_code for more information.

Column Name: ss_notc_sin_dic_108_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 108 code'

Column Name: ss_notc_sin_dic_108_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_108_code. See ss_notc_sin_dic_108_code for more information.

Column Name: ss_notc_sin_dic_109_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 109 code'

Column Name: ss_notc_sin_dic_109_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_109_code. See ss_notc_sin_dic_109_code for more information.

Column Name: ss_notc_sin_dic_110_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 110 code'

Column Name: ss_notc_sin_dic_110_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_110_code. See ss_notc_sin_dic_110_code for more information.

Column Name: ss_notc_sin_dic_81_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 81 code'

Column Name: ss_notc_sin_dic_81_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_81_code. See ss_notc_sin_dic_81_code for more information.

Column Name: ss_notc_sin_dic_82_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 82 code'

Column Name: ss_notc_sin_dic_82_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_82_code. See ss_notc_sin_dic_82_code for more information.

Column Name: ss_notc_sin_dic_83_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 83 code'

Column Name: ss_notc_sin_dic_83_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_83_code. See ss_notc_sin_dic_83_code for more information.

Column Name: ss_notc_sin_dic_84_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 84 code'

Column Name: ss_notc_sin_dic_84_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_84_code. See ss_notc_sin_dic_84_code for more information.

Column Name: ss_notc_sin_dic_85_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 85 code'

Column Name: ss_notc_sin_dic_85_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_85_code. See ss_notc_sin_dic_85_code for more information.

Column Name: ss_notc_sin_dic_86_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 86 code'

Column Name: ss_notc_sin_dic_86_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_86_code. See ss_notc_sin_dic_86_code for more information.

Column Name: ss_notc_sin_dic_87_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 87 code'

Column Name: ss_notc_sin_dic_87_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_87_code. See ss_notc_sin_dic_87_code for more information.

Column Name: ss_notc_sin_dic_88_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 88 code'

Column Name: ss_notc_sin_dic_88_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_88_code. See ss_notc_sin_dic_88_code for more information.

Column Name: ss_notc_sin_dic_89_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 89 code'

Column Name: ss_notc_sin_dic_89_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_89_code. See ss_notc_sin_dic_89_code for more information.

Column Name: ss_notc_sin_dic_90_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 90 code'

Column Name: ss_notc_sin_dic_90_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_90_code. See ss_notc_sin_dic_90_code for more information.

Column Name: ss_notc_sin_dic_91_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 91 code'

Column Name: ss_notc_sin_dic_91_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_91_code. See ss_notc_sin_dic_91_code for more information.

Column Name: ss_notc_sin_dic_92_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 92 code'

Column Name: ss_notc_sin_dic_92_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_92_code. See ss_notc_sin_dic_92_code for more information.

Column Name: ss_notc_sin_dic_93_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 93 code'

Column Name: ss_notc_sin_dic_93_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_93_code. See ss_notc_sin_dic_93_code for more information.

Column Name: ss_notc_sin_dic_94_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 94 code'

Column Name: ss_notc_sin_dic_94_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_94_code. See ss_notc_sin_dic_94_code for more information.

Column Name: ss_notc_sin_dic_95_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 95 code'

Column Name: ss_notc_sin_dic_95_value

Column Type: varchar

Max Length: 265

The description associated with ss_notc_sin_dic_95_code. See ss_notc_sin_dic_95_code for more information.

Column Name: ss_notc_sin_dic_96_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 96 code'

Column Name: ss_notc_sin_dic_96_value

Column Type: varchar

Max Length: 255

The description associated with ss_notc_sin_dic_96_code. See ss_notc_sin_dic_96_code for more information.

Column Name: ss_notc_sin_dic_97_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 97 code'

Column Name: ss_notc_sin_dic_97_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_97_code. See ss_notc_sin_dic_97_code for more information.

Column Name: ss_notc_sin_dic_98_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 98 code'

Column Name: ss_notc_sin_dic_98_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_98_code. See ss_notc_sin_dic_98_code for more information.

Column Name: ss_notc_sin_dic_99_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 99 code'

Column Name: ss_notc_sin_dic_99_value
Column Type: varchar
Max Length: 255
The description associated with ss_notc_sin_dic_99_code. See ss_notc_sin_dic_99_code for more information.

Column Name: ss_note_mul_dic_100_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 100 code'

Column Name: ss_note_mul_dic_100_shval
Column Type: varchar
Max Length: 255
The description associated with ss_note_mul_dic_100_code limited to 255 characters. See ss_note_mul_dic_100_code for more information.

Column Name: ss_note_mul_dic_100_value
Column Type: varchar
Max Length: 32700

The description associated with ss_note_mul_dic_100_code. See ss_note_mul_dic_100_code for more information.

Column Name: ss_note_mul_dic_101_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 101 code'

Column Name: ss_note_mul_dic_101_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_101_code limited to 255 characters. See ss_note_mul_dic_101_code for more information.

Column Name: ss_note_mul_dic_101_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_101_code. See ss_note_mul_dic_101_code for more information.

Column Name: ss_note_mul_dic_102_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 102 code'

Column Name: ss_note_mul_dic_102_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_102_code limited to 255 characters. See ss_note_mul_dic_102_code for more information.

Column Name: ss_note_mul_dic_102_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_102_code. See ss_note_mul_dic_102_code for more information.

Column Name: ss_note_mul_dic_103_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 103 code'

Column Name: ss_note_mul_dic_103_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_103_code limited to 255 characters. See ss_note_mul_dic_103_code for more information.

Column Name: ss_note_mul_dic_103_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_103_code. See ss_note_mul_dic_103_code for more information.

Column Name: ss_note_mul_dic_104_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 104 code'

Column Name: ss_note_mul_dic_104_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_104_code limited to 255 characters. See ss_note_mul_dic_104_code for more information.

Column Name: ss_note_mul_dic_104_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_104_code. See ss_note_mul_dic_104_code for more information.

Column Name: ss_note_mul_dic_105_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 105 code'

Column Name: ss_note_mul_dic_105_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_105_code limited to 255 characters. See ss_note_mul_dic_105_code for more information.

Column Name: ss_note_mul_dic_105_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_105_code. See ss_note_mul_dic_105_code for more information.

Column Name: ss_note_mul_dic_106_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 106 code'

Column Name: ss_note_mul_dic_106_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_106_code limited to 255 characters. See ss_note_mul_dic_106_code for more information.

Column Name: ss_note_mul_dic_106_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_106_code. See ss_note_mul_dic_106_code for more information.

Column Name: ss_note_mul_dic_107_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 107 code'

Column Name: ss_note_mul_dic_107_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_107_code limited to 255 characters. See ss_note_mul_dic_107_code for more information.

Column Name: ss_note_mul_dic_107_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_107_code. See ss_note_mul_dic_107_code for more information.

Column Name: ss_note_mul_dic_108_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 108 code'

Column Name: ss_note_mul_dic_108_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_108_code limited to 255 characters. See ss_note_mul_dic_108_code for more information.

Column Name: ss_note_mul_dic_108_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_108_code. See ss_note_mul_dic_108_code for more information.

Column Name: ss_note_mul_dic_109_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 109 code'

Column Name: ss_note_mul_dic_109_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_109_code limited to 255 characters. See ss_note_mul_dic_109_code for more information.

Column Name: ss_note_mul_dic_109_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_109_code. See ss_note_mul_dic_109_code for more information.

Column Name: ss_note_mul_dic_110_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 110 code'

Column Name: ss_note_mul_dic_110_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_110_code limited to 255 characters. See ss_note_mul_dic_110_code for more information.

Column Name: ss_note_mul_dic_110_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_110_code. See ss_note_mul_dic_110_code for more information.

Column Name: ss_note_mul_dic_81_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 81 code'

Column Name: ss_note_mul_dic_81_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_81_code limited to 255 characters. See ss_note_mul_dic_81_code for more information.

Column Name: ss_note_mul_dic_81_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_81_code. See ss_note_mul_dic_81_code for more information.

Column Name: ss_note_mul_dic_82_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 82 code'

Column Name: ss_note_mul_dic_82_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_82_code limited to 255 characters. See ss_note_mul_dic_82_code for more information.

Column Name: ss_note_mul_dic_82_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_82_code. See ss_note_mul_dic_82_code for more information.

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_87_code limited to 255 characters. See ss_note_mul_dic_87_code for more information.

Column Name: ss_note_mul_dic_87_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_87_code. See ss_note_mul_dic_87_code for more information.

Column Name: ss_note_mul_dic_88_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 88 code'

Column Name: ss_note_mul_dic_88_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_88_code limited to 255 characters. See ss_note_mul_dic_88_code for more information.

Column Name: ss_note_mul_dic_88_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_88_code. See ss_note_mul_dic_88_code for more information.

Column Name: ss_note_mul_dic_89_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 89 code'

Column Name: ss_note_mul_dic_89_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_89_code limited to 255 characters. See ss_note_mul_dic_89_code for more information.

Column Name: ss_note_mul_dic_89_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_89_code. See ss_note_mul_dic_89_code for more information.

Column Name: ss_note_mul_dic_90_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 90 code'

Column Name: ss_note_mul_dic_90_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_90_code limited to 255 characters. See ss_note_mul_dic_90_code for more information.

Column Name: ss_note_mul_dic_90_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_90_code. See ss_note_mul_dic_90_code for more information.

Column Name: ss_note_mul_dic_91_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 91 code'

Column Name: ss_note_mul_dic_91_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_91_code limited to 255 characters. See ss_note_mul_dic_91_code for more information.

Column Name: ss_note_mul_dic_91_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_91_code. See ss_note_mul_dic_91_code for more information.

Column Name: ss_note_mul_dic_92_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 92 code'

Column Name: ss_note_mul_dic_92_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_92_code limited to 255 characters. See ss_note_mul_dic_92_code for more information.

Column Name: ss_note_mul_dic_92_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_92_code. See ss_note_mul_dic_92_code for more information.

Column Name: ss_note_mul_dic_93_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 93 code'

Column Name: ss_note_mul_dic_93_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_93_code limited to 255 characters. See ss_note_mul_dic_93_code for more information.

Column Name: ss_note_mul_dic_93_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_93_code. See ss_note_mul_dic_93_code for more information.

Column Name: ss_note_mul_dic_94_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 94 code'

Column Name: ss_note_mul_dic_94_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_94_code limited to 255 characters. See ss_note_mul_dic_94_code for more information.

Column Name: ss_note_mul_dic_94_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_94_code. See ss_note_mul_dic_94_code for more information.

Column Name: ss_note_mul_dic_95_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 95 code'

Column Name: ss_note_mul_dic_95_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_95_code limited to 255 characters. See ss_note_mul_dic_95_code for more information.

Column Name: ss_note_mul_dic_95_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_95_code. See ss_note_mul_dic_95_code for more information.

Column Name: ss_note_mul_dic_96_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 96 code'

Column Name: ss_note_mul_dic_96_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_96_code limited to 255 characters. See ss_note_mul_dic_96_code for more information.

Column Name: ss_note_mul_dic_96_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_96_code. See ss_note_mul_dic_96_code for more information.

Column Name: ss_note_mul_dic_97_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 97 code'

Column Name: ss_note_mul_dic_97_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_97_code limited to 255 characters. See ss_note_mul_dic_97_code for more information.

Column Name: ss_note_mul_dic_97_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_97_code. See ss_note_mul_dic_97_code for more information.

Column Name: ss_note_mul_dic_98_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 98 code'

Column Name: ss_note_mul_dic_98_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_98_code limited to 255 characters. See ss_note_mul_dic_98_code for more information.

Column Name: ss_note_mul_dic_98_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_98_code. See ss_note_mul_dic_98_code for more information.

Column Name: ss_note_mul_dic_99_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 99 code'

Column Name: ss_note_mul_dic_99_shval

Column Type: varchar

Max Length: 255

The description associated with ss_note_mul_dic_99_code limited to 255 characters. See ss_note_mul_dic_99_code for more information.

Column Name: ss_note_mul_dic_99_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_mul_dic_99_code. See ss_note_mul_dic_99_code for more information.

Column Name: ss_note_scroll_text_100

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Free Text 100'

Column Name: ss_note_scroll_text_101

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Free Text 101'

Column Name: ss_note_scroll_text_102

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Free Text 102'

Column Name: ss_note_scroll_text_103

Column Type: varchar

Max Length: 32700

'SS Note Scrolling Free Text 99'

Column Name: ss_note_sin_dic_100_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 100 code'

Column Name: ss_note_sin_dic_100_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_100_code. See ss_note_sin_dic_100_code for more information.

Column Name: ss_note_sin_dic_101_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 101 code'

Column Name: ss_note_sin_dic_101_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_101_code. See ss_note_sin_dic_101_code for more information.

Column Name: ss_note_sin_dic_102_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 102 code'

Column Name: ss_note_sin_dic_102_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_102_code. See ss_note_sin_dic_102_code for more information.

Column Name: ss_note_sin_dic_103_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 103 code'

Column Name: ss_note_sin_dic_103_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_103_code. See ss_note_sin_dic_103_code for more information.

Column Name: ss_note_sin_dic_104_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 104 code'

Column Name: ss_note_sin_dic_104_value

Column Type: varchar

Max Length: 50

The description associated with `ss_note_sin_dic_104_code`. See `ss_note_sin_dic_104_code` for more information.

Column Name: `ss_note_sin_dic_105_code`
Column Type: `varchar`
Max Length: 50
'SS Note Single Response Dictionary 105 code'

Column Name: `ss_note_sin_dic_105_value`
Column Type: `varchar`
Max Length: 50
The description associated with `ss_note_sin_dic_105_code`. See `ss_note_sin_dic_105_code` for more information.

Column Name: `ss_note_sin_dic_106_code`
Column Type: `varchar`
Max Length: 50
'SS Note Single Response Dictionary 106 code'

Column Name: `ss_note_sin_dic_106_value`
Column Type: `varchar`
Max Length: 50
The description associated with `ss_note_sin_dic_106_code`. See `ss_note_sin_dic_106_code` for more information.

Column Name: `ss_note_sin_dic_107_code`
Column Type: `varchar`
Max Length: 50
'SS Note Single Response Dictionary 107 code'

Column Name: `ss_note_sin_dic_107_value`
Column Type: `varchar`
Max Length: 50
The description associated with `ss_note_sin_dic_107_code`. See `ss_note_sin_dic_107_code` for more information.

Column Name: `ss_note_sin_dic_108_code`
Column Type: `varchar`
Max Length: 50
'SS Note Single Response Dictionary 108 code'

Column Name: `ss_note_sin_dic_108_value`
Column Type: `varchar`
Max Length: 50
The description associated with `ss_note_sin_dic_108_code`. See `ss_note_sin_dic_108_code` for more information.

Column Name: `ss_note_sin_dic_109_code`
Column Type: `varchar`
Max Length: 50

'SS Note Single Response Dictionary 109 code'

Column Name: ss_note_sin_dic_109_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_109_code. See ss_note_sin_dic_109_code for more information.

Column Name: ss_note_sin_dic_110_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 110 code'

Column Name: ss_note_sin_dic_110_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_110_code. See ss_note_sin_dic_110_code for more information.

Column Name: ss_note_sin_dic_81_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 81 code'

Column Name: ss_note_sin_dic_81_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_81_code. See ss_note_sin_dic_81_code for more information.

Column Name: ss_note_sin_dic_82_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 82 code'

Column Name: ss_note_sin_dic_82_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_82_code. See ss_note_sin_dic_82_code for more information.

Column Name: ss_note_sin_dic_83_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 83 code'

Column Name: ss_note_sin_dic_83_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_83_code. See ss_note_sin_dic_83_code for more information.

Column Name: ss_note_sin_dic_84_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 84 code'

Column Name: ss_note_sin_dic_84_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dic_84_code. See ss_note_sin_dic_84_code for more information.

Column Name: ss_note_sin_dic_85_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 85 code'

Column Name: ss_note_sin_dic_85_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dic_85_code. See ss_note_sin_dic_85_code for more information.

Column Name: ss_note_sin_dic_86_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 86 code'

Column Name: ss_note_sin_dic_86_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dic_86_code. See ss_note_sin_dic_86_code for more information.

Column Name: ss_note_sin_dic_87_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 87 code'

Column Name: ss_note_sin_dic_87_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sin_dic_87_code. See ss_note_sin_dic_87_code for more information.

Column Name: ss_note_sin_dic_88_code
Column Type: varchar
Max Length: 50

'SS Note Single Response Dictionary 88 code'

Column Name: ss_note_sin_dic_88_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_88_code. See ss_note_sin_dic_88_code for more information.

Column Name: ss_note_sin_dic_89_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 89 code'

Column Name: ss_note_sin_dic_89_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_89_code. See ss_note_sin_dic_89_code for more information.

Column Name: ss_note_sin_dic_90_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 90 code'

Column Name: ss_note_sin_dic_90_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_90_code. See ss_note_sin_dic_90_code for more information.

Column Name: ss_note_sin_dic_91_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 91 code'

Column Name: ss_note_sin_dic_91_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_91_code. See ss_note_sin_dic_91_code for more information.

Column Name: ss_note_sin_dic_92_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 92 code'

Column Name: ss_note_sin_dic_92_value

Column Type: varchar

Max Length: 50

The description associated with `ss_note_sin_dic_92_code`. See `ss_note_sin_dic_92_code` for more information.

Column Name: `ss_note_sin_dic_93_code`
Column Type: `varchar`
Max Length: 50
'SS Note Single Response Dictionary 93 code'

Column Name: `ss_note_sin_dic_93_value`
Column Type: `varchar`
Max Length: 50
The description associated with `ss_note_sin_dic_93_code`. See `ss_note_sin_dic_93_code` for more information.

Column Name: `ss_note_sin_dic_94_code`
Column Type: `varchar`
Max Length: 50
'SS Note Single Response Dictionary 94 code'

Column Name: `ss_note_sin_dic_94_value`
Column Type: `varchar`
Max Length: 50
The description associated with `ss_note_sin_dic_94_code`. See `ss_note_sin_dic_94_code` for more information.

Column Name: `ss_note_sin_dic_95_code`
Column Type: `varchar`
Max Length: 50
'SS Note Single Response Dictionary 95 code'

Column Name: `ss_note_sin_dic_95_value`
Column Type: `varchar`
Max Length: 50
The description associated with `ss_note_sin_dic_95_code`. See `ss_note_sin_dic_95_code` for more information.

Column Name: `ss_note_sin_dic_96_code`
Column Type: `varchar`
Max Length: 50
'SS Note Single Response Dictionary 96 code'

Column Name: `ss_note_sin_dic_96_value`
Column Type: `varchar`
Max Length: 50
The description associated with `ss_note_sin_dic_96_code`. See `ss_note_sin_dic_96_code` for more information.

Column Name: `ss_note_sin_dic_97_code`
Column Type: `varchar`
Max Length: 50

'SS Note Single Response Dictionary 97 code'

Column Name: ss_note_sin_dic_97_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_97_code. See ss_note_sin_dic_97_code for more information.

Column Name: ss_note_sin_dic_98_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 98 code'

Column Name: ss_note_sin_dic_98_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_98_code. See ss_note_sin_dic_98_code for more information.

Column Name: ss_note_sin_dic_99_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 99 code'

Column Name: ss_note_sin_dic_99_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sin_dic_99_code. See ss_note_sin_dic_99_code for more information.

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Void_Progress_Notes

Table Name: SYSTEM.cw_patient_not_void_sup_6

Table Description: This table returns supplemental information stored in the 'Void Progress Notes' form.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the service.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: FILING_COUNTER
Column Type: integer
Filing Counter

Column Name: Filing_Hist
Column Type: varchar
Max Length: 50
Unique Identifier used for filing.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the service.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the service.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: facloc_address_1
Column Type: varchar
Max Length: 50
'Facility Location Address - Street'

Column Name: facloc_address_2
Column Type: varchar
Max Length: 50
'Facility Location Address - Street 2'

Column Name: facloc_city
Column Type: varchar
Max Length: 50
'Facility Location City'

Column Name: facloc_id_code
Column Type: varchar
Max Length: 50
'Facility Location Code Identifier'

Column Name: facloc_id_code_qual
Column Type: varchar
Max Length: 50
'Facility Location Code Qualifier'

Column Name: facloc_name
Column Type: varchar

Max Length: 50
'Facility Location Name'

Column Name: facloc_state
Column Type: varchar
Max Length: 50
'Facility Location State'

Column Name: facloc_zip_code
Column Type: varchar
Max Length: 50
'Facility Location Zip Code'

Column Name: form_number
Column Type: varchar
Max Length: 50
'Form Number'

Column Name: option_desc
Column Type: varchar
Max Length: 81
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

SS Note Scrolling Free Text 134

Column Name: ss_note_scroll_text_135
Column Type: varchar
Max Length: 32700
SS Note Scrolling Free Text 135

Column Name: ss_note_scroll_text_136
Column Type: varchar
Max Length: 32700
SS Note Scrolling Free Text 136

Column Name: ss_note_time_51
Column Type: varchar

Max Length: 10
SS Note Time 51

Column Name: ss_note_time_52
Column Type: varchar
Max Length: 10
SS Note Time 52

Column Name: ss_note_time_53
Column Type: varchar
Max Length: 10
SS Note Time 53

Column Name: ss_note_time_54
Column Type: varchar
Max Length: 10
SS Note Time 54

Column Name: ss_note_time_55
Column Type: varchar
Max Length: 10
SS Note Time 55

Column Name: ss_note_time_56
Column Type: varchar
Max Length: 10
SS Note Time 56

Column Name: ss_note_time_57
Column Type: varchar
Max Length: 10
SS Note Time 57

Column Name: ss_note_time_58
Column Type: varchar
Max Length: 10
SS Note Time 58

Column Name: ss_note_time_59
Column Type: varchar
Max Length: 10
SS Note Time 59

Column Name: ss_note_time_60
Column Type: varchar
Max Length: 10
SS Note Time 60

Column Name: user_row_access_code
Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Void_Progress_Notes

Table Name: SYSTEM.cw_patient_notes_voided_supp

Table Description: This table returns supplemental information stored in the 'Void Progress Notes' form.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: EPISODE_NUMBER

Column Type: integer

The episode number associated with PATID.

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: FILING_COUNTER

Column Type: integer

'Filing Counter'

Column Name: Filing_Hist

Column Type: varchar

Max Length: 50

Unique string used for filing.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the data.

Column Name: confidential_note

Column Type: varchar

Max Length: 50

'Confidential Note'

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the service.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The user ID who last updated the service.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the service.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: notes_field

Column Type: varchar

Max Length: 32766

'Notes'

Column Name: option_desc

Column Type: varchar

Max Length: 80

The name of the form that last updated the row.

Column Name: option_id

Column Type: varchar

Max Length: 50

The unique ID of the form that last updated the row.

Column Name: ss_note_20_char_text_11

Column Type: varchar

Max Length: 20

'SS Note 20 Character 11'

Column Name: ss_note_20_char_text_12

Column Type: varchar

Max Length: 20

'SS Note 20 Character 12'

Column Name: ss_note_20_char_text_13

Column Type: date

'SS Note Date 19'

Column Name: ss_note_date_20

Column Type: date

'SS Note Date 20'

Column Name: ss_note_date_21

Column Type: date

'SS Note Date 21'

Column Name: ss_note_date_22

Column Type: date

'SS Note Date 22'

Column Name: ss_note_date_23

Column Type: date

'SS Note Date 23'

Column Name: ss_note_date_24

Column Type: date

'SS Note Date 24'

Column Name: ss_note_date_25

Column Type: date

'SS Note Date 25'

Column Name: ss_note_date_26

Column Type: date

'SS Note Date 26'

Column Name: ss_note_date_27

Column Type: date

'SS Note Date 27'

Column Name: ss_note_date_28

Column Type: date

'SS Note Date 28'

Column Name: ss_note_date_29

Column Type: date

'SS Note Date 29'

Column Name: ss_note_date_30

Column Type: date

'SS Note Date 30'

Column Name: ss_note_dsm_diag_11_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 11'

Column Name: ss_note_dsm_diag_11_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_11_code. See ss_note_dsm_diag_11_code for more information.

Column Name: ss_note_dsm_diag_12_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 12'

Column Name: ss_note_dsm_diag_12_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_12_code. See ss_note_dsm_diag_12_code for more information.

Column Name: ss_note_dsm_diag_13_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 13'

Column Name: ss_note_dsm_diag_13_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_13_code. See ss_note_dsm_diag_13_code for more information.

Column Name: ss_note_dsm_diag_14_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 14'

Column Name: ss_note_dsm_diag_14_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_14_code. See ss_note_dsm_diag_14_code for more information.

Column Name: ss_note_dsm_diag_15_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 15'

Column Name: ss_note_dsm_diag_15_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_15_code. See ss_note_dsm_diag_15_code for more information.

Column Name: ss_note_dsm_diag_16_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 16'

Column Name: ss_note_dsm_diag_16_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_16_code. See ss_note_dsm_diag_16_code for more information.

Column Name: ss_note_dsm_diag_17_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 17'

Column Name: ss_note_dsm_diag_17_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_17_code. See ss_note_dsm_diag_17_code for more information.

Column Name: ss_note_dsm_diag_18_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 18'

Column Name: ss_note_dsm_diag_18_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_18_code. See ss_note_dsm_diag_18_code for more information.

Column Name: ss_note_dsm_diag_19_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 19'

Column Name: ss_note_dsm_diag_19_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_19_code. See ss_note_dsm_diag_19_code for more information.

Column Name: ss_note_dsm_diag_20_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 20'

Column Name: ss_note_dsm_diag_20_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_20_code. See ss_note_dsm_diag_20_code for more information.

Column Name: ss_note_dsm_diag_21_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 21'

Column Name: ss_note_dsm_diag_21_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_21_code. See ss_note_dsm_diag_21_code for more information.

Column Name: ss_note_dsm_diag_22_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 22'

Column Name: ss_note_dsm_diag_22_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_22_code. See ss_note_dsm_diag_22_code for more information.

Column Name: ss_note_dsm_diag_23_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 23'

Column Name: ss_note_dsm_diag_23_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_23_code. See ss_note_dsm_diag_23_code for more information.

Column Name: ss_note_dsm_diag_24_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 24'

Column Name: ss_note_dsm_diag_24_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_24_code. See ss_note_dsm_diag_24_code for more information.

Column Name: ss_note_dsm_diag_25_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 25'

Column Name: ss_note_dsm_diag_25_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_25_code. See ss_note_dsm_diag_25_code for more information.

Column Name: ss_note_dsm_diag_26_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 26'

Column Name: ss_note_dsm_diag_26_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_26_code. See ss_note_dsm_diag_26_code for more information.

Column Name: ss_note_dsm_diag_27_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 27'

Column Name: ss_note_dsm_diag_27_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_27_code. See ss_note_dsm_diag_27_code for more information.

Column Name: ss_note_dsm_diag_28_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 28'

Column Name: ss_note_dsm_diag_28_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_28_code. See ss_note_dsm_diag_28_code for more information.

Column Name: ss_note_dsm_diag_29_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 29'

Column Name: ss_note_dsm_diag_29_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_29_code. See ss_note_dsm_diag_29_code for more information.

Column Name: ss_note_dsm_diag_30_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 30'

Column Name: ss_note_dsm_diag_30_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_30_code. See ss_note_dsm_diag_30_code for more information.

Column Name: ss_note_icd9_diag_11_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 11'

Column Name: ss_note_icd9_diag_11_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_11_code. See ss_note_icd9_diag_11_code for more information.

Column Name: ss_note_icd9_diag_12_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 12'

Column Name: ss_note_icd9_diag_12_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_12_code. See ss_note_icd9_diag_12_code for more information.

Column Name: ss_note_icd9_diag_13_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 13'

Column Name: ss_note_icd9_diag_13_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_13_code. See ss_note_icd9_diag_13_code for more information.

Column Name: ss_note_icd9_diag_14_code

Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 14'

Column Name: ss_note_icd9_diag_14_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_14_code. See ss_note_icd9_diag_14_code for more information.

Column Name: ss_note_icd9_diag_15_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 15'

Column Name: ss_note_icd9_diag_15_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_15_code. See ss_note_icd9_diag_15_code for more information.

Column Name: ss_note_icd9_diag_16_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 16'

Column Name: ss_note_icd9_diag_16_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_16_code. See ss_note_icd9_diag_16_code for more information.

Column Name: ss_note_icd9_diag_17_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 17'

Column Name: ss_note_icd9_diag_17_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_17_code. See ss_note_icd9_diag_17_code for more information.

Column Name: ss_note_icd9_diag_18_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 18'

Column Name: ss_note_icd9_diag_18_value
Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_18_code. See ss_note_icd9_diag_18_code for more information.

Column Name: ss_note_icd9_diag_19_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 19'

Column Name: ss_note_icd9_diag_19_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_19_code. See ss_note_icd9_diag_19_code for more information.

Column Name: ss_note_icd9_diag_20_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 20'

Column Name: ss_note_icd9_diag_20_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_20_code. See ss_note_icd9_diag_20_code for more information.

Column Name: ss_note_icd9_diag_21_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 21'

Column Name: ss_note_icd9_diag_21_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_21_code. See ss_note_icd9_diag_21_code for more information.

Column Name: ss_note_icd9_diag_22_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 22'

Column Name: ss_note_icd9_diag_22_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_22_code. See ss_note_icd9_diag_22_code for more information.

Column Name: ss_note_icd9_diag_23_code

Column Type: varchar

Max Length: 20
'SS Note ICD-9 Code 23'

Column Name: ss_note_icd9_diag_23_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_23_code. See ss_note_icd9_diag_23_code for more information.

Column Name: ss_note_icd9_diag_24_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 24'

Column Name: ss_note_icd9_diag_24_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_24_code. See ss_note_icd9_diag_24_code for more information.

Column Name: ss_note_icd9_diag_25_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 25'

Column Name: ss_note_icd9_diag_25_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_25_code. See ss_note_icd9_diag_25_code for more information.

Column Name: ss_note_icd9_diag_26_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 26'

Column Name: ss_note_icd9_diag_26_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_26_code. See ss_note_icd9_diag_26_code for more information.

Column Name: ss_note_icd9_diag_27_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 27'

Column Name: ss_note_icd9_diag_27_value
Column Type: varchar
Max Length: 250

The description associated with `ss_note_icd9_diag_27_code`. See `ss_note_icd9_diag_27_code` for more information.

Column Name: `ss_note_icd9_diag_28_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 28'

Column Name: `ss_note_icd9_diag_28_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_28_code`. See `ss_note_icd9_diag_28_code` for more information.

Column Name: `ss_note_icd9_diag_29_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 29'

Column Name: `ss_note_icd9_diag_29_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_29_code`. See `ss_note_icd9_diag_29_code` for more information.

Column Name: `ss_note_icd9_diag_30_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 30'

Column Name: `ss_note_icd9_diag_30_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_30_code`. See `ss_note_icd9_diag_30_code` for more information.

Column Name: `ss_note_multi_dict_11_code`

Column Type: `varchar`

Max Length: 20

'SS Note Multi Response Dictionary 11'

Column Name: `ss_note_multi_dict_11_value`

Column Type: `varchar`

Max Length: 32700

The description associated with `ss_note_multi_dict_11_code`. See `ss_note_multi_dict_11_code` for more information.

Column Name: `ss_note_multi_dict_12_code`

Column Type: `varchar`

Max Length: 20

'SS Note Multi Response Dictionary 12'

Column Name: ss_note_multi_dict_12_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_12_code. See ss_note_multi_dict_12_code for more information.

Column Name: ss_note_multi_dict_13_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 13'

Column Name: ss_note_multi_dict_13_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_13_code. See ss_note_multi_dict_13_code for more information.

Column Name: ss_note_multi_dict_14_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 14'

Column Name: ss_note_multi_dict_14_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_14_code. See ss_note_multi_dict_14_code for more information.

Column Name: ss_note_multi_dict_15_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 15'

Column Name: ss_note_multi_dict_15_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_15_code. See ss_note_multi_dict_15_code for more information.

Column Name: ss_note_multi_dict_16_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 16'

Column Name: ss_note_multi_dict_16_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_16_code. See ss_note_multi_dict_16_code for more information.

Column Name: ss_note_multi_dict_17_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 17'

Column Name: ss_note_multi_dict_17_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_17_code. See ss_note_multi_dict_17_code for more information.

Column Name: ss_note_multi_dict_18_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 18'

Column Name: ss_note_multi_dict_18_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_18_code. See ss_note_multi_dict_18_code for more information.

Column Name: ss_note_multi_dict_19_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 19'

Column Name: ss_note_multi_dict_19_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_19_code. See ss_note_multi_dict_19_code for more information.

Column Name: ss_note_multi_dict_20_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 20'

Column Name: ss_note_multi_dict_20_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_20_code. See ss_note_multi_dict_20_code for more information.

Column Name: ss_note_multi_dict_21_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 21'

Column Name: ss_note_multi_dict_21_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_21_code. See ss_note_multi_dict_21_code for more information.

Column Name: ss_note_multi_dict_22_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 22'

Column Name: ss_note_multi_dict_22_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_22_code. See ss_note_multi_dict_22_code for more information.

Column Name: ss_note_multi_dict_23_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 23'

Column Name: ss_note_multi_dict_23_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_23_code. See ss_note_multi_dict_23_code for more information.

Column Name: ss_note_multi_dict_24_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 24'

Column Name: ss_note_multi_dict_24_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_24_code. See ss_note_multi_dict_24_code for more information.

Column Name: ss_note_multi_dict_25_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 25'

Column Name: ss_note_multi_dict_25_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_25_code. See ss_note_multi_dict_25_code for more information.

Column Name: ss_note_multi_dict_26_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 26'

Column Name: ss_note_multi_dict_26_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_26_code. See ss_note_multi_dict_26_code for more information.

Column Name: ss_note_multi_dict_27_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 27'

Column Name: ss_note_multi_dict_27_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_27_code. See ss_note_multi_dict_27_code for more information.

Column Name: ss_note_multi_dict_28_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 28'

Column Name: ss_note_multi_dict_28_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_28_code. See ss_note_multi_dict_28_code for more information.

Column Name: ss_note_multi_dict_29_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 29'

Column Name: ss_note_multi_dict_29_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_29_code. See ss_note_multi_dict_29_code for more information.

Column Name: ss_note_multi_dict_30_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 30'

Column Name: ss_note_multi_dict_30_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_30_code. See ss_note_multi_dict_30_code for more information.

Column Name: ss_note_scroll_text_11

Column Type: varchar

Max Length: 32700

Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 11'

Column Name: ss_note_sing_dict_11_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sing_dict_11_code. See ss_note_sing_dict_11_code for more information.

Column Name: ss_note_sing_dict_12_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 12'

Column Name: ss_note_sing_dict_12_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sing_dict_12_code. See ss_note_sing_dict_12_code for more information.

Column Name: ss_note_sing_dict_13_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 13'

Column Name: ss_note_sing_dict_13_value
Column Type: varchar
Max Length: 50
The description associated with ss_note_sing_dict_13_code. See ss_note_sing_dict_13_code for more information.

Column Name: ss_note_sing_dict_14_code
Column Type: varchar
Max Length: 50
'SS Note Single Response Dictionary 14'

Column Name: ss_note_sing_dict_14_value
Column Type: varchar
Max Length: 50

The description associated with `ss_note_sing_dict_14_code`. See `ss_note_sing_dict_14_code` for more information.

Column Name: `ss_note_sing_dict_15_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 15'

Column Name: `ss_note_sing_dict_15_value`

Column Type: `varchar`

Max Length: 50

The description associated with `ss_note_sing_dict_15_code`. See `ss_note_sing_dict_15_code` for more information.

Column Name: `ss_note_sing_dict_16_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 16'

Column Name: `ss_note_sing_dict_16_value`

Column Type: `varchar`

Max Length: 50

The description associated with `ss_note_sing_dict_16_code`. See `ss_note_sing_dict_16_code` for more information.

Column Name: `ss_note_sing_dict_17_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 17'

Column Name: `ss_note_sing_dict_17_value`

Column Type: `varchar`

Max Length: 50

The description associated with `ss_note_sing_dict_17_code`. See `ss_note_sing_dict_17_code` for more information.

Column Name: `ss_note_sing_dict_18_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 18'

Column Name: `ss_note_sing_dict_18_value`

Column Type: `varchar`

Max Length: 50

The description associated with `ss_note_sing_dict_18_code`. See `ss_note_sing_dict_18_code` for more information.

Column Name: `ss_note_sing_dict_19_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 19'

Column Name: ss_note_sing_dict_19_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sing_dict_19_code. See ss_note_sing_dict_19_code for more information.

Column Name: ss_note_sing_dict_20_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 20'

Column Name: ss_note_sing_dict_20_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sing_dict_20_code. See ss_note_sing_dict_20_code for more information.

Column Name: ss_note_sing_dict_21_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 21'

Column Name: ss_note_sing_dict_21_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sing_dict_21_code. See ss_note_sing_dict_21_code for more information.

Column Name: ss_note_sing_dict_22_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 22'

Column Name: ss_note_sing_dict_22_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sing_dict_22_code. See ss_note_sing_dict_22_code for more information.

Column Name: ss_note_sing_dict_23_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 23'

Column Name: ss_note_sing_dict_23_value

Column Type: varchar

Max Length: 50

The description associated with `ss_note_sing_dict_23_code`. See `ss_note_sing_dict_23_code` for more information.

Column Name: `ss_note_sing_dict_24_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 24'

Column Name: `ss_note_sing_dict_24_value`

Column Type: `varchar`

Max Length: 50

The description associated with `ss_note_sing_dict_24_code`. See `ss_note_sing_dict_24_code` for more information.

Column Name: `ss_note_sing_dict_25_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 25'

Column Name: `ss_note_sing_dict_25_value`

Column Type: `varchar`

Max Length: 50

The description associated with `ss_note_sing_dict_25_code`. See `ss_note_sing_dict_25_code` for more information.

Column Name: `ss_note_sing_dict_26_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 26'

Column Name: `ss_note_sing_dict_26_value`

Column Type: `varchar`

Max Length: 50

The description associated with `ss_note_sing_dict_26_code`. See `ss_note_sing_dict_26_code` for more information.

Column Name: `ss_note_sing_dict_27_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 27'

Column Name: `ss_note_sing_dict_27_value`

Column Type: `varchar`

Max Length: 50

The description associated with `ss_note_sing_dict_27_code`. See `ss_note_sing_dict_27_code` for more information.

Column Name: `ss_note_sing_dict_28_code`

Column Type: `varchar`

Max Length: 50

'SS Note Single Response Dictionary 28'

Column Name: ss_note_sing_dict_28_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sing_dict_28_code. See ss_note_sing_dict_28_code for more information.

Column Name: ss_note_sing_dict_29_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 29'

Column Name: ss_note_sing_dict_29_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sing_dict_29_code. See ss_note_sing_dict_29_code for more information.

Column Name: ss_note_sing_dict_30_code

Column Type: varchar

Max Length: 50

'SS Note Single Response Dictionary 30'

Column Name: ss_note_sing_dict_30_value

Column Type: varchar

Max Length: 50

The description associated with ss_note_sing_dict_30_code. See ss_note_sing_dict_30_code for more information.

Column Name: ss_note_time_11

Column Type: varchar

Max Length: 50

'SS Note Time 11'

Column Name: ss_note_time_12

Column Type: varchar

Max Length: 50

'SS Note Time 12'

Column Name: ss_note_time_13

Column Type: varchar

'SS Note Time 16'

Column Name: ss_note_time_17
Column Type: varchar
Max Length: 50
'SS Note Time 17'

Column Name: ss_note_time_18
Column Type: varchar
Max Length: 50
'SS Note Time 18'

Column Name: ss_note_time_19
Column Type: varchar
Max Length: 50
'SS Note Time 19'

Column Name: ss_note_time_20
Column Type: varchar
Max Length: 50
'SS Note Time 20'

Column Name: ss_note_time_21
Column Type: varchar
Max Length: 50
'SS Note Time 21'

Column Name: ss_note_time_22
Column Type: varchar
Max Length: 50
'SS Note Time 22'

Column Name: ss_note_time_23
Column Type: varchar
Max Length: 50
'SS Note Time 23'

Column Name: ss_note_time_24
Column Type: varchar
Max Length: 50
'SS Note Time 24'

Column Name: ss_note_time_25
Column Type: varchar
Max Length: 50
'SS Note Time 25'

Column Name: ss_note_time_26
Column Type: varchar
Max Length: 50
'SS Note Time 26'

Column Name: ss_note_time_27
Column Type: varchar
Max Length: 50
'SS Note Time 27'

Column Name: ss_note_time_28
Column Type: varchar
Max Length: 50
'SS Note Time 28'

Column Name: ss_note_time_29
Column Type: varchar
Max Length: 50
'SS Note Time 29'

Column Name: ss_note_time_30
Column Type: varchar
Max Length: 50
'SS Note Time 30'

Column Name: user_row_access_code
Column Type: integer
If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Void_Progress_Notes

Table Name: SYSTEM.cw_patient_notes_voided_supp_1

Table Description: This table returns supplemental information stored in the 'Void Progress Notes' form.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: FILING_COUNTER
Column Type: integer
Filing Counter

Column Name: Filing_Hist
Column Type: varchar
Max Length: 50
Unique Identifier used for filing.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: confidential_note
Column Type: varchar
Max Length: 50
'Confidential Note'

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the service.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The user ID who last updated the service.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the service.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: notes_field
Column Type: varchar
Max Length: 32766
'Notes'

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 50
The unique ID of the form that last updated the row.

Column Name: ss_note_20_char_text_31
Column Type: varchar

Max Length: 20
'SS Note 20 Character 31'

Column Name: ss_note_20_char_text_32

Max Length: 250

The description associated with ss_note_dsm_diag_39_code. See ss_note_dsm_diag_39_code for more information.

Column Name: ss_note_dsm_diag_40_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 40'

Column Name: ss_note_dsm_diag_40_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_40_code. See ss_note_dsm_diag_40_code for more information.

Column Name: ss_note_dsm_diag_41_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 41'

Column Name: ss_note_dsm_diag_41_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_41_code. See ss_note_dsm_diag_41_code for more information.

Column Name: ss_note_dsm_diag_42_code

Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 42'

Column Name: ss_note_dsm_diag_42_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_42_code. See ss_note_dsm_diag_42_code for more information.

Column Name: ss_note_dsm_diag_43_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 43'

Column Name: ss_note_dsm_diag_43_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_43_code. See ss_note_dsm_diag_43_code for more information.

Column Name: ss_note_dsm_diag_44_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 44'

Column Name: ss_note_dsm_diag_44_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_44_code. See ss_note_dsm_diag_44_code for more information.

Column Name: ss_note_dsm_diag_45_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 45'

Column Name: ss_note_dsm_diag_45_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_dsm_diag_45_code. See ss_note_dsm_diag_45_code for more information.

Column Name: ss_note_dsm_diag_46_code
Column Type: varchar
Max Length: 20
'SS Note DSM IV Diagnosis 46'

Column Name: ss_note_dsm_diag_46_value
Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_46_code. See ss_note_dsm_diag_46_code for more information.

Column Name: ss_note_dsm_diag_47_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 47'

Column Name: ss_note_dsm_diag_47_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_47_code. See ss_note_dsm_diag_47_code for more information.

Column Name: ss_note_dsm_diag_48_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 48'

Column Name: ss_note_dsm_diag_48_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_48_code. See ss_note_dsm_diag_48_code for more information.

Column Name: ss_note_dsm_diag_49_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 49'

Column Name: ss_note_dsm_diag_49_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_49_code. See ss_note_dsm_diag_49_code for more information.

Column Name: ss_note_dsm_diag_50_code

Column Type: varchar

Max Length: 20

'SS Note DSM IV Diagnosis 50'

Column Name: ss_note_dsm_diag_50_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_dsm_diag_50_code. See ss_note_dsm_diag_50_code for more information.

Column Name: ss_note_icd9_diag_31_code

Column Type: varchar

Max Length: 20
'SS Note ICD-9 Code 31'

Column Name: ss_note_icd9_diag_31_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_31_code. See ss_note_icd9_diag_31_code for more information.

Column Name: ss_note_icd9_diag_32_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 32'

Column Name: ss_note_icd9_diag_32_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_32_code. See ss_note_icd9_diag_32_code for more information.

Column Name: ss_note_icd9_diag_33_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 33'

Column Name: ss_note_icd9_diag_33_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_33_code. See ss_note_icd9_diag_33_code for more information.

Column Name: ss_note_icd9_diag_34_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 34'

Column Name: ss_note_icd9_diag_34_value
Column Type: varchar
Max Length: 250
The description associated with ss_note_icd9_diag_34_code. See ss_note_icd9_diag_34_code for more information.

Column Name: ss_note_icd9_diag_35_code
Column Type: varchar
Max Length: 20
'SS Note ICD-9 Code 35'

Column Name: ss_note_icd9_diag_35_value
Column Type: varchar
Max Length: 250

The description associated with `ss_note_icd9_diag_35_code`. See `ss_note_icd9_diag_35_code` for more information.

Column Name: `ss_note_icd9_diag_36_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 36'

Column Name: `ss_note_icd9_diag_36_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_36_code`. See `ss_note_icd9_diag_36_code` for more information.

Column Name: `ss_note_icd9_diag_37_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 37'

Column Name: `ss_note_icd9_diag_37_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_37_code`. See `ss_note_icd9_diag_37_code` for more information.

Column Name: `ss_note_icd9_diag_38_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 38'

Column Name: `ss_note_icd9_diag_38_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_38_code`. See `ss_note_icd9_diag_38_code` for more information.

Column Name: `ss_note_icd9_diag_39_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 39'

Column Name: `ss_note_icd9_diag_39_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_39_code`. See `ss_note_icd9_diag_39_code` for more information.

Column Name: `ss_note_icd9_diag_40_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 40'

Column Name: ss_note_icd9_diag_40_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_40_code. See ss_note_icd9_diag_40_code for more information.

Column Name: ss_note_icd9_diag_41_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 41'

Column Name: ss_note_icd9_diag_41_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_41_code. See ss_note_icd9_diag_41_code for more information.

Column Name: ss_note_icd9_diag_42_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 42'

Column Name: ss_note_icd9_diag_42_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_42_code. See ss_note_icd9_diag_42_code for more information.

Column Name: ss_note_icd9_diag_43_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 43'

Column Name: ss_note_icd9_diag_43_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_43_code. See ss_note_icd9_diag_43_code for more information.

Column Name: ss_note_icd9_diag_44_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 44'

Column Name: ss_note_icd9_diag_44_value

Column Type: varchar

Max Length: 250

The description associated with `ss_note_icd9_diag_44_code`. See `ss_note_icd9_diag_44_code` for more information.

Column Name: `ss_note_icd9_diag_45_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 45'

Column Name: `ss_note_icd9_diag_45_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_45_code`. See `ss_note_icd9_diag_45_code` for more information.

Column Name: `ss_note_icd9_diag_46_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 46'

Column Name: `ss_note_icd9_diag_46_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_46_code`. See `ss_note_icd9_diag_46_code` for more information.

Column Name: `ss_note_icd9_diag_47_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 47'

Column Name: `ss_note_icd9_diag_47_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_47_code`. See `ss_note_icd9_diag_47_code` for more information.

Column Name: `ss_note_icd9_diag_48_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 48'

Column Name: `ss_note_icd9_diag_48_value`

Column Type: `varchar`

Max Length: 250

The description associated with `ss_note_icd9_diag_48_code`. See `ss_note_icd9_diag_48_code` for more information.

Column Name: `ss_note_icd9_diag_49_code`

Column Type: `varchar`

Max Length: 20

'SS Note ICD-9 Code 49'

Column Name: ss_note_icd9_diag_49_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_49_code. See ss_note_icd9_diag_49_code for more information.

Column Name: ss_note_icd9_diag_50_code

Column Type: varchar

Max Length: 20

'SS Note ICD-9 Code 50'

Column Name: ss_note_icd9_diag_50_value

Column Type: varchar

Max Length: 250

The description associated with ss_note_icd9_diag_50_code. See ss_note_icd9_diag_50_code for more information.

Column Name: ss_note_integer_1

Column Type: integer

'SS Note Integer 1'

Column Name: ss_note_integer_2

'SS Note Integer 5'

Column Name: ss_note_integer_6

Column Type: integer

'SS Note Integer 6'

Column Name: ss_note_multi_dict_31_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 31'

Column Name: ss_note_multi_dict_31_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_31_code. See ss_note_multi_dict_31_code for more information.

Column Name: ss_note_multi_dict_32_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 32'

Column Name: ss_note_multi_dict_32_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_32_code. See ss_note_multi_dict_32_code for more information.

Column Name: ss_note_multi_dict_33_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 33'

Column Name: ss_note_multi_dict_33_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_33_code. See ss_note_multi_dict_33_code for more information.

Column Name: ss_note_multi_dict_34_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 34'

Column Name: ss_note_multi_dict_34_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_34_code. See ss_note_multi_dict_34_code for more information.

Column Name: ss_note_multi_dict_35_code

Column Type: varchar

Max Length: 20

'SS Note Multi Response Dictionary 35'

Column Name: ss_note_multi_dict_35_value

Column Type: varchar

Max Length: 32700

The description associated with ss_note_multi_dict_35_code. See ss_note_multi_dict_35_code for more information.

Column Name: ss_note_multi_dict_36_code

Column Type: varchar

Max Length: 20
'SS Note Multi Response Dictionary 36'

Column Name: ss_note_multi_dict_36_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_36_code. See ss_note_multi_dict_36_code for more information.

Column Name: ss_note_multi_dict_37_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 37'

Column Name: ss_note_multi_dict_37_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_37_code. See ss_note_multi_dict_37_code for more information.

Column Name: ss_note_multi_dict_38_code
Column Type: varchar
Max Length: 20
'SS Note Multi Response Dictionary 38'

Column Name: ss_note_multi_dict_38_value
Column Type: varchar
Max Length: 32700
The description associated with ss_note_multi_dict_38_code. See ss_note_multi_dict_38_code for more information.

Column Name: ss_note_multi_dict_39_code
Column Type: varchar

'SS Note Time 50'

Column Name: user_row_access_code
Column Type: integer
If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Void_Progress_Notes

Table Name: SYSTEM.cw_patient_notes_voided_supp_2

Table Description: This table returns supplemental information stored in the 'Void Progress Notes' form.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the service.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: FILING_COUNTER
Column Type: integer
'Filing Counter'

Column Name: Filing_Hist
Column Type: varchar
Max Length: 50
Unique string used for filing.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the service.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the service.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Documentation for form: Void_Progress_Notes

Table Name: SYSTEM.cw_patient_notes_voided_supp_3

Table Description: This table returns supplemental information stored in the 'Void Progress Notes' form.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the service.

Column Name: data_entry_time

Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with PATID.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: FILING_COUNTER
Column Type: integer
'Filing Counter'

Column Name: Filing_Hist
Column Type: varchar
Max Length: 50
Unique string used for filing.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the service.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the service.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: form_number
Column Type: varchar
Max Length: 50
Unique ID for a form.

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Max Length: 255

'SS Note Copy Multiple Response Dictionary 25'

Column Name: ss_notec_multi_dict_25_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_25_code. See ss_notec_multi_dict_25_code for more information.

Column Name: ss_notec_multi_dict_26_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 26'

Column Name: ss_notec_multi_dict_26_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_26_code. See ss_notec_multi_dict_26_code for more information.

Column Name: ss_notec_multi_dict_27_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 27'

Column Name: ss_notec_multi_dict_27_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_27_code. See ss_notec_multi_dict_27_code for more information.

Column Name: ss_notec_multi_dict_28_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 28'

Column Name: ss_notec_multi_dict_28_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_28_code. See ss_notec_multi_dict_28_code for more information.

Column Name: ss_notec_multi_dict_29_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 29'

Column Name: ss_notec_multi_dict_29_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_29_code. See ss_notec_multi_dict_29_code for more information.

Column Name: ss_notec_multi_dict_2_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 2'

Column Name: ss_notec_multi_dict_2_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_2_code. See ss_notec_multi_dict_2_code for more information.

Column Name: ss_notec_multi_dict_30_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 30'

Column Name: ss_notec_multi_dict_30_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_30_code. See ss_notec_multi_dict_30_code for more information.

Column Name: ss_notec_multi_dict_31_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 31'

Column Name: ss_notec_multi_dict_31_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_31_code. See ss_notec_multi_dict_31_code for more information.

Column Name: ss_notec_multi_dict_32_code
Column Type: varchar
Max Length: 255

'SS Note Copy Multiple Response Dictionary 32'

Column Name: ss_notec_multi_dict_32_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_32_code. See ss_notec_multi_dict_32_code for more information.

Column Name: ss_notec_multi_dict_33_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 33'

Column Name: ss_notec_multi_dict_33_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_33_code. See ss_notec_multi_dict_33_code for more information.

Column Name: ss_notec_multi_dict_34_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 34'

Column Name: ss_notec_multi_dict_34_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_34_code. See ss_notec_multi_dict_34_code for more information.

Column Name: ss_notec_multi_dict_35_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 35'

Column Name: ss_notec_multi_dict_35_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_35_code. See ss_notec_multi_dict_35_code for more information.

Column Name: ss_notec_multi_dict_36_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 36'

Column Name: ss_notec_multi_dict_36_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_36_code. See ss_notec_multi_dict_36_code for more information.

Column Name: ss_notec_multi_dict_37_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 37'

Column Name: ss_notec_multi_dict_37_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_37_code. See ss_notec_multi_dict_37_code for more information.

Column Name: ss_notec_multi_dict_38_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 38'

Column Name: ss_notec_multi_dict_38_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_38_code. See ss_notec_multi_dict_38_code for more information.

Column Name: ss_notec_multi_dict_39_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 39'

Column Name: ss_notec_multi_dict_39_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_39_code. See ss_notec_multi_dict_39_code for more information.

Column Name: ss_notec_multi_dict_3_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 3'

Column Name: ss_notec_multi_dict_3_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_3_code. See ss_notec_multi_dict_3_code for more information.

Column Name: ss_notec_multi_dict_40_code
Column Type: varchar
Max Length: 255

'SS Note Copy Multiple Response Dictionary 40'

Column Name: ss_notec_multi_dict_40_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_40_code. See ss_notec_multi_dict_40_code for more information.

Column Name: ss_notec_multi_dict_41_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 41'

Column Name: ss_notec_multi_dict_41_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_41_code. See ss_notec_multi_dict_41_code for more information.

Column Name: ss_notec_multi_dict_42_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 42'

Column Name: ss_notec_multi_dict_42_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_42_code. See ss_notec_multi_dict_42_code for more information.

Column Name: ss_notec_multi_dict_43_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 43'

Column Name: ss_notec_multi_dict_43_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_43_code. See ss_notec_multi_dict_43_code for more information.

Column Name: ss_notec_multi_dict_44_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 44'

Column Name: ss_notec_multi_dict_44_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_44_code. See ss_notec_multi_dict_44_code for more information.

Column Name: ss_notec_multi_dict_45_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 45'

Column Name: ss_notec_multi_dict_45_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_45_code. See ss_notec_multi_dict_45_code for more information.

Column Name: ss_notec_multi_dict_46_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 46'

Column Name: ss_notec_multi_dict_46_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_46_code. See ss_notec_multi_dict_46_code for more information.

Column Name: ss_notec_multi_dict_47_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 47'

Column Name: ss_notec_multi_dict_47_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_47_code. See ss_notec_multi_dict_47_code for more information.

Column Name: ss_notec_multi_dict_48_code
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 48'

Column Name: ss_notec_multi_dict_48_value
Column Type: varchar
Max Length: 32759
The description associated with ss_notec_multi_dict_48_code. See ss_notec_multi_dict_48_code for more information.

Column Name: ss_notec_multi_dict_49_code
Column Type: varchar
Max Length: 255

'SS Note Copy Multiple Response Dictionary 49'

Column Name: ss_notec_multi_dict_49_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_49_code. See ss_notec_multi_dict_49_code for more information.

Column Name: ss_notec_multi_dict_4_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 4'

Column Name: ss_notec_multi_dict_4_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_4_code. See ss_notec_multi_dict_4_code for more information.

Column Name: ss_notec_multi_dict_50_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 50'

Column Name: ss_notec_multi_dict_50_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_50_code. See ss_notec_multi_dict_50_code for more information.

Column Name: ss_notec_multi_dict_5_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 5'

Column Name: ss_notec_multi_dict_5_value

Column Type: varchar

Max Length: 32759

The description associated with ss_notec_multi_dict_5_code. See ss_notec_multi_dict_5_code for more information.

Column Name: ss_notec_multi_dict_6_code

Column Type: varchar

Max Length: 255

'SS Note Copy Multiple Response Dictionary 6'

Column Name: ss_notec_multi_dict_6_value

Column Type: varchar

Max Length: 32759

The description associated with `ss_notec_multi_dict_6_code`. See `ss_notec_multi_dict_6_code` for more information.

Column Name: `ss_notec_multi_dict_7_code`
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 7'

Column Name: `ss_notec_multi_dict_7_value`
Column Type: varchar
Max Length: 32759
The description associated with `ss_notec_multi_dict_7_code`. See `ss_notec_multi_dict_7_code` for more information.

Column Name: `ss_notec_multi_dict_8_code`
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 8'

Column Name: `ss_notec_multi_dict_8_value`
Column Type: varchar
Max Length: 32759
The description associated with `ss_notec_multi_dict_8_code`. See `ss_notec_multi_dict_8_code` for more information.

Column Name: `ss_notec_multi_dict_9_code`
Column Type: varchar
Max Length: 255
'SS Note Copy Multiple Response Dictionary 9'

Column Name: `ss_notec_multi_dict_9_value`
Column Type: varchar
Max Length: 32759
The description associated with `ss_notec_multi_dict_9_code`. See `ss_notec_multi_dict_9_code` for more information.

Column Name: `ss_notec_sing_dict_10_code`
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 10'

Column Name: `ss_notec_sing_dict_10_value`
Column Type: varchar
Max Length: 255
The description associated with `ss_notec_sing_dict_10_code`. See `ss_notec_sing_dict_10_code` for more information.

Column Name: `ss_notec_sing_dict_11_code`
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 11'

Column Name: ss_notec_sing_dict_11_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_11_code. See ss_notec_sing_dict_11_code for more information.

Column Name: ss_notec_sing_dict_12_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 12'

Column Name: ss_notec_sing_dict_12_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_12_code. See ss_notec_sing_dict_12_code for more information.

Column Name: ss_notec_sing_dict_13_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 13'

Column Name: ss_notec_sing_dict_13_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_13_code. See ss_notec_sing_dict_13_code for more information.

Column Name: ss_notec_sing_dict_14_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 14'

Column Name: ss_notec_sing_dict_14_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_14_code. See ss_notec_sing_dict_14_code for more information.

Column Name: ss_notec_sing_dict_15_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 15'

Column Name: ss_notec_sing_dict_15_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_15_code. See ss_notec_sing_dict_15_code for more information.

Column Name: ss_notec_sing_dict_16_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 16'

Column Name: ss_notec_sing_dict_16_value
Column Type: varchar
Max Length: 255
The description associated with ss_notec_sing_dict_16_code. See ss_notec_sing_dict_16_code for more information.

Column Name: ss_notec_sing_dict_17_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 17'

Column Name: ss_notec_sing_dict_17_value
Column Type: varchar
Max Length: 255
The description associated with ss_notec_sing_dict_17_code. See ss_notec_sing_dict_17_code for more information.

Column Name: ss_notec_sing_dict_18_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 18'

Column Name: ss_notec_sing_dict_18_value
Column Type: varchar
Max Length: 255
The description associated with ss_notec_sing_dict_18_code. See ss_notec_sing_dict_18_code for more information.

Column Name: ss_notec_sing_dict_19_code
Column Type: varchar
Max Length: 50
'SS Note Copy Single Response Dictionary 19'

Column Name: ss_notec_sing_dict_19_value
Column Type: varchar
Max Length: 255
The description associated with ss_notec_sing_dict_19_code. See ss_notec_sing_dict_19_code for more information.

Column Name: ss_notec_sing_dict_1_code
Column Type: varchar
Max Length: 50

'SS Note Copy Single Response Dictionary 1'

Column Name: ss_notec_sing_dict_1_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_1_code. See ss_notec_sing_dict_1_code for more information.

Column Name: ss_notec_sing_dict_20_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 20'

Column Name: ss_notec_sing_dict_20_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_20_code. See ss_notec_sing_dict_20_code for more information.

Column Name: ss_notec_sing_dict_21_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 21'

Column Name: ss_notec_sing_dict_21_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_21_code. See ss_notec_sing_dict_21_code for more information.

Column Name: ss_notec_sing_dict_22_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 22'

Column Name: ss_notec_sing_dict_22_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_22_code. See ss_notec_sing_dict_22_code for more information.

Column Name: ss_notec_sing_dict_23_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 23'

Column Name: ss_notec_sing_dict_23_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_23_code. See ss_notec_sing_dict_23_code for more information.

Column Name: ss_notec_sing_dict_24_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 24'

Column Name: ss_notec_sing_dict_24_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_24_code. See ss_notec_sing_dict_24_code for more information.

Column Name: ss_notec_sing_dict_25_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 25'

Column Name: ss_notec_sing_dict_25_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_25_code. See ss_notec_sing_dict_25_code for more information.

Column Name: ss_notec_sing_dict_26_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 26'

Column Name: ss_notec_sing_dict_26_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_26_code. See ss_notec_sing_dict_26_code for more information.

Column Name: ss_notec_sing_dict_27_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 27'

Column Name: ss_notec_sing_dict_27_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_27_code. See ss_notec_sing_dict_27_code for more information.

Column Name: ss_notec_sing_dict_28_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 28'

Column Name: ss_notec_sing_dict_28_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_28_code. See ss_notec_sing_dict_28_code for more information.

Column Name: ss_notec_sing_dict_29_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 29'

Column Name: ss_notec_sing_dict_29_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_29_code. See ss_notec_sing_dict_29_code for more information.

Column Name: ss_notec_sing_dict_2_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 2'

Column Name: ss_notec_sing_dict_2_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_2_code. See ss_notec_sing_dict_2_code for more information.

Column Name: ss_notec_sing_dict_30_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 30'

Column Name: ss_notec_sing_dict_30_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_30_code. See ss_notec_sing_dict_30_code for more information.

Column Name: ss_notec_sing_dict_31_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 31'

Column Name: ss_notec_sing_dict_31_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_31_code. See ss_notec_sing_dict_31_code for more information.

Column Name: ss_notec_sing_dict_32_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 32'

Column Name: ss_notec_sing_dict_32_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_32_code. See ss_notec_sing_dict_32_code for more information.

Column Name: ss_notec_sing_dict_33_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 33'

Column Name: ss_notec_sing_dict_33_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_33_code. See ss_notec_sing_dict_33_code for more information.

Column Name: ss_notec_sing_dict_34_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 34'

Column Name: ss_notec_sing_dict_34_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_34_code. See ss_notec_sing_dict_34_code for more information.

Column Name: ss_notec_sing_dict_35_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 35'

Column Name: ss_notec_sing_dict_35_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_35_code. See ss_notec_sing_dict_35_code for more information.

Column Name: ss_notec_sing_dict_36_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 36'

Column Name: ss_notec_sing_dict_36_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_36_code. See ss_notec_sing_dict_36_code for more information.

Column Name: ss_notec_sing_dict_37_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 37'

Column Name: ss_notec_sing_dict_37_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_37_code. See ss_notec_sing_dict_37_code for more information.

Column Name: ss_notec_sing_dict_38_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 38'

Column Name: ss_notec_sing_dict_38_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_38_code. See ss_notec_sing_dict_38_code for more information.

Column Name: ss_notec_sing_dict_39_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 39'

Column Name: ss_notec_sing_dict_39_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_39_code. See ss_notec_sing_dict_39_code for more information.

Column Name: ss_notec_sing_dict_3_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 3'

Column Name: ss_notec_sing_dict_3_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_3_code. See ss_notec_sing_dict_3_code for more information.

Column Name: ss_notec_sing_dict_40_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 40'

Column Name: ss_notec_sing_dict_40_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_40_code. See ss_notec_sing_dict_40_code for more information.

Column Name: ss_notec_sing_dict_41_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 41'

Column Name: ss_notec_sing_dict_41_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_41_code. See ss_notec_sing_dict_41_code for more information.

Column Name: ss_notec_sing_dict_42_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 42'

Column Name: ss_notec_sing_dict_42_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_42_code. See ss_notec_sing_dict_42_code for more information.

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_45_code. See ss_notec_sing_dict_45_code for more information.

Column Name: ss_notec_sing_dict_46_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 46'

Column Name: ss_notec_sing_dict_46_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_46_code. See ss_notec_sing_dict_46_code for more information.

Column Name: ss_notec_sing_dict_47_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 47'

Column Name: ss_notec_sing_dict_47_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_47_code. See ss_notec_sing_dict_47_code for more information.

Column Name: ss_notec_sing_dict_48_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 48'

Column Name: ss_notec_sing_dict_48_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_48_code. See ss_notec_sing_dict_48_code for more information.

Column Name: ss_notec_sing_dict_49_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 49'

Column Name: ss_notec_sing_dict_49_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_49_code. See ss_notec_sing_dict_49_code for more information.

Column Name: ss_notec_sing_dict_4_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 4'

Column Name: ss_notec_sing_dict_4_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_4_code. See ss_notec_sing_dict_4_code for more information.

Column Name: ss_notec_sing_dict_50_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 50'

Column Name: ss_notec_sing_dict_50_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_50_code. See ss_notec_sing_dict_50_code for more information.

Column Name: ss_notec_sing_dict_5_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 5'

Column Name: ss_notec_sing_dict_5_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_5_code. See ss_notec_sing_dict_5_code for more information.

Column Name: ss_notec_sing_dict_6_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 6'

Column Name: ss_notec_sing_dict_6_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_6_code. See ss_notec_sing_dict_6_code for more information.

Column Name: ss_notec_sing_dict_7_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 7'

Column Name: ss_notec_sing_dict_7_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_7_code. See ss_notec_sing_dict_7_code for more information.

Column Name: ss_notec_sing_dict_8_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 8'

Column Name: ss_notec_sing_dict_8_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_8_code. See ss_notec_sing_dict_8_code for more information.

Column Name: ss_notec_sing_dict_9_code

Column Type: varchar

Max Length: 50

'SS Note Copy Single Response Dictionary 9'

Column Name: ss_notec_sing_dict_9_value

Column Type: varchar

Max Length: 255

The description associated with ss_notec_sing_dict_9_code. See ss_notec_sing_dict_9_code for more information.

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Progress_Note_Corrections

Table Name: SYSTEM.Progress_Note_Corrections

Table Description: This table returns information stored in the 'Progress Note Corrections' form.

Column Name: ID
Column Type: integer

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: NOT_Hist
Column Type: varchar
Max Length: 20
The progress notes data link for the data row.

Column Name: aps_link
Column Type: varchar
Max Length: 40
The appointment link to for the data row.

Column Name: service_link
Column Type: varchar
Max Length: 40
The service link for the data row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The date the data row was last updated.

Column Name: data_entry_by_option

Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user the row was updated by.

Column Name: option_id
Column Type: varchar
Max Length: 40
The option id of the form that updated the row.

Column Name: option_desc
Column Type: varchar
Max Length: 80
The option description of the form that updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The name of the user that updated data row.

Column Name: action_code
Column Type: varchar
Max Length: 50
The Correction Action code taken on the updated data row.

Column Name: action_value
Column Type: varchar
Max Length: 40
The Correction Action value taken on the updated data row.

Column Name: reason_code
Column Type: varchar
Max Length: 50
The Reason for Correction taken on the updated data row.

Column Name: reason_value
Column Type: varchar
Max Length: 40
The Reason for Correction value taken on the updated data row.

Column Name: delete_serv_code
Column Type: varchar
Max Length: 50
delete_serv_code - The delete service code action taken on the updated data row.

Column Name: delete_serv_value

Column Type: varchar
Max Length: 40
The delete service value action taken on the updated data row.

Column Name: correction_comments
Column Type: varchar
Max Length: 32759
The correction comments taken on the updated data row.

Documentation for form: CWS_Vital_Signs

Table Name: SYSTEM.cw_voided_vital_signs

Table Description: This table returns the vital sign records which were voided via the 'CWS Vital Signs' form.

Column Name: ID
Column Type: integer

Column Name: FACILITY
Column Type: integer
The system code in which the vital sign record was voided.

Column Name: PATID
Column Type: varchar
Max Length: 20
The Client ID for which the vitals were entered.

Column Name: Unique_Row_Id
Column Type: varchar
Max Length: 50
'Unique Row Id'

Column Name: admin_date_actual
Column Type: date
'Date'.

Column Name: admin_time_actual_h
Column Type: time
'Time'.

Column Name: admin_unique_id
Column Type: varchar
Max Length: 50
The eMAR administration unique ID.

Column Name: data_entry_by

Column Type: varchar
Max Length: 40
The 'User Description' of the user which last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The 'User Description' of the user which last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 15
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The User ID of the user which last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The 'User Description' of the user which last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: emar_event_code
Column Type: varchar
Max Length: 50
"R" for "Results" or "A" for "Administration".

Column Name: emar_event_value
Column Type: varchar
Max Length: 50
The description associated with emar_event_code. See emar_event_code for more information.

Column Name: measured_unit
Column Type: varchar
Max Length: 50
The unit of measurement for the vital sign reading.

Column Name: option_desc
Column Type: varchar
Max Length: 80
The description of the last option that saved the vital sign.

Column Name: option_id
Column Type: varchar
Max Length: 20
The ID of the last option that saved the vital sign.

Column Name: order_number
Column Type: varchar
Max Length: 50
eMAR Order Number.

Column Name: order_unique_id
Column Type: varchar
Max Length: 50
The unique ID for the order number.

Column Name: reading
Column Type: varchar
Max Length: 50
The code for the vital sign associated with the reading value.

Column Name: reading_entry
Column Type: varchar
Max Length: 50
The value associated with the vital sign (reading).

Column Name: reading_value

Column Type: varchar

Max Length: 50

The description associated with reading_code. See reading_code for more information.

Column Name: void_data_entry_by

Column Type: varchar

Max Length: 40

The 'User Description' of the user which voided the vital record.

Column Name: void_data_entry_by_option

Column Type: varchar

Max Length: 40

The 'User Description' of the user which voided the vital record.

Column Name: void_data_entry_date

Column Type: date

The date the vital record was voided.

Column Name: void_data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the void data was saved.

Column Name: void_data_entry_source

Column Type: varchar

Max Length: 255

The name of the form which was used to void the vital record.

Column Name: void_data_entry_time

Column Type: varchar

Max Length: 15

The time the vital record was voided.

Column Name: void_data_entry_time_j

Column Type: time

the time with fractional seconds when the void data was saved.

Column Name: void_data_entry_tz_short

Column Type: varchar

Max Length: 8

the short abbreviation for the void data timezone.

Column Name: void_data_entry_user_id

Column Type: varchar

Max Length: 40

The User ID of the user which voided the vital record.

Column Name: void_data_entry_user_name

Column Type: varchar

Max Length: 40

The 'User Description' of the user which voided the vital record.

Column Name: void_data_entry_utc

Column Type: timestamp

the UTC date and time the void data was saved.

Column Name: void_data_ent_tz_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the void data was saved.

Column Name: void_option_desc

Column Type: varchar

Max Length: 80

The description of the option that voided the vital sign.

Column Name: void_option_id

Column Type: varchar

Max Length: 20

The ID of the option that voided the vital sign.

Documentation for form: Site_Specific_CWS_Vital_Signs

Table Name: SYSTEM.cw_vital_signs

Table Description: This table returns the information entered via the 'Vitals Entry' or 'CWS Vital Signs' forms.

Column Name: ID

Column Type: integer

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The 'User Description' of the user which last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 15

The time the row was last updated.

Column Name: FACILITY

Column Type: integer

The system code in which the vitals were entered.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID for which the vitals were entered.

Column Name: Unique_Row_Id

Column Type: varchar

Max Length: 50

The unique ID for the vital record entry. Will be the 'Date' in format (YYYYMMDD), the time in format (HHMMSS), 1, followed by the data entry date and time in UTC (Coordinated Universal Time).

Column Name: admin_date_actual

Column Type: date

'Date'

Column Name: admin_time_actual_h

Column Type: time

'Time'

Column Name: admin_unique_id

Column Type: varchar

Max Length: 50

The eMAR administration unique ID.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The 'User Description' of the user which last updated the row.

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar
Max Length: 8
the short abbreviation for the timezone.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The 'User ID' of the user which last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The 'User Description' of the user which last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: emar_attached_result
Column Type: bit
Flag to indicate whether or not the user attached to an already existing result/vital when filing an eMAR administration.

Column Name: edit_comments
Column Type: varchar
Max Length: 50
edit comments

Column Name: edit_increment_ID
Column Type: integer
ID that groups vital signs edited together

Column Name: emar_event_code
Column Type: varchar
Max Length: 50
"R" for "Results" or "A" for "Administration".

Column Name: emar_event_value
Column Type: varchar
Max Length: 50
The description associated with emar_event_code. See emar_event_code for more information.

Column Name: JOIN_RESULT_DETAIL_ID
Column Type: varchar
Max Length: 80
The link the the SYSTEM.results_detail row ID.

Column Name: measured_unit
Column Type: varchar
Max Length: 50

The unit of measurement for the vital sign reading.

Column Name: option_desc

Column Type: varchar

Max Length: 80

The description of the option that last filed the form.

Column Name: option_id

Column Type: varchar

Max Length: 20

The option ID that last filed the form.

Column Name: order_number

Column Type: varchar

Max Length: 50

eMAR Order Number.

Column Name: order_unique_id

Column Type: varchar

Max Length: 50

The eMAR unique ID for the order number.

Column Name: reading

Column Type: varchar

Max Length: 50

The code for the vital sign associated with the reading value.

Column Name: reading_entry

Column Type: varchar

Max Length: 80

The value associated with the vital sign (reading).

Column Name: reading_value

Column Type: varchar

Max Length: 80

The value and measurement for the associated row.

Column Name: vital_sign

Column Type: varchar

Max Length: 50

The description associated with the reading property. See the reading property for more information.

Column Name: voided_code

Column Type: varchar

Max Length: 40

Voided

Column Name: voided_value

Column Type: varchar

Max Length: 255

The description associated with voided_code.

Column Name: void_reason_code
Column Type: varchar
Max Length: 40
Void Reason

Column Name: void_reason_value
Column Type: varchar
Max Length: 255
The description associated with void_reason_code. See void_reason_code for more information.

Documentation for form: Site_Specific_CWS_Vital_Signs

Table Name: SYSTEM.cw_vitals_single_row_view

Table Description: This table returns the information entered via the 'Vitals Entry' or 'CWS Vital Signs' forms.

Documentation for form: Import_Clinical_Information

Table Name: SYSTEM.ccd_tempstorage

Table Description: Temporary storage table for imported CCDs

Column Name: ID
Column Type: integer

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number the diagnosis is associated with.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: JOIN_TO_DOCUMENT_IMAGE

Column Type: varchar

Max Length: 50

The id of the associated image in DocM.DocumentImage table (if provided)

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the data.

Column Name: client_name

Column Type: varchar

Max Length: 50

The name associated with PATID.

Column Name: confidentiality_code

Column Type: varchar

Max Length: 50

Column Name: confidentiality_code_sys

Column Type: varchar

Max Length: 50

Column Name: confidentiality_disp_name

Column Type: varchar

Max Length: 50

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The last user name to update this row of data.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The last user name to update this row of data.

Column Name: data_entry_date

Column Type: date

The date this row of data was last updated.

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 15
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 20
The User ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
data_entry_user_name - The User Name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: file_name
Column Type: varchar
Max Length: 2000

Column Name: file_name_no_path
Column Type: varchar
Max Length: 2000
The file name without the path.

Column Name: last_reviewed_date
Column Type: date
Last reviewed date (ccd>author>time)

Column Name: no_known_allergies
Column Type: bit
Flag to keep the Client's no known allergy status

Column Name: no_known_medication_allergies
Column Type: bit
Flag to keep the Client's no known medication allergy status

The user who last updated the service.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The user name that last updated the row.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 15

The time the row was last updated.

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 20

The user ID who last updated the service.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 50

The user name who last updated the service.

Column Name: date_recognized

Column Type: date

Date Recognized

Column Name: display_name

Column Type: varchar

Max Length: 255

Allergen name

Column Name: last_recon_action_code

Column Type: varchar

Max Length: 50

The action was last taken.

Column Name: last_recon_action_value

Column Type: varchar

Max Length: 50

Action description was last taken.

Column Name: last_reconciliation_date

Column Type: date

Last Reconciliation Date

Column Name: last_reconciliation_id

Column Type: varchar

Max Length: 50

'Last Reconciliation ID' Last Reconciliation ID

Column Name: last_reviewed_date

Column Type: date

Last reviewed date (ccd>author>time)

Column Name: negationInd

Column Type: bit
Presents the no known allergy status.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: status_active_code
Column Type: varchar
Max Length: 50
Active status code of the status code. CWS Dictionary #10038

Column Name: status_active_value
Column Type: varchar
Max Length: 50
Active status description of the status code. CWS Dictionary #10038

Column Name: status_avatar_code
Column Type: varchar
Max Length: 50
Associated Avatar status code of the status.

Column Name: status_avatar_value
Column Type: varchar
Max Length: 50
Associated Avatar status description of the status.

Column Name: status_code
Column Type: varchar
Max Length: 50
'Status'

Column Name: status_code_system
Column Type: varchar
Max Length: 50
Status code system

Column Name: status_display_name
Column Type: varchar
Max Length: 50
Status

Column Name: type
Column Type: varchar
Max Length: 50
The type of patch that is being updated.

Documentation for form: Import_Clinical_Information

Table Name: SYSTEM.ccd_tempstorage_medication

Table Description: Temporary storage table for imported CCDs (medication data)

Column Name: ID
Column Type: integer

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: JOIN_TO_DETAIL
Column Type: varchar
Max Length: 50
'JOIN TO DETAIL' JOIN_TO_DETAIL

Column Name: active_code
Column Type: varchar
Max Length: 50
The code for 'Active'.

Column Name: active_code_system
Column Type: varchar
Max Length: 50
Active code system

Column Name: active_display_name
Column Type: varchar
Max Length: 50
Active code description

Column Name: code
Column Type: varchar
Max Length: 50
Medication code corresponding to the code system

Column Name: code_system
Column Type: varchar
Max Length: 50
Medication code system

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the service.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 15
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 20
The user ID who last updated the service.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
The user name who last updated the service.

Column Name: display_name
Column Type: varchar
Max Length: 255
Medication name

Column Name: dose_quantity
Column Type: varchar
Max Length: 50
Dose Qty

Column Name: dose_quantity_unit
Column Type: varchar
Max Length: 50
Dose Qty Unit

Column Name: end_date
Column Type: date
'End Date'

Column Name: form_code
Column Type: varchar

Max Length: 50

Form Code

Column Name: form_code_system

Column Type: varchar

Max Length: 50

Form code system

Column Name: form_display_name

Column Type: varchar

Max Length: 50

Form description

Column Name: last_recon_action_code

Column Type: varchar

Max Length: 50

The action was last taken.

Column Name: last_recon_action_value

Column Type: varchar

Max Length: 50

Action description was last taken.

Column Name: last_reconciliation_date

Column Type: date

Last Reconciliation Date Last Reconciliation Date

Column Name: last_reconciliation_id

Column Type: varchar

Max Length: 50

'Last Reconciliation ID' Last Reconciliation ID

Column Name: last_reviewed_date

Column Type: date

Last reviewed date (ccd>author>time)

Column Name: negationInd

Column Type: bit

Presents the no known medication status.

Column Name: option_id

Column Type: varchar

Max Length: 20

The unique ID of the form that last updated the row.

Column Name: rate_quantity

Column Type: varchar

Max Length: 50

Rate Qty

Column Name: rate_quantity_unit
Column Type: varchar
Max Length: 50
Rate Qty Unit

Column Name: route_code
Column Type: varchar
Max Length: 50
'Route code'

Column Name: route_code_system
Column Type: varchar
Max Length: 50
Route code system

Column Name: route_display_name
Column Type: varchar
Max Length: 50
Route description

Column Name: start_date
Column Type: date
'Start Date'

Documentation for form: Import_Clinical_Information

Table Name: SYSTEM.ccd_tempstorage_problem

Table Description: Temporary storage table for imported CCDs (problem data)

Column Name: ID
Column Type: integer

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: JOIN_TO_DETAIL
Column Type: varchar
Max Length: 50
'JOIN TO DETAIL' JOIN_TO_DETAIL

Column Name: code
Column Type: varchar
Max Length: 50
Problem code corresponding to the code system

Column Name: code_system
Column Type: varchar
Max Length: 50
Problem code system

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the service.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 15
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 20
The user ID who last updated the service.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
The user name who last updated the service.

Column Name: date_of_onset
Column Type: date
Date of Onset

Column Name: date_of_resolve
Column Type: date
Date of Resolve

Column Name: display_name
Column Type: varchar

Max Length: 50

Problem name

Column Name: last_recon_action_code

Column Type: varchar

Max Length: 50

The action was last taken.

Column Name: last_recon_action_value

Column Type: varchar

Max Length: 50

Action description was last taken.

Column Name: last_reconciliation_date

Column Type: date

Last Reconciliation Date Last Reconciliation Date

Column Name: last_reconciliation_id

Column Type: varchar

Max Length: 50

'Last Reconciliation ID' Last Reconciliation ID

Column Name: last_reviewed_date

Column Type: date

Last reviewed date (ccd>author>time)

Column Name: negationInd

Column Type: bit

Presents the no known problem status.

Column Name: option_id

Column Type: varchar

Max Length: 20

The unique ID of the form that last updated the row.

Column Name: status_active_code

Column Type: varchar

Max Length: 50

Active status code of the status code. CWS Dictionary #10038

Column Name: status_active_value

Column Type: varchar

Max Length: 50

Active status description of the status code. CWS Dictionary #10038

Column Name: status_avatar_code

Column Type: varchar

Max Length: 50

Associated Avatar status code of the status.

Column Name: status_avatar_value
Column Type: varchar
Max Length: 50
Associated Avatar status description of the status.

Column Name: status_code
Column Type: varchar
Max Length: 50
'Status'

Column Name: status_code_system
Column Type: varchar
Max Length: 50
Status code system

Column Name: status_display_name
Column Type: varchar
Max Length: 50
Status

Documentation for form: CCD_Scheduling_Definition

Table Name: SYSTEM.ccd_export_log

Table Description: CCD Export Log Table

Column Name: ID
Column Type: integer

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: export_type_code
Column Type: varchar
Max Length: 50
The process type used to export the CCD

Column Name: export_type_value
Column Type: varchar
Max Length: 50
The description for the export_type_code.

Column Name: export_date
Column Type: date
The date the CCD is exported.

Column Name: export_time
Column Type: varchar
Max Length: 50
The time the CCD is exported.

Column Name: client_count
Column Type: varchar
Max Length: 50
The client count the process has exported.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The last user name to update this row of data.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The last user name to update this row of data.

Column Name: data_entry_date
Column Type: date
The date this row of data was last updated.

Column Name: data_entry_offset
Column Type: numeric
The offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 15
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
The time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
The time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar

Max Length: 8
The short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 20
The User ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
data_entry_user_name - The User Name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
The UTC date and time the data was saved.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Documentation for form: CCD_Scheduling_Definition

Table Name: SYSTEM.ccd_scheduling_definition

Table Description: This table represents CCD Scheduling task data.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer
The system code in which the data is stored.

Column Name: PATID
Column Type: varchar
Max Length: 20
Patient ID if ccd task is 'CLIENT' category

Column Name: client_program_sel
Column Type: varchar
Max Length: 50
ccd task category. 'CLIENT', 'PROGRAM' or 'ALL'

Column Name: content
Column Type: varchar
Max Length: 32000
'content'

Column Name: content_version
Column Type: varchar
Max Length: 50
'content dictionary code version 1-PM (TABLE #1027) 2-SDK (Clinical Document Sections)'

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
Data Entry By

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
Data Entry By Option (30003)

Column Name: data_entry_date
Column Type: date
Data Entry Date

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
source or form that filed the data

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
Data Entry Time

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
data entry user id

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
data entry user name

Column Name: programs
Column Type: varchar
Max Length: 32000
'&' delimited string of programs if ccd task is 'PROGRAM' category

Column Name: purpose_code

Column Type: varchar
Max Length: 50
The reason for which CCDs are generated.

Column Name: purpose_value
Column Type: varchar
Max Length: 50
The description for the purpose_code. See purpose_code for more information.

Column Name: receiving_provider
Column Type: varchar
Max Length: 32000
'&' delimited string of provider GUIDs

Column Name: sched_def_id
Column Type: integer
CCD Scheduling definition task ID

Column Name: send_on_inp_disch
Column Type: varchar
Max Length: 50
'Y' or 'N' for ccd tasks of 'DISCHARGE' purpose

Column Name: task
Column Type: integer
System Task Scheduler task number

Documentation for form: Independent_Group_Progress_Notes

Table Name: SYSTEM.cw_group_notes

Table Description: This table returns the information stored in the 'Progress Notes (Group and Individual)', 'Independent Group Progress Notes', 'Enter Group Default Note', and 'Edit Group Note for Individual' forms.

Column Name: ID
Column Type: integer

Column Name: APPOINTMENT_ID
Column Type: varchar
Max Length: 40

Column Name: calpm_ebpss_csi_code
Column Type: varchar
Max Length: 50

Column Name: calpm_ebpss_csi_value
Column Type: varchar

Documentation for form: Implantable_Device_List

Table Name: SYSTEM.cw_implantable_device

Table Description: This table returns the information in the 'Implantable Device List' form.

Column Name: ID
Column Type: integer

Column Name: brand_name
Column Type: varchar
Max Length: 1024
The device's brand name.

Column Name: company_name
Column Type: varchar
Max Length: 1024
The device's company name.

Column Name: device_description
Column Type: varchar
Max Length: 1024
The description of the device.

Column Name: distinct_identifier
Column Type: varchar
Max Length: 255
DonationIdNumber if one exists otherwise a GUID

Column Name: does_label_contain_nrl
Column Type: varchar
Max Length: 1024
Whether or not the label contains NRL.

Column Name: donation_id_number
Column Type: varchar
Max Length: 1024
The device's donation ID number.

Column Name: expiration_date
Column Type: date
The device's date of expiration.

Column Name: FACILITY
Column Type: integer
The system code that data was generated for.

Column Name: lot_batch_number
Column Type: varchar
Max Length: 1024
The device's lot batch number.

Column Name: mri_safety_status
Column Type: varchar
Max Length: 1024
The device's MRI safety status.

Column Name: manufactured_date
Column Type: date
The device's date of manufacturing.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: serial_number
Column Type: varchar
Max Length: 1024
The serial number of the device.

Column Name: status_code
Column Type: varchar
Max Length: 1024
The status of the device.

Column Name: status_value
Column Type: varchar
Max Length: 1024
The description associated with status_code. See status_code for more information.

Column Name: UDI
Column Type: varchar
Max Length: 255
The Unique Device Identification number.

Column Name: version_model_number
Column Type: varchar
Max Length: 1024
The device's version model number.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The username that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 50

The time the row was last updated.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 50

The 'User ID' who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 50

The 'User Description' of the 'User ID'.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: device_identifier

Column Type: varchar

Max Length: 50

The 'device identifier' part of the 'UDI' value.

Column Name: device_type_code

Column Type: varchar

Max Length: 1024

The devicetype of the device.

Column Name: device_type_value

Column Type: varchar

Max Length: 1024

The description associated with device_type_code. See device_type_code for more information.

Column Name: option_id

Column Type: varchar

Max Length: 50

The form that last updated the row.

Documentation for form: Product_Final_to_Draft_Override

Table Name: SYSTEM.cw_prod_final_to_draft_ov

Table Description: This table returns information stored in the 'Product Final to Draft Override' form.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: EPISODE_NUMBER

Column Type: integer

Episode Number

Column Name: FACILITY

Column Type: integer

The system code in which the data is stored.

Column Name: INDIRECT

Column Type: varchar

Max Length: 50

'Entity Database'

Column Name: PATID

Column Type: varchar

Max Length: 20

Client ID

Column Name: audit_date

Column Type: date

The date the row was last updated.

Column Name: audit_time

Column Type: varchar

Max Length: 50

The time the row was last updated.

Column Name: audit_time_sec

Column Type: varchar

Max Length: 50

The time the row was last updated in seconds.

Column Name: audit_user

Column Type: varchar

Max Length: 50

The user ID that last updated the row.

Column Name: historic

Column Type: varchar

Max Length: 50

Unique string used for referencing data.

Column Name: option

Column Type: varchar

Max Length: 50

'Option'

Column Name: override_reason

Column Type: varchar

Max Length: 500

'Override Reason'

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Health_Maintenance_Guideline_Definition_-_Custom

Table Name: SYSTEM.cw_immunization_cust_def

Table Description: This table returns data from a custom immunization definition.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: comments

Column Type: varchar

Max Length: 32766

'Comments'

Column Name: CMI_uniqueid

Column Type: varchar

Max Length: 50

The unique ID used to identify the custom immunization.

Column Name: FACILITY

Column Type: integer

The system code that generated the data.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID.

Column Name: age_from

Column Type: varchar

Max Length: 50

'Age From'

Column Name: age_to

Column Type: varchar

Max Length: 50

'Age To'

Column Name: client_name

Column Type: varchar

Max Length: 50

The name of the selected client.

Column Name: custom_start_date

Column Type: date

'Start Date'

Column Name: cust_reason_code

Column Type: varchar

Max Length: 50

'Customization Reason code'

Column Name: cust_reason_value

Column Type: varchar

Max Length: 40

The description associated with cust_reason_code. See cust_reason_code for more information.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The 'User ID' who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The 'User ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The 'User Description' of the 'User ID'.

Column Name: data_entry_utc
Column Type: timestamp

the UTC date and time the data was saved.

Column Name: date_of_birth
Column Type: date
'Client Date Of Birth'

Column Name: declined_by_code
Column Type: varchar
Max Length: 50
'Declined By Code'

Column Name: declined_by_value
Column Type: varchar
Max Length: 40
The description associated with declined_by_code. See declined_by_code for more information.

Column Name: declined_code
Column Type: varchar
Max Length: 50
'Declined code'

Column Name: declined_value
Column Type: varchar
Max Length: 40
The description associated with declined_code. See declined_code for more information.

Column Name: dose_code
Column Type: varchar
Max Length: 50
'Dose code'

Column Name: dose_value
Column Type: varchar
Max Length: 40
The description associated with dose_code. See dose_code for more information.

Column Name: interval_num
Column Type: varchar
Max Length: 50
'Interval #'

Column Name: interval_since_code
Column Type: varchar
Max Length: 50
'Interval Since code'

Column Name: interval_since_value
Column Type: varchar
Max Length: 40
The description associated with interval_since_code. See interval_since_code for more information.

Column Name: interval_unit_code

Column Type: varchar

Max Length: 50

'Interval Unit Code'

Column Name: interval_unit_value

Column Type: varchar

Max Length: 40

The description associated with interval_unit_code. See interval_unit_code for more information.

Column Name: option_desc

Column Type: varchar

Max Length: 80

The description of the form that last updated the row.

Column Name: option_id

Column Type: varchar

Max Length: 20

'Option Id'

Column Name: recurring_code

Column Type: varchar

Max Length: 50

'Recurring code'

Column Name: recurring_value

Column Type: varchar

Max Length: 40

The description associated with recurring_code. See recurring_code for more information.

Column Name: sex_code

Column Type: varchar

Max Length: 5

'Sex'

Column Name: sex_value

Column Type: varchar

Max Length: 40

The description associated with sex_code. See sex_code for more information.

Column Name: start_date

Column Type: varchar

Max Length: 20

'Start Date' Text

Column Name: vaccine_code

Column Type: varchar

Max Length: 50

'Vaccine code'

Column Name: vaccine_value

Column Type: varchar

Max Length: 40

The description associated with vaccine_code. See vaccine_code for more information.

Column Name: year_month_code

Column Type: varchar

Max Length: 50

'Year/Month code'

Column Name: year_month_value

Column Type: varchar

Max Length: 40

The description associated with year_month_code. See year_month_code for more information.

Documentation for form: Health_Maintenance_Guideline_Definition_-_Custom

Table Name: SYSTEM.cw_wellness_cust_def

Table Description: This table returns the custom wellness guideline definitions created via the 'Customize Wellness' section of the 'Health Maintenance Guideline Definition - Custom' form.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: PATID

Column Type: varchar

Max Length: 20

The Client ID for which the wellness definition was created.

Column Name: comments

Column Type: varchar

Max Length: 32766

'Comments'

Column Name: CMW_uniqueid

Column Type: varchar

Max Length: 50

The unique ID of the custom wellness guideline record. Will be specific to the Client ID.

Column Name: FACILITY

Column Type: integer

The system code in which the definition was created.

Column Name: age
Column Type: varchar
Max Length: 50
'Age From'

Column Name: age_to
Column Type: varchar
Max Length: 50
'Age To'

Column Name: client_name
Column Type: varchar
Max Length: 50
The name of the selected client.

Column Name: custom_start_date
Column Type: date
'Start Date'

Column Name: cust_reason_code
Column Type: varchar
Max Length: 50
'Customization Reason'

Column Name: cust_reason_value
Column Type: varchar
Max Length: 40
The description associated with cust_reason_code. See cust_reason_code for more information.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The 'User Description' of the user which created the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The 'User Description' of the user which created the row.

Column Name: data_entry_date
Column Type: date
The date the row was created.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar
Max Length: 255
The name of the form used to create the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was created.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The User ID of the user which created the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The 'User Description' of the user which created the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: date_of_birth
Column Type: date
'Client Date Of Birth'

Column Name: declined_by_code
Column Type: varchar
Max Length: 50
'Declined By'

Column Name: declined_by_value
Column Type: varchar
Max Length: 40
The description associated with declined_by_code. See declined_by_code for more information.

Column Name: declined_code

Column Type: varchar

Max Length: 50

'Declined?'

Column Name: declined_value

Column Type: varchar

Max Length: 40

The description associated with declined_code. See declined_code for more information.

Column Name: gender_code

Column Type: varchar

Max Length: 50

'Gender'

Column Name: gender_value

Column Type: varchar

Max Length: 40

The description associated with gender_code. See gender_code for more information.

Column Name: interval_num

Column Type: varchar

Max Length: 50

'Interval #'

Column Name: interval_unit_code

Column Type: varchar

Max Length: 50

'Interval Unit'

Column Name: interval_unit_value

Column Type: varchar

Max Length: 40

The description associated with interval_unit_code. See interval_unit_code for more information.

Column Name: option_desc

Column Type: varchar

Max Length: 80

The name of the form used to create the row.

Column Name: option_id

Column Type: varchar

Max Length: 20

The unique ID of the form used to create the row.

Column Name: recurring_code

Column Type: varchar

Max Length: 50

'Recurring'

Column Name: recurring_value

Column Type: varchar

Max Length: 40

The description associated with recurring_code. See recurring_code for more information.

Column Name: sex_code

Column Type: varchar

Max Length: 5

'Sex'

Column Name: sex_value

Column Type: varchar

Max Length: 40

The description associated with sex_code. See sex_code for more information.

Column Name: start_date

Column Type: varchar

Max Length: 20

'Start Date' text

Column Name: wellness_item_code

Column Type: varchar

Max Length: 50

'Wellness Item'

Column Name: wellness_item_value

Column Type: varchar

Max Length: 40

The description associated with wellness_item_code. See wellness_item_code for more information.

Column Name: year_month_code

Column Type: varchar

Max Length: 50

'Year/Month'

Column Name: year_month_value

Column Type: varchar

Max Length: 40

The description associated with year_month_code. See year_month_code for more information.

Documentation for form: Client_Health_Maintenance

Table Name: SYSTEM.audit_alerts_immunization

Table Description: This table returns audited immunization alert information from the 'Client Health Maintenance' form.

Column Name: ID
Column Type: integer

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The 'User Description'.

Column Name: CMI_uniqueid
Column Type: varchar
Max Length: 50
The unique ID used to identify the custom immunization.

Column Name: FACILITY
Column Type: integer
The system code the data was generated for.

Column Name: HMIuniqueid
Column Type: varchar
Max Length: 50
The HMI unique ID.

Column Name: PATID
Column Type: varchar
Max Length: 20
The Client ID.

Column Name: age
Column Type: numeric
'Client current age'

Column Name: client_address
Column Type: varchar
Max Length: 50

The address of the selected client.

Column Name: client_city

Column Type: varchar

Max Length: 50

The city of the selected client.

Column Name: client_name

Column Type: varchar

Max Length: 50

The name of the selected client.

Column Name: client_phone

Column Type: varchar

Max Length: 50

The phone number of the selected client.

Column Name: client_state

Column Type: varchar

Max Length: 50

The state of the selected client.

Column Name: client_zip

Column Type: varchar

Max Length: 50

The zip code of the selected client.

Column Name: customized

Column Type: varchar

Max Length: 50

'Customized'

Column Name: cust_reason

Column Type: varchar

Max Length: 50

'Customization Reason'

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The 'User ID' that last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The username that last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: date_of_birth
Column Type: date
'Client Date Of Birth'

Column Name: dose_code
Column Type: varchar
Max Length: 50
'Dose code'

Column Name: due_date
Column Type: date
'Due Date'

Column Name: item_code
Column Type: varchar
Max Length: 50
'Vaccine/Wellness Item code'

Column Name: item_value
Column Type: varchar
Max Length: 50
The description associated with item_code. See item_code for more information.

Documentation for form: Client_Health_Maintenance

Table Name: SYSTEM.audit_alerts_wellness

Table Description: This table returns audited wellness alert information from the 'Client Health Maintenance' form.

Column Name: ID
Column Type: integer

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The 'User Description'.

Column Name: CMW_uniqueid
Column Type: varchar
Max Length: 50
The unique ID of the custom wellness guideline record. Will be specific to the Client ID.

Column Name: FACILITY
Column Type: integer
The system code the data was generated for.

Column Name: HMWuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the wellness guideline definition.

Column Name: PATID
Column Type: varchar
Max Length: 20
The Client ID.

Column Name: age
Column Type: numeric
'Client current age'

Column Name: client_address
Column Type: varchar
Max Length: 50
The address of the selected client.

Column Name: client_city
Column Type: varchar
Max Length: 50
The city of the selected client.

Column Name: client_name
Column Type: varchar
Max Length: 50
The name of the selected client.

Column Name: client_phone
Column Type: varchar
Max Length: 50
The phone number of the selected client.

Column Name: client_state
Column Type: varchar
Max Length: 50
The state of the selected client.

Column Name: client_zip
Column Type: varchar
Max Length: 50
The zip code of the selected client.

Column Name: customized
Column Type: varchar
Max Length: 50
'Customized'

Column Name: cust_reason
Column Type: varchar
Max Length: 50
'Customization Reason'

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The 'User ID' that last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The username that last updated the row.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: date_of_birth

Column Type: date

'Client Date Of Birth'

Column Name: due_date

Column Type: date

'Due date'

Column Name: item_code

Column Type: varchar

Max Length: 50

'Vaccine/Wellness Item code'

Column Name: item_value

Column Type: varchar

Max Length: 50

The description associated with item_code. See item_code for more information.

Documentation for form: Client_Health_Maintenance

Table Name: SYSTEM.cw_hm_alerts_immunization

Table Description: This table returns immunization alert information from the 'Client Health Maintenance' form.

Column Name: ID
Column Type: integer

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The 'User Description'.

Column Name: CMI_uniqueid
Column Type: varchar
Max Length: 50
The unique ID used to identify the custom immunization.

Column Name: FACILITY
Column Type: integer
The system code the data was generated for.

Column Name: HMIuniqueid
Column Type: varchar
Max Length: 50
The HMI unique ID.

Column Name: PATID
Column Type: varchar

The Client ID.

Column Name: client_address
Column Type: varchar
Max Length: 50
The address of the selected client.

Column Name: client_city
Column Type: varchar
Max Length: 50
The city of the selected client.

Column Name: client_name
Column Type: varchar
Max Length: 50
The name of the selected client.

Column Name: client_phone
Column Type: varchar
Max Length: 50
The phone number of the selected client.

Column Name: client_state
Column Type: varchar
Max Length: 50
The state of the selected client.

Column Name: client_zip
Column Type: varchar
Max Length: 50
The zip code of the selected client.

Column Name: customized
Column Type: varchar
Max Length: 50
'Customized'

Column Name: cust_reason
Column Type: varchar
Max Length: 50
'Customization Reason'

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time_j

Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The 'User ID' that last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The username that last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: date_of_birth
Column Type: date
'Client Date Of Birth'

Column Name: dose_code
Column Type: varchar
Max Length: 50
'Dose code'

Column Name: due_date
Column Type: date
'Due Date'

Column Name: item_code
Column Type: varchar
Max Length: 50
'Vaccine/Wellness Item code'

Column Name: item_value
Column Type: varchar
Max Length: 50
The description associated with item_code. See item_code for more information.

Column Name: sex_code
Column Type: varchar
Max Length: 5
'Sex'

Column Name: sex_value
Column Type: varchar
Max Length: 40
The description associated with sex_code. See sex_code for more information.

Documentation for form: Client_Health_Maintenance

Table Name: SYSTEM.cw_hm_alerts_wellness

Table Description: This table returns wellness alert information from the 'Client Health Maintenance' form.

Column Name: ID
Column Type: integer

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The 'User Description'.

Column Name: CMW_uniqueid
Column Type: varchar
Max Length: 50
The unique ID of the custom wellness guideline record. Will be specific to the Client ID.

Column Name: FACILITY
Column Type: integer
The system code the data was generated for.

Column Name: HMWuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the wellness guideline definition.

Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The 'User ID' that last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The username that last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: date_of_birth
Column Type: date
'Client Date Of Birth'

Column Name: due_date
Column Type: date
'Due date'

Column Name: item_code
Column Type: varchar
Max Length: 50
'Vaccine/Wellness Item code'

Column Name: item_value

Column Type: varchar

Max Length: 50

The description associated with item_code. See item_code for more information.

Column Name: sex_code

Column Type: varchar

Max Length: 5

'Sex'

Column Name: sex_value

Column Type: varchar

Max Length: 40

The description associated with sex_code. See sex_code for more information.

Documentation for form: Client_Health_Maintenance

Table Name: SYSTEM.cw_immunization_history

Table Description: This table returns data of a client's immunization history.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: FACILITY

Column Type: integer

The system code the data was generated for.

Column Name: HMIuniqueid

Column Type: varchar

Max Length: 50

The HMI unique ID.

Column Name: NDC

Column Type: varchar

Max Length: 50

'NDC'

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID.

Column Name: administered_by_code

Column Type: varchar
Max Length: 50
'Administered By'

Column Name: administered_by_value
Column Type: varchar
Max Length: 40
The description associated with administered_by_code. See administered_by_code for more information.

Column Name: administration_comments
Column Type: varchar
Max Length: 999
'Administration Comments'

Column Name: body_site_other
Column Type: varchar
Max Length: 50
'Body Site - Other'

Column Name: data_control_identifier
Column Type: varchar
Max Length: 40
'Data Control Identifier'

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The 'User ID' who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 40
'The name of the form that last updated the form'

Column Name: data_entry_time
Column Type: varchar
Max Length: 10

The time the row was last updated.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The 'User ID' who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The 'User Description' of the 'User ID'.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: date

Column Type: date

'Date'

Column Name: date_published

Column Type: date

'Date Published'.

Column Name: dosage

Column Type: varchar

Max Length: 50

'Dosage'

Column Name: dose_code

Column Type: varchar

Max Length: 50

'Dose code'

Column Name: dose_value

Column Type: varchar

Max Length: 40

The description associated with dose_code. See dose_code for more information.

Column Name: edition_status_code

Column Type: varchar

Max Length: 50

'Edition Status code'

Column Name: edition_status_value

Column Type: varchar

Max Length: 50

The description associated with edition_status_code. See edition_status_code for more information.

Column Name: exp_date

Column Type: date

'Expiration Date'

Column Name: immunization_source_code

Column Type: varchar

Max Length: 50

'Immunization source code'

Column Name: immunization_source_value

Column Type: varchar

Max Length: 100

The description associated with immunization_source_code. See immunization_source_code for more information.

Column Name: lot_num

Column Type: varchar

Max Length: 50

'Lot #'

Column Name: manufacturer_code

Column Type: varchar

Max Length: 50

'Manufacturer code'

Column Name: manufacturer_value

Column Type: varchar

Max Length: 128

The description associated with manufacturer_code. See manufacturer_code for more information.

Column Name: option_desc

Column Type: varchar

Max Length: 80

The description of the form that last updated the row.

Column Name: option_id

Column Type: varchar

Max Length: 20
'Option Id'

Column Name: ordered_by_code
Column Type: varchar
Max Length: 50
'Ordered By code'

Column Name: ordered_by_value
Column Type: varchar
Max Length: 40
The description associated with ordered_by_code. See ordered_by_code for more information.

Column Name: provided_by_code
Column Type: varchar
Max Length: 50
'Provided By code'

Column Name: provided_by_value
Column Type: varchar
Max Length: 40
The description associated with provided_by_code. See provided_by_code for more information.

Column Name: reason_code
Column Type: varchar
Max Length: 50
'Reason code'

Column Name: reason_description
Column Type: varchar
Max Length: 100
The description of reason_code. See reason_code for more information.

Column Name: reason_type_code
Column Type: varchar
Max Length: 5
'Reason Type code'

Column Name: reason_type_value
Column Type: varchar
Max Length: 10
The description associated with reason_type_code. See reason_type_code for more information.

Column Name: refused_code
Column Type: varchar
Max Length: 50
'Refused code'

Column Name: refused_value
Column Type: varchar

Max Length: 40

The description associated with refused_code. See refused_code for more information.

Column Name: route_code

Column Type: varchar

Max Length: 50

'Route code'

Column Name: route_other

Column Type: varchar

Max Length: 50

'Route - Other'

Column Name: route_value

Column Type: varchar

Max Length: 40

The description associated with route_code. See route_code for more information.

Column Name: site_code

Column Type: varchar

Max Length: 50

'Site code'

Column Name: site_value

Column Type: varchar

Max Length: 40

The description associated with site_code. See site_code for more information.

Column Name: time

Column Type: varchar

Max Length: 50

'Time'

Column Name: under_19_consent_code

Column Type: varchar

Max Length: 50

'(If Under 19) Consent for Vaccine code'

Column Name: under_19_consent_value

Column Type: varchar

Max Length: 50

The description associated with under_19_consent_code. See under_19_consent_code for more information.

Column Name: under_19_vfc_elig_code

Column Type: varchar

Max Length: 50

'(If Under 19) VFC Eligibility Code'

Column Name: under_19_vfc_elig_value

Column Type: varchar

Max Length: 50

The description associated with under_19_vfc_elig_code. See under_19_vfc_elig_code for more information.

Column Name: under_19_vfc_status

Column Type: varchar

Max Length: 50

'(If Under 19) (VFC Status)'

Column Name: under_19_vfc_vac_src_code

Column Type: varchar

Max Length: 50

'(If Under 19) Vaccine Source code'

Column Name: under_19_vfc_vac_src_val

Column Type: varchar

Max Length: 50

The description associated with under_19_vfc_vac_src_code. See under_19_vfc_vac_src_code for more information.

Column Name: unit_code

Column Type: varchar

Max Length: 50

'Unit code'

Column Name: unit_other

Column Type: varchar

Max Length: 50

'Unit - Other'

Column Name: unit_value

Column Type: varchar

Max Length: 40

The description associated with unit_code. See unit_code for more information.

Column Name: vaccine_code

Column Type: varchar

Max Length: 50

'Vaccine code'

Column Name: vaccine_stmt_shown

Column Type: varchar

Max Length: 50

'Vaccine Statement Shown to Patient'

Column Name: vaccine_stmt_shown_date

Column Type: date

'Date Vaccine Statement Shown to Patient'

Column Name: vaccine_value

Column Type: varchar

Max Length: 40

The description associated with vaccine_code. See vaccine_code for more information.

Column Name: vis_edition_date

Column Type: date

'VIS Edition Date'

Column Name: vis_last_updated_date

Column Type: date

'VIS Last Updated Date'

Column Name: vis_number

Column Type: varchar

Max Length: 50

'VIS Number'

Column Name: vis_stmt_name

Column Type: varchar

Max Length: 50

'Name of VIS Statement'

Documentation for form: Client_Health_Maintenance

Table Name: SYSTEM.cw_wellness_history

Table Description: This table returns the information stored via the 'Wellness' grid within the 'Client Health Maintenance' form.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: FACILITY

Column Type: integer

The system code in which the record was filed.

Column Name: HMWuniqueid

Column Type: varchar

Max Length: 50

The ID assigned to wellness record row. Will be unique to the Client.

Column Name: PATID

Column Type: varchar

Max Length: 20

The Client ID for which the row is associated.

Column Name: administered_by_code

Column Type: varchar

Max Length: 50

ID of the staff who administered the wellness item.

Column Name: administered_by_value

Column Type: varchar

Max Length: 40

The description associated with administered_by_code. See administered_by_code for more information.

Column Name: comments

Column Type: varchar

Max Length: 999

'Comments'

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The 'User Description' of the user which last updated the row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The 'User Description' of the user which last updated the row.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 10

The time the row was last updated.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The User ID of the user which last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The 'User Description' of the user which last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: date
Column Type: date
'Date'

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: provided_by_code
Column Type: varchar
Max Length: 50
'Provided By'

Column Name: provided_by_value
Column Type: varchar
Max Length: 40
The description associated with provided_by_code. See provided_by_code for more information.

Column Name: refused_code
Column Type: varchar
Max Length: 50

'Refused'

Column Name: refused_value

Column Type: varchar

Max Length: 40

The description associated with refused_code. See refused_code for more information.

Column Name: wellness_item_code

Column Type: varchar

Max Length: 50

'Wellness Item'

Column Name: wellness_item_value

Column Type: varchar

Max Length: 40

The description associated with wellness_item_code. See wellness_item_code for more information.

Documentation for form: Non-Administered_Treatment

Table Name: SYSTEM.non_administered_treatment

Table Description: This table returns information related to non-administered treatments from the 'Non-Administered Treatment' form.

Column Name: ID

Column Type: integer

Column Name: EPISODE_NUMBER

Column Type: integer

'Episode Number'.

Column Name: FACILITY

Column Type: integer

The system code in which the non-administered treatments are stored.

Column Name: PATID

Column Type: varchar

Max Length: 20

The unique ID of the client.

Column Name: comments

Column Type: varchar

Max Length: 32700

'Comments'.

Column Name: data_entry_by

Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The 'User Description'.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The 'User ID' who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The username who last updated the row.

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: patient_name
Column Type: varchar
Max Length: 50
The name of the client selected.

Column Name: practioner_name
Column Type: varchar

Max Length: 100
The Practitioner name.

Column Name: practitioner_id
Column Type: varchar
Max Length: 50
The unique ID of the practitioner.

Column Name: protocol_reason_code
Column Type: varchar
Max Length: 50
Reason code for Non-Administered Protocol.

Column Name: protocol_reason_value
Column Type: varchar
Max Length: 250
The value of protocol_reason_code.

Column Name: record_date
Column Type: date
The date that the non-administered treatment was recorded.

Column Name: record_name
Column Type: varchar
Max Length: 400
The record name.

Column Name: record_time
Column Type: time
The time that the non-administered treatment was recorded.

Column Name: treatment_protocol_code
Column Type: varchar
Max Length: 50
The treatment protocol code.

Documentation for form: Nursing_Caseload_Assignment

Table Name: SYSTEM.cw_nursing_caseload

Table Description: This table returns the information stored in the 'Nursing Caseload Assignment' form.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer

Column Name: USERID
Column Type: varchar
Max Length: 40

Column Name: PATID
Column Type: varchar
Max Length: 20

Column Name: EPISODE_NUMBER
Column Type: integer

Column Name: active
Column Type: varchar
Max Length: 50

Column Name: effective_date
Column Type: date

Column Name: effective_time
Column Type: time

Column Name: patient_name
Column Type: varchar
Max Length: 50

Column Name: release_date
Column Type: date

Column Name: release_time
Column Type: time

Column Name: release_method
Column Type: varchar
Max Length: 50

Column Name: user_description

Column Type: varchar
Max Length: 50

Column Name: user_row_access_code

Column Type: integer

If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Documentation for form: Export_Health_Information

Table Name: SYSTEM.health_info_export_log

Table Description: Audit log for data exported using form 'Export Health Information'

Column Name: ID

Column Type: integer

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: PATID

Column Type: varchar

Max Length: 20

Client id

Column Name: batch_id

Column Type: varchar

Max Length: 50

Batch id that the exported data was included in, if any

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The last user name to update this row of data.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The last user name to update this row of data.

Column Name: data_entry_date

Column Type: date

The date this row of data was last updated.

Column Name: data_entry_offset
Column Type: numeric
The offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 15
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
The time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
The time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
The short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 20
The User ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
The User Name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
The UTC date and time the data was saved.

Column Name: export_date
Column Type: date
Export date in local time

Column Name: export_time
Column Type: varchar
Max Length: 15

Export time in local time

Column Name: export_type_code

Column Type: varchar

Max Length: 50

type of data eport (F)ile or (C)areConnect

Column Name: export_type_value

Column Type: varchar

Max Length: 50

type of data eport (F)ile or (C)areConnect

Column Name: link_to_source_data

Column Type: varchar

Max Length: 50

Link value that can be used to join with source data (ADT = HRS, VXU = HMI, ORU = result row id)

Column Name: message_event

Column Type: varchar

Max Length: 50

HL7 message event code (e.g. A01, V04, R01)

Column Name: message_type

Column Type: varchar

Max Length: 50

HL7 message type (e.g. ADT, VXU, ORU)

Column Name: option_id

Column Type: varchar

Max Length: 20

The unique ID of the form that last updated the row.

Column Name: source_activity_date

Column Type: date

The date when the source activity took place

Documentation for form: Client_List/Reminder_List

Table Name: SYSTEM.client_reminder_list

Table Description: This table returns reminders that need to be given to the client from the 'Client List/Reminder List' form.

Column Name: ID

Column Type: integer

Column Name: EPISODE_NUMBER
Column Type: integer
The episode number associated with the reminder.

Column Name: FACILITY
Column Type: integer
The system code in which the client reminders are stored.

Column Name: PATID
Column Type: varchar
Max Length: 20
'Client ID'.

Column Name: actual_com_method_code
Column Type: varchar
Max Length: 50
The Actual Communication Method code.

Column Name: actual_com_method_value
Column Type: varchar
Max Length: 50
The value of actual_com_method_code. See actual_com_method_code for more information.

Column Name: age
Column Type: varchar
Max Length: 50
The age of the client associated with the reminder.

Column Name: client_name
Column Type: varchar
Max Length: 50
The name of the client for whom the reminder was created.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 40

The time the row was last updated.

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The 'User ID' that last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The username that last updated the row.

Column Name: episode_information

Column Type: varchar

Max Length: 20

Returns information associated with the episode.

Column Name: gender

Column Type: varchar

Max Length: 50

The gender of the client associated with the reminder.

Column Name: gender_value

Column Type: varchar

Max Length: 50

The value of gender.

Column Name: option_id

Column Type: varchar

Max Length: 40

The unique ID of the form that last updated the row.

Column Name: pref_com_method_code

Column Type: varchar

Max Length: 50

The client's communication preference code.

Column Name: pref_com_method_value

Column Type: varchar

Max Length: 50

The value of pref_com_method_code. See pref_com_method_code for more information.

Column Name: program

Column Type: varchar

Max Length: 50

'Programs'.

Column Name: program_code

Column Type: varchar

Max Length: 50

The code of the program that the client who the reminder is being created for is associated with.

Column Name: reminder_completion_date

Column Type: date

The date that the reminder is completed.

Column Name: reminder_create_by

Column Type: varchar

Max Length: 50

The person who created the reminder.

Column Name: reminder_create_date

Column Type: date

The date that the reminder is created.

Column Name: reminder_type_code

Column Type: varchar

Max Length: 50

The reminder type code.

Column Name: reminder_type_value

Column Type: varchar

Max Length: 50

The value of reminder_type_code. See reminder_type_code for more information.

Documentation for form: Final_to_Draft_Override

Table Name: SYSTEM.cw_pn_override

Table Description: This table returns the information stored in the 'Final to Draft Override' form.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer
The system code where the data is stored.

Column Name: NOTuniqueid
Column Type: varchar
Max Length: 50
The unique ID for a Note used for filing.

Column Name: Option_Desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: Option_Id
Column Type: varchar
Max Length: 40
The unique ID of the form that last updated the row.

Column Name: OverRideIndex
Column Type: integer
'Override Index'

Column Name: PATID
Column Type: varchar
Max Length: 20
Client ID

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255

The name of the form that last updated the row.

Column Name: data_entry_time

Column Type: varchar

Max Length: 50

The time the row was last updated.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The 'User ID' who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name who last updated the row.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: override_code

Column Type: varchar

Max Length: 50

'Draft/Final'

Column Name: override_reason

Column Type: varchar

Max Length: 31000

'Override Reason'

Column Name: override_value

Column Type: varchar

Max Length: 50

The description associated with override_code. See override_code for more information.

Documentation for form: Client_Profile/_/_Physicians_Orders

Table Name: OrderEntry.history_client_order

Table Description: This table contains one row for every client order stored in Avatar OE.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: EPISODE_NUMBER
Column Type: integer
The client Episode with which the order is associated

Column Name: FACILITY
Column Type: integer
The FACILITY (Root System Code) in which the data was stored

Column Name: FREQUENCYID
Column Type: varchar
Max Length: 50
The order's Frequency Code

Column Name: ICD9CODE
Column Type: varchar
Max Length: 50
The order's ICD-9 diagnosis code

Column Name: JOIN_TO_DIAGNOSIS_OBJECT
Column Type: varchar
Max Length: 40
Used to JOIN to SYSTEM.RADplus_IMO_results table
Diagnosis JOIN and associated values v2011010

Column Name: ORDERID
Column Type: varchar
Max Length: 50
The order's Order Code

Column Name: ORDUniqueid
Column Type: varchar
Max Length: 50
The order's ORD unique ID within the client's orders

Column Name: PATID
Column Type: varchar

Max Length: 20
The Client ID for whom this order was created

Column Name: administer_am_0100
Column Type: varchar
Max Length: 50
Is this order to be administered at 1:00 AM ?

Column Type: varchar
Max Length: 50
Is this order to be administered at 4:00 AM ?

Column Name: administer_am_0430
Column Type: varchar
Max Length: 50
Is this order to be administered at 4:30 AM ?

Column Name: administer_am_0500
Column Type: varchar
Max Length: 50
Is this order to be administered at 5:00 AM ?

Column Name: administer_am_0530
Column Type: varchar

Max Length: 50
Is this order to be administered at 5:30 AM ?

Column Name: administer_am_0600
Column Type: varchar
Max Length: 50
Is this order to be administered at 6:00 AM ?

Column Name: administer_am_0630
Column Type: varchar
Max Length: 50
Is this order to be administered at 6:30 AM ?

Column Name: administer_am_0700
Column Type: varchar
Max Length: 50
Is this order to be administered at 7:00 AM ?

Column Name: administer_am_0730
Column Type: varchar
Max Length: 50
Is this order to be administered at 7:30 AM ?

Column Name: administer_am_0800
Column Type: varchar
Max Length: 50
Is this order to be administered at 8:00 AM ?

Column Name: administer_am_0830
Column Type: varchar
Max Length: 50
Is this order to be administered at 8:30 AM ?

Column Name: administer_am_0900
Column Type: varchar
Max Length: 50
Is this order to be administered at 9:00 AM ?

Column Name: administer_am_0930
Column Type: varchar
Max Length: 50
Is this order to be administered at 9:30 AM ?

Column Name: administer_am_1000
Column Type: varchar
Max Length: 50
Is this order to be administered at 10:00 AM ?

Column Name: administer_am_1030
Column Type: varchar

Max Length: 50
Is this order to be administered at 10:30 AM ?

Column Name: administer_am_1100
Column Type: varchar
Max Length: 50
Is this order to be administered at 11:00 AM ?

Column Name: administer_am_1130
Column Type: varchar
Max Length: 50
Is this order to be administered at 11:30 AM ?

Column Name: administer_am_1230
Column Type: varchar
Max Length: 50
Is this order to be administered at 12:30 AM ?

Column Name: administer_am_midnight
Column Type: varchar
Max Length: 50
Is this order to be administered at 12:00 AM (Midnight) ?

Column Name: administer_pm_0100
Column Type: varchar
Max Length: 50
Is this order to be administered at 1:00 PM ?

Column Name: administer_pm_0130
Column Type: varchar
Max Length: 50
Is this order to be administered at 1:30 PM ?

Column Name: administer_pm_0200
Column Type: varchar
Max Length: 50
Is this order to be administered at 2:00 PM ?

Column Name: administer_pm_0230
Column Type: varchar
Max Length: 50
Is this order to be administered at 2:30 PM ?

Column Name: administer_pm_0300
Column Type: varchar
Max Length: 50
Is this order to be administered at 3:00 PM ?

Column Name: administer_pm_0330
Column Type: varchar

Max Length: 50
Is this order to be administered at 3:30 PM ?

Column Name: administer_pm_0400
Column Type: varchar
Max Length: 50
Is this order to be administered at 4:00 PM ?

Column Name: administer_pm_0430
Column Type: varchar
Max Length: 50
Is this order to be administered at 4:30 PM ?

Column Name: administer_pm_0500
Column Type: varchar
Max Length: 50
Is this order to be administered at 5:00 PM ?

Column Name: administer_pm_0530
Column Type: varchar
Max Length: 50
Is this order to be administered at 5:30 PM ?

Column Name: administer_pm_0600
Column Type: varchar
Max Length: 50
Is this order to be administered at 6:00 PM ?

Column Name: administer_pm_0630
Column Type: varchar
Max Length: 50
Is this order to be administered at 6:30 PM ?

Column Name: administer_pm_0700
Column Type: varchar
Max Length: 50
Is this order to be administered at 7:00 PM ?

Column Name: administer_pm_0730
Column Type: varchar
Max Length: 50
Is this order to be administered at 7:30 PM ?

Column Name: administer_pm_0800
Column Type: varchar
Max Length: 50
Is this order to be administered at 8:00 PM ?

Column Name: administer_pm_0830
Column Type: varchar

Max Length: 50

Is this order to be administered at 8:30 PM ?

Column Name: administer_pm_0900

Column Type: varchar

Max Length: 50

Is this order to be administered at 9:00 PM ?

Column Name: administer_pm_0930

Column Type: varchar

Max Length: 50

Is this order to be administered at 9:30 PM ?

Column Name: administer_pm_1000

Column Type: varchar

Max Length: 50

Is this order to be administered at 10:00 PM ?

Column Name: administer_pm_1030

Column Type: varchar

Max Length: 50

Is this order to be administered at 10:30 PM ?

Column Name: administer_pm_1100

Column Type: varchar

Max Length: 50

Is this order to be administered at 11:00 PM ?

Column Name: administer_pm_1130

Column Type: varchar

Max Length: 50

Is this order to be administered at 11:30 PM ?

Column Name: administer_pm_1230

Column Type: varchar

Max Length: 50

Is this order to be administered at 12:30 PM ?

Column Name: administer_pm_noon

Column Type: varchar

Max Length: 50

Is this order to be administered at 12:00 PM (Noon) ?

Column Name: administration_route

Column Type: varchar

Max Length: 50

The order's Route of Adminiistration

Column Name: administration_route_code

Column Type: varchar

Max Length: 50
The order's Route of Administration Code

Column Name: administration_times
Column Type: varchar
Max Length: 4096
The order's Hours of Administration

Column Name: admin_method_code
Column Type: varchar
Max Length: 50
The order's Administration Method Code (IV orders only)

Column Name: admin_method_value
Column Type: varchar
Max Length: 50
The order's Administration Method Value (IV orders only)

Column Name: am_0600_1130am_code
Column Type: varchar
Max Length: 50
The order's specified Hours of Administration codes between 6:00 AM and 11:30 AM

Column Name: am_0600_1130am_value
Column Type: varchar
Max Length: 75
The order's specified Hours of Administration values between 6:00 AM and 11:30 AM

Column Name: am_12midnight_0530am_code
Column Type: varchar
Max Length: 50
The order's specified Hours of Administration codes between 12:00 AM (Midnight) and 5:30 AM

Column Name: am_12midnight_0530am_value
Column Type: varchar
Max Length: 80
The order's specified Hours of Administration values between 12:00 AM (Midnight) and 5:30 AM

Column Name: basic_dup_order_ovr_code
Column Type: varchar
Max Length: 50
Override code for Basic Duplicate Override Check alert

Column Name: basic_dup_order_ovr_text
Column Type: varchar
Max Length: 80
Override text for Basic Duplicate Override Check alert

Column Name: basic_dup_order_ovr_value
Column Type: varchar

Max Length: 50
Override value for Basic Duplicate Override Check alert

Column Name: change_by
Column Type: varchar
Max Length: 50
Order last changed by User

Column Name: change_by_option
Column Type: varchar
Max Length: 50
Order last changed by (option) User

Column Name: change_by_pract_id
Column Type: varchar
Max Length: 50
Order last changed by Practitioner ID

Column Name: change_by_pract_name
Column Type: varchar
Max Length: 50
Order last changed by Practitioner Name

Column Name: change_by_pr_not_enr
Column Type: varchar
Max Length: 50
Order last changed by Practitioner Who Is Not Enrolled

Column Name: change_by_user_id
Column Type: varchar
Max Length: 50
Order last changed by User ID

Column Name: change_by_user_name
Column Type: varchar
Max Length: 50
Order last changed by User ID Name

Column Name: change_date
Column Type: date
Order last changed date

Column Name: change_delay_ent_code
Column Type: varchar
Max Length: 50
Order last changed Delayed Entry code

Column Name: change_delay_ent_value
Column Type: varchar
Max Length: 50

Order last changed Delayed Entry value

Column Name: change_eff_date

Column Type: date

Order last changed Effective Date

Column Name: change_eff_time

Column Type: varchar

Max Length: 50

Order last changed Effective Time

Column Name: change_ent_src_code

Column Type: varchar

Max Length: 50

Order last changed Order Entry Source code

Column Name: change_ent_src_value

Column Type: varchar

Max Length: 50

Order last changed Order Entry Source value

Column Name: change_explanation

Column Type: varchar

Max Length: 32766

Order last changed Explanation

Column Name: change_explanation_255

Column Type: varchar

Max Length: 255

Order last changed Explanation (255 character limit)

Column Name: change_reason_code

Column Type: varchar

Max Length: 50

Order last changed Reason for Change code

Column Name: change_reason_value

Column Type: varchar

Max Length: 50

Order last changed Reason for Change value

Column Name: change_time

Column Type: varchar

Max Length: 50

Order last changed time

Column Name: client_educ_by_userid

Column Type: varchar

Max Length: 50

Client Education By User ID

Column Name: client_educ_by_user_name
Column Type: varchar
Max Length: 50
Client Education By User Name

Column Name: client_educ_date
Column Type: date
Client Education Date

Column Name: client_educ_filed_by_user
Column Type: varchar
Max Length: 50
Client Education Filed By User Name

Column Name: client_educ_filed_by_usid
Column Type: varchar
Max Length: 50
Client Education Filed By User ID

Column Name: client_educ_filed_date
Column Type: date
Client Education Filed Date

Column Name: client_educ_filed_time
Column Type: varchar
Max Length: 50
Client Education Filed Time

Column Name: client_educ_time
Column Type: varchar
Max Length: 50
Client Education Time

Column Name: comments
Column Type: varchar
Max Length: 32766
The order's Comments

Column Name: comments_255
Column Type: varchar
Max Length: 255
The order's Comments (255 character limit)

Column Name: completed_flag
Column Type: varchar
Max Length: 2
Completed flag.

Column Name: consult_practitioner_id

Column Type: varchar
Max Length: 50
Consulting Practitioner ID.

Column Name: consult_practitioner_name
Column Type: varchar
Max Length: 50
Consulting Practitioner Name.

Column Name: consult_team_id
Column Type: varchar
Max Length: 50
Consulting Team ID.

Column Name: consult_team_name
Column Type: varchar
Max Length: 50
Consulting Team Name.

Column Name: created_by
Column Type: varchar
Max Length: 50
Order created by User

Column Name: created_by_option
Column Type: varchar
Max Length: 50
Order created by (option) User

Column Name: created_by_pre_auth_code
Column Type: varchar
Max Length: 50
Order created by via Pre-Authorized Order code

Column Name: created_by_pre_auth_value
Column Type: varchar
Max Length: 50
Order created by via Pre-Authorized Order value

Column Name: created_by_user_id
Column Type: varchar
Max Length: 50
Order created by User ID

Column Name: created_by_user_name
Column Type: varchar
Max Length: 50
Order created by User ID Name

Column Name: created_date

Column Type: date
Order created date

Column Name: created_time
Column Type: varchar
Max Length: 50
Order created time

Column Name: created_time_h
Column Type: time
Order created time

Column Name: current_duration
Column Type: varchar
Max Length: 50
The order's current Duration

Column Name: current_duration_numeric
Column Type: integer
The order's current Duration (numeric data type)

Column Name: current_dur_days
Column Type: varchar
Max Length: 50
The order's current Duration (Days)

Column Name: current_dur_days_numeric
Column Type: integer
The order's current Duration (Days) (numeric data type)

Column Name: current_dur_doses
Column Type: varchar
Max Length: 50
The order's current Duration (Doses)

Column Name: current_dur_doses_numeric
Column Type: integer
The order's current Duration (Doses) (numeric data type)

Column Name: current_dur_hrs
Column Type: varchar
Max Length: 50
The order's current Duration (Hours)

Column Name: current_dur_hrs_numeric
Column Type: integer
The order's current Duration (Hours) (numeric data type)

Column Name: current_dur_mins
Column Type: varchar

Max Length: 50

The order's current Duration (Minutes)

Column Name: current_dur_mins_numeric

Column Type: integer

The order's current Duration (Minutes) (numeric data type)

Column Name: current_stop_date

Column Type: date

The order's current Stop Date

Column Name: current_stop_time

Column Type: varchar

Max Length: 50

The order's current Stop Time

Column Name: current_stop_time_h

Column Type: time

The order's current Stop Time

Column Name: cust_frequency_att_code

Column Type: varchar

Max Length: 50

The order's flag (code) for whether Frequency Code attributes were customized

Column Name: cust_frequency_att_value

Column Type: varchar

Max Length: 50

The order's flag (value) for whether Frequency Code attributes were customized

Column Name: daily_administration_code

Column Type: varchar

Max Length: 50

Does administration of this order occur Daily (code)?

Column Name: daily_administration_value

Column Type: varchar

Max Length: 50

Does administration of this order occur Daily (value)?

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user name that last updated this data row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The user name that last updated this data row.

Column Name: data_entry_date
Column Type: date
The date when this data row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The source that last updated this data row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 15
The time when this data row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user id that last updated this data row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name that last updated this data row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: days_administered_code
Column Type: varchar
Max Length: 50
The days that this order is administered (codes)

Column Name: days_administered_friday
Column Type: varchar
Max Length: 50
Is this order administered on Friday

Column Name: days_administered_monday
Column Type: varchar
Max Length: 50
Is this order administered on Monday?

Column Name: days_administered_saturday
Column Type: varchar
Max Length: 50
Is this order administered on Saturday?

Column Name: days_administered_sunday
Column Type: varchar
Max Length: 50
Is this order administered on Sunday?

Column Name: days_administered_thursday
Column Type: varchar
Max Length: 50
Is this order administered on Thursday?

Column Name: days_administered_tuesday
Column Type: varchar
Max Length: 50
Is this order administered on Tuesday?

Column Name: days_administered_value
Column Type: varchar
Max Length: 1024
The days that this order is administered (values)

Column Name: days_administered_wednesday
Column Type: varchar
Max Length: 50
Is this order administered on Wednesday?

Column Name: delayed_entry_code
Column Type: varchar
Max Length: 50
The order's Delayed Entry code (Create New Order)

Column Name: delayed_entry_value
Column Type: varchar
Max Length: 50
The order's Delayed Entry value (Create New Order)

Column Name: diag_icd10_code
Column Type: varchar
Max Length: 40
The order's ICD10 diagnosis code

Column Name: diag_icd10_value
Column Type: varchar
Max Length: 255
The order's ICD10 diagnosis code value

Column Name: diag_icd9_code
Column Type: varchar
Max Length: 40
The order's ICD9 diagnosis code

Column Name: diag_icd9_value
Column Type: varchar
Max Length: 255
The order's ICD9 diagnosis code value

Column Name: diag_imo_code
Column Type: varchar
Max Length: 255
The order's IMO diagnosis code

Column Name: diag_imo_value
Column Type: varchar
Max Length: 255
The order's IMO diagnosis code value

Column Name: diagnosis_code
Column Type: varchar
Max Length: 40
The order's diagnosis code

Column Name: diagnosis_value
Column Type: varchar
Max Length: 255
the order's diagnosis code value

Column Name: discontinued_by
Column Type: varchar
Max Length: 50
The order was Discontinued By User

Column Name: discontinued_by_opt
Column Type: varchar
Max Length: 50
The order was Discontinued By (option) User

Column Name: discontinued_by_user_id

Column Type: varchar

Max Length: 50

The order was Discontinued By User ID

Column Name: discontinued_by_user_name

Column Type: varchar

Max Length: 50

The order was Discontinued By User ID Name

Column Name: discontinued_date

Column Type: date

The order's Discontinue Date

Column Name: discontinued_time

Column Type: varchar

Max Length: 50

The order's Discontinue Time

Column Name: discontinue_reason_code

Column Type: varchar

Max Length: 1024

The order's Discontinue Reason code

Column Name: discontinue_reason_text

Column Type: varchar

Max Length: 32766

The order's Discontinue Reason Text

Column Name: discontinue_reason_txt255

Column Type: varchar

Max Length: 255

The order's Discontinue Reason Text (255 character limit)

Column Name: discontinue_reason_value

Column Type: varchar

Max Length: 50

The order's Discontinue Reason value

Column Name: dis_delay_ent_code

Column Type: varchar

Max Length: 50

The order's Discontinue Delayed Entry code

Column Name: dis_delay_ent_value

Column Type: varchar

Max Length: 50

The order's Discontinue Delayed Entry value

Column Name: dis_effective_date
Column Type: date
The order's Discontinue Effective Dtae

Column Name: dis_effective_time
Column Type: varchar
Max Length: 50
The order's Discontinue Effective Time

Column Name: dis_ent_src_code
Column Type: varchar
Max Length: 50
The order's Discontinue Order Entry Source code

Column Name: dis_ent_src_value
Column Type: varchar
Max Length: 50
The order's Discontinue Order Entry Source value

Column Name: dispense_as_written_code
Column Type: varchar
Max Length: 50
The order's Dispense As Written code

Column Name: dispense_as_written_value
Column Type: varchar
Max Length: 50
The order's Dispense As Written value

Column Name: dispense_qty_unit_code
Column Type: varchar
Max Length: 50
The order's Dispense Quantity Unit code

Column Name: dispense_qty_unit_value
Column Type: varchar
Max Length: 50
The order's Dispense Quantity Unit value

Column Name: dispense_quantity
Column Type: varchar
Max Length: 50
The order's Dispense Quantity

Column Name: dispense_quantity_numeric
Column Type: numeric
The order's Dispense Quantity (numeric data type)

Column Name: dis_pract_id
Column Type: varchar

Max Length: 50
The order's Discontinue Practitioner ID

Column Name: dis_pract_name
Column Type: varchar
Max Length: 50
The order's Discontinue Practitioner Name

Column Name: dis_pr_not_enr
Column Type: varchar
Max Length: 32000
The order's Discontinue Practitioner Who Is Not Enrolled

Column Name: dis_rd_bk_conf_code
Column Type: varchar
Max Length: 2
The order's Discontinue Read-Back Confirmation code
Discontinue Read-back Confirmation code

Column Name: dis_rd_bk_conf_value
Column Type: varchar
Max Length: 50
The order's Read-Back Confirmation value
Discontinue Read-back Confirmation value

Column Name: dis_review_date
Column Type: date
The order Discontinue Review Date

Column Name: dis_review_time
Column Type: varchar
Max Length: 50
The order's Discontinue Review Time

Column Name: dosage
Column Type: varchar
Max Length: 50
The order's Dosage (Strength of the order's Order Code, if a medication)

Column Name: dosage_form
Column Type: varchar
Max Length: 50
The order's Dosage Form (if a medication)

Column Name: dosage_numeric
Column Type: numeric
The order's Dosage (Strength of the order's Order Code, if a medication) (numeric data type)

Column Name: dosage_unit
Column Type: varchar

Max Length: 1024

The order's Dosage Unit (Strength Unit of the order's Order Code, if a medication)

Column Name: effective_stop_date

Column Type: date

The order's Effective Stop date (the earlier of the order's Stop Date or DC Effective Date)

Column Name: effective_stop_is_dc

Column Type: varchar

Max Length: 1

The order's Effective Stop Date is the order's DC Effective Date

Column Name: effective_stop_time

Column Type: varchar

Max Length: 50

The order's Effective Stop Time (the earlier of the order's Stop Time or Effective DC Time)

Column Name: every_nth_day

Column Type: integer

The order's Every Nth Day value (for order's administered Not Daily according to an interval of days)

Column Name: every_nth_hour

Column Type: integer

The order's Every Nth Hour value (for order's administered Not Daily according to an interval of hours)

Column Name: every_nth_minute

Column Type: integer

The order's Every Nth Minute value (for order's administered Not Daily according to an interval of minutes)

Column Name: expected_days_supply

Column Type: integer

The order's Expected Days Supply or specified Days Supply

Column Name: fill_days_supply

Column Type: integer

The Days Supply actually being filled for the order, for NCPDP claims

Column Name: filler_filled_flag_code

Column Type: varchar

Max Length: 50

The order's Filled by the Filling System code

Column Name: filler_filled_flag_value

Column Type: varchar

Max Length: 50

The order's Filled by the Filling System value

Column Name: filler_order_number

Column Type: varchar

Max Length: 50

The order's Filler Order Number (supplied by the filling system)

Column Name: filler_order_number_on_dc

Column Type: varchar

Max Length: 50

The order's filler order number if rejected by the filling system

Column Name: fill_quantity

Column Type: integer

The order's Fill Quantity, for NCPDP claims

Column Name: first_dose_code

Column Type: varchar

Max Length: 50

The order's First Dose code (Does this order represent a first dose of this medication for the client at this facility)

Column Name: first_dose_value

Column Type: varchar

Max Length: 50

The order's First Dose value (Does this order represent a first dose of this medication for the client at this facility)

Column Name: frequency_description

Column Type: varchar

Max Length: 50

The order's Frequency Code description

Column Name: fulfillment_status_code

Column Type: varchar

Max Length: 50

Fulfillment Status Code.

Column Name: fulfillment_status_value

Column Type: varchar

Max Length: 50

Fulfillment Status Value.

Column Name: give_init_dose_now_code

Column Type: varchar

Max Length: 50

The order's Give Initial Dose Now code

Column Name: give_init_dose_now_value

Column Type: varchar

Max Length: 50

The order's Give Initial Dose Now value

Column Name: icd_9_description

Column Type: varchar

Max Length: 32000
The order's ICD9 diagnosis code description
v2011010

Column Name: infuse_amount
Column Type: varchar
Max Length: 50
The order's Infuse Amount

Column Name: infuse_ovr_time
Column Type: varchar
Max Length: 50
The order's Infuse Over Time

Column Name: infuse_ovr_time_unit_code
Column Type: varchar
Max Length: 50
The order's Infuse Over Time Unit code

Column Name: infuse_ovr_time_unit_val
Column Type: varchar
Max Length: 50
The order's Infuse Over Time Unit value

Column Name: last_action_date
Column Type: date
The order's Last Action Date

Column Name: last_action_taken_code
Column Type: varchar
Max Length: 50
The order's Last Action Taken code

Column Name: last_action_taken_value
Column Type: varchar
Max Length: 50
The order's Last Action Taken value

Column Name: last_action_val_code
Column Type: varchar
Max Length: 50
The order's Last Action Validated code
Last action Validated code

Column Name: last_action_val_value
Column Type: varchar
Max Length: 50
The order's Last Action Validated value
Last action Validated value

Column Name: last_billed_date

Column Type: date

The order's Last Billed Date

Column Name: last_post_service_date

Column Type: date

The order's last Billing Post Service Date

Column Name: last_renew_by

Column Type: varchar

Max Length: 50

The order's Last Renewed By User

Column Name: last_renew_by_option

Column Type: varchar

Max Length: 50

The order's Last Renewed By (option) User

Column Name: last_renew_by_user_id

Column Type: varchar

Max Length: 50

The order's Last Renewed By User ID

Column Name: last_renew_by_user_name

Column Type: varchar

Max Length: 50

The order's Last Renewed By User ID Name

Column Name: last_renew_date

Column Type: date

The order's Last Renew Date

Column Name: last_renew_delay_ent_code

Column Type: varchar

Max Length: 50

The order's Last Renew Delayed Entry code

Column Name: last_renew_delay_ent_value

Column Type: varchar

Max Length: 50

The order's Last Renew Delayed Entry value

Column Name: last_renew_eff_date

Column Type: date

The order's Last Renew Effective Date

Column Name: last_renew_eff_time

Column Type: varchar

Max Length: 50

The order's Last Renew Effective Time

Column Name: last_renew_ent_src_code
Column Type: varchar
Max Length: 50
The order's Last Renew Order Entry Source code

Column Name: last_renew_ent_src_value
Column Type: varchar
Max Length: 50
The order's Last Renew Order Entry Source value

Column Name: last_renew_num_days
Column Type: varchar
Max Length: 50
The order's Last Renew For Number of Days

Column Name: last_renew_num_doses
Column Type: varchar
Max Length: 50
The order's Last Renew for Number of Doses

Column Name: last_renew_num_hrs
Column Type: varchar
Max Length: 50
The order's Last Renew For Number of Hours

Column Name: last_renew_num_mins
Column Type: varchar
Max Length: 50
The order's Last Renew for Number of Minutes

Column Name: last_renew_pract_id
Column Type: varchar
Max Length: 50
The order's Last Renew Practitioner ID

Column Name: last_renew_pract_name
Column Type: varchar
Max Length: 50
The order's Last Renew Practitioner Name

Column Name: last_renew_pr_nt_enr
Column Type: varchar
Max Length: 50
The order's Last Renew Practitioner Who Is Not Enrolled

Column Name: last_renew_protocol_code
Column Type: varchar
Max Length: 50
Last Renew Protocol code.

Column Name: last_renew_protocol_text
Column Type: varchar
Max Length: 50
Last Renew Protocol text.

Column Name: last_renew_protocol_value
Column Type: varchar
Max Length: 50
Last Renew Protocol value.

Column Name: last_renew_reason_code
Column Type: varchar
Max Length: 50
The order's Last Renew Reason code

Column Name: last_renew_reason_text
Column Type: varchar
Max Length: 32766
The order's Last Renew Reason Text

Column Name: last_renew_reason_txt255
Column Type: varchar
Max Length: 255
The order's Last Renew Reason Text (255 character limit)

Column Name: last_renew_reason_value
Column Type: varchar
Max Length: 50
The order's Last Renew Reason value

Column Name: last_renew_review_dt
Column Type: date
The order's Last Renew Review Date

Column Name: last_renew_rev_time
Column Type: varchar
Max Length: 50
The order's Last Renew Review Time

Column Name: last_renew_stop_date
Column Type: date
The order's Last Renew Stop Date

Column Name: last_renew_stop_time
Column Type: varchar
Max Length: 50
The order's Last Renew Stop Time

Column Name: last_renew_time

Column Type: varchar
Max Length: 50
The order's Last Renew Time
- v23

Column Name: last_renw_rd_bk_conf_code
Column Type: varchar
Max Length: 2
The order's Last Renew Read-Back Confirmation code
Renew Read-back Confirmation code

Column Name: last_renw_rd_bk_conf_value
Column Type: varchar
Max Length: 50
The order's Last Renew Read-Back Confirmation value
Renew Read-back Confirmation value

Column Name: last_update_data_entry_by
Column Type: varchar
Max Length: 50
The order's last update data entry by User

Column Name: last_update_data_entry_by_option
Column Type: varchar
Max Length: 50
The order's last update data entry by (option) User

Column Name: last_update_data_entry_date
Column Type: date
The order's last update data entry date

Column Name: last_update_data_entry_time
Column Type: varchar
Max Length: 50
The order's last update data entry time

Column Name: last_upd_data_entry_src
Column Type: varchar
Max Length: 255
The order's last update data entry source

Column Name: last_upd_data_entry_usrid
Column Type: varchar
Max Length: 50
The order's last update data entry User Id

Column Name: last_upd_data_entry_usnm
Column Type: varchar
Max Length: 50
The order's last update data entry User ID Name

Column Name: last_used_fill_number
Column Type: integer
The order's last used fill number, for NCPDP claims

Column Name: latest_hold_by_user_id
Column Type: varchar
Max Length: 50
The order's latest Hold data entry by User ID

Column Name: latest_hold_by_user_name
Column Type: varchar
Max Length: 50
The order's latest Hold data entry by User ID Name

Column Name: latest_hold_eff_date
Column Type: date
The order's latest Hold Effective Date
Lastest Hold Order Effective Date

Column Name: latest_hold_eff_time
Column Type: varchar
Max Length: 50
The order's latest Hold Effecive Time
Latest Hold Order Effective Time

Column Name: latest_hold_entry_by
Column Type: varchar
Max Length: 50
The order's latest data entry by User

Column Name: latest_hold_entry_byopt
Column Type: varchar
Max Length: 50
The order's latest Hold data entry by (option) User

Column Name: latest_hold_entry_date
Column Type: date
The order's latest Hold entry date

Column Name: latest_hold_entry_source
Column Type: varchar
Max Length: 255
The order's latest Hold entry source

Column Name: latest_hold_entry_time
Column Type: varchar
Max Length: 50
The order's latest Hold entry time

Column Name: latest_hold_pract_id
Column Type: varchar
Max Length: 50
The order's latest Hold Practitioner ID
Latest Hold Order Reviewing Practitioner

Column Name: latest_hold_pract_name
Column Type: varchar
Max Length: 50
The order's latest Hold Practitioner Name
Latest Hold Order Reviewing Practitioner Name

Column Name: latest_hold_pr_not_enr
Column Type: varchar
Max Length: 50
The order's latest Hold Practitioner Who Is Not Enrolled
Latest Hold Order Practitioner Who Is Not Enrolled

Column Name: latest_hold_rd_bk_conf_code
Column Type: varchar
Max Length: 2
The order's latest Hold Read-Back Confirmation code
Hold Read-back Confirmation code

Column Name: latest_hold_rd_bk_conf_value
Column Type: varchar
Max Length: 50
The order's latest Hold Read-Back Confirmation value
Hold Read-back Confirmation value

Column Name: latest_hold_reason_code
Column Type: varchar
Max Length: 50
The order's latest Hold Reason code
Latest Hold Order Reason Code

Column Name: latest_hold_reason_text
Column Type: varchar
Max Length: 32766
The order's latest Hold Reason Text
Latest Hold Order Reason Text

Column Name: latest_hold_reason_value
Column Type: varchar
Max Length: 50
The order's latest Hold reason value
Latest Hold Order Reason Code Value

Column Name: latest_hold_reas_txt255
Column Type: varchar

Max Length: 255
The order's latest Hold Reason Text (255 character limit)
Latest Hold Order Reason Text

Column Name: latest_hold_review_date
Column Type: date
The order's latest Hold Review Date
Latest Hold Order Review Date

Column Name: latest_hold_review_time
Column Type: varchar
Max Length: 50
The order's latest Hold Review Time
Latest Hold Order Review Time

Column Name: latest_resm_rd_bk_conf_code
Column Type: varchar
Max Length: 2
The order's latest Resume Read-Back Confirmation code
Resume Read-back Confirmation code

Column Name: latest_resm_rd_bk_conf_value
Column Type: varchar
Max Length: 50
The order's latest Resume Read-Back Confirmation value
Resume Read-back Confirmation value

Column Name: latest_resume_by_user_id
Column Type: varchar
Max Length: 50
The order's latest Resume data entry by User ID

Column Name: latest_resume_by_username
Column Type: varchar
Max Length: 50
The order's latest Resume data entry by User ID Name

Column Name: latest_resume_eff_date
Column Type: date
The order's latest Resume Effective Date
Lastest Resume Order Effective Date

Column Name: latest_resume_eff_time
Column Type: varchar
Max Length: 50
The order's latest Resume Effective Time
Latest Resume Order Effective Time

Column Name: latest_resume_entry_by
Column Type: varchar

Max Length: 50
The order's latest Resume data entry by User

Column Name: latest_resume_entry_byopt
Column Type: varchar
Max Length: 50
The order's latest Resume data entry by (option) User

Column Name: latest_resume_entry_date
Column Type: date
The order's latest Resume data entry date

Column Name: latest_resume_entry_src
Column Type: varchar
Max Length: 255
The order's latest Resume entry source

Column Name: latest_resume_entry_time
Column Type: varchar
Max Length: 50
The order's latest Resume data entry time

Column Name: latest_resume_pract_id
Column Type: varchar
Max Length: 50
The order's latest Resume Practitioner ID
Latest Resume Order Reviewing Practitioner

Column Name: latest_resume_pract_name
Column Type: varchar
Max Length: 50
The order's latest Resume Practitioner Name
Latest Resume Order Reviewing Practitioner Name

Column Name: latest_resume_pr_not_enr
Column Type: varchar
Max Length: 50
The order's latest Resume Practitioner Who Is Not Enrolled
Latest Resume Order Practitioner Who Is Not Enrolled

Column Name: latest_resume_reason_code
Column Type: varchar
Max Length: 50
The order's latest Resume Reason code
Latest Resume Order Reason Code

Column Name: latest_resume_reason_text
Column Type: varchar
Max Length: 32766
The order's latest Resume Reason Text

Latest Resume Order Reason Text

Column Name: latest_resume_reas_txt255

Column Type: varchar

Max Length: 255

The order's latest Resume Reason Text (255 character limit)

Latest Resume Order Reason Text

Column Name: latest_resume_reason_value

Column Type: varchar

Max Length: 50

The order's latest Resume Reason value

Latest Resume Order Reason Code Value

Column Name: latest_resume_review_date

Column Type: date

The order's latest Resume Review Date

Latest Resume Order Review Date

Column Name: latest_resume_review_time

Column Type: varchar

Max Length: 50

The order's latest Resume Review Time

Latest Resume Order Review Time

Column Name: make_orders_open_end_code

Column Type: varchar

Max Length: 50

The order's Make Order Open-Ended code

Column Name: make_orders_open_end_value

Column Type: varchar

Max Length: 50

The order's Make Order Open-Ended value

Column Name: med_category_code

Column Type: varchar

Max Length: 255

The order's Medication Category code (from the order's Order Code, for medications)

Column Name: med_category_value_long

Column Type: varchar

Max Length: 4096

The order's Medication Category value (long) (from the order's Order Code, for medications)

Column Name: med_category_value_short

Column Type: varchar

Max Length: 255

The order's Medication Category value (short) (from the order's Order Code, for medications)

Column Name: non_formulary_override
Column Type: varchar
Max Length: 80
The order's Non-Formulary Override text
Non-formulary Pharmacy Order Warning Override Text

Column Name: non_formulary_ovrd_code
Column Type: varchar
Max Length: 50
The order's Non-formulary Override code
Non-formulary override code (dictionary-based)

Column Name: non_formulary_ovrd_value
Column Type: varchar
Max Length: 50
The order's Non-formulary Override value
Non-formulary override code value (from dictionary)

Column Name: now_and_then_first
Column Type: varchar
Max Length: 50
Give Now First Order Number

Column Name: now_and_then_ongoing
Column Type: varchar
Max Length: 50
Give Now Ongoing Order Number

Column Name: now_and_then_second
Column Type: varchar
Max Length: 50
Give Now Second Order Number

Column Name: now_and_then_type
Column Type: varchar
Max Length: 50
Give Now Order Type

Column Name: number_of_refills
Column Type: varchar
Max Length: 50
The order's Number of Refill Allowed

Column Name: number_of_refills_numeric
Column Type: integer
The order's Number of Refill Allowed (numeric data type)

Column Name: oc_action
Column Type: varchar
Max Length: 50

The order's OrderConnect action (when integrated with Order Connect for OTE external pharmacy mode)

Column Name: oc_assoc_order_history_id

Column Type: varchar

Max Length: 50

The order's OrderConnect associated OrderHistoryID (when integrated with Order Connect for OTE external pharmacy mode)

Column Name: oc_assoc_rx_id

Column Type: varchar

Max Length: 50

The order's OrderConnect associated RxID (when integrated with Order Connect for OTE external pharmacy mode)

Column Name: oc_calc_total_rx_duration

Column Type: integer

The order's OrderConnect calculated total prescriptoin duration (when integrated with Order Connect for OTE external pharmacy mode)

Column Name: oc_dc_pendingapprove_info

Column Type: varchar

Max Length: 50

The order's OrderConnect DC Pending Approval information (when integrated with Order Connect for OTE external pharmacy mode)

Column Name: oc_earliest_fill_date

Column Type: date

The order's OrderConnect Earliest Fill Date (when integrated with Order Connect for OTE external pharmacy mode)

Column Name: oc_note_to_pharmacy

Column Type: varchar

Max Length: 255

The order's OrderConnect Note to Pharmacist (when integrated with Order Connect for OTE external pharmacy mode)

Column Name: oe_source_val_ovr

Column Type: varchar

Max Length: 50

The 'Order Requires Validation Override' extended attribute of the Order Entry Source

Column Name: one_time_only_code

Column Type: varchar

Max Length: 50

The order's One-time-Only code

Column Name: one_time_only_value

Column Type: varchar

Max Length: 50

The order's One-Time-Only value

Column Name: ord_disc_protocol_code
Column Type: varchar
Max Length: 50
Order Discontinue Protocol code.

Column Name: ord_disc_protocol_text
Column Type: varchar
Max Length: 50
Order Discontinue Protocol code.

Column Name: ord_disc_protocol_value
Column Type: varchar
Max Length: 50
Order Discontinue Protocol value.

Column Name: order_category_code
Column Type: varchar
Max Length: 50
The order's Order Category code (Leave, Discharge, History-Only, Other)

Column Name: order_category_value
Column Type: varchar
Max Length: 50
The order's Order Category value (Leave, Discharge, History-Only, Other)

Column Name: order_changed_code
Column Type: varchar
Max Length: 50
The order's Order Changed code

Column Name: order_changed_value
Column Type: varchar
Max Length: 50
The order's Order Changed value

Column Name: order_date
Column Type: date
The order's Order Date

Column Name: order_dc_via_modify_x
Column Type: varchar
Max Length: 50
The order was DC'd via a Modify flag

Column Name: order_description
Column Type: varchar
Max Length: 100
The order's Order Code Description

Column Name: order_entry_source_code
Column Type: varchar
Max Length: 50
The order's Order Entry Source code (Create New Order)

Column Name: order_entry_source_value
Column Type: varchar
Max Length: 50
The order's Order Entry Source value (Create New Order)

Column Name: order_guidelines
Column Type: varchar
Max Length: 32766
The order's Order Guidelines (from the order's Order Code)
Order Guidelines (previously call Dosage / Lab Test Guidelines)

Column Name: order_guidelines_255
Column Type: varchar
Max Length: 255
The order's Order Guidelines (from the order's Order Code) (255 character limit)
Order Guidelines (previously called Dosage / Lab Test Guidelines)

Column Name: ordering_prac_npi
Column Type: varchar
Max Length: 100
The NPI Number defined for the Ordering Practitioner

Column Name: ordering_pract_id
Column Type: varchar
Max Length: 50
The order's Ordering Practitioner ID

Column Name: ordering_pract_name
Column Type: varchar
Max Length: 50
The order's Ordering Practitioner Name

Column Name: ordering_pr_not_enr
Column Type: varchar
Max Length: 50
The order's Ordering Practitioner Who Is Not Enrolled

Column Name: order_status_code
Column Type: varchar
Max Length: 50
The order's Order Status code

Column Name: order_status_value
Column Type: varchar
Max Length: 50

The order's Order Status value

Column Name: order_text

Column Type: varchar

Max Length: 32766

The order's Order Text

Column Name: order_text_255

Column Type: varchar

Max Length: 255

The order's Order Text (255 character limit)

Column Name: order_time

Column Type: varchar

Max Length: 50

The order's Order Time

Column Name: order_type_category_code

Column Type: varchar

Max Length: 10

The order's Order Type Category code

Column Name: order_type_category_value

Column Type: varchar

Max Length: 50

The order's Order Type Category value

Column Name: order_type_code

Column Type: varchar

Max Length: 50

The order's Order Type code

Column Name: order_type_value

Column Type: varchar

Max Length: 50

The order's Order Type value

Column Name: order_unique_id

Column Type: varchar

Max Length: 50

The order's Order Number

Column Name: ordnum_dcd_during_modify

Column Type: varchar

Max Length: 50

The Order Number that was DC'd during the Modify action that created this order

Column Name: ord_val_protocol_code

Column Type: varchar

Max Length: 50

Order Validate Protocol code.

Column Name: ord_val_protocol_text

Column Type: varchar

Max Length: 50

Order Validate Protocol code.

Column Name: ord_val_protocol_value

Column Type: varchar

Max Length: 50

Order Validate Protocol value.

Column Name: orig_dur_doses_numeric

Column Type: integer

The order's original Duration (Doses) (numeric data type)

Column Name: original_duration

Column Type: varchar

Max Length: 50

The order's original Duration

Column Name: original_dur_days

Column Type: varchar

Max Length: 50

The order's original Duration (Days)

Column Name: original_dur_days_numeric

Column Type: integer

The order's original Duration (Days) (numeric data type)

Column Name: original_dur_doses

Column Type: varchar

Max Length: 50

The order's original Duration (Doses)

Column Name: original_dur_hrs

Column Type: varchar

Max Length: 50

The order's original Duration (Hours)

Column Name: original_dur_hrs_numeric

Column Type: integer

The order's original Duration (Hooours) (numeric data type)

Column Name: original_dur_mins

Column Type: varchar

Max Length: 50

The order's original Duration (Minutes)

Column Name: original_dur_mins_numeric

Column Type: integer
The order's original Duration (Minutes) (numeric data type)

Column Name: original_stop_date
Column Type: date
The order's original Stop Date

Column Name: original_stop_time
Column Type: varchar
Max Length: 50
The order's original Stop Time

Column Name: pm_0600_1130pm_code
Column Type: varchar
Max Length: 50
The order's specified Hours of Administration codes between 6:00 PM and 11:30 PM

Column Name: pm_0600_1130pm_value
Column Type: varchar
Max Length: 75
The order's specified Hours of Administration values between 6:00 PM and 11:30 PM

Column Name: pm_noon_0530pm_code
Column Type: varchar
Max Length: 50
The order's specified Hours of Administration codes between 12:00 PM (Noon) and 5:30 PM

Column Name: pm_noon_0530pm_value
Column Type: varchar
Max Length: 75
The order's specified Hours of Administration values between 12:00 PM (Noon) and 5:30 PM

Column Name: pre_auth_link
Column Type: varchar
Max Length: 50
The order's link to a Pre-Authorized order

Column Name: problems_code
Column Type: varchar
Max Length: 4096
The order's Associated Problems codes

Column Name: problems_value
Column Type: varchar
Max Length: 4096
The order's Associated Problems values

Column Name: protocol_code
Column Type: varchar
Max Length: 50

Protocol code.

Column Name: protocol_text

Column Type: varchar

Max Length: 50

Protocol text.

Column Name: protocol_value

Column Type: varchar

Max Length: 50

Protocol value.

Column Name: quantity

Column Type: varchar

Max Length: 50

The order's Quantity / Dose per administration

Column Name: quantity_numeric

Column Type: numeric

The order's Quantity / Dose per administration (numeric data type)

Column Name: quantity_unit

Column Type: varchar

Max Length: 50

The order's Quantity / Dose per administration Unit

Column Name: rate_amount

Column Type: varchar

Max Length: 50

The order's Rate Amount (IV orders only)

Column Name: rate_unit_code

Column Type: varchar

Max Length: 50

The order's Rate Unit code (IV orders only)

Column Name: rate_unit_value

Column Type: varchar

Max Length: 50

The order's Rate Unit value (IV ordders only)

Column Name: read_back_confirm_code

Column Type: varchar

Max Length: 2

The order's Read-Back Confirmation code (Create New Order)

Read-back Confirmation code

Column Name: read_back_confirm_value

Column Type: varchar

Max Length: 50

The order's Read-Back Confirmation value (Create New Order)
Read-back Confirmation value

Column Name: reason_code
Column Type: varchar
Max Length: 32000
The order's Reason Code

Column Name: reason_text
Column Type: varchar
Max Length: 32766
The order's Reason Text

Column Name: reason_text_255
Column Type: varchar
Max Length: 255
The order's Reason Text (255 character limit)

Column Name: reason_value
Column Type: varchar
Max Length: 32000
The order's Reason value

Column Name: reordered_order_number
Column Type: varchar
Max Length: 50
If reordered, the Order Number of the subsequent order

Column Name: reorder_of_order_number
Column Type: varchar
Max Length: 50
If created via a Reorder, the Order Number of the previous order that was Reordered

Column Name: reschd_1st_dose_date
Column Type: date
Rescheduled first dose date.

Column Name: reschd_1st_dose_time
Column Type: varchar
Max Length: 10
Rescheduled first dose time.

Column Name: reschd_2nd_dose_date
Column Type: date
Rescheduled second dose date.

Column Name: reschd_2nd_dose_skip_code
Column Type: varchar
Max Length: 10
Skip second dose code.

Column Name: reschd_2nd_dose_skip_val
Column Type: varchar
Max Length: 20
Skip second dose value.

Column Name: reschd_2nd_dose_time
Column Type: varchar
Max Length: 10
Rescheduled second dose time.

Column Name: results_status_code
Column Type: varchar
Max Length: 20
The order's Results Status code

Column Name: results_status_date
Column Type: date
The order's Results Status date

Column Name: results_status_time
Column Type: varchar
Max Length: 10
The order's Results Status time

Column Name: results_status_value
Column Type: varchar
Max Length: 200
The order's Results Status value

Column Name: routine_or_prn_code
Column Type: varchar
Max Length: 50
The order's Routine / PRN / STAT / Other code

Column Name: routine_or_prn_value
Column Type: varchar
Max Length: 50
The order's Routine / PRN / STAT / Other value

Column Name: self_administered_code
Column Type: varchar
Max Length: 50
The order's Self-Administered code

Column Name: self_administered_value
Column Type: varchar
Max Length: 50
The order's Self-Administered value

Column Name: special_instructions
Column Type: varchar
Max Length: 32766
The order's Special/Additional Instructions

Column Name: special_instructions_255
Column Type: varchar
Max Length: 255
The order's Special/Additional Instructions (255 character limit)

Column Name: start_date
Column Type: date
The order's Start Date

Column Name: start_time
Column Type: varchar
Max Length: 50
The order's Start Time

Column Name: start_time_h
Column Type: time
The order's Start Time

Column Name: times_24_hour
Column Type: varchar
Max Length: 50
The order's Times / 24 Hours value

Column Name: times_24_hour_numeric
Column Type: integer
The order's Times / 24 Hours value (numeric data type)

Column Name: treatment_setting_code
Column Type: varchar
Max Length: 50
The Treatment Setting code of the client Episode for the order

Column Name: treatment_setting_value
Column Type: varchar
Max Length: 50
The Treatment Setting value of the client Episode for the order

Column Name: unique_session_id_create
Column Type: varchar
Max Length: 255
The Unique Session ID from when the order was created
Unique Session ID associated with Create New Order action

Column Name: unique_session_id_latest
Column Type: varchar

Max Length: 255
The Unique Session ID from when the order was last updated
Unique Session ID associated with latest action

Column Name: unit_dose
Column Type: varchar
Max Length: 50
Unit Dose value from fill details

Column Name: user_row_access_code
Column Type: integer
If sub system codes are enabled this will be either a 0, 1, or 2. 0 for no access, 1 for access to row and user that is logged into the same sub-system code, and 2 for access to row and user that is logged into different sub-system code.

Column Name: uses_ssi_instructions
Column Type: varchar
Max Length: 1
Y/N flag indicating whether the order uses Sliding Scale Insulin instructions

Column Name: validated_by
Column Type: varchar
Max Length: 50
The order's Validated By User

Column Name: validated_by_option
Column Type: varchar
Max Length: 50
The order's Validate data entry by (option) User

Column Name: validated_by_user_id
Column Type: varchar
Max Length: 50
The order's Validate data entry by User Id

Column Name: validated_by_user_name
Column Type: varchar
Max Length: 50
The order's Validate data entry by User ID Name

Column Name: validated_date
Column Type: date
The order's Validate date entry date

Column Name: validate_delay_ent_code
Column Type: varchar
Max Length: 50
The order's Validate Delayed Entry code

Column Name: validate_delay_ent_value

Column Type: varchar
Max Length: 50
The order's Validate Delayed Entry value

Column Name: validated_time
Column Type: varchar
Max Length: 50
The order's Validate data entry time

Column Name: validate_ent_src_code
Column Type: varchar
Max Length: 50
The order's Validate Order Entry Source code

Column Name: validate_ent_src_value
Column Type: varchar
Max Length: 50
The order's Validate Order Entry Source value

Column Name: validate_pract_id
Column Type: varchar
Max Length: 50
The order's Validate Practitioner ID

Column Name: validate_pract_name
Column Type: varchar
Max Length: 50
The order's Validate Practitioner Name

Column Name: validate_pr_not_enr
Column Type: varchar
Max Length: 50
The order's Validate Practitioner Who Is Not Enrolled

Column Name: validate_reason_code
Column Type: varchar
Max Length: 50
The order's Validate Reason code

Column Name: validate_reason_text
Column Type: varchar
Max Length: 32766
The order's Validate Reason Text

Column Name: validate_reason_txt255
Column Type: varchar
Max Length: 255
The order's Validate Reason Text (255 character limit)

Column Name: validate_reason_value

Column Type: varchar
Max Length: 50
The order's Validate Reason value

Column Name: validate_review_date
Column Type: date
The order's Validate Review Date

Column Name: validate_review_time
Column Type: varchar
Max Length: 50
The order's Validate Review Time

Column Name: v_dosage_lab_test
Column Type: varchar
Max Length: 32766
The order's Order Guidelines (from the order's Order Code)

Column Name: v_dosage_lab_test_255
Column Type: varchar
Max Length: 255
The order's Order Guidelines (from the order's Order Code) (255 character limit)

Documentation for form: Client_Profile/_Physicians_Orders

Table Name: OrderEntry.history_client_order_lab

Table Description: External Laboratory Order details

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer
System code.

Column Name: ORDuniqueid
Column Type: varchar
Max Length: 50
Order unique ID.

Column Name: PATID
Column Type: varchar
Max Length: 20
Patient ID.

Column Name: abn_image
Column Type: longvarbinary
Max Length: 2147483647
ABN Image

Column Name: abn_required
Column Type: integer
Flags a lab order has having an ABN attached.

Column Name: communication_method
Column Type: varchar
Max Length: 50
Communication Method

Column Name: last_activity
Column Type: varchar
Max Length: 100
Last Activity message

Column Name: specimen_collect_code
Column Type: varchar
Max Length: 50
Specimen Collection code.

Column Name: specimen_collect_value
Column Type: varchar
Max Length: 50
Specimen Collection Value

Column Name: specimen_site
Column Type: varchar
Max Length: 50
Specimen Site ; av - 60128

Column Name: specimen_type_code
Column Type: varchar
Max Length: 50
Specimen Type Code

Column Name: specimen_type_value
Column Type: varchar
Max Length: 50
Specimen Type value

Column Name: vendor_name
Column Type: varchar
Max Length: 50
Vendor name associated with laboratory order.

Documentation for form: Client_Profile/_/_Physicians_Orders

Table Name: OrderEntry.history_client_order_renew

Table Description: This table contains one row for every client order renewal in Avatar OE.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: EPISODENUMBER
Column Type: integer
The client episode for the order that was renewed.

Column Name: FACILITY
Column Type: integer
The FACILITY (Root System Code) in which the data was stored

Column Name: PATID
Column Type: varchar
Max Length: 20
The Client ID for whom this order was created

Column Name: RNWuniqueid
Column Type: varchar
Max Length: 50
The renewal's RNW unique ID within the client's renewals

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user name that last updated this data row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated this data row.

Column Name: data_entry_date
Column Type: date
The date when this data row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time when this data row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The user id that last updated this data row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
The user name that last updated this data row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: effective_date
Column Type: date
Effective date of the renewal.

Column Name: effective_time
Column Type: varchar
Max Length: 50
Effective time of the renewal.

Column Name: link_to_order_hist
Column Type: varchar
Max Length: 50

Link to the ORD unique ID in OrderEntry.history_client_order.

Column Name: number_of_days
Column Type: varchar
Max Length: 50
Number of days renewed.

Column Name: number_of_doses
Column Type: varchar
Max Length: 50
Number of doses renewed.

Column Name: number_of_hours
Column Type: varchar
Max Length: 50
Number of hours renewed.

Column Name: number_of_minutes
Column Type: varchar
Max Length: 50
Number of minutes renewed.

Column Name: oe_source_val_ovr
Column Type: varchar
Max Length: 50
The 'Order Requires Validation Override' extended attribute of the Order Entry Source".

Column Name: open_ended_code
Column Type: varchar
Max Length: 50
Whether the renewal is open ended (code).

Column Name: open_ended_value
Column Type: varchar
Max Length: 50
Whether the renewal is open ended (value).

Column Name: order_entry_source_code
Column Type: varchar
Max Length: 50
Order Entry Source code

Column Name: order_entry_source_value
Column Type: varchar
Max Length: 50
Order Entry Source value

Column Name: practitioner
Column Type: varchar
Max Length: 50

Practitioner ID.

Column Name: practitioner_name
Column Type: varchar
Max Length: 50
Practitioner name.

Column Name: pract_not_enrolled
Column Type: varchar
Max Length: 50
Practitioner not enrolled.

Column Name: protocol_code
Column Type: varchar
Max Length: 50
'Renew Protocol' code.

Column Name: protocol_text
Column Type: varchar
Max Length: 50
'Renew Protocol Text'.

Column Name: protocol_value
Column Type: varchar
Max Length: 50
'Renew Protocol' value.

Column Name: renew_rd_bk_conf_code
Column Type: varchar
Max Length: 2
Renew Read-back Confirmation code.

Column Name: renew_rd_bk_conf_value
Column Type: varchar
Max Length: 50
Renew Read-back Confirmation value.

Column Name: renew_reason_code
Column Type: varchar
Max Length: 50
Renewal reason (code).

Column Name: renew_reason_text
Column Type: varchar
Max Length: 32766
Renew reason text (full).

Column Name: renew_reason_txt255
Column Type: varchar
Max Length: 255

Renewal reason text (max length 255 characters).

Column Name: renew_reason_value
Column Type: varchar
Max Length: 50
Renewal reason (value).

Column Name: review_date
Column Type: date
Review date.

Column Name: review_time
Column Type: varchar
Max Length: 50
Review time.

Column Name: stop_date_prior_to_renew
Column Type: date
Order stop date prior to renewal.

Column Name: stop_time_prior_to_renew
Column Type: varchar
Max Length: 50
Order stop time prior to renewal.

Documentation for form: Client_Profile/_Physicians_Orders

Table Name: OrderEntry.history_log_warn_clinical

Table Description: Clinical Alert warning override information.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: CAWuniqueid
Column Type: varchar
Max Length: 50
Unique identifier for override record.

Column Name: EPISODE_NUMBER
Column Type: integer
Episode number associated with override record.

Column Name: FACILITY
Column Type: integer

The system code in which the data was stored.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the override record.

Column Name: alert_message

Column Type: varchar

Max Length: 32000

The warning message that was presented to the user.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 50

The user name that last updated the row.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The source that the order was filed from.

Column Name: data_entry_time

Column Type: varchar

Max Length: 50

The time the row was last updated.

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 50

The 'User ID' who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 50

The 'User Description' of the user which last updated the row.

Column Name: override_code

Column Type: varchar

Max Length: 50

Reason the warning was overridden.

Column Name: override_text
Column Type: varchar
Max Length: 250
Short explanation of why the warning was overridden.

Column Name: override_value
Column Type: varchar
Max Length: 50
Description associated with override reason code.

Column Name: parent_node_for_subs
Column Type: varchar
Max Length: 50
The identifier of the order that this override applies to.

Documentation for form: Client_Profile/_Physicians_Orders

Table Name: OrderEntry.history_log_warn_consent

Table Description: Consent warning override information.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: EPISODE_NUMBER
Column Type: integer
Episode number associated with override record.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: MCWuniqueid
Column Type: varchar
Max Length: 50
Unique identifier for override record.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the override record.

Column Name: alert_message
Column Type: varchar

Max Length: 32000

The warning message that was presented to the user.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 50

The user name that last updated the row.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_source

Column Type: varchar

Max Length: 255

The source that the order was filed from.

Column Name: data_entry_time

Column Type: varchar

Max Length: 50

The time the row was last updated.

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 50

The 'User ID' who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 50

The 'User Description' of the user which last updated the row.

Column Name: override_code

Column Type: varchar

Max Length: 50

Reason the warning was overridden.

Column Name: override_text

Column Type: varchar

Max Length: 250

Short explanation of why the warning was overridden.

Column Name: override_value

Column Type: varchar

Max Length: 50

Description associated with override reason code.

Column Name: parent_node_for_subs

Column Type: varchar

Max Length: 50

The identifier of the order that this override applies to.

Documentation for form: Client_Profile/_Physicians_Orders

Table Name: OrderEntry.history_log_warn_dose

Table Description: Dosage range warning override information.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: DRWuniqueid

Column Type: varchar

Max Length: 50

Unique identifier for override record.

Column Name: EPISODE_NUMBER

Column Type: integer

Episode number associated with override record.

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the override record.

Column Name: alert_message

Column Type: varchar

Max Length: 32000

The warning message that was presented to the user.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the row.

Column Name: data_entry_by_option

Column Type: varchar
Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The source that the order was filed from.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The 'User ID' who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
The 'User Description' of the user which last updated the row.

Column Name: override_code
Column Type: varchar
Max Length: 50
Reason the warning was overridden.

Column Name: override_text
Column Type: varchar
Max Length: 250
Short explanation of why the warning was overridden.

Column Name: override_value
Column Type: varchar
Max Length: 50
Description associated with override reason code.

Column Name: parent_node_for_subs
Column Type: varchar
Max Length: 50
The identifier of the order that this override applies to.

Documentation for form: Client_Profile/_Physicians_Orders

Table Name: OrderEntry.history_log_warn_ing_dup

Table Description: Order Entry Ingredient Duplication warning messages

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: EPISODE_NUMBER
Column Type: integer
Episode number.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: IDWuniqueid
Column Type: varchar
Max Length: 50
Ingredient duplication warning row ID.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
Data entry by User.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
Data entry option ID.

Column Name: data_entry_date
Column Type: date
Data entry date.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar

Max Length: 255
Data entry source.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
Data entry time.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
Data entry by user ID.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
Data entry user name.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: override_code
Column Type: varchar
Max Length: 50
Override code selected during entry of order.

Column Name: override_text
Column Type: varchar
Max Length: 250
Override Notes entered during entry of order.

Column Name: override_value
Column Type: varchar
Max Length: 50
Value associated with override code.

Column Name: parent_node_for_subs
Column Type: varchar
Max Length: 50
Link to OrderEntry.history_client_order table.

Column Name: screening_message
Column Type: varchar
Max Length: 500
Warning message.

Documentation for form: Client_Profile/_Physicians_Orders

Table Name: OrderEntry.history_log_warn_ther_dup

Table Description: Order Entry Therapeutic Duplication warning messages

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: EPISODE_NUMBER
Column Type: integer
Episode number.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: TDWuniqueid
Column Type: varchar
Max Length: 50
Therapeutic duplication warning row ID.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
Data entry by User.

Column Name: data_entry_by_option
Column Type: varchar

Max Length: 50
Data entry option ID.

Column Name: data_entry_date
Column Type: date
Data entry date.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
Data entry source.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
Data entry time.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
Data entry by user ID.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
Data entry user name.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: override_code

Column Type: varchar
Max Length: 50
Override code selected during entry of order.

Column Name: override_text
Column Type: varchar
Max Length: 250
Override Notes entered during entry of order.

Column Name: override_value
Column Type: varchar
Max Length: 50
Value associated with override code.

Column Name: parent_node_for_subs
Column Type: varchar
Max Length: 50

Max Length: 500
Warning message.

Documentation for form: Client_Profile/_/_Physicians_Orders

Table Name: OrderEntry.history_order_alert

Table Description: Order Entry Screening warning messages

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: EPISODE_NUMBER
Column Type: integer
Episode number.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: ORDuniqueid
Column Type: varchar
Max Length: 50
Order row ID.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: alert_message
Column Type: varchar
Max Length: 32000
Alert message.

Column Name: alert_type
Column Type: varchar
Max Length: 50
Alert type.

Column Name: alert_unique_id
Column Type: varchar
Max Length: 50
Alert row ID.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
Data entry by User.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
Data entry option ID.

Column Name: data_entry_date
Column Type: date
Data entry date.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
Data entry time.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar

Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
Data entry by user ID.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
Data entry user name.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: override_code
Column Type: varchar
Max Length: 32000
Override code selected during entry of order.

Column Name: override_text
Column Type: varchar
Max Length: 32000
Override Notes entered during entry of order.

Column Name: override_value
Column Type: varchar
Max Length: 50
Value associated with override code.

Column Name: warning_clinical_effect
Column Type: varchar
Max Length: 150
Warning clinical effect.

Column Name: warning_severity_level
Column Type: varchar
Max Length: 50
Warning severity level.

Documentation for form: Client_Profile/_Physicians_Orders

Table Name: OrderEntry.order_mesg_status

Table Description: Order message transmission (via CareFabric interface) status.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer
System code.

Column Name: event_date_time
Column Type: timestamp
The date and time that the order-related event (such as new or discontinue order or a specimen collection) occurred in the system.

Column Name: event_message_id
Column Type: varchar
Max Length: 50
A unique message identifier for that placer order number and order-related event.

Column Name: event_message_type
Column Type: varchar
Max Length: 50
The Order Control Code associated to the order message the was generated from the event (Ex: 'NW' (New), 'CA' (Cancel), 'SC' (Status change such as collection).

Column Name: placer_number
Column Type: varchar
Max Length: 50
The order number assigned to the order message at the time it was send out of Avatar. It could be the OE order number, a recurring order number, or a group order number.

Column Name: retry_attempts
Column Type: integer
If the message failed, how many time it was retried.

Column Name: status_code
Column Type: varchar
Max Length: 10
The status code of the order message that was sent (S - Success, E - Error, Q - Placed on the RadPlus Transfer Queue)

Column Name: status_code_value
Column Type: varchar

Max Length: 50

The status value of the order message that was sent.

Column Name: status_message

Column Type: varchar

Max Length: 500

Details related to the order status. Will contain the error message if the status is 'E' (Error).

Documentation for form: Client_Profile/_Physicians_Orders

Table Name: OrderEntry.order_var_dose_data

Table Description: Stores variable dose data for Avatar OE orders

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: FACILITY

Column Type: integer

Column Name: PATID

Column Type: varchar

Max Length: 20

Column Name: order_unique_id

Column Name: var_dose_qty

Column Type: varchar

Max Length: 50

Column Name: var_dose_qty_numeric
Column Type: numeric

Column Name: var_dose_qty_unit_code
Column Type: varchar
Max Length: 50

Column Name: var_dose_qty_unit_value
Column Type: varchar
Max Length: 50

Column Name: var_dose_freq_code
Column Type: varchar
Max Length: 50

Column Name: var_dose_freq_code_value
Column Type: varchar
Max Length: 50

Column Name: var_dose_admin_hours
Column Type: varchar
Max Length: 50

Column Name: var_dose_admin_days
Column Type: varchar
Max Length: 50

Documentation for form: Client_Profile/_Physicians_Orders

Table Name: OrderEntry.recurring_order_nums

Table Description: This table contains one row for every placer order number sent on a recurring order.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer

The FACILITY (Root System Code) in which the data was stored

Column Name: admin_unique_id
Column Type: varchar
Max Length: 50
Administration Unique ID

Column Name: order_unique_id
Column Type: varchar
Max Length: 50
The order's Order Number

Column Name: placer_num
Column Type: varchar
Max Length: 50
The order's Placer Number

Documentation for form: Renew/Validate_Orders

Table Name: OrderEntry.history_client_order_renew

Table Description: This table contains one row for every client order renewal in Avatar OE.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: EPISODENUMBER
Column Type: integer
The client episode for the order that was renewed.

Column Name: FACILITY
Column Type: integer
The FACILITY (Root System Code) in which the data was stored

Column Name: PATID
Column Type: varchar
Max Length: 20
The Client ID for whom this order was created

Column Name: RNWuniqueid
Column Type: varchar
Max Length: 50
The renewal's RNW unique ID within the client's renewals

Column Name: data_entry_by

Column Type: varchar
Max Length: 40
The user name that last updated this data row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated this data row.

Column Name: data_entry_date
Column Type: date
The date when this data row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The name of the form that last updated the row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time when this data row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The user id that last updated this data row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
The user name that last updated this data row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: effective_date
Column Type: date
Effective date of the renewal.

Column Name: effective_time
Column Type: varchar
Max Length: 50
Effective time of the renewal.

Column Name: link_to_order_hist
Column Type: varchar
Max Length: 50
Link to the ORD unique ID in OrderEntry.history_client_order.

Column Name: number_of_days
Column Type: varchar
Max Length: 50
Number of days renewed.

Column Name: number_of_doses
Column Type: varchar
Max Length: 50
Number of doses renewed.

Column Name: number_of_hours
Column Type: varchar
Max Length: 50
Number of hours renewed.

Column Name: number_of_minutes
Column Type: varchar
Max Length: 50
Number of minutes renewed.

Column Name: oe_source_val_ovr
Column Type: varchar
Max Length: 50
The 'Order Requires Validation Override' extended attribute of the Order Entry Source".

Column Name: open_ended_code
Column Type: varchar
Max Length: 50
Whether the renewal is open ended (code).

Column Name: open_ended_value

Column Type: varchar
Max Length: 50
Whether the renewal is open ended (value).

Column Name: order_entry_source_code
Column Type: varchar
Max Length: 50
Order Entry Source code

Column Name: order_entry_source_value
Column Type: varchar
Max Length: 50
Order Entry Source value

Column Name: practitioner
Column Type: varchar
Max Length: 50
Practitioner ID.

Column Name: practitioner_name
Column Type: varchar
Max Length: 50
Practitioner name.

Column Name: pract_not_enrolled
Column Type: varchar
Max Length: 50
Practitioner not enrolled.

Column Name: protocol_code
Column Type: varchar
Max Length: 50
'Renew Protocol' code.

Column Name: protocol_text
Column Type: varchar
Max Length: 50
'Renew Protocol Text'.

Column Name: protocol_value
Column Type: varchar
Max Length: 50
'Renew Protocol' value.

Column Name: renew_rd_bk_conf_code
Column Type: varchar
Max Length: 2
Renew Read-back Confirmation code.

Column Name: renew_rd_bk_conf_value

Column Type: varchar
Max Length: 50
Renew Read-back Confirmation value.

Column Name: renew_reason_code
Column Type: varchar
Max Length: 50
Renewal reason (code).

Column Name: renew_reason_text
Column Type: varchar
Max Length: 32766
Renew reason text (full).

Column Name: renew_reason_txt255
Column Type: varchar
Max Length: 255
Renewal reason text (max length 255 characters).

Column Name: renew_reason_value
Column Type: varchar
Max Length: 50
Renewal reason (value).

Column Name: review_date
Column Type: date
Review date.

Column Name: review_time
Column Type: varchar
Max Length: 50
Review time.

Column Name: stop_date_prior_to_renew
Column Type: date
Order stop date prior to renewal.

Column Name: stop_time_prior_to_renew
Column Type: varchar
Max Length: 50
Order stop time prior to renewal.

Documentation for form: Renew/Validate_Orders

Table Name: OrderEntry.order_entry_cs_utilities

Table Description: Stores OE Order data as of the filing of each order action - Client Profile/Physicians Orders, Order Entry Console, Renew Due To Do, Validation Required To Do, "automatic" Discontinues

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: EPISODE_NUMBER
Column Type: integer

Column Name: FACILITY
Column Type: integer

Column Name: PATID
Column Type: varchar
Max Length: 20

Hours of administration - 06:00pm.

Column Name: administer_pm_0630
Column Type: varchar
Max Length: 50

Hours of administration - 06:30pm.

Column Name: administer_pm_0700
Column Type: varchar
Max Length: 50
Hours of administration - 07:00pm.

Column Name: administer_pm_0730
Column Type: varchar
Max Length: 50
Hours of administration - 07:30pm.

Column Name: administer_pm_0800
Column Type: varchar
Max Length: 50
Hours of administration - 08:00pm.

Column Name: administer_pm_0830
Column Type: varchar
Max Length: 50
Hours of administration - 08:30pm.

Column Name: administer_pm_0900
Column Type: varchar
Max Length: 50
Hours of administration - 09:00pm.

Column Name: administer_pm_0930
Column Type: varchar
Max Length: 50
Hours of administration - 09:30pm.

Column Name: administer_pm_1000
Column Type: varchar
Max Length: 50
Hours of administration - 10:00pm.

Column Name: administer_pm_1030
Column Type: varchar
Max Length: 50
Hours of administration - 10:30pm.

Column Name: administer_pm_1100
Column Type: varchar
Max Length: 50
Hours of administration - 11:00pm.

Column Name: administer_pm_1130
Column Type: varchar
Max Length: 50

Hours of administration - 11:30pm.

Column Name: administer_pm_1230

Column Type: varchar

Max Length: 50

Hours of administration - 12:30pm.

Column Name: administer_pm_noon

Column Type: varchar

Max Length: 50

Hours of administration - 12:30pm.

Column Name: administration_route

Column Type: varchar

Max Length: 50

Route of administration.

Column Name: administration_route_code

Column Type: varchar

Max Length: 50

Route of administration code.

Column Name: administration_times

Column Type: varchar

Max Length: 4096

Administration times.

Column Name: am_0600_1130am_code

Column Type: varchar

Max Length: 50

AM(06:00-11:30 AM) code.

Column Name: am_0600_1130am_value

Column Type: varchar

Max Length: 75

AM(06:00-11:30 AM) value.

Column Name: am_12midnight_0530am_code

Column Type: varchar

Max Length: 50

AM(12 Midnight-05:30 AM) code.

Column Name: am_12midnight_0530am_value

Column Type: varchar

Max Length: 80

AM(12 Midnight-05:30 AM) value.

Column Name: basic_dup_order_ovr_code

Column Type: varchar

Max Length: 50

Perform Basic Duplicate Order Code Checking code.

Column Name: basic_dup_order_ovr_text

Column Type: varchar

Max Length: 80

Perform Basic Duplicate Order Code Checking text.

Column Name: basic_dup_order_ovr_value

Column Type: varchar

Max Length: 50

Perform Basic Duplicate Order Code Checking value.

Column Name: change_by

Column Type: varchar

Max Length: 50

Order Changed By.

Column Name: change_by_option

Column Type: varchar

Max Length: 50

Order Changed By (Option).

Column Name: change_by_pract_id

Column Type: varchar

Max Length: 50

Order Changed By Practitioner.

Column Name: change_by_pract_name

Column Type: varchar

Max Length: 50

Order Changed By Practitioner Name.

Column Name: change_by_pr_not_enr

Column Type: varchar

Max Length: 50

Order Changed By Practitioner Who Is Not Enrolled.

Column Name: change_by_user_id

Column Type: varchar

Max Length: 50

Order Changed User ID.

Column Name: change_by_user_name

Column Type: varchar

Max Length: 50

Order Changed User Name.

Column Name: change_date

Column Type: date

Order Changed Date.

Column Name: change_delay_ent_code
Column Type: varchar
Max Length: 50
Change Delayed Entry code.

Column Name: change_delay_ent_value
Column Type: varchar
Max Length: 50
Change Delayed Entry value.

Column Name: change_eff_date
Column Type: date
Change Effective Date.

Column Name: change_eff_time
Column Type: varchar
Max Length: 50
Change Effective Time.

Column Name: change_ent_src_code
Column Type: varchar
Max Length: 50
Change Order Entry Source code.

Column Name: change_ent_src_value
Column Type: varchar
Max Length: 50
Change Order Entry Source value.

Column Name: change_explanation
Column Type: varchar
Max Length: 32766
Explanation of change.

Column Name: change_explanation_255
Column Type: varchar
Max Length: 255
Explanation of change (max length 255 characters).

Column Name: change_reason_code
Column Type: varchar
Max Length: 50
Reason for Change code.

Column Name: change_reason_value
Column Type: varchar
Max Length: 50
Reason for Change value.

Column Name: change_time
Column Type: varchar
Max Length: 50
Order Changed Time.

Column Name: comments
Column Type: varchar
Max Length: 32766
Comments.

Column Name: comments_255
Column Type: varchar
Max Length: 255
Comments (max length 255 characters).

Column Name: created_by
Column Type: varchar
Max Length: 50
Order Created By.

Column Name: created_by_option
Column Type: varchar
Max Length: 50
Order Created By (Option).

Column Name: created_by_pre_auth_code
Column Type: varchar
Max Length: 50
Order Created By Pre-Authorized Order code.

Column Name: created_by_pre_auth_value
Column Type: varchar
Max Length: 50
Order Created By Pre-Authorized Order value.

Column Name: created_by_user_id
Column Type: varchar
Max Length: 50
Order Created User ID.

Column Name: created_by_user_name
Column Type: varchar
Max Length: 50
Order Created User Name.

Column Name: created_date
Column Type: date
Order Created Date.

Column Name: created_time

Column Type: varchar
Max Length: 50
Order Created Time.

Column Name: current_duration
Column Type: varchar
Max Length: 50
Duration (Days).

Column Name: current_duration_numeric
Column Type: integer
Duration (Days) (Numeric).

Column Name: current_dur_days
Column Type: varchar
Max Length: 50
Duration (Days).

Column Name: current_dur_days_numeric
Column Type: integer
Duration (Days) (Numeric).

Column Name: current_dur_hrs
Column Type: varchar
Max Length: 50
Duration (Hours).

Column Name: current_dur_hrs_numeric
Column Type: integer
Duration (Hours) (Numeric).

Column Name: current_dur_mins
Column Type: varchar
Max Length: 50
Duration (Minutes).

Column Name: current_dur_mins_numeric
Column Type: integer
Duration (Minutes) (Numeric).

Column Name: current_stop_date
Column Type: date
Current Stop Date.

Column Name: current_stop_time
Column Type: varchar
Max Length: 50
Current Stop Time.

Column Name: cust_frequency_att_code

Column Type: varchar
Max Length: 50
Customize Frequency Code Attributes code.

Column Name: cust_frequency_att_value
Column Type: varchar
Max Length: 50
Customize Frequency Code Attributes value.

Column Name: daily_administration_code
Column Type: varchar
Max Length: 50
Daily Administration code.

Column Name: daily_administration_value
Column Type: varchar
Max Length: 50
Daily Administration value.

Column Name: days_administered_code
Column Type: varchar
Max Length: 50
Days Administered code.

Column Name: days_administered_friday
Column Type: varchar
Max Length: 50
Days Administered: Friday?

Column Name: days_administered_monday
Column Type: varchar
Max Length: 50
Days Administered: Monday?

Column Name: days_administered_saturday
Column Type: varchar
Max Length: 50
Days Administered: Saturday?

Column Name: days_administered_sunday
Column Type: varchar
Max Length: 50
Days Administered: Sunday?

Column Name: days_administered_thursday
Column Type: varchar
Max Length: 50
Days Administered: Thursday?

Column Name: days_administered_tuesday

Column Type: varchar
Max Length: 50
Days Administered: Tuesday?

Column Name: days_administered_value
Column Type: varchar
Max Length: 50
Days Administered value.

Column Name: days_administered_wednesday
Column Type: varchar
Max Length: 50
Days Administered: Wednesday?

Column Name: delayed_entry_code
Column Type: varchar
Max Length: 50
Delayed Entry code.

Column Name: delayed_entry_value
Column Type: varchar
Max Length: 50
Delayed Entry value.

Column Name: diag_icd10_code
Column Type: varchar
Max Length: 40
ICD-10 Diagnosis code.

Column Name: diag_icd10_value
Column Type: varchar
Max Length: 255
ICD-10 Diagnosis value.

Column Name: diag_icd9_code
Column Type: varchar
Max Length: 40
ICD-9 Diagnosis code.

Column Name: diag_icd9_value
Column Type: varchar
Max Length: 255
ICD-9 Diagnosis value.

Column Name: diag_imo_code
Column Type: varchar
Max Length: 255
IMO diagnosis code.

Column Name: diag_imo_value

Column Type: varchar
Max Length: 255
IMO diagnosis value.

Column Name: diagnosis_code
Column Type: varchar
Max Length: 40
Diagnosis code.

Column Name: diagnosis_value
Column Type: varchar
Max Length: 255
Diagnosis value.

Column Name: discontinued_by
Column Type: varchar
Max Length: 50
Order Discontinued By.

Column Name: discontinued_by_opt
Column Type: varchar
Max Length: 50
Order Discontinue By (Option).

Column Name: discontinued_by_user_id
Column Type: varchar
Max Length: 50
Order Discontinue User ID.

Column Name: discontinued_by_user_name
Column Type: varchar
Max Length: 50
Order Discontinue Username.

Column Name: discontinued_date
Column Type: date
Order Discontinued Date.

Column Name: discontinued_time
Column Type: varchar
Max Length: 50
Order Discontinued Time.

Column Name: discontinue_reason_code
Column Type: varchar
Max Length: 50
Discontinue Reason Code.

Column Name: discontinue_reason_text
Column Type: varchar

Max Length: 32766
Discontinue Reason Text.

Column Name: discontinue_reason_txt255
Column Type: varchar
Max Length: 255
Discontinue Reason Text (max length 255 characters).

Column Name: discontinue_reason_value
Column Type: varchar
Max Length: 50
Discontinue Reason value.

Column Name: dis_delay_ent_code
Column Type: varchar
Max Length: 50
Order Discontinue Delayed Entry code.

Column Name: dis_delay_ent_value
Column Type: varchar
Max Length: 50
Order Discontinue Delayed Entry value.

Column Name: dis_effective_date
Column Type: date
Order Discontinue Effective Date.

Column Name: dis_effective_time
Column Type: varchar
Max Length: 50
Order Discontinue Effective Time.

Column Name: dis_ent_src_code
Column Type: varchar
Max Length: 50
Order Discontinue Order Entry Source code.

Column Name: dis_ent_src_value
Column Type: varchar
Max Length: 50
Order Discontinue Order Entry Source value.

Column Name: dispense_as_written_code
Column Type: varchar
Max Length: 50
Dispense As Written (DAW) code.

Column Name: dispense_as_written_value
Column Type: varchar
Max Length: 50

Dispense As Written (DAW) value.

Column Name: dispense_quantity
Column Type: varchar
Max Length: 50
Quantity To Be Dispensed.

Column Name: dispense_quantity_numeric
Column Type: numeric
Quantity To Be Dispensed (Numeric).

Column Name: dis_pract_id
Column Type: varchar
Max Length: 50
Order Discontinue Practitioner.

Column Name: dis_pract_name
Column Type: varchar
Max Length: 50
Order Discontinue Practitioner name.

Column Name: dis_pr_not_enr
Column Type: varchar
Max Length: 50
Order Discontinue Practitioner Who Is Not Enrolled.

Column Name: dis_rd_bk_conf_code
Column Type: varchar
Max Length: 2
Discontinue - Confirmation: This Order Was Read Back To The Ordering Practitioner code.

Column Name: dis_rd_bk_conf_value
Column Type: varchar
Max Length: 50
Discontinue - Confirmation: This Order Was Read Back To The Ordering Practitioner value.

Column Name: dis_review_date
Column Type: date
Order Discontinue Review Date.

Column Name: dis_review_time
Column Type: varchar
Max Length: 50
Order Discontinue Review Time.

Column Name: dosage
Column Type: varchar
Max Length: 50
Dosage.

Column Name: dosage_form
Column Type: varchar
Max Length: 50
Dosage Form.

Column Name: dosage_numeric
Column Type: numeric
Dosage (Numeric).

Column Name: dosage_unit
Column Type: varchar
Max Length: 50
Dosage Unit.

Column Name: effective_stop_date
Column Type: date
Effective Stop Date.

Column Name: effective_stop_is_dc
Column Type: varchar
Max Length: 1
Effective Stop Date (Is Discontinued?).

Column Name: effective_stop_time
Column Type: varchar
Max Length: 50
Effective Stop Time.

Column Name: every_nth_day
Column Type: integer
Every Nth Day.

Column Name: filler_filled_flag_code
Column Type: varchar
Max Length: 50
Filler Filled Flag Code.

Column Name: filler_filled_flag_value
Column Type: varchar
Max Length: 50
Filler Filled Flag value.

Column Name: filler_order_number
Column Type: varchar
Max Length: 50
Filler Order Number.

Column Name: filler_order_number_on_dc
Column Type: varchar
Max Length: 50

Filler Order Number For DC.

Column Name: first_dose_code

Column Type: varchar

Max Length: 50

Check here if this order is a FIRST DOSE of this medication code.

Column Name: first_dose_value

Column Type: varchar

Max Length: 50

Check here if this order is a FIRST DOSE of this medication value.

Column Name: frequency_description

Column Type: varchar

Max Length: 50

Frequency Description.

Column Name: icd_9_description

Column Type: varchar

Max Length: 50

ICD-9 Description.

Column Name: last_action_date

Column Type: date

Last Action Date.

Column Name: last_action_taken_code

Column Type: varchar

Max Length: 50

Last Action Taken code.

Column Name: last_action_taken_value

Column Type: varchar

Max Length: 50

Last Action Taken value.

Column Name: last_action_val_code

Column Type: varchar

Max Length: 50

Last Action Validated code.

Column Name: last_action_val_value

Column Type: varchar

Max Length: 50

Last Action Validated value.

Column Name: last_renew_by

Column Type: varchar

Max Length: 50

Last Renew - Data Entry Person.

Column Name: last_renew_by_option
Column Type: varchar
Max Length: 50
Last Renew - Data Entry Person (Option).

Column Name: last_renew_by_user_id
Column Type: varchar
Max Length: 50
Last Renew - Data Entry User ID.

Column Name: last_renew_by_user_name
Column Type: varchar
Max Length: 50
Last Renew - Data Entry User Name.

Column Name: last_renew_date
Column Type: date
Last Renew - Date Of Entry.

Column Name: last_renew_delay_ent_code
Column Type: varchar
Max Length: 50
Last Renew Delayed Entry code.

Column Name: last_renew_delay_ent_value
Column Type: varchar
Max Length: 50
Last Renew Delayed Entry value.

Column Name: last_renew_eff_date
Column Type: date
Last Renew - Order Renew Effective Date.

Column Name: last_renew_eff_time
Column Type: varchar
Max Length: 50
Last Renew - Order Renew Effective Time.

Column Name: last_renew_ent_src_code
Column Type: varchar
Max Length: 50
Last Renew Order Entry Source code.

Column Name: last_renew_ent_src_value
Column Type: varchar
Max Length: 50
Last Renew Order Entry Source value.

Column Name: last_renew_num_days

Column Type: varchar
Max Length: 50
Last Renew - Number Of Days To Renew.

Column Name: last_renew_num_hrs
Column Type: varchar
Max Length: 50
Last Renew - Number Of Hours To Renew.

Column Name: last_renew_num_mins
Column Type: varchar
Max Length: 50
Last Renew - Number Of Minutes To Renew.

Column Name: last_renew_pract_id
Column Type: varchar
Max Length: 50
Last Renew - Order Renew Practitioner.

Column Name: last_renew_pract_name
Column Type: varchar
Max Length: 50
Last Renew - Order Renew Practitioner Name.

Column Name: last_renew_pr_nt_enr
Column Type: varchar
Max Length: 50
Last Renew - Order Renew Practitioner Who Is Not Enrolled.

Column Name: last_renew_reason_code
Column Type: varchar
Max Length: 50
Renew Reason Code.

Column Name: last_renew_reason_text
Column Type: varchar
Max Length: 32766
Renew Reason Text.

Column Name: last_renew_reason_txt255
Column Type: varchar
Max Length: 255
Renew Reason Text (max length 255).

Column Name: last_renew_reason_value
Column Type: varchar
Max Length: 50
Renew Reason value.

Column Name: last_renew_review_dt

Column Type: date
Last Renew - Order Renew Review Date.

Column Name: last_renew_rev_time
Column Type: varchar
Max Length: 50
Last Renew - Order Renew Review Time.

Column Name: last_renew_stop_date
Column Type: date
Last Renew - Stop Date Prior To Renew.

Column Name: last_renew_stop_time
Column Type: varchar
Max Length: 50
Last Renew - Order Renew Review Time.

Column Name: last_renew_time
Column Type: varchar
Max Length: 50
Last Renew - Data Entry Time.

Column Name: last_renw_rd_bk_conf_code
Column Type: varchar
Max Length: 2
Renew - Confirmation: This Order Was Read Back To The Ordering Practitioner code.

Column Name: last_renw_rd_bk_conf_value
Column Type: varchar
Max Length: 50
Renew - Confirmation: This Order Was Read Back To The Ordering Practitioner value.

Column Name: last_update_data_entry_by
Column Type: varchar
Max Length: 50
last_update_data_entry_by - Entry Person.

Column Name: last_update_data_entry_by_option
Column Type: varchar
Max Length: 50
last_update_data_entry_by_option - Data Entry By (Option).

Column Name: last_update_data_entry_date
Column Type: date
last_update_data_entry_date - Date Of Entry.

Column Name: last_update_data_entry_time
Column Type: varchar
Max Length: 50
last_update_data_entry_time - Data Entry Time.

Column Name: last_upd_data_entry_src
Column Type: varchar
Max Length: 255
last_upd_data_entry_src - Data Entry Source.

Column Name: last_upd_data_entry_usrid
Column Type: varchar
Max Length: 50
last_upd_data_entry_usrid - Data Entry User ID.

Column Name: last_upd_data_entry_usnm
Column Type: varchar
Max Length: 50
last_upd_data_entry_usnm - Data Entry User Name.

Column Name: latest_hold_byopt
Column Type: varchar
Max Length: 50
Latest Hold Order - Data Entry By (Option).

Column Name: latest_hold_by_user_id
Column Type: varchar
Max Length: 50
Latest Hold Order - Data Entry User ID.

Column Name: latest_hold_by_user_name
Column Type: varchar
Max Length: 50
Latest Hold Order - Data Entry User Name.

Column Name: latest_hold_eff_date
Column Type: date
Latest Hold Order - Effective Date.

Column Name: latest_hold_eff_time
Column Type: varchar
Max Length: 50
Latest Hold Order - Effective Time.

Column Name: latest_hold_entry_by
Column Type: varchar
Max Length: 50
Latest Hold Order - Entry Person.

Column Name: latest_hold_entry_date
Column Type: date
Latest Hold Order - Date Of Entry.

Column Name: latest_hold_entry_source

Column Type: varchar
Max Length: 255
Latest Hold Order - Data Entry Source.

Column Name: latest_hold_entry_time
Column Type: varchar
Max Length: 50
Latest Hold Order - Data Entry Time.

Column Name: latest_hold_pract_id
Column Type: varchar
Max Length: 50
Latest Hold Order Reviewing Practitioner

Column Name: latest_hold_pract_name
Column Type: varchar
Max Length: 50
Latest Hold Order Reviewing Practitioner Name

Column Name: latest_hold_pr_not_enr
Column Type: varchar
Max Length: 50
Latest Hold Order Practitioner Who Is Not Enrolled

Column Name: latest_hold_rd_bk_conf_code
Column Type: varchar
Max Length: 2
Hold Read-back Confirmation code

Column Name: latest_hold_rd_bk_conf_value
Column Type: varchar
Max Length: 50
Hold Read-back Confirmation value

Column Name: latest_hold_reason_code
Column Type: varchar
Max Length: 50
Latest Hold Order Reason Code

Column Name: latest_hold_reason_text
Column Type: varchar
Max Length: 32766
Latest Hold Order Reason Text

Column Name: latest_hold_reason_value
Column Type: varchar
Max Length: 50
Latest Hold Order Reason Code Value

Column Name: latest_hold_reas_txt255

Column Type: varchar
Max Length: 255
Latest Hold Order Reason Text

Column Name: latest_hold_review_date
Column Type: date
Latest Hold Order Review Date

Column Name: latest_hold_review_time
Column Type: varchar
Max Length: 50
Latest Hold Order Review Time

Column Name: latest_resm_rd_bk_conf_code
Column Type: varchar
Max Length: 2
Resume Read-back Confirmation code

Column Name: latest_resm_rd_bk_conf_value
Column Type: varchar
Max Length: 50
Resume Read-back Confirmation value

Column Name: latest_resume_by_opt
Column Type: varchar
Max Length: 50
Latest Resume Order - Data Entry By (Option).

Column Name: latest_resume_by_user_id
Column Type: varchar
Max Length: 50
Latest Resume Order - Data Entry User ID.

Column Name: latest_resume_by_username
Column Type: varchar
Max Length: 50
Latest Resume Order - Data Entry User Name.

Column Name: latest_resume_eff_date
Column Type: date
Latest Resume Order Effective Date

Column Name: latest_resume_eff_time
Column Type: varchar
Max Length: 50
Latest Resume Order Effective Time

Column Name: latest_resume_entry_by
Column Type: varchar
Max Length: 50

Latest Resume Order - Entry Person.

Column Name: latest_resume_entry_date

Column Type: date

Latest Resume Order - Date Of Entry.

Column Name: latest_resume_entry_src

Column Type: varchar

Max Length: 255

Latest Resume Order - Data Entry Source.

Column Name: latest_resume_entry_time

Column Type: varchar

Max Length: 50

Latest Resume Order - Data Entry Time.

Column Name: latest_resume_pract_id

Column Type: varchar

Max Length: 50

Latest Resume Order Reviewing Practitioner

Column Name: latest_resume_pract_name

Column Type: varchar

Max Length: 50

Latest Resume Order Reviewing Practitioner Name

Column Name: latest_resume_pr_not_enr

Column Type: varchar

Max Length: 50

Column Name: latest_resume_reason_code

Column Type: varchar

Max Length: 50

Latest Resume Order Reason Code

Column Name: latest_resume_reason_text

Column Type: varchar

Max Length: 32766

Latest Resume Order Reason Text

Column Name: latest_resume_reason_value

Column Type: varchar

Max Length: 50

Latest Resume Order Reason Code Value

Column Name: latest_resume_reas_txt255

Column Type: varchar

Max Length: 255

Latest Resume Order Reason Text

Column Name: latest_resume_review_date
Column Type: date
Latest Resume Order Review Date

Column Name: latest_resume_review_time
Column Type: varchar
Max Length: 50
Latest Resume Order Review Time

Column Name: make_orders_open_end_code
Column Type: varchar
Max Length: 50
Make Order(s) Open Ended code.

Column Name: make_orders_open_end_value
Column Type: varchar
Max Length: 50
Make Order(s) Open Ended value.

Column Name: med_category_code
Column Type: varchar
Max Length: 255
Medication Category code.

Column Name: med_category_value_long
Column Type: varchar
Max Length: 4096
Medication Category value (long).

Column Name: med_category_value_short
Column Type: varchar
Max Length: 255
Medication Category value (short).

Column Name: non_formulary_override
Column Type: varchar
Max Length: 80
Non-formulary Pharmacy Order Warning Override Text

Column Name: non_formulary_ovrd_code
Column Type: varchar
Max Length: 50
Non-formulary override code (dictionary-based)

Column Name: non_formulary_ovrd_value
Column Type: varchar
Max Length: 50
Non-formulary override code value (from dictionary)

Column Name: number_of_refills
Column Type: varchar
Max Length: 50
Number of Refills Allowed.

Column Name: number_of_refills_numeric
Column Type: integer
Number of Refills Allowed (numeric).

Column Name: one_time_only_code
Column Type: varchar
Max Length: 50
One Time Only code.

Column Name: one_time_only_value
Column Type: varchar
Max Length: 50
One Time Only value.

Column Name: order_category_code
Column Type: varchar
Max Length: 50
Order Category code.

Column Name: order_category_value
Column Type: varchar
Max Length: 50
Order Category value.

Column Name: order_changed_code
Column Type: varchar
Max Length: 50
Order Changed? (code)

Column Name: order_changed_value
Column Type: varchar
Max Length: 50
Order Changed? (value)

Column Name: order_date
Column Type: date
Order Date.

Column Name: order_description
Column Type: varchar
Max Length: 100
Order Description.

Column Name: order_entry_source_code
Column Type: varchar

Max Length: 50
Order Entry Source code.

Column Name: order_entry_source_value
Column Type: varchar
Max Length: 50
Order Entry Source value.

Column Name: order_guidelines
Column Type: varchar
Max Length: 32766
Order Guidelines (previously call Dosage / Lab Test Guidelines)

Column Name: order_guidelines_255
Column Type: varchar
Max Length: 255
Order Guidelines (previously called Dosage / Lab Test Guidelines)

Column Name: ordering_pract_id
Column Type: varchar
Max Length: 50
Ordering Practitioner.

Column Name: ordering_pract_name
Column Type: varchar
Max Length: 50
Ordering Practitioner Name.

Column Name: ordering_pr_not_enr
Column Type: varchar
Max Length: 50
Ordering Practitioner Who is Not Enrolled

Column Name: order_status_code
Column Type: varchar
Max Length: 50
Order Status code.

Column Name: order_status_value
Column Type: varchar
Max Length: 50
Order Status value.

Column Name: order_text
Column Type: varchar
Max Length: 32766
Order Text.

Column Name: order_text_255
Column Type: varchar

Max Length: 255
Order Text (max length 255).

Column Name: order_time
Column Type: varchar
Max Length: 50
Order Time.

Column Name: order_type_category_code
Column Type: varchar
Max Length: 10
Order Type Category Code

Column Name: order_type_category_value
Column Type: varchar
Max Length: 50
Order Type Category Value

Column Name: order_type_code
Column Type: varchar
Max Length: 50
Order Type code.

Column Name: order_type_value
Column Type: varchar
Max Length: 50
Order Type value.

Column Name: order_unique_id
Column Type: varchar
Max Length: 50
Order Unique ID.

Column Name: original_duration
Column Type: varchar
Max Length: 50
Original Duration.

Column Name: original_dur_days
Column Type: varchar
Max Length: 50
Original Duration (Days).

Column Name: original_dur_days_numeric
Column Type: integer
Original Duration (Days numeric).

Column Name: original_dur_hrs
Column Type: varchar
Max Length: 50

Original Duration (Hours).

Column Name: original_dur_hrs_numeric

Column Type: integer

Original Duration (Hours numeric).

Column Name: original_dur_mins

Column Type: varchar

Max Length: 50

Original Duration (Minutes).

Column Name: original_dur_mins_numeric

Column Type: integer

Original Duration (Minutes numeric).

Column Name: original_stop_date

Column Type: date

Original Stop Date.

Column Name: original_stop_time

Column Type: varchar

Max Length: 50

Original Stop Time.

Column Name: parent_node_for_subs

Column Type: varchar

Max Length: 50

Parent node (System use only).

Column Name: pm_0600_1130pm_code

Column Type: varchar

Max Length: 50

PM(06:00-11:30 PM) code.

Column Name: pm_0600_1130pm_value

Column Type: varchar

Max Length: 75

PM(06:00-11:30 PM) value.

Column Name: pm_noon_0530pm_code

Column Type: varchar

Max Length: 50

PM(12 Noon-05:30 PM) code.

Column Name: pm_noon_0530pm_value

Column Type: varchar

Max Length: 75

PM(12 Noon-05:30 PM) value.

Column Name: pre_auth_link

Column Type: varchar
Max Length: 50
Link To Client Pre-Authorized Orders History (System Use Only)

Column Name: problems_code
Column Type: varchar
Max Length: 4096
Problems code.

Column Name: problems_value
Column Type: varchar
Max Length: 4096
Problems value.

Column Name: quantity
Column Type: varchar
Max Length: 50
Quantity.

Column Name: quantity_numeric
Column Type: numeric
Quantity (numeric).

Column Name: quantity_unit
Column Type: varchar
Max Length: 50
Quantity Unit.

Column Name: read_back_confirm_code
Column Type: varchar
Max Length: 2
Read-back Confirmation code

Column Name: read_back_confirm_value
Column Type: varchar
Max Length: 50
Read-back Confirmation value

Column Name: reason_code
Column Type: varchar
Max Length: 32000
Reason code.

Column Name: reason_text
Column Type: varchar
Max Length: 32766
Reason Text.

Column Name: reason_text_255
Column Type: varchar

Max Length: 255
Reason Text (max length 255).

Column Name: reason_value
Column Type: varchar
Max Length: 32000
Reason value.

Column Name: results_status_code
Column Type: varchar
Max Length: 20
Results Status code.

Column Name: results_status_date
Column Type: date
Results Status date.

Column Name: results_status_time
Column Type: varchar
Max Length: 10
Results Status Time.

Column Name: results_status_value
Column Type: varchar
Max Length: 200
Results Status value.

Column Name: routine_or_prn_code
Column Type: varchar
Max Length: 50
Routine or PRN code.

Column Name: routine_or_prn_value
Column Type: varchar
Max Length: 50
Routine or PRN value.

Column Name: special_instructions
Column Type: varchar
Max Length: 32766
Special Instructions.

Column Name: special_instructions_255
Column Type: varchar
Max Length: 255
Special Instructions (max length 255).

Column Name: start_date
Column Type: date
Start Date.

Column Name: start_time
Column Type: varchar
Max Length: 50
Start Time.

Column Name: times_24_hour
Column Type: varchar
Max Length: 50
Times/24 Hour.

Column Name: times_24_hour_numeric
Column Type: integer
Times/24 Hour (Numeric).

Column Name: treatment_setting_code
Column Type: varchar
Max Length: 50
Treatment Setting code.

Column Name: treatment_setting_value
Column Type: varchar
Max Length: 50
Treatment Setting value.

Column Name: unique_session_id_create
Column Type: varchar
Max Length: 50
Unique Session ID associated with Create New Order action

Column Name: unique_session_id_latest
Column Type: varchar
Max Length: 50
Unique Session ID associated with latest action

Column Name: validated_by
Column Type: varchar
Max Length: 50
Order Validated By.

Column Name: validated_by_option
Column Type: varchar
Max Length: 50
Order Validated By (Option).

Column Name: validated_by_user_id
Column Type: varchar
Max Length: 50
Order Validated User ID.

Column Name: validated_by_user_name
Column Type: varchar
Max Length: 50
Order Validated User Name.

Column Name: validated_date
Column Type: date
Order Validated Date.

Column Name: validate_delay_ent_code
Column Type: varchar
Max Length: 50
Order Validate Delayed Entry code.

Column Name: validate_delay_ent_value
Column Type: varchar
Max Length: 50
Order Validate Delayed Entry value.

Column Name: validated_time
Column Type: varchar
Max Length: 50
Order Validated Time.

Column Name: validate_ent_src_code
Column Type: varchar
Max Length: 50
Order Validate Order Entry Source code.

Column Name: validate_ent_src_value
Column Type: varchar
Max Length: 50
Order Validate Order Entry Source value.

Column Name: validate_pract_id
Column Type: varchar
Max Length: 50
Order Validate Practitioner.

Column Name: validate_pract_name
Column Type: varchar
Max Length: 50
Order Validate Practitioner name.

Column Name: validate_pr_not_enr
Column Type: varchar
Max Length: 50
Order Validate Practitioner Who Is Not Enrolled

Column Name: validate_reason_code

Column Type: varchar
Max Length: 50
Order Validate code.

Column Name: validate_reason_text
Column Type: varchar
Max Length: 32766
Order Validate text.

Column Name: validate_reason_txt255
Column Type: varchar
Max Length: 255
Order Validate text (max length 255).

Column Name: validate_reason_value
Column Type: varchar
Max Length: 50
Order Validate value.

Column Name: validate_review_date
Column Type: date
Order Validate Review Date.

Column Name: validate_review_time
Column Type: varchar
Max Length: 50
Order Validate Review Time.

Column Name: v_dosage_lab_test
Column Type: varchar
Max Length: 32766
Order Guidelines.

Column Name: v_dosage_lab_test_255
Column Type: varchar
Max Length: 255
Order Guidelines (max length 255).

Documentation for form: Order_Consent

Table Name: OrderEntry.aoe_answers

Table Description: This table contains the answers to AOE question for a specific order.

Column Name: ID
Column Type: integer

Column Name: FACILITY
Column Type: integer
System code.

Column Name: ORDuniqueid
Column Type: varchar
Max Length: 50
Order unique ID.

Column Name: PATID
Column Type: varchar
Max Length: 20
Patient ID.

Column Name: answer
Column Type: varchar
Max Length: 50
Answer.

Column Name: answer_value
Column Type: varchar
Max Length: 50
Answer Value.

Column Name: aoe_id
Column Type: varchar
Max Length: 50
Ask on order entry ID.

Column Name: aoe_question_id
Column Type: varchar
Max Length: 50
Question Identifier.

Column Name: question
Column Type: varchar
Max Length: 50
Question.

Documentation for form: Order_Consent

Table Name: OrderEntry.consent

Table Description: This table returns entries filed in the 'Consent' form.

Column Name: ID

Column Type: integer

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: ORDERID

Column Type: varchar

Max Length: 50

'Order Code'

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the consent.

Column Name: comments

Column Type: varchar

Max Length: 32766

'Comments'

Column Name: consent_date

Column Type: date

'Consent Date'

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 50

The user name that last updated the row.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_time

Column Type: varchar

Max Length: 50

The time the row was last updated.

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 50

The 'User ID' who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The 'User Description' of the user which last updated the row.

Column Name: last_review_date
Column Type: date
'Last Review Date'

Column Name: order_description
Column Type: varchar
Max Length: 100
Description associated with the order code selected in 'Order Code' field.

Column Name: override_reason_code
Column Type: varchar
Max Length: 50
'Consent Override Reason'

Column Name: override_reason_value
Column Type: varchar
Max Length: 50
Description associated with 'Consent Override Reason' code.

Column Name: signature
Column Type: longvarbinary
Max Length: 2147483647
'Capture Signature'

Column Name: signature_entered
Column Type: varchar
Max Length: 50
Indicates if a signature was entered.

Documentation for form: Order_Consent

Table Name: OrderEntry.user_def_aoe_answers

Table Description: Ask On Order Entry Quesiton Answers.

Column Name: ID
Column Type: integer

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: ORDuniqueid
Column Type: varchar
Max Length: 50
Order unique ID.

Column Name: PATID
Column Type: varchar
Max Length: 20
Patient ID.

Column Name: answer_text
Column Type: varchar
Max Length: 32766
Answer text.

Column Name: aoe_entry_id
Column Type: varchar
Max Length: 50
Unique ID for AOE entry.

Column Name: dictionary_answer_value
Column Type: varchar
Max Length: 32766
For dictionary type AOE's this is the value associated with the dictionary code.

Column Name: dictionary_file
Column Type: varchar
Max Length: 50
Dictionary File

Column Name: dictionary_namespace
Column Type: varchar
Max Length: 50
Dictionary Namespace

Column Name: dictionary_number
Column Type: varchar
Max Length: 50
Dictionary field number

Column Name: question_text
Column Type: varchar
Max Length: 32766
Question text.

Documentation for form: Order_Fulfillment

Table Name: OrderEntry.fulfillment_status

Table Description: Fulfillment Status

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: PATID
Column Type: varchar
Max Length: 20
Patient ID.

Column Name: completed_code
Column Type: varchar
Max Length: 50
Fulfillment Completed code

Column Name: completed_value
Column Type: varchar
Max Length: 50
Fulfillment Completed value

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time

Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_time_h
Column Type: varchar
Max Length: 50
The time the row was last updated (Cache system time).

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The 'User ID' who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The 'User Description' of the user which last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: form_historic
Column Type: varchar
Max Length: 50
Historic associated with modeled form.

Column Name: fulfillment_form
Column Type: varchar
Max Length: 50
Modeled form where fulfillment was entered.

Column Name: fulfillment_optionCSMid
Column Type: varchar
Max Length: 50

Internal modeled form ID.

Column Name: fulfillment_status_code
Column Type: varchar
Max Length: 50
Fulfillment Status Code.

Column Name: fulfillment_status_value
Column Type: varchar
Max Length: 50
Fulfillment Status Value

Column Name: order_unique_id
Column Type: varchar
Max Length: 50
Order Number

Documentation for form: Order_Entry_Forms_Printing

Table Name: OrderEntry.temp_history_client_order

Table Description: Populated with data for orders to be printed via the Order Entry Forms Printing process.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: EPISODE_NUMBER
Column Type: integer
The client Episode with which the order is associated

Column Name: FACILITY
Column Type: integer
The FACILITY (Root System Code) in which the data was stored

Column Name: FREQUENCYID
Column Type: varchar
Max Length: 50
The order's Frequency Code

Column Name: ICD9CODE
Column Type: varchar
Max Length: 50
The order's ICD-9 diagnosis code

Column Name: JOIN_TO_DIAGNOSIS_OBJECT

Column Type: varchar
Max Length: 40
Used to JOIN to SYSTEM.RADplus_IMO_results table
Diagnosis JOIN and associated values v2011010

Column Name: ORDERID
Column Type: varchar
Max Length: 50
The order's Order Code

Column Name: ORDuniqueid
Column Type: varchar
Max Length: 50
The order's ORD unique ID within the client's orders

Column Name: PATID
Column Type: varchar
Max Length: 20
The Client ID for whom this order was created

Column Name: TNuniqueid
Column Type: varchar
Max Length: 50
TN unique ID.

Column Name: administer_am_0100
Column Type: varchar
Max Length: 50
Is this order to be administered at 1:00 AM ?

Column Name: administer_am_0130
Column Type: varchar
Max Length: 50
Is this order to be administered at 1:30 AM ?

Column Name: administer_am_0200
Column Type: varchar
Max Length: 50
Is this order to be administered at 2:00 AM ?

Column Name: administer_am_0230
Column Type: varchar
Max Length: 50
Is this order to be administered at 2:30 AM ?

Column Name: administer_am_0300
Column Type: varchar
Max Length: 50
Is this order to be administered at 3:00 AM ?

Column Name: administer_am_0330
Column Type: varchar
Max Length: 50
Is this order to be administered at 3:30 AM ?

Column Name: administer_am_0400
Column Type: varchar
Max Length: 50
Is this order to be administered at 4:00 AM ?

Column Name: administer_am_0430
Column Type: varchar
Max Length: 50
Is this order to be administered at 4:30 AM ?

Column Name: administer_am_0500
Column Type: varchar
Max Length: 50
Is this order to be administered at 5:00 AM ?

Column Name: administer_am_0530
Column Type: varchar
Max Length: 50
Is this order to be administered at 5:30 AM ?

Column Name: administer_am_0600
Column Type: varchar
Max Length: 50
Is this order to be administered at 6:00 AM ?

Column Name: administer_am_0630
Column Type: varchar
Max Length: 50
Is this order to be administered at 6:30 AM ?

Column Name: administer_am_0700
Column Type: varchar
Max Length: 50
Is this order to be administered at 7:00 AM ?

Column Name: administer_am_0730
Column Type: varchar
Max Length: 50
Is this order to be administered at 7:30 AM ?

Column Name: administer_am_0800
Column Type: varchar
Max Length: 50
Is this order to be administered at 8:00 AM ?

Column Name: administer_am_0830
Column Type: varchar
Max Length: 50
Is this order to be administered at 8:30 AM ?

Column Name: administer_am_0900
Column Type: varchar
Max Length: 50
Is this order to be administered at 9:00 AM ?

Column Name: administer_am_0930
Column Type: varchar
Max Length: 50
Is this order to be administered at 9:30 AM ?

Column Name: administer_am_1000
Column Type: varchar
Max Length: 50
Is this order to be administered at 10:00 AM ?

Column Name: administer_am_1030
Column Type: varchar
Max Length: 50
Is this order to be administered at 10:30 AM ?

Column Name: administer_am_1100
Column Type: varchar
Max Length: 50
Is this order to be administered at 11:00 AM ?

Column Name: administer_am_1130
Column Type: varchar
Max Length: 50
Is this order to be administered at 11:30 AM ?

Column Name: administer_am_1230
Column Type: varchar
Max Length: 50
Is this order to be administered at 12:30 PM ?

Column Name: administer_am_midnight
Column Type: varchar
Max Length: 50
Is this order to be administered at 12:00 AM (Midnight) ?

Column Name: administer_pm_0100
Column Type: varchar
Max Length: 50
Is this order to be administered at 1:00 PM ?

Column Name: administer_pm_0130
Column Type: varchar
Max Length: 50
Is this order to be administered at 1:30 PM ?

Column Name: administer_pm_0200
Column Type: varchar
Max Length: 50
Is this order to be administered at 2:00 PM ?

Column Name: administer_pm_0230
Column Type: varchar
Max Length: 50
Is this order to be administered at 2:30 PM ?

Column Name: administer_pm_0300
Column Type: varchar
Max Length: 50
Is this order to be administered at 3:00 PM ?

Column Name: administer_pm_0330
Column Type: varchar
Max Length: 50
Is this order to be administered at 3:30 PM ?

Column Name: administer_pm_0400
Column Type: varchar
Max Length: 50
Is this order to be administered at 4:00 PM ?

Column Name: administer_pm_0430
Column Type: varchar
Max Length: 50
Is this order to be administered at 4:30 PM ?

Column Name: administer_pm_0500
Column Type: varchar
Max Length: 50
Is this order to be administered at 5:00 PM ?

Column Name: administer_pm_0530
Column Type: varchar
Max Length: 50
Is this order to be administered at 5:30 PM ?

Column Name: administer_pm_0600
Column Type: varchar
Max Length: 50
Is this order to be administered at 6:00 PM ?

Column Name: administer_pm_0630
Column Type: varchar
Max Length: 50
Is this order to be administered at 6:30 PM ?

Column Name: administer_pm_0700
Column Type: varchar
Max Length: 50
Is this order to be administered at 7:00 PM ?

Column Name: administer_pm_0730
Column Type: varchar
Max Length: 50
Is this order to be administered at 7:30 PM ?

Column Name: administer_pm_0800
Column Type: varchar
Max Length: 50
Is this order to be administered at 8:00 PM ?

Column Name: administer_pm_0830
Column Type: varchar
Max Length: 50
Is this order to be administered at 8:30 PM ?

Column Name: administer_pm_0900
Column Type: varchar
Max Length: 50
Is this order to be administered at 9:00 PM ?

Column Name: administer_pm_0930
Column Type: varchar
Max Length: 50
Is this order to be administered at 9:30 PM ?

Column Name: administer_pm_1000
Column Type: varchar
Max Length: 50
Is this order to be administered at 10:00 PM ?

Column Name: administer_pm_1030
Column Type: varchar
Max Length: 50
Is this order to be administered at 10:30 PM ?

Column Name: administer_pm_1100
Column Type: varchar
Max Length: 50
Is this order to be administered at 11:00 PM ?

Column Name: administer_pm_1130
Column Type: varchar
Max Length: 50
Is this order to be administered at 11:30 PM ?

Column Name: administer_pm_1230
Column Type: varchar
Max Length: 50
Is this order to be administered at 12:30 PM ?

Column Name: administer_pm_noon
Column Type: varchar
Max Length: 50
Is this order to be administered at 12:00 PM (Noon) ?

Column Name: administration_route
Column Type: varchar
Max Length: 50
The order's Route of Adminiistration

Column Name: administration_times
Column Type: varchar
Max Length: 4096
The order's Hours of Administration

Column Name: admin_method_code
Column Type: varchar
Max Length: 50
The order's Administration Method Code (IV orders only)

Column Name: admin_method_value
Column Type: varchar
Max Length: 50
The order's Administration Method Value (IV orders only)

Column Name: am_0600_1130am_code
Column Type: varchar
Max Length: 50
The order's specified Hours of Administration codes between 6:00 AM and 11:30 AM

Column Name: am_0600_1130am_value
Column Type: varchar
Max Length: 100
The order's specified Hours of Administration values between 6:00 AM and 11:30 AM

Column Name: am_12midnight_0530am_code
Column Type: varchar
Max Length: 50
The order's specified Hours of Administration codes between 12:00 AM (Midnight) and 5:30 AM

Column Name: am_12midnight_0530am_value

Column Type: varchar

Max Length: 4096

The order's specified Hours of Administration values between 12:00 AM (Midnight) and 5:30 AM

Column Name: basic_dup_order_ovr_code

Column Type: varchar

Max Length: 50

Override code for Basic Duplicate Override Check alert

Column Name: basic_dup_order_ovr_text

Column Type: varchar

Max Length: 80

Override text for Basic Duplicate Override Check alert

Column Name: basic_dup_order_ovr_value

Column Type: varchar

Max Length: 50

Override value for Basic Duplicate Override Check alert

Column Name: change_by

Column Type: varchar

Max Length: 50

Order last changed by User

Column Name: change_by_option

Column Type: varchar

Max Length: 50

Order last changed by (option) User

Column Name: change_by_pract_id

Column Type: varchar

Max Length: 50

Order last changed by Practitioner ID

Column Name: change_by_pract_name

Column Type: varchar

Max Length: 50

Order last changed by Practitioner Name

Column Name: change_by_pr_not_enr

Column Type: varchar

Max Length: 50

Order last changed by Practitioner Who Is Not Enrolled

Column Name: change_by_user_id

Column Type: varchar

Max Length: 50

Order last changed by User ID

Column Name: change_by_user_name
Column Type: varchar
Max Length: 50
Order last changed by User ID Name

Column Name: change_date
Column Type: date
Order last changed date

Column Name: change_delay_ent_code
Column Type: varchar
Max Length: 50
Order last changed Delayed Entry code

Column Name: change_delay_ent_value
Column Type: varchar
Max Length: 50
Order last changed Delayed Entry value

Column Name: change_eff_date
Column Type: date
Order last changed Effective Date

Column Name: change_eff_time
Column Type: varchar
Max Length: 50
Order last changed Effective Time

Column Name: change_ent_src_code
Column Type: varchar
Max Length: 50
Order last changed Order Entry Source code

Column Name: change_ent_src_value
Column Type: varchar
Max Length: 50
Order last changed Order Entry Source value

Column Name: change_explanation
Column Type: varchar
Max Length: 32766
Order last changed Explanation

Column Name: change_explanation_255
Column Type: varchar
Max Length: 255
Order last changed Explanation (255 character limit)

Column Name: change_reason_code
Column Type: varchar

Max Length: 50
Order last changed Reason for Change code

Column Name: change_reason_value
Column Type: varchar
Max Length: 50
Order last changed Reason for Change value

Column Name: change_time
Column Type: varchar
Max Length: 50
Order last changed time

Column Name: comments
Column Type: varchar
Max Length: 32766
The order's Comments

Column Name: comments_255
Column Type: varchar
Max Length: 255
The order's Comments (255 character limit)

Column Name: created_by
Column Type: varchar
Max Length: 50
Order created by User

Column Name: created_by_option
Column Type: varchar
Max Length: 50
Order created by (option) User

Column Name: created_by_pre_auth_code
Column Type: varchar
Max Length: 50
Order created by via Pre-Authorized Order code

Column Name: created_by_pre_auth_value
Column Type: varchar
Max Length: 50
Order created by via Pre-Authorized Order value

Column Name: created_by_user_id
Column Type: varchar
Max Length: 50
Order created by User ID

Column Name: created_by_user_name
Column Type: varchar

Max Length: 50
Order created by User ID Name

Column Name: created_date
Column Type: date
Order created date

Column Name: created_time
Column Type: varchar
Max Length: 50
Order created time

Column Name: current_duration
Column Type: varchar
Max Length: 50
The order's current Duration

Column Name: current_duration_numeric
Column Type: integer
The order's current Duration (numeric data type)

Column Name: current_dur_days
Column Type: varchar
Max Length: 50
The order's current Duration (Days)

Column Name: current_dur_days_numeric
Column Type: integer
The order's current Duration (Days) (numeric data type)

Column Name: current_dur_hrs
Column Type: varchar
Max Length: 50
The order's current Duration (Hours)

Column Name: current_dur_hrs_numeric
Column Type: integer
The order's current Duration (Hours) (numeric data type)

Column Name: current_dur_mins
Column Type: varchar
Max Length: 50
The order's current Duration (Minutes)

Column Name: current_dur_mins_numeric
Column Type: integer
The order's current Duration (Minutes) (numeric data type)

Column Name: current_stop_date
Column Type: date

The order's current Stop Date

Column Name: current_stop_time

Column Type: varchar

Max Length: 50

The order's current Stop Time

Column Name: cust_frequency_att_code

Column Type: varchar

Max Length: 50

The order's flag (code) for whether Frequency Code attributes were customized

Column Name: cust_frequency_att_value

Column Type: varchar

Max Length: 50

The order's flag (value) for whether Frequency Code attributes were customized

Column Name: daily_administration_code

Column Type: varchar

Max Length: 50

Does administration of this order occur Daily (code)?

Column Name: daily_administration_value

Column Type: varchar

Max Length: 50

Does administration of this order occur Daily (value)?

Column Name: days_administered_code

Column Type: varchar

Max Length: 50

The days that this order is administered (codes)

Column Name: days_administered_friday

Column Type: varchar

Max Length: 50

Is this order administered on Friday

Column Name: days_administered_monday

Column Type: varchar

Max Length: 50

Is this order administered on Monday?

Column Name: days_administered_saturday

Column Type: varchar

Max Length: 50

Is this order administered on Saturday?

Column Name: days_administered_sunday

Column Type: varchar

Max Length: 50

Is this order administered on Sunday?

Column Name: days_administered_thursday

Column Type: varchar

Max Length: 50

Is this order administered on Thursday?

Column Name: days_administered_tuesday

Column Type: varchar

Max Length: 50

Is this order administered on Tuesday?

Column Name: days_administered_value

Column Type: varchar

Max Length: 50

The days that this order is administered (values)

Column Name: days_administered_wednesday

Column Type: varchar

Max Length: 50

Is this order administered on Wednesday?

Column Name: delayed_entry_code

Column Type: varchar

Max Length: 50

The order's Delayed Entry code (Create New Order)

Column Name: delayed_entry_value

Column Type: varchar

Max Length: 50

The order's Delayed Entry value (Create New Order)

Column Name: diag_icd10_code

Column Type: varchar

Max Length: 40

The order's ICD10 diagnosis code

Column Name: diag_icd10_value

Column Type: varchar

Max Length: 255

The order's ICD10 diagnosis code value

Column Name: diag_icd9_code

Column Type: varchar

Max Length: 40

The order's ICD9 diagnosis code

Column Name: diag_icd9_value

Column Type: varchar

Max Length: 255

The order's ICD9 diagnosis code value

Column Name: diag_imo_code

Column Type: varchar

Max Length: 255

The order's IMO diagnosis code

Column Name: diag_imo_value

Column Type: varchar

Max Length: 255

The order's IMO diagnosis code value

Column Name: diagnosis_code

Column Type: varchar

Max Length: 40

The order's diagnosis code

Column Name: diagnosis_value

Column Type: varchar

Max Length: 255

the order's diagnosis code value

Column Name: discontinued_by

Column Type: varchar

Max Length: 50

The order was Discontinued By User

Column Name: discontinued_by_opt

Column Type: varchar

Max Length: 50

The order was Discontinued By (option) User

Column Name: discontinued_by_user_id

Column Type: varchar

Max Length: 50

The order was Discontinued By User ID

Column Name: discontinued_by_user_name

Column Type: varchar

Max Length: 50

The order was Discontinued By User ID Name

Column Name: discontinued_date

Column Type: date

The order's Discontinue Date

Column Name: discontinued_time

Column Type: varchar

Max Length: 50

The order's Discontinue Time

Column Name: discontinue_reason_code
Column Type: varchar
Max Length: 50
The order's Discontinue Reason code

Column Name: discontinue_reason_text
Column Type: varchar
Max Length: 32766
The order's Discontinue Reason Text

Column Name: discontinue_reason_txt255
Column Type: varchar
Max Length: 255
The order's Discontinue Reason Text (255 character limit)

Column Name: discontinue_reason_value
Column Type: varchar
Max Length: 50
The order's Discontinue Reason value

Column Name: dis_delay_ent_code
Column Type: varchar
Max Length: 50
The order's Discontinue Delayed Entry code

Column Name: dis_delay_ent_value
Column Type: varchar
Max Length: 50
The order's Discontinue Delayed Entry value

Column Name: dis_effective_date
Column Type: date
The order's Discontinue Effective Dtae

Column Name: dis_effective_time
Column Type: varchar
Max Length: 50
The order's Discontinue Effective Time

Column Name: dis_ent_src_code
Column Type: varchar
Max Length: 50
The order's Discontinue Order Entry Source code

Column Name: dis_ent_src_value
Column Type: varchar
Max Length: 50
The order's Discontinue Order Entry Source value

Column Name: dispense_as_written_code
Column Type: varchar
Max Length: 50
The order's Dispense As Written code

Column Name: dispense_as_written_value
Column Type: varchar
Max Length: 50
The order's Dispense As Written value

Column Name: dispense_quantity
Column Type: varchar
Max Length: 50
The order's Dispense Quantity

Column Name: dispense_quantity_numeric
Column Type: numeric
The order's Dispense Quantity (numeric data type)

Column Name: dis_pract_id
Column Type: varchar
Max Length: 50
The order's Discontinue Practitioner ID

Column Name: dis_pract_name
Column Type: varchar
Max Length: 50
The order's Discontinue Practitioner Name

Column Name: dis_pr_not_enr
Column Type: varchar
Max Length: 50
The order's Discontinue Practitioner Who Is Not Enrolled

Column Name: dis_rd_bk_conf_code
Column Type: varchar
Max Length: 2
The order's Discontinue Read-Back Confirmation code

Column Name: dis_rd_bk_conf_value
Column Type: varchar
Max Length: 50
The order's Read-Back Confirmation value

Column Name: dis_review_date
Column Type: date
The order Discontinue Review Date

Column Name: dis_review_time
Column Type: varchar

Max Length: 50
The order's Discontinue Review Time

Column Name: dosage
Column Type: varchar
Max Length: 50
The order's Dosage (Strength of the order's Order Code, if a medication)

Column Name: dosage_form
Column Type: varchar
Max Length: 50
The order's Dosage Form (if a medication)

Column Name: dosage_numeric
Column Type: numeric
The order's Dosage (Strength of the order's Order Code, if a medication) (numeric data type)

Column Name: dosage_unit
Column Type: varchar
Max Length: 50
The order's Dosage Unit (Strength Unit of the order's Order Code, if a medication)

Column Name: effective_stop_date
Column Type: date
The order's Effective Stop date (the earlier of the order's Stop Date or DC Effective Date)

Column Name: effective_stop_is_dc
Column Type: varchar
Max Length: 1
The order's Effective Stop Date is the order's DC Effective Date

Column Name: effective_stop_time
Column Type: varchar
Max Length: 50
The order's Effective Stop Time (the earlier of the order's Stop Time or Effective DC Time)

Column Name: every_nth_day
Column Type: integer
The order's Every Nth Day value (for order's administered Not Daily according to an interval of days)

Column Name: every_nth_hour
Column Type: integer
The order's Every Nth Hour value (for order's administered Not Daily according to an interval of hours)

Column Name: every_nth_minute
Column Type: integer
The order's Every Nth Minute value (for order's administered Not Daily according to an interval of minutes)

Column Name: expected_days_supply
Column Type: integer

The order's Expected Days Supply or specified Days Supply

Column Name: fill_days_supply

Column Type: integer

The Days Supply actually being filled for the order, for NCPDP claims

Column Name: filler_filled_flag_code

Column Type: varchar

Max Length: 50

The order's Filled by the Filling System code

Column Name: filler_filled_flag_value

Column Type: varchar

Max Length: 50

The order's Filled by the Filling System value

Column Name: filler_order_number

Column Type: varchar

Max Length: 50

The order's Filler Order Number (supplied by the filling system)

Column Name: filler_order_number_on_dc

Column Type: varchar

Max Length: 50

The order's filler order number if rejected by the filling system

Column Name: fill_quantity

Column Type: integer

The order's Fill Quantity, for NCPDP claims

Column Name: first_dose_code

Column Type: varchar

Max Length: 50

The order's First Dose code (Does this order represent a first dose of this medication for the client at this facility)

Column Name: first_dose_value

Column Type: varchar

Max Length: 50

The order's First Dose value (Does this order represent a first dose of this medication for the client at this facility)

Column Name: frequency_description

Column Type: varchar

Max Length: 50

The order's Frequency Code description

Column Name: give_init_dose_now_code

Column Type: varchar

Max Length: 50

The order's Give Initial Dose Now code

Column Name: give_init_dose_now_value

Column Type: varchar

Max Length: 50

The order's Give Initial Dose Now value

Column Name: icd_9_description

Column Type: varchar

Max Length: 50

The order's ICD9 diagnosis code description

Column Name: last_action_date

Column Type: date

The order's Last Action Date

Column Name: last_action_taken_code

Column Type: varchar

Max Length: 50

The order's Last Action Taken code

Column Name: last_action_taken_value

Column Type: varchar

Max Length: 50

The order's Last Action Taken value

Column Name: last_action_val_code

Column Type: varchar

Max Length: 50

The order's Last Action Validated code

Column Name: last_action_val_value

Column Type: varchar

Max Length: 50

The order's Last Action Validated value

Column Name: last_billed_date

Column Type: date

The order's Last Billed Date

Column Name: last_post_service_date

Column Type: date

The order's last Billing Post Service Date

Column Name: last_renew_by

Column Type: varchar

Max Length: 50

The order's Last Renewed By User

Column Name: last_renew_by_option

Column Type: varchar
Max Length: 50
The order's Last Renewed By (option) User

Column Name: last_renew_by_user_id
Column Type: varchar
Max Length: 50
The order's Last Renewed By User ID

Column Name: last_renew_by_user_name
Column Type: varchar
Max Length: 50
The order's Last Renewed By User ID Name

Column Name: last_renew_date
Column Type: date
The order's Last Renew Date

Column Name: last_renew_delay_ent_code
Column Type: varchar
Max Length: 50
The order's Last Renew Delayed Entry code

Column Name: last_renew_delay_ent_value
Column Type: varchar
Max Length: 50
The order's Last Renew Delayed Entry value

Column Name: last_renew_eff_date
Column Type: date
The order's Last Renew Effective Date

Column Name: last_renew_eff_time
Column Type: varchar
Max Length: 50
The order's Last Renew Effective Time

Column Name: last_renew_ent_src_code
Column Type: varchar
Max Length: 50
The order's Last Renew Order Entry Source code

Column Name: last_renew_ent_src_value
Column Type: varchar
Max Length: 50
The order's Last Renew Order Entry Source value

Column Name: last_renew_num_days
Column Type: varchar
Max Length: 50

The order's Last Renew For Number of Days

Column Name: last_renew_num_hrs

Column Type: varchar

Max Length: 50

The order's Last Renew For Number of Hours

Column Name: last_renew_num_mins

Column Type: varchar

Max Length: 50

The order's Last Renew for Number of Minutes

Column Name: last_renew_pract_id

Column Type: varchar

Max Length: 50

The order's Last Renew Practitioner ID

Column Name: last_renew_pract_name

Column Type: varchar

Max Length: 50

The order's Last Renew Practitioner Name

Column Name: last_renew_pr_nt_enr

Column Type: varchar

Max Length: 50

The order's Last Renew Practitioner Who Is Not Enrolled

Column Name: last_renew_reason_code

Column Type: varchar

Max Length: 50

The order's Last Renew Reason code

Column Name: last_renew_reason_text

Column Type: varchar

Max Length: 32766

The order's Last Renew Reason Text

Column Name: last_renew_reason_txt255

Column Type: varchar

Max Length: 255

The order's Last Renew Reason Text (255 character limit)

Column Name: last_renew_reason_value

Column Type: varchar

Max Length: 50

The order's Last Renew Reason value

Column Name: last_renew_review_dt

Column Type: date

The order's Last Renew Review Date

Column Name: last_renew_rev_time
Column Type: varchar
Max Length: 50
The order's Last Renew Review Time

Column Name: last_renew_stop_date
Column Type: date
The order's Last Renew Stop Date

Column Name: last_renew_stop_time
Column Type: varchar
Max Length: 50
The order's Last Renew Stop Time

Column Name: last_renew_time
Column Type: varchar
Max Length: 50
The order's Last Renew Time

Column Name: last_renw_rd_bk_conf_code
Column Type: varchar
Max Length: 2
The order's Last Renew Read-Back Confirmation code

Column Name: last_renw_rd_bk_conf_value
Column Type: varchar
Max Length: 50
The order's Last Renew Read-Back Confirmation value

Column Name: last_update_data_entry_by
Column Type: varchar
Max Length: 50
The order's last update data entry by User

Column Name: last_update_data_entry_by_option
Column Type: varchar
Max Length: 50
The order's last update data entry by (option) User

Column Name: last_update_data_entry_date
Column Type: date
The order's last update data entry date

Column Name: last_update_data_entry_time
Column Type: varchar
Max Length: 50
The order's last update data entry time

Column Name: last_upd_data_entry_usrid

Column Type: varchar
Max Length: 50
The order's last update data entry User Id

Column Name: last_upd_data_entry_usrnm
Column Type: varchar
Max Length: 50
The order's last update data entry User ID Name

Column Name: last_used_fill_number
Column Type: integer
The order's last used fill number, for NCPDP claims

Column Name: latest_hold_entry_byopt
Column Type: varchar
Max Length: 50
The order's latest Hold data entry by (option) User

Column Name: latest_hold_by_user_id
Column Type: varchar
Max Length: 50
The order's latest Hold data entry by User ID

Column Name: latest_hold_by_user_name
Column Type: varchar
Max Length: 50
The order's latest Hold data entry by User ID Name

Column Name: latest_hold_eff_date
Column Type: date
The order's latest Hold Effective Date

Column Name: latest_hold_eff_time
Column Type: varchar
Max Length: 50
The order's latest Hold Effective Time

Column Name: latest_hold_entry_by
Column Type: varchar
Max Length: 50
The order's latest data entry by User

Column Name: latest_hold_entry_date
Column Type: date
The order's latest Hold entry date

Column Name: latest_hold_entry_time
Column Type: varchar
Max Length: 50
The order's latest Hold entry time

Column Name: latest_hold_pract_id

Column Type: varchar

Max Length: 50

The order's latest Hold Practitioner ID

Column Name: latest_hold_pract_name

Column Type: varchar

Max Length: 50

The order's latest Hold Practitioner Name

Column Name: latest_hold_pr_not_enr

Column Type: varchar

Max Length: 50

The order's latest Hold Practitioner Who Is Not Enrolled

Column Name: latest_hold_rd_bk_conf_code

Column Type: varchar

Max Length: 2

The order's latest Hold Read-Back Confirmation code

Column Name: latest_hold_rd_bk_conf_value

Column Type: varchar

Max Length: 50

The order's latest Hold Read-Back Confirmation value

Column Name: latest_hold_reason_code

Column Type: varchar

Max Length: 50

The order's latest Hold Reason code

Column Name: latest_hold_reason_text

Column Type: varchar

Max Length: 32766

The order's latest Hold Reason Text

Column Name: latest_hold_reason_value

Column Type: varchar

Max Length: 50

The order's latest Hold reason value

Column Name: latest_hold_reas_txt255

Column Type: varchar

Max Length: 255

The order's latest Hold reason Text (255 character limit)

Column Name: latest_hold_review_date

Column Type: date

The order's latest Hold Review Date

Column Name: latest_hold_review_time

Column Type: varchar

Max Length: 50

The order's latest Hold Review Time

Column Name: latest_resm_rd_bk_conf_code

Column Type: varchar

Max Length: 2

The order's latest Resume Read-Back Confirmation code

Column Name: latest_resm_rd_bk_conf_value

Column Type: varchar

Max Length: 50

The order's latest Resume Read-Back Confirmation value

Column Name: latest_resume_entry_byopt

Column Type: varchar

Max Length: 50

The order's latest Resume data entry by (option) User

Column Name: latest_resume_by_user_id

Column Type: varchar

Max Length: 50

The order's latest Resume data entry by User ID

Column Name: latest_resume_by_username

Column Type: varchar

Max Length: 50

The order's latest Resume data entry by User ID Name

Column Name: latest_resume_eff_date

Column Type: date

The order's latest Resume Effective Date

Column Name: latest_resume_eff_time

Column Type: varchar

Max Length: 50

The order's latest Resume Effective Time

Column Name: latest_resume_entry_by

Column Type: varchar

Max Length: 50

The order's latest Resume data entry by User

Column Name: latest_resume_entry_date

Column Type: date

The order's latest Resume data entry date

Column Name: latest_resume_entry_time

Column Type: varchar

Max Length: 50

The order's latest Resume data entry time

Column Name: latest_resume_pract_id

Column Type: varchar

Max Length: 50

The order's latest Resume Practitioner ID

Column Name: latest_resume_pract_name

Column Type: varchar

Max Length: 50

The order's latest Resume Practitioner Name

Column Name: latest_resume_pr_not_enr

Column Type: varchar

Max Length: 50

The order's latest Resume Practitioner Who Is Not Enrolled

Column Name: latest_resume_reason_code

Column Type: varchar

Max Length: 50

The order's latest Resume Reason code

Column Name: latest_resume_reason_text

Column Type: varchar

Max Length: 32766

The order's latest Resume Reason Text

Column Name: latest_resume_reas_txt255

Column Type: varchar

Max Length: 255

The order's latest Resume Reason Text (255 character limit)

Column Name: latest_resume_reason_value

Column Type: varchar

Max Length: 50

The order's latest Resume Reason value

Column Name: latest_resume_review_date

Column Type: date

The order's latest Resume Review Date

Column Name: latest_resume_review_time

Column Type: varchar

Max Length: 50

The order's latest Resume Review Time

Column Name: make_orders_open_end_code

Column Type: varchar

Max Length: 50

The order's Make Order OPen-Ended code

Column Name: make_orders_open_end_value

Column Type: varchar

Max Length: 50

The order's Make Order Open-Ended value

Column Name: med_category_code

Column Type: varchar

Max Length: 255

The order's Medication Category code (from the order's Order Code, for medications)

Column Name: med_category_value_long

Column Type: varchar

Max Length: 4096

The order's Medication Category value (long) (from the order's Order Code, for medications)

Column Name: med_category_value_short

Column Type: varchar

Max Length: 255

The order's Medication Category value (short) (from the order's Order Code, for medications)

Column Name: non_formulary_override

Column Type: varchar

Max Length: 80

The order's Non-Formulary Override text

Column Name: non_formulary_ovrd_code

Column Type: varchar

Max Length: 50

The order's Non-formulary Override code

Column Name: non_formulary_ovrd_value

Column Type: varchar

Max Length: 50

The order's Non-formulary Override value

Column Name: number_of_refills

Column Type: varchar

Max Length: 50

The order's Number of Refill Allowed

Column Name: number_of_refills_numeric

Column Type: integer

The order's Number of Refill Allowed (numeric data type)

Column Name: one_time_only_code

Column Type: varchar

Max Length: 50

The order's One-time-Only code

Column Name: one_time_only_value

Column Type: varchar

Max Length: 50

The order's One-Time-Only value

Column Name: order_category_code

Column Type: varchar

Max Length: 50

The order's Order Category code (Leave, Discharge, History-Only, Other)

Column Name: order_category_value

Column Type: varchar

Max Length: 50

The order's Order Category value (Leave, Discharge, History-Only, Other)

Column Name: order_changed_code

Column Type: varchar

Max Length: 50

The order's Order Changed code

Column Name: order_changed_value

Column Type: varchar

Max Length: 50

The order's Order Changed value

Column Name: order_date

Column Type: date

The order's Order Date

Column Name: order_description

Column Type: varchar

Max Length: 100

The order's Order Code Description

Column Name: order_entry_source_code

Column Type: varchar

Max Length: 50

The order's Order Entry Source code (Create New Order)

Column Name: order_entry_source_value

Column Type: varchar

Max Length: 50

The order's Order Entry Source value (Create New Order)

Column Name: order_guidelines

Column Type: varchar

Max Length: 32766

The order's Order Guidelines (from the order's Order Code)

Column Name: order_guidelines_255
Column Type: varchar
Max Length: 255
The order's Order Guidelines (from the order's Order Code) (255 character limit)

Column Name: ordering_pract_id
Column Type: varchar
Max Length: 50
The order's Ordering Practitioner ID

Column Name: ordering_pract_name
Column Type: varchar
Max Length: 50
The order's Ordering Practitioner Name

Column Name: ordering_pr_not_enr
Column Type: varchar
Max Length: 50
The order's Ordering Practitioner Who Is Not Enrolled

Column Name: order_num_plus_rx_num
Column Type: varchar
Max Length: 50
Order number plus Rx Number

Column Name: order_status_code
Column Type: varchar
Max Length: 50
The order's Order Status code

Column Name: order_status_value
Column Type: varchar
Max Length: 50
The order's Order Status code

Column Name: order_text
Column Type: varchar
Max Length: 32766
The order's Order Text

Column Name: order_text_255
Column Type: varchar
Max Length: 255
The order's Order Text (255 character limit)

Column Name: order_time
Column Type: varchar
Max Length: 50
The order's Order Time

Column Name: order_type_category_code
Column Type: varchar
Max Length: 10
The order's Order Type Category code

Column Name: order_type_category_value
Column Type: varchar
Max Length: 50
The order's Order Type Category value

Column Name: order_type_code
Column Type: varchar
Max Length: 50
The order's Order Type code

Column Name: order_type_value
Column Type: varchar
Max Length: 50
The order's Order Type value

Column Name: order_unique_id
Column Type: varchar
Max Length: 50
The order's Order Number

Column Name: original_duration
Column Type: varchar
Max Length: 50
The order's original Duration

Column Name: original_dur_days
Column Type: varchar
Max Length: 50
The order's original Duration (Days)

Column Name: original_dur_days_numeric
Column Type: integer
The order's original Duration (Days) (numeric data type)

Column Name: original_dur_hrs
Column Type: varchar
Max Length: 50
The order's original Duration (Hours)

Column Name: original_dur_hrs_numeric
Column Type: integer
The order's original Duration (Hours) (numeric data type)

Column Name: original_dur_mins
Column Type: varchar

Max Length: 50
The order's original Duration (Minutes)

Column Name: original_dur_mins_numeric
Column Type: integer
The order's original Duration (Minutes) (numeric data type)

Column Name: original_stop_date
Column Type: date
The order's original Stop Date

Column Name: original_stop_time
Column Type: varchar
Max Length: 50
The order's original Stop Time

Column Name: pm_0600_1130pm_code
Column Type: varchar
Max Length: 50
The order's specified Hours of Administration codes between 6:00 PM and 11:30 PM

Column Name: pm_0600_1130pm_value
Column Type: varchar
Max Length: 100
The order's specified Hours of Administration values between 6:00 PM and 11:30 PM

Column Name: pm_noon_0530pm_code
Column Type: varchar
Max Length: 50
The order's specified Hours of Administration codes between 12:00 PM (Noon) and 5:30 PM

Column Name: pm_noon_0530pm_value
Column Type: varchar
Max Length: 4096
The order's specified Hours of Administration values between 12:00 PM (Noon) and 5:30 PM

Column Name: pre_auth_link
Column Type: varchar
Max Length: 50
The order's link to a Pre-Authorized order

Column Name: problems_code
Column Type: varchar
Max Length: 4096
The order's Associated Problems codes

Column Name: problems_value
Column Type: varchar
Max Length: 4096
The order's Associated Problems values

Column Name: quantity
Column Type: varchar
Max Length: 50
The order's Quantity / Dose per administration

Column Name: quantity_numeric
Column Type: numeric
The order's Quantity / Dose per administration (numeric data type)

Column Name: quantity_unit
Column Type: varchar
Max Length: 50
The order's Quantity / Dose per administration Unit

Column Name: rate_amount
Column Type: varchar
Max Length: 50
The order's Rate Amount (IV orders only)

Column Name: rate_unit_code
Column Type: varchar
Max Length: 50
The order's Rate Unit code (IV orders only)

Column Name: rate_unit_value
Column Type: varchar
Max Length: 50
The order's Rate Unit value (IV ordders only)

Column Name: read_back_confirm_code
Column Type: varchar
Max Length: 2
The order's Read-Back Confirmation code (Create New Order)

Column Name: read_back_confirm_value
Column Type: varchar
Max Length: 50
The order's Read-Back Confirmation value (Create New Order)

Column Name: reason_code
Column Type: varchar
Max Length: 32000
The order's Reason Code

Column Name: reason_text
Column Type: varchar
Max Length: 32766
The order's Reason Text

Column Name: reason_text_255
Column Type: varchar
Max Length: 255
The order's Reson Text (255 character limit)

Column Name: reason_value
Column Type: varchar
Max Length: 32000
The order's Reason value

Column Name: results_status_code
Column Type: varchar
Max Length: 20
The order's Results Status code

Column Name: results_status_date
Column Type: date
The order's Results Status date

Column Name: results_status_time
Column Type: varchar
Max Length: 10
The order's Results Status time

Column Name: results_status_value
Column Type: varchar
Max Length: 200
The order's Results Status value

Column Name: routine_or_prn_code
Column Type: varchar
Max Length: 50
The order's Routine / PRN / STAT / Other code

Column Name: routine_or_prn_value
Column Type: varchar
Max Length: 50
The order's Routine / PRN / STAT / Other value

Column Name: self_administered_code
Column Type: varchar
Max Length: 50
The order's Self-Administered code

Column Name: self_administered_value
Column Type: varchar
Max Length: 50
The order's Self-Administered value

Column Name: special_instructions

Column Type: varchar
Max Length: 32766
The order's Special/Additional Instructions

Column Name: special_instructions_255
Column Type: varchar
Max Length: 255
The order's Special/Additional Instructions (255 character limit)

Column Name: start_date
Column Type: date
The order's Start Date

Column Name: start_time
Column Type: varchar
Max Length: 50
The order's Start Time

Column Name: times_24_hour
Column Type: varchar
Max Length: 50
The order's Times / 24 Hours value

Column Name: times_24_hour_numeric
Column Type: integer
The order's Times / 24 Hours value (numeric data type)

Column Name: treatment_setting_code
Column Type: varchar
Max Length: 50
The Treatment Setting code of the client Episode for the order

Column Name: treatment_setting_value
Column Type: varchar
Max Length: 50
The Treatment Setting value of the client Episode for the order

Column Name: unique_session_id_create
Column Type: varchar
Max Length: 50
The Unique Session ID from when the order was created

Column Name: unique_session_id_latest
Column Type: varchar
Max Length: 50
The Unique Session ID from when the order was last updated

Column Name: uses_ssi_instructions
Column Type: varchar
Max Length: 1

Y/N flag indicating whether the order uses Sliding Scale Insulin instructions

Column Name: validated_by

Column Type: varchar

Max Length: 50

The order's Validated By User

Column Name: validated_by_option

Column Type: varchar

Max Length: 50

The order's Validate data entry by (option) User

Column Name: validated_by_user_id

Column Type: varchar

Max Length: 50

The order's Validate data entry by User Id

Column Name: validated_by_user_name

Column Type: varchar

Max Length: 50

The order's Validate data entry by User ID Name

Column Name: validated_date

Column Type: date

The order's Validate date entry date

Column Name: validate_delay_ent_code

Column Type: varchar

Max Length: 50

The order's Validate Delayed Entry code

Column Name: validate_delay_ent_value

Column Type: varchar

Max Length: 50

The order's Validate Delayed Entry value

Column Name: validated_time

Column Type: varchar

Max Length: 50

The order's Validate data entry time

Column Name: validate_ent_src_code

Column Type: varchar

Max Length: 50

The order's Validate Order Entry Source code

Column Name: validate_ent_src_value

Column Type: varchar

Max Length: 50

The order's Validate Order Entry Source value

Column Name: validate_pract_id
Column Type: varchar
Max Length: 50
The order's Validate Practitioner ID

Column Name: validate_pract_name
Column Type: varchar
Max Length: 50
The order's Validate Practitioner Name

Column Name: validate_pr_not_enr
Column Type: varchar
Max Length: 50
The order's Validate Practitioner Who Is Not Enrolled

Column Name: validate_reason_code
Column Type: varchar
Max Length: 50
The order's Validate Reason code

Column Name: validate_reason_text
Column Type: varchar
Max Length: 32766
The order's Validate Reason Text

Column Name: validate_reason_txt255
Column Type: varchar
Max Length: 255
The order's Validate Reason Text (255 character limit)

Column Name: validate_reason_value
Column Type: varchar
Max Length: 50
The order's Validate Reason value

Column Name: validate_review_date
Column Type: date
The order's Validate Review Date

Column Name: validate_review_time
Column Type: varchar
Max Length: 50
The order's Validate Review Time

Column Name: variable_sort_data_1
Column Type: varchar
Max Length: 100
Variable Sort Field 1 (System Use Only).

Column Name: v_dosage_lab_test
Column Type: varchar
Max Length: 32766
The order's Order Guidelines (from the order's Order Code)

Column Name: v_dosage_lab_test_255
Column Type: varchar
Max Length: 255
The order's Order Guidelines (from the order's Order Code) (255 character limit)

Documentation for form: Results_Reconciliation

Table Name: SYSTEM.results_msg_assignment

Table Description: This table returns any HL7 transmissions which were resolved using the 'Results Reconciliation' form.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer
The system code in which the HL7 message was reconciled

Column Name: PATID
Column Type: varchar
Max Length: 20
The Client ID within the Avatar system

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The 'User Description' of the user which last updated the row

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The 'User Description' of the user which last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated

Column Name: data_entry_time
Column Type: varchar

Max Length: 50
The time the row was last updated

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The User ID of the user which last updated the row

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The 'User Description' of the user which last updated the row.

Column Name: date_of_birth
Column Type: date
The Client's date of birth

Column Name: external_PATID
Column Type: varchar
Max Length: 32000
The ID of the Client within the HL7 message

Column Name: message_index
Column Type: varchar
Max Length: 50
The unique ID for the HL7 message

Column Name: message_status
Column Type: varchar
Max Length: 50
The message status

Column Name: observation_date
Column Type: date
'Observation Date'

Column Name: patient_name
Column Type: varchar
Max Length: 32000
The name associated with the PATID

Column Name: patient_sex
Column Type: varchar
Max Length: 32000
The Client's gender

Column Name: universal_svc_id_value
Column Type: varchar
Max Length: 32000
'Universal Service ID Value'

Documentation for form: Results_Document_Upload

Table Name: SYSTEM.results_upload

Table Description: This table contains additional values for results entered in the 'Results Document Upload' form.

Column Name: ID
Column Type: integer

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: JOIN_RESULT_DETAIL_UPLOAD
Column Type: varchar
Max Length: 50
Results Detail table ID

Column Name: JOIN_RESULT_HEADER
Column Type: varchar
Max Length: 50
Results Header table ID

Column Name: JOIN_TO_DOCUMENT_IMAGE
Column Type: varchar
Max Length: 1028
The id of the associated image in DocM.DocumentImage table (if provided)

Column Name: PATID
Column Type: varchar
Max Length: 20
Patient ID

Column Name: additional_notes

Column Type: varchar

Max Length: 50

Additional Notes

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 50

The user name that last updated the row.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_offset

Column Type: numeric

The offset in hours from UTC on when the data was saved.

Column Name: data_entry_time

Column Type: varchar

Max Length: 50

The time the row was last updated.

Column Name: data_entry_time_j

Column Type: time

The time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

The time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

The short abbreviation for the timezone.

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 50

The 'User ID' who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The 'User Description' of the user which last updated the row.

Column Name: data_entry_utc

Column Type: timestamp

The UTC date and time the data was saved.

Column Name: fhir_diag_report_id

Column Type: varchar

Max Length: 1028

The id of the associated diagnostic report in CareFabric diagnostic report service

Column Name: order_number

Column Type: varchar

Max Length: 50

OE Order Number

Column Name: results_status_code

Column Type: varchar

Max Length: 50

Results Status code

Column Name: results_status_value

Column Type: varchar

Max Length: 50

Results Status value

Column Name: reviewing_provider

Column Type: varchar

Max Length: 50

Reviewing Provider

Column Name: staff_to_notify

Column Type: varchar

Max Length: 50

Additional Staff Member to Notify

Table Name: SYSTEM.poc_results_link

Table Description: This table returns a link between modeled forms and SYSTEM.results_header when filed through 'POC Results Entry'

Column Name: ID

Column Type: integer

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: JOIN_RESULT_HEADER

Column Type: varchar

Max Length: 50

Results Header table unique ID

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the data.

Column Name: admin_unique_id

Column Type: varchar

Max Length: 50

The collection related to this POC result.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user name that last updated this data row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The user name that last updated this data row.

Column Name: data_entry_date

Column Type: date

The date when this data row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_source
Column Type: varchar
Max Length: 255
The source that last updated this data row.

Column Name: data_entry_time
Column Type: varchar
Max Length: 15
The time when this data row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user id that last updated this data row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name that last updated this data row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: form_CSMid
Column Type: varchar
Max Length: 50
Internal modeled form ID.

Column Name: form_desc
Column Type: varchar
Max Length: 50

Modeled form name.

Column Name: form_historic

Column Type: varchar

Max Length: 50

Historic associated with modeled form.

Column Name: form_id

Column Type: varchar

Max Length: 50

Internal modeled form ID.

Column Name: option_desc

Column Type: varchar

Max Length: 80

The option name that last updated this data row.

Column Name: option_id

Column Type: varchar

Max Length: 20

The option identifier that last updated this data_row.

Documentation for form: Funding_Source_Service_Authorization

Table Name: SYSTEM.service_auth_detail

Table Description: This table returns service authorization information from 'Contracting Provider Service Authorization', 'Funding Source Service Authorization', 'Service Authorization', and 'Service Authorization (Unlimited Codes)' forms.

Column Name: ID
Column Type: integer

Column Name: AUTuniqueid
Column Type: varchar
Max Length: 50
The unique ID of the service authorization.

Column Name: FACILITY
Column Type: integer
The system code the service authorization is defined in.

Column Name: FUNDSRCID
Column Type: varchar
Max Length: 50
The ID number of the funding source this authorization applies to.

Column Name: GUID
Column Type: varchar
Max Length: 50
An ID number for the authorization that is likely to be unique, even on other system codes.

Column Name: JOIN_TO_contract_CORuniqueid
Column Type: varchar
Max Length: 50
The unique ID of the funding source's registration.

Column Name: JOIN_TO_member_CONuniqueid
Column Type: varchar
Max Length: 50
The unique ID of the client's enrollment in the funding source's plan.

Column Name: JOIN_TO_provider_REGuniqueid

Column Type: varchar
Max Length: 50
The unique ID of the contracting provider's registration history.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the service authorization.

Column Name: PLAN_ID
Column Type: varchar
Max Length: 50
The code for 'Benefit Plan'.

Column Name: PROVID
Column Type: varchar
Max Length: 50
The ID number of the contracting provider this authorization applies to.

Column Name: UTCTimeStamp
Column Type: timestamp
The date and time the authorization was made, in coordinated universal time.

Column Name: account_code
Column Type: varchar
Max Length: 50
The code for 'Account'.

Column Name: account_level
Column Type: varchar
Max Length: 50
The level of the budget tracking account.

Column Name: account_level_name
Column Type: varchar
Max Length: 50
The name of the budget tracking account level.

Column Name: account_status_code
Column Type: varchar
Max Length: 50
The code for 'Status'.

Column Name: account_status_value
Column Type: varchar
Max Length: 50
The description associated with account_status_code. See account_status_code for more information.

Column Name: account_value
Column Type: varchar

Max Length: 50

The description associated with account_code. See account_code for more information.

Column Name: auth_grouping_code

Column Type: varchar

Max Length: 50

The code for 'Authorization Grouping'.

Column Name: auth_grouping_value

Column Type: varchar

Max Length: 50

The description associated with auth_grouping_code. See auth_grouping_code for more information.

Column Name: auth_grp_or_indiv_code

Column Type: varchar

Max Length: 50

The code for 'Individual Authorizations Or Authorization Grouping'.

Column Name: auth_grp_or_indiv_value

Column Type: varchar

Max Length: 50

The description associated with auth_grp_or_indiv_code. See auth_grp_or_indiv_code for more information.

Column Name: auth_level_care_code

Column Type: varchar

Max Length: 50

The code for 'Authorized Level of Care'.

Column Name: auth_level_care_value

Column Type: varchar

Max Length: 50

The description associated with auth_level_care_code. See auth_level_care_code for more information.

Column Name: authorization_number

Column Type: varchar

Max Length: 50

'Authorization Number'

Column Name: auth_status_change_day

Column Type: varchar

Max Length: 50

The day the 'Current Authorization Status' changed from "Pending to Approved".

Column Name: auth_status_change_min

Column Type: varchar

Max Length: 50

The minute the 'Current Authorization Status' changed from "Pending to Approved".

Column Name: auth_status_change_sec

Column Type: varchar

Max Length: 50

The second the 'Current Authorization Status' changed from "Pending to Approved".

Column Name: auth_type_code

Column Type: varchar

Max Length: 50

The code for 'Authorization Type'.

Column Name: auth_type_value

Column Type: varchar

Max Length: 1024

The description associated with auth_type_code. See auth_type_code for more information.

Column Name: begin_date_of_auth

Column Type: date

'Begin Date of Authorization'

Column Name: clm_stat_inh_svc_cd

Column Type: varchar

Max Length: 50

The code for 'Claim Status for Inhibited Services'.

Column Name: clm_stat_inh_svc_val

Column Type: varchar

Max Length: 50

The description associated with clm_stat_inh_svc_code. See clm_stat_inh_svc_code for more information.

Column Name: clm_stat_reas_inh_svc_cd

Column Type: varchar

Max Length: 50

The code for 'Claim Status Reason for Inhibited Services'.

Column Name: clm_stat_reas_inh_svc_val

Column Type: varchar

Max Length: 50

The description associated with clm_stat_reas_inh_svc_code. See clm_stat_reas_inh_svc_code for more information.

Column Name: comments_on_auth

Column Type: varchar

Max Length: 32766

'Comments On Authorization'

Column Name: cont_prov_auth

Column Type: varchar

Max Length: 40

'Contracting Provider Authorization'

Column Name: cpauth_denied_amount

Column Type: numeric

The total estimated liability for denied member authorizations tied to contracting provider auth.

Column Name: curr_auth_stat_reas_code

Column Type: varchar

Max Length: 50

The code for 'Current Authorization Status Reason'.

Column Name: curr_auth_stat_reas_value

Column Type: varchar

Max Length: 50

The description associated with curr_auth_stat_reas_code. See curr_auth_stat_reas_code for more information.

Column Name: curr_auth_status_code

Column Type: varchar

Max Length: 50

The code for 'Current Authorization Status'.

Column Name: curr_auth_status_value

Column Type: varchar

Max Length: 50

The description associated with curr_auth_status_code. See curr_auth_status_code for more information.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user name that last updated the row of data.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 50

The user name that last updated the row of data.

Column Name: data_entry_date

Column Type: date

The date the row of data was last updated.

Column Name: data_entry_time

Column Type: varchar

Max Length: 50

The time the row of data was last updated.

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The user ID who last updated the row of data.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name who last updated the row of data.

Column Name: end_date_of_auth

Column Type: date

'End Date of Authorization'

Column Name: financial_eligibility

Column Type: varchar

Max Length: 32766

Information on the client's financial eligibility.

Column Name: funding_source_name

Column Type: varchar

Max Length: 50

The name of the funding source.

Column Name: inhibit_adj_code

Column Type: varchar

Max Length: 50

The code for 'Inhibit Adjudication For Services Claimed During Authorization Period'.

Column Name: inhibit_adj_value

Column Type: varchar

Max Length: 50

The description associated with inhibit_adj_code. See inhibit_adj_code for more information.

Column Name: inhibit_cpt_svc_code_code

Column Type: varchar

Max Length: 1024

The code for 'Exclude CPT Service Code'.

Column Name: inhibit_cpt_svc_code_val

Column Type: varchar

Max Length: 1024

The description associated with inhibit_cpt_svc_code_code. See inhibit_cpt_svc_code_code for more information.

Column Name: inhibit_procedure_group_cd

Column Type: varchar

Max Length: 1024

The code for 'Exclude Procedure Code Group Definition'.

Column Name: inhibit_procedure_group_val

Column Type: varchar

Max Length: 1024

The description associated with inhibit_procedure_group_code. See inhibit_procedure_group_code for more information.

Column Name: inhibit_revenue_code_code

Column Type: varchar
Max Length: 1024
The code for 'Exclude Revenue Code'.

Column Name: inhibit_revenue_code_val
Column Type: varchar
Max Length: 1024
The description associated with inhibit_revenue_code_code. See inhibit_revenue_code_code for more information.

Column Name: init_or_contin_auth_code
Column Type: varchar
Max Length: 50
The code for 'Initial Or Continuing Authorization'.

Column Name: init_or_contin_auth_value
Column Type: varchar
Max Length: 50
The description associated with init_or_contin_auth_code. See init_or_contin_auth_code for more information.

Column Name: internal_comments
Column Type: varchar
Max Length: 32766
'Internal Comments'

Column Name: jointoprimdiagnosis
Column Type: varchar
Max Length: 40
The unique ID of the primary diagnosis.

Column Name: jointosecdiagnosis
Column Type: varchar
Max Length: 40
The unique ID of the secondary diagnosis.

Column Name: letter_type_code
Column Type: varchar
Max Length: 50
The code for 'Letter Type'.

Column Name: letter_type_value
Column Type: varchar
Max Length: 50
The description associated with letter_type_code. See letter_type_code for more information.

Column Name: level_of_care_code
Column Type: varchar
Max Length: 50
The code for 'Primary Level of Care'.

Column Name: level_of_care_value

Column Type: varchar

Max Length: 50

The description associated with level_of_care_code. See level_of_care_code for more information.

Column Name: next_review_date

Column Type: date

'Next Review Date'

Column Name: option_desc

Column Type: varchar

Max Length: 50

The name of the form that last updated the row of data.

Column Name: option_id

Column Type: varchar

Max Length: 50

The unique ID of the form that last updated the row of data.

Column Name: original_data_entry_person

Column Type: varchar

Max Length: 50

The user name that originally entered this row of data.

Column Name: original_date_entry

Column Type: date

The date this row of data was originally updated.

Column Name: original_time_entry

Column Type: varchar

Max Length: 50

The time this row of data was originally updated.

Column Name: performing_provider

Column Type: varchar

Max Length: 50

The code for 'Performing Provider'.

Column Name: performing_prov_type

Column Type: varchar

Max Length: 50

The code for 'Provider Type'.

Column Name: performing_prv_type_value

Column Type: varchar

Max Length: 50

The description associated with performing_prv_type_code. See performing_prv_type_code for more information.

Column Name: perf_provider_name

Column Type: varchar

Max Length: 50

The description of the associated performing_provider. See performing_provider for more information.

Column Name: planned_admit_date

Column Type: date

'Planned Admit Date'

Column Name: prevent_push_code

Column Type: varchar

Max Length: 50

The code for 'Prevent Approved Services From Pushing To Parent System'.

Column Name: prevent_push_value

Column Type: varchar

Max Length: 50

The description associated with prevent_push_code. See prevent_push_code for more information.

Column Name: primary_account_code

Column Type: varchar

Max Length: 50

'Primary Account'

Column Name: primary_account_value

Column Type: varchar

Max Length: 50

The description associated with primary_account_code. See primary_account_code for more information.

Column Name: primary_diagnosis

Column Type: varchar

Max Length: 50

'Primary Diagnosis Authorized'

Column Name: prim_dsm4_diag_code

Column Type: varchar

Max Length: 40

The DSM-IV code for the primary diagnosis.

Column Name: prim_dsm4_diag_value

Column Type: varchar

Max Length: 40

The description associated with prim_dsm4_diag_code. See prim_dsm4_diag_code for more information.

Column Name: prim_icd10_diag_code

Column Type: varchar

Max Length: 40

The ICD-10 code for the primary diagnosis.

Column Name: prim_icd10_diag_value

Column Type: varchar

Max Length: 40

The description associated with prim_icd10_diag_code. See prim_icd10_diag_code for more information.

Column Name: prim_icd9_diag_code

Column Type: varchar

Max Length: 40

The ICD-9 code for the primary diagnosis.

Column Name: prim_icd9_diag_value

Column Type: varchar

Max Length: 40

The description associated with prim_icd9_diag_code. See prim_icd9_diag_code for more information.

Column Name: provider_connect_user

Column Type: varchar

Max Length: 150

The provider connect user ID associated with this request.

Column Name: provider_name

Column Type: varchar

Max Length: 50

The description of the associated PROVID, See PROVID for more information.

Column Name: provider_to_be_auth

Column Type: varchar

Max Length: 50

'Provider to be Authorized'

Column Name: prov_pgm_link

Column Type: varchar

Max Length: 50

The unique ID of the provider's program.

Column Name: prov_pgm_name

Column Type: varchar

Max Length: 50

The name of the provider's program.

Column Name: prov_submitting_request

Column Type: varchar

Max Length: 50

The ID of the contracting provider that submitted this service authorization request.

Column Name: rem_liab_total

Column Type: numeric

'Remaining Total Liability'

Column Name: sec_dsm4_diag_code

Column Type: varchar

Max Length: 40

The DSM-IV code for the secondary diagnosis.

Column Name: sec_dsm4_diag_value

Column Type: varchar

Max Length: 40

The description associated with sec_dsm4_diag_code. See sec_dsm4_diag_code for more information.

Column Name: sec_icd10_diag_code

Column Type: varchar

Max Length: 40

The ICD-10 code for the secondary diagnosis.

Column Name: sec_icd10_diag_value

Column Type: varchar

Max Length: 40

The description associated with sec_icd10_diag_code. See sec_icd10_diag_code for more information.

Column Name: sec_icd9_diag_code

Column Type: varchar

Max Length: 40

The ICD-9 code for the secondary diagnosis.

Column Name: sec_icd9_diag_value

Column Type: varchar

Max Length: 40

The description associated with sec_icd9_diag_code. See sec_icd9_diag_code for more information.

Column Name: secondary_diagnosis

Column Type: varchar

Max Length: 50

'Secondary Diagnosis Authorized'

Column Name: status_code

Column Type: varchar

Max Length: 50

The code for 'Status'.

Column Name: status_value

Column Type: varchar

Max Length: 50

The description associated with status_code. See status_code for more information.

Column Name: total_estimated_liab

Column Type: numeric

'Total Estimated Liability'

Column Name: type_of_auth_code

Column Type: varchar

Max Length: 50

The code for 'Type Of Authorization'.

Column Name: type_of_auth_value

Column Type: varchar

Max Length: 50

The description associated with type_of_auth_code. See type_of_auth_code for more information.

Column Name: unique_case_idenfier

Column Type: varchar

Max Length: 50

'Associated Case'

Documentation for form: Funding_Source_Service_Authorization

Table Name: SYSTEM.service_auth_svc

Table Description: This table returns the allowance of services for an authorization from 'Contracting Provider Service Authorization', 'Funding Source Service Authorization', 'Service Authorization', and 'Service Authorization (Unlimited Codes)' forms.

Column Name: ID

Column Type: integer

Column Name: AUTUniqueID

Column Type: varchar

Max Length: 50

The unique ID of the service authorization.

Column Name: FACILITY

Column Type: integer

The system code the service authorization is defined in.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID the service authorization applies to.

Column Name: PROVID

Column Type: varchar

Max Length: 20

The ID of the authorized service provider.

Column Name: authorization_number

Column Type: varchar

Max Length: 50

'Authorization Number'

Column Name: begin_date_of_service
Column Type: date
'Begin Date of Service'

Column Name: claimed_units
Column Type: integer
The number of units of service already claimed under this authorization.

Column Name: end_date_of_service
Column Type: date
'End Date of Service'

Column Name: estimated_liability_code
Column Type: numeric
'Estimated Liability Code'

Column Name: frequency_limit
Column Type: numeric
'Frequency Limit'.

Column Name: frequency_periods
Column Type: numeric
'Frequency Periods'.

Column Name: frequency_type_code
Column Type: varchar
Max Length: 50
The code for 'Frequency Type'.

Column Name: frequency_type_value
Column Type: varchar
Max Length: 50
The description associated with frequency_type_code See frequency_type_code for more information.

Column Name: procedure_code
Column Type: varchar
Max Length: 50
The code for 'Code Authorized'.

Column Name: procedure_code_type
Column Type: varchar
Max Length: 50
The code for 'Procedure Code Type'.

Column Name: procedure_code_type_value
Column Type: varchar
Max Length: 50
The description associated with procedure_code_type_code. See procedure_code_type_code for more information.

Column Name: procedure_value

Column Type: varchar

Max Length: 50

The description associated with procedure_code. See procedure_code for more information.

Column Name: remain_liability

Column Type: numeric

The amount of liability the funding source has for this service.

Column Name: requested_units

Column Type: varchar

Max Length: 50

'Requested Units'

Column Name: row_number

Column Type: integer

The number of the authorized service within this authorization.

Column Name: units_authorized

Column Type: varchar

Max Length: 50

'Units Authorized'

Documentation for form: Service_Authorization

Table Name: SYSTEM.TAR_auth_defaults

Table Description: This table holds the high level default information for creating a service authorization from a TAR.

Column Name: ID

Column Type: integer

Column Name: FACILITY

Column Type: integer

The system code the service authorization defaults are defined in.

Column Name: FUNDSRCID

Column Type: varchar

Max Length: 50

Default funding source for authorization.

Column Name: PLAN_ID

Column Type: varchar

Max Length: 50

Default plan for authorization.

Column Name: auth_status_reason_code
Column Type: varchar
Max Length: 50
Default authorization status reason code.

Column Name: care_manager
Column Type: varchar
Max Length: 50
Default care manager for TAR authorization.

Column Name: claim_status_code
Column Type: varchar
Max Length: 50
Default claim status code for blackout days.

Column Name: claim_status_reason_code
Column Type: varchar
Max Length: 50
Default claim status reason code for blackout days.

Column Name: level_of_care_acute
Column Type: varchar
Max Length: 50
Acute authorized level of care.

Column Name: level_of_care_admin
Column Type: varchar
Max Length: 50
Admin authorized level of care.

Documentation for form: Service_Authorization

Table Name: SYSTEM.TAR_auth_defaults_svc

Table Description: This table holds the acute and admin procedure codes for creating a service authorization from a TAR.

Column Name: ID
Column Type: integer

Column Name: FACILITY
Column Type: integer
The system code the service authorization defaults are defined in.

Column Name: TAR_type_code

Column Type: varchar
Max Length: 50
The type of TAR authorization (AC - Acute Day / AD Admin Day).

Column Name: procedure_code
Column Type: varchar
Max Length: 50
Procedure code.

Column Name: procedure_code_type
Column Type: varchar
Max Length: 50
Type of procedure code.

Column Name: procedure_code_type_value
Column Type: varchar
Max Length: 50
Type of procedure code.

Column Name: procedure_value
Column Type: varchar
Max Length: 50
Procedure code.

Column Name: units_authorized
Column Type: varchar
Max Length: 50
Number of units authorized for procedure code.

Column Name: units_authorized_max
Column Type: varchar
Max Length: 50
Maximum number of units allowed for authorization.

Documentation for form: Service_Authorization

Documentation for form: Service_Authorization

Table Name: SYSTEM.service_auth_detail

Table Description: This table returns service authorization information from 'Contracting Provider Service Authorization', 'Funding Source Service Authorization', 'Service Authorization', and 'Service Authorization (Unlimited Codes)' forms.

Column Name: ID
Column Type: integer

Column Name: AUTuniqueid
Column Type: varchar
Max Length: 50
The unique ID of the service authorization.

Column Name: FACILITY
Column Type: integer
The system code the service authorization is defined in.

Column Name: FUNDSRCID
Column Type: varchar
Max Length: 50
The ID number of the funding source this authorization applies to.

Column Name: GUID
Column Type: varchar

Max Length: 50

An ID number for the authorization that is likely to be unique, even on other system codes.

Column Name: JOIN_TO_contract_CORuniqueid

Column Type: varchar

Max Length: 50

The unique ID of the funding source's registration.

Column Name: JOIN_TO_member_CONuniqueid

Column Type: varchar

Max Length: 50

The unique ID of the client's enrollment in the funding source's plan.

Column Name: JOIN_TO_provider_REGuniqueid

Column Type: varchar

Max Length: 50

The unique ID of the contracting provider's registration history.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the service authorization.

Column Name: PLAN_ID

Column Type: varchar

Max Length: 50

The code for 'Benefit Plan'.

Column Name: PROVID

Column Type: varchar

Max Length: 50

The ID number of the contracting provider this authorization applies to.

Column Name: UTCTimeStamp

Column Type: timestamp

The date and time the authorization was made, in coordinated universal time.

Column Name: account_code

Column Type: varchar

Max Length: 50

The code for 'Account'.

Column Name: account_level

Column Type: varchar

Max Length: 50

The level of the budget tracking account.

Column Name: account_level_name

Column Type: varchar

Max Length: 50

The name of the budget tracking account level.

Column Name: account_status_code

Column Type: varchar

Max Length: 50

The code for 'Status'.

Column Name: account_status_value

Column Type: varchar

Max Length: 50

The description associated with account_status_code. See account_status_code for more information.

Column Name: account_value

Column Type: varchar

Max Length: 50

The description associated with account_code. See account_code for more information.

Column Name: auth_grouping_code

Column Type: varchar

Max Length: 50

The code for 'Authorization Grouping'.

Column Name: auth_grouping_value

Column Type: varchar

Max Length: 50

The description associated with auth_grouping_code. See auth_grouping_code for more information.

Column Name: auth_grp_or_indiv_code

Column Type: varchar

Max Length: 50

The code for 'Individual Authorizations Or Authorization Grouping'.

Column Name: auth_grp_or_indiv_value

Column Type: varchar

Max Length: 50

The description associated with auth_grp_or_indiv_code. See auth_grp_or_indiv_code for more information.

Column Name: auth_level_care_code

Column Type: varchar

Max Length: 50

The code for 'Authorized Level of Care'.

Column Name: auth_level_care_value

Column Type: varchar

Max Length: 50

The description associated with auth_level_care_code. See auth_level_care_code for more information.

Column Name: authorization_number

Column Type: varchar

Max Length: 50
'Authorization Number'

Column Name: auth_status_change_day
Column Type: varchar
Max Length: 50
The day the 'Current Authorization Status' changed from "Pending to Approved".

Column Name: auth_status_change_min
Column Type: varchar
Max Length: 50
The minute the 'Current Authorization Status' changed from "Pending to Approved".

Column Name: auth_status_change_sec
Column Type: varchar
Max Length: 50
The second the 'Current Authorization Status' changed from "Pending to Approved".

Column Name: auth_type_code
Column Type: varchar
Max Length: 50
The code for 'Authorization Type'.

Column Name: auth_type_value
Column Type: varchar
Max Length: 1024
The description associated with auth_type_code. See auth_type_code for more information.

Column Name: begin_date_of_auth
Column Type: date
'Begin Date of Authorization'

Column Name: clm_stat_inh_svc_cd
Column Type: varchar
Max Length: 50
The code for 'Claim Status for Inhibited Services'.

Column Name: clm_stat_inh_svc_val
Column Type: varchar
Max Length: 50
The description associated with clm_stat_inh_svc_code. See clm_stat_inh_svc_code for more information.

Column Name: clm_stat_reas_inh_svc_cd
Column Type: varchar
Max Length: 50
The code for 'Claim Status Reason for Inhibited Services'.

Column Name: clm_stat_reas_inh_svc_val
Column Type: varchar
Max Length: 50

The description associated with clm_stat_reas_inh_svc_code. See clm_stat_reas_inh_svc_code for more information.

Column Name: comments_on_auth

Column Type: varchar

Max Length: 32766

'Comments On Authorization'

Column Name: cont_prov_auth

Column Type: varchar

Max Length: 40

'Contracting Provider Authorization'

Column Name: cpauth_denied_amount

Column Type: numeric

The total estimated liability for denied member authorizations tied to contracting provider auth.

Column Name: curr_auth_stat_reas_code

Column Type: varchar

Max Length: 50

The code for 'Current Authorization Status Reason'.

Column Name: curr_auth_stat_reas_value

Column Type: varchar

Max Length: 50

The description associated with curr_auth_stat_reas_code. See curr_auth_stat_reas_code for more information.

Column Name: curr_auth_status_code

Column Type: varchar

Max Length: 50

The code for 'Current Authorization Status'.

Column Name: curr_auth_status_value

Column Type: varchar

Max Length: 50

The description associated with curr_auth_status_code. See curr_auth_status_code for more information.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user name that last updated the row of data.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 50

The user name that last updated the row of data.

Column Name: data_entry_date

Column Type: date

The date the row of data was last updated.

Column Name: data_entry_time

Column Type: varchar

Max Length: 50

The time the row of data was last updated.

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The user ID who last updated the row of data.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name who last updated the row of data.

Column Name: end_date_of_auth

Column Type: date

'End Date of Authorization'

Column Name: financial_eligibility

Column Type: varchar

Max Length: 32766

Information on the client's financial eligibility.

Column Name: funding_source_name

Column Type: varchar

Max Length: 50

The name of the funding source.

Column Name: inhibit_adj_code

Column Type: varchar

Max Length: 50

The code for 'Inhibit Adjudication For Services Claimed During Authorization Period'.

Column Name: inhibit_adj_value

Column Type: varchar

Max Length: 50

The description associated with inhibit_adj_code. See inhibit_adj_code for more information.

Column Name: inhibit_cpt_svc_code_code

Column Type: varchar

Max Length: 1024

The code for 'Exclude CPT Service Code'.

Column Name: inhibit_cpt_svc_code_val

Column Type: varchar

Max Length: 1024

The description associated with inhibit_cpt_svc_code_code. See inhibit_cpt_svc_code_code for more information.

Column Name: inhibit_procedure_group_cd

Column Type: varchar

Max Length: 1024

The code for 'Exclude Procedure Code Group Definition'.

Column Name: inhibit_procedure_group_val

Column Type: varchar

Max Length: 1024

The description associated with inhibit_procedure_group_code. See inhibit_procedure_group_code for more information.

Column Name: inhibit_revenue_code_code

Column Type: varchar

Max Length: 1024

The code for 'Exclude Revenue Code'.

Column Name: inhibit_revenue_code_val

Column Type: varchar

Max Length: 1024

The description associated with inhibit_revenue_code_code. See inhibit_revenue_code_code for more information.

Column Name: init_or_contin_auth_code

Column Type: varchar

Max Length: 50

The code for 'Initial Or Continuing Authorization'.

Column Name: init_or_contin_auth_value

Column Type: varchar

Max Length: 50

The description associated with init_or_contin_auth_code. See init_or_contin_auth_code for more information.

Column Name: internal_comments

Column Type: varchar

Max Length: 32766

'Internal Comments'

Column Name: jointoprimdiagnosis

Column Type: varchar

Max Length: 40

The unique ID of the primary diagnosis.

Column Name: jointosecdiagnosis

Column Type: varchar

Max Length: 40

The unique ID of the secondary diagnosis.

Column Name: letter_type_code

Column Type: varchar

Max Length: 50

The code for 'Letter Type'.

Column Name: letter_type_value

Column Type: varchar

Max Length: 50

The description associated with letter_type_code. See letter_type_code for more information.

Column Name: level_of_care_code

Column Type: varchar

Max Length: 50

The code for 'Primary Level of Care'.

Column Name: level_of_care_value

Column Type: varchar

Max Length: 50

The description associated with level_of_care_code. See level_of_care_code for more information.

Column Name: next_review_date

Column Type: date

'Next Review Date'

Column Name: option_desc

Column Type: varchar

Max Length: 50

The name of the form that last updated the row of data.

Column Name: option_id

Column Type: varchar

Max Length: 50

The unique ID of the form that last updated the row of data.

Column Name: original_data_entry_person

Column Type: varchar

Max Length: 50

The user name that originally entered this row of data.

Column Name: original_date_entry

Column Type: date

The date this row of data was originally updated.

Column Name: original_time_entry

Column Type: varchar

Max Length: 50

The time this row of data was originally updated.

Column Name: performing_provider

Column Type: varchar
Max Length: 50
The code for 'Performing Provider'.

Column Name: performing_prov_type
Column Type: varchar
Max Length: 50
The code for 'Provider Type'.

Column Name: performing_prv_type_value
Column Type: varchar
Max Length: 50
The description associated with performing_prv_type_code. See performing_prv_type_code for more information.

Column Name: perf_provider_name
Column Type: varchar
Max Length: 50
The description of the associated performing_provider. See performing_provider for more information.

Column Name: planned_admit_date
Column Type: date
'Planned Admit Date'

Column Name: prevent_push_code
Column Type: varchar
Max Length: 50
The code for 'Prevent Approved Services From Pushing To Parent System'.

Column Name: prevent_push_value
Column Type: varchar
Max Length: 50
The description associated with prevent_push_code. See prevent_push_code for more information.

Column Name: primary_account_code
Column Type: varchar
Max Length: 50
'Primary Account'

Column Name: primary_account_value
Column Type: varchar
Max Length: 50
The description associated with primary_account_code. See primary_account_code for more information.

Column Name: primary_diagnosis
Column Type: varchar
Max Length: 50
'Primary Diagnosis Authorized'

Column Name: prim_dsm4_diag_code

Column Type: varchar
Max Length: 40
The DSM-IV code for the primary diagnosis.

Column Name: prim_dsm4_diag_value
Column Type: varchar
Max Length: 40
The description associated with prim_dsm4_diag_code. See prim_dsm4_diag_code for more information.

Column Name: prim_icd10_diag_code
Column Type: varchar
Max Length: 40
The ICD-10 code for the primary diagnosis.

Column Name: prim_icd10_diag_value
Column Type: varchar
Max Length: 40
The description associated with prim_icd10_diag_code. See prim_icd10_diag_code for more information.

Column Name: prim_icd9_diag_code
Column Type: varchar
Max Length: 40
The ICD-9 code for the primary diagnosis.

Column Name: prim_icd9_diag_value
Column Type: varchar
Max Length: 40
The description associated with prim_icd9_diag_code. See prim_icd9_diag_code for more information.

Column Name: provider_connect_user
Column Type: varchar
Max Length: 150
The provider connect user ID associated with this request.

Column Name: provider_name
Column Type: varchar
Max Length: 50
The description of the associated PROVID, See PROVID for more information.

Column Name: provider_to_be_auth
Column Type: varchar
Max Length: 50
'Provider to be Authorized'

Column Name: prov_pgm_link
Column Type: varchar
Max Length: 50
The unique ID of the provider's program.

Column Name: prov_pgm_name

Column Type: varchar
Max Length: 50
The name of the provider's program.

Column Name: prov_submitting_request
Column Type: varchar
Max Length: 50
The ID of the contracting provider that submitted this service authorization request.

Column Name: rem_liab_total
Column Type: numeric
'Remaining Total Liability'

Column Name: sec_dsm4_diag_code
Column Type: varchar
Max Length: 40
The DSM-IV code for the secondary diagnosis.

Column Name: sec_dsm4_diag_value
Column Type: varchar
Max Length: 40
The description associated with sec_dsm4_diag_code. See sec_dsm4_diag_code for more information.

Column Name: sec_icd10_diag_code
Column Type: varchar
Max Length: 40
The ICD-10 code for the secondary diagnosis.

Column Name: sec_icd10_diag_value
Column Type: varchar
Max Length: 40
The description associated with sec_icd10_diag_code. See sec_icd10_diag_code for more information.

Column Name: sec_icd9_diag_code
Column Type: varchar
Max Length: 40
The ICD-9 code for the secondary diagnosis.

Column Name: sec_icd9_diag_value
Column Type: varchar
Max Length: 40
The description associated with sec_icd9_diag_code. See sec_icd9_diag_code for more information.

Column Name: secondary_diagnosis
Column Type: varchar
Max Length: 50
'Secondary Diagnosis Authorized'

Column Name: status_code
Column Type: varchar

Max Length: 50
The code for 'Status'.

Column Name: status_value
Column Type: varchar
Max Length: 50
The description associated with status_code. See status_code for more information.

Column Name: total_estimated_liab
Column Type: numeric
'Total Estimated Liability'

Column Name: type_of_auth_code
Column Type: varchar
Max Length: 50
The code for 'Type Of Authorization'.

Column Name: type_of_auth_value
Column Type: varchar
Max Length: 50
The description associated with type_of_auth_code. See type_of_auth_code for more information.

Column Name: unique_case_idenfier
Column Type: varchar
Max Length: 50
'Associated Case'

Documentation for form: Service_Authorization

Table Name: SYSTEM.service_auth_ss_member

Table Description: The table returns site specific data associated with service authorization of a member.

Column Name: ID
Column Type: integer

Column Name: FACILITY
Column Type: integer
System Code the data is stored in

Column Name: PATID
Column Type: varchar
Max Length: 20
Avatar Client ID

Column Name: AUTuniqueid

Column Type: varchar
Max Length: 50
Unique service authorization ID for MSO member

Column Name: ss_date_1
Column Type: date
Site Specific Date 1

Column Name: ss_date_10
Column Type: date
Site Specific Date 10

Column Name: ss_date_2

Column Name: ss_multi_dict_10_codes
Column Type: varchar
Max Length: 50
'&' delimited list of Site Specific Multi Select Dictionary 10 codes. MSO Dictionary 10032.11 in Member file.

Column Name: ss_multi_dict_10_values

Column Type: varchar

Max Length: 200

The description associated with ss_multi_dict_10_codes. See ss_multi_dict_10_codes for more information.

Column Name: ss_multi_dict_1_codes

Column Type: varchar

Max Length: 50

'&' delimited list of Site Specific Multi Select Dictionary 1 codes. MSO Dictionary 10032.01 in Member file.

Column Name: ss_multi_dict_1_values

Column Type: varchar

Max Length: 200

The description associated with ss_multi_dict_1_codes. See ss_multi_dict_1_codes for more information.

Column Name: ss_multi_dict_2_codes

Column Type: varchar

Max Length: 50

'&' delimited list of Site Specific Multi Select Dictionary 2 codes. MSO Dictionary 10032.02 in Member file.

Column Name: ss_multi_dict_2_values

Column Type: varchar

Max Length: 200

The description associated with ss_multi_dict_2_codes. See ss_multi_dict_2_codes for more information.

Column Name: ss_multi_dict_3_codes

Column Type: varchar

Max Length: 50

'&' delimited list of Site Specific Multi Select Dictionary 3 codes. MSO Dictionary 10032.03 in Member file.

Column Name: ss_multi_dict_3_values

Column Type: varchar

Max Length: 200

The description associated with ss_multi_dict_3_codes. See ss_multi_dict_3_codes for more information.

Column Name: ss_multi_dict_4_codes

Column Type: varchar

Max Length: 50

'&' delimited list of Site Specific Multi Select Dictionary 4 codes. MSO Dictionary 10032.04 in Member file.

Column Name: ss_multi_dict_4_values

Column Type: varchar

Max Length: 200

The description associated with ss_multi_dict_4_codes. See ss_multi_dict_4_codes for more information.

Column Name: ss_multi_dict_5_codes

Column Type: varchar

Max Length: 50

'&' delimited list of Site Specific Multi Select Dictionary 5 codes. MSO Dictionary 10032.05 in Member file.

Column Name: ss_multi_dict_5_values

Column Type: varchar

Max Length: 200

The description associated with ss_multi_dict_5_codes. See ss_multi_dict_5_codes for more information.

Column Name: ss_multi_dict_6_codes

Column Type: varchar

Max Length: 50

'&' delimited list of Site Specific Multi Select Dictionary 6 codes. MSO Dictionary 10032.06 in Member file.

Column Name: ss_multi_dict_6_values

Column Type: varchar

Max Length: 200

The description associated with ss_multi_dict_6_codes. See ss_multi_dict_6_codes for more information.

Column Name: ss_multi_dict_7_codes

Column Type: varchar

Max Length: 50

'&' delimited list of Site Specific Multi Select Dictionary 7 codes. MSO Dictionary 10032.07 in Member file.

Column Name: ss_multi_dict_7_values

Column Type: varchar

Max Length: 200

The description associated with ss_multi_dict_7_codes. See ss_multi_dict_7_codes for more information.

Column Name: ss_multi_dict_8_codes

Column Type: varchar

Max Length: 50

'&' delimited list of Site Specific Multi Select Dictionary 8 codes. MSO Dictionary 10032.08 in Member file.

Column Name: ss_multi_dict_8_values

Column Type: varchar

Max Length: 200

The description associated with ss_multi_dict_8_codes. See ss_multi_dict_8_codes for more information.

Column Name: ss_multi_dict_9_codes

Column Type: varchar

Max Length: 50

'&' delimited list of Site Specific Multi Select Dictionary 9 codes. MSO Dictionary 10032.09 in Member file.

Column Name: ss_multi_dict_9_values

Column Type: varchar

Max Length: 200

The description associated with ss_multi_dict_9_codes. See ss_multi_dict_9_codes for more information.

Column Name: ss_single_dict_10_code
Column Type: varchar
Max Length: 50
Site Specific Single Select Dictionary 10 Code. MSO Dictionary 10031.11 in Member file.

Column Name: ss_single_dict_10_value

Column Type: varchar

Max Length: 50

The description associated with ss_single_dict_10_code. See ss_single_dict_10_code for more information.

Column Name: ss_single_dict_1_code

Column Type: varchar

Max Length: 50

Site Specific Single Select Dictionary 1 Code. MSO Dictionary 10031.01 in Member file.

Column Name: ss_single_dict_1_value

Column Type: varchar

Max Length: 50

The description associated with ss_single_dict_1_code. See ss_single_dict_1_code for more information.

Column Name: ss_single_dict_2_code

Column Type: varchar

Max Length: 50

Site Specific Single Select Dictionary 2 Code. MSO Dictionary 10031.02 in Member file.

Column Name: ss_single_dict_2_value

Column Type: varchar

Max Length: 50

The description associated with ss_single_dict_2_code. See ss_single_dict_2_code for more information.

Column Name: ss_single_dict_3_code

Column Type: varchar

Max Length: 50

Site Specific Single Select Dictionary 3 Code. MSO Dictionary 10031.03 in Member file.

Column Name: ss_single_dict_3_value

Column Type: varchar

Max Length: 50

The description associated with ss_single_dict_3_code. See ss_single_dict_3_code for more information.

Column Name: ss_single_dict_4_code

Column Type: varchar

Max Length: 50

Site Specific Single Select Dictionary 4 Code. MSO Dictionary 10031.04 in Member file.

Column Name: ss_single_dict_4_value

Column Type: varchar

Max Length: 50

The description associated with ss_single_dict_4_code. See ss_single_dict_4_code for more information.

Column Name: ss_single_dict_5_code

Column Type: varchar

Max Length: 50

Site Specific Single Select Dictionary 5 Code. MSO Dictionary 10031.05 in Member file.

Column Name: ss_single_dict_5_value

Column Type: varchar

Max Length: 50

The description associated with ss_single_dict_5_code. See ss_single_dict_5_code for more information.

Column Name: ss_single_dict_6_code

Column Type: varchar

Max Length: 50

Site Specific Single Select Dictionary 6 Code. MSO Dictionary 10031.06 in Member file.

Column Name: ss_single_dict_6_value

Column Type: varchar

Max Length: 50

The description associated with ss_single_dict_6_code. See ss_single_dict_6_code for more information.

Column Name: ss_single_dict_7_code

Column Type: varchar

Max Length: 50

Site Specific Single Select Dictionary 7 Code. MSO Dictionary 10031.07 in Member file.

Column Name: ss_single_dict_7_value

Column Type: varchar

Max Length: 50

The description associated with ss_single_dict_7_code. See ss_single_dict_7_code for more information.

Column Name: ss_single_dict_8_code

Column Type: varchar

Max Length: 50

Site Specific Single Select Dictionary 8 Code. MSO Dictionary 10031.08 in Member file.

Column Name: ss_single_dict_8_value

Column Type: varchar

Max Length: 50

The description associated with ss_single_dict_8_code. See ss_single_dict_8_code for more information.

Column Name: ss_single_dict_9_code

Column Type: varchar

Max Length: 50

Site Specific Single Select Dictionary 9 Code. MSO Dictionary 10031.09 in Member file.

Column Name: ss_single_dict_9_value

Column Type: varchar

Max Length: 50

The description associated with ss_single_dict_9_code. See ss_single_dict_9_code for more information.

Column Name: ss_time_1

Column Type: varchar

Documentation for form: Service_Authorization

Table Name: SYSTEM.service_auth_svc

Table Description: This table returns the allowance of services for an authorization from 'Contracting Provider Service Authorization', 'Funding Source Service Authorization', 'Service Authorization', and 'Service Authorization (Unlimited Codes)' forms.

Column Name: ID
Column Type: integer

Column Name: AUTUniqueID
Column Type: varchar
Max Length: 50
The unique ID of the service authorization.

Column Name: FACILITY
Column Type: integer
The system code the service authorization is defined in.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID the service authorization applies to.

Column Name: PROVID
Column Type: varchar
Max Length: 20
The ID of the authorized service provider.

Column Name: authorization_number
Column Type: varchar
Max Length: 50
'Authorization Number'

Column Name: begin_date_of_service
Column Type: date
'Begin Date of Service'

Column Name: claimed_units
Column Type: integer
The number of units of service already claimed under this authorization.

Column Name: end_date_of_service
Column Type: date
'End Date of Service'

Column Name: estimated_liability_code

Column Type: numeric
'Estimated Liability Code'

Column Name: frequency_limit
Column Type: numeric
'Frequency Limit'.

Column Name: frequency_periods
Column Type: numeric
'Frequency Periods'.

Column Name: frequency_type_code
Column Type: varchar
Max Length: 50
The code for 'Frequency Type'.

Column Name: frequency_type_value
Column Type: varchar
Max Length: 50
The description associated with frequency_type_code See frequency_type_code for more information.

Column Name: procedure_code
Column Type: varchar
Max Length: 50
The code for 'Code Authorized'.

Column Name: procedure_code_type
Column Type: varchar
Max Length: 50
The code for 'Procedure Code Type'.

Column Name: procedure_code_type_value
Column Type: varchar
Max Length: 50
The description associated with procedure_code_type_code. See procedure_code_type_code for more information.

Column Name: procedure_value
Column Type: varchar
Max Length: 50
The description associated with procedure_code. See procedure_code for more information.

Column Name: remain_liability
Column Type: numeric
The amount of liability the funding source has for this service.

Column Name: requested_units
Column Type: varchar
Max Length: 50
'Requested Units'

Column Name: row_number
Column Type: integer
The number of the authorized service within this authorization.

Column Name: units_authorized
Column Type: varchar
Max Length: 50
'Units Authorized'

Documentation for form: Service_Authorization_(Unlimited_Codes)

Table Name: SYSTEM.history_fund_auth

Table Description: This table returns service authorization information from 'Contracting Provider Service Authorization', 'Funding Source Service Authorization', 'Service Authorization', and 'Service Authorization (Unlimited Codes)' forms.

Documentation for form: Service_Authorization_(Unlimited_Codes)

Table Name: SYSTEM.service_auth_detail

Table Description: This table returns service authorization information from 'Contracting Provider Service Authorization', 'Funding Source Service Authorization', 'Service Authorization', and 'Service Authorization (Unlimited Codes)' forms.

Column Name: ID
Column Type: integer

Column Name: AUTuniqueid
Column Type: varchar
Max Length: 50
The unique ID of the service authorization.

Column Name: FACILITY
Column Type: integer
The system code the service authorization is defined in.

Column Name: FUNDSRCID
Column Type: varchar
Max Length: 50
The ID number of the funding source this authorization applies to.

Column Name: GUID
Column Type: varchar
Max Length: 50
An ID number for the authorization that is likely to be unique, even on other system codes.

Column Name: JOIN_TO_contract_CORuniqueid
Column Type: varchar
Max Length: 50
The unique ID of the funding source's registration.

Column Name: JOIN_TO_member_CONuniqueid
Column Type: varchar
Max Length: 50
The unique ID of the client's enrollment in the funding source's plan.

Column Name: JOIN_TO_provider_REGuniqueid
Column Type: varchar
Max Length: 50
The unique ID of the contracting provider's registration history.

Column Name: PATID
Column Type: varchar
Max Length: 20

The client ID associated with the service authorization.

Column Name: PLAN_ID

Column Type: varchar

Max Length: 50

The code for 'Benefit Plan'.

Column Name: PROVID

Column Type: varchar

Max Length: 50

The ID number of the contracting provider this authorization applies to.

Column Name: UTCTimeStamp

Column Type: timestamp

The date and time the authorization was made, in coordinated universal time.

Column Name: account_code

Column Type: varchar

Max Length: 50

The code for 'Account'.

Column Name: account_level

Column Type: varchar

Max Length: 50

The level of the budget tracking account.

Column Name: account_level_name

Column Type: varchar

Max Length: 50

The name of the budget tracking account level.

Column Name: account_status_code

Column Type: varchar

Max Length: 50

The code for 'Status'.

Column Name: account_status_value

Column Type: varchar

Max Length: 50

The description associated with account_status_code. See account_status_code for more information.

Column Name: account_value

Column Type: varchar

Max Length: 50

The description associated with account_code. See account_code for more information.

Column Name: auth_grouping_code

Column Type: varchar

Max Length: 50

The code for 'Authorization Grouping'.

Column Name: auth_grouping_value

Column Type: varchar

Max Length: 50

The description associated with auth_grouping_code. See auth_grouping_code for more information.

Column Name: auth_grp_or_indiv_code

Column Type: varchar

Max Length: 50

The code for 'Individual Authorizations Or Authorization Grouping'.

Column Name: auth_grp_or_indiv_value

Column Type: varchar

Max Length: 50

The description associated with auth_grp_or_indiv_code. See auth_grp_or_indiv_code for more information.

Column Name: auth_level_care_code

Column Type: varchar

Max Length: 50

The code for 'Authorized Level of Care'.

Column Name: auth_level_care_value

Column Type: varchar

Max Length: 50

The description associated with auth_level_care_code. See auth_level_care_code for more information.

Column Name: authorization_number

Column Type: varchar

Max Length: 50

'Authorization Number'

Column Name: auth_status_change_day

Column Type: varchar

Max Length: 50

The day the 'Current Authorization Status' changed from "Pending to Approved".

Column Name: auth_status_change_min

Column Type: varchar

Max Length: 50

The minute the 'Current Authorization Status' changed from "Pending to Approved".

Column Name: auth_status_change_sec

Column Type: varchar

Max Length: 50

The second the 'Current Authorization Status' changed from "Pending to Approved".

Column Name: auth_type_code

Column Type: varchar

Max Length: 50

The code for 'Authorization Type'.

Column Name: auth_type_value

Column Type: varchar

Max Length: 1024

The description associated with auth_type_code. See auth_type_code for more information.

Column Name: begin_date_of_auth

Column Type: date

'Begin Date of Authorization'

Column Name: clm_stat_inh_svc_cd

Column Type: varchar

Max Length: 50

The code for 'Claim Status for Inhibited Services'.

Column Name: clm_stat_inh_svc_val

Column Type: varchar

Max Length: 50

The description associated with clm_stat_inh_svc_code. See clm_stat_inh_svc_code for more information.

Column Name: clm_stat_reas_inh_svc_cd

Column Type: varchar

Max Length: 50

The code for 'Claim Status Reason for Inhibited Services'.

Column Name: clm_stat_reas_inh_svc_val

Column Type: varchar

Max Length: 50

The description associated with clm_stat_reas_inh_svc_code. See clm_stat_reas_inh_svc_code for more information.

Column Name: comments_on_auth

Column Type: varchar

Max Length: 32766

'Comments On Authorization'

Column Name: cont_prov_auth

Column Type: varchar

Max Length: 40

'Contracting Provider Authorization'

Column Name: cpauth_denied_amount

Column Type: numeric

The total estimated liability for denied member authorizations tied to contracting provider auth.

Column Name: curr_auth_stat_reas_code

Column Type: varchar

Max Length: 50

The code for 'Current Authorization Status Reason'.

Column Name: curr_auth_stat_reas_value

Column Type: varchar

Max Length: 50

The description associated with curr_auth_stat_reas_code. See curr_auth_stat_reas_code for more information.

Column Name: curr_auth_status_code

Column Type: varchar

Max Length: 50

The code for 'Current Authorization Status'.

Column Name: curr_auth_status_value

Column Type: varchar

Max Length: 50

The description associated with curr_auth_status_code. See curr_auth_status_code for more information.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user name that last updated the row of data.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 50

The user name that last updated the row of data.

Column Name: data_entry_date

Column Type: date

The date the row of data was last updated.

Column Name: data_entry_time

Column Type: varchar

Max Length: 50

The time the row of data was last updated.

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The user ID who last updated the row of data.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name who last updated the row of data.

Column Name: end_date_of_auth

Column Type: date

'End Date of Authorization'

Column Name: financial_eligibility
Column Type: varchar
Max Length: 32766
Information on the client's financial eligibility.

Column Name: funding_source_name
Column Type: varchar
Max Length: 50
The name of the funding source.

Column Name: inhibit_adj_code
Column Type: varchar
Max Length: 50
The code for 'Inhibit Adjudication For Services Claimed During Authorization Period'.

Column Name: inhibit_adj_value
Column Type: varchar
Max Length: 50
The description associated with inhibit_adj_code. See inhibit_adj_code for more information.

Column Name: inhibit_cpt_svc_code_code
Column Type: varchar
Max Length: 1024
The code for 'Exclude CPT Service Code'.

Column Name: inhibit_cpt_svc_code_val
Column Type: varchar
Max Length: 1024
The description associated with inhibit_cpt_svc_code_code. See inhibit_cpt_svc_code_code for more information.

Column Name: inhibit_procedure_group_cd
Column Type: varchar
Max Length: 1024
The code for 'Exclude Procedure Code Group Definition'.

Column Name: inhibit_procedure_group_val
Column Type: varchar
Max Length: 1024
The description associated with inhibit_procedure_group_code. See inhibit_procedure_group_code for more information.

Column Name: inhibit_revenue_code_code
Column Type: varchar
Max Length: 1024
The code for 'Exclude Revenue Code'.

Column Name: inhibit_revenue_code_val
Column Type: varchar
Max Length: 1024

The description associated with inhibit_revenue_code_code. See inhibit_revenue_code_code for more information.

Column Name: init_or_contin_auth_code

Column Type: varchar

Max Length: 50

The code for 'Initial Or Continuing Authorization'.

Column Name: init_or_contin_auth_value

Column Type: varchar

Max Length: 50

The description associated with init_or_contin_auth_code. See init_or_contin_auth_code for more information.

Column Name: internal_comments

Column Type: varchar

Max Length: 32766

'Internal Comments'

Column Name: jointoprimdiagnosis

Column Type: varchar

Max Length: 40

The unique ID of the primary diagnosis.

Column Name: jointosecdiagnosis

Column Type: varchar

Max Length: 40

The unique ID of the secondary diagnosis.

Column Name: letter_type_code

Column Type: varchar

Max Length: 50

The code for 'Letter Type'.

Column Name: letter_type_value

Column Type: varchar

Max Length: 50

The description associated with letter_type_code. See letter_type_code for more information.

Column Name: level_of_care_code

Column Type: varchar

Max Length: 50

The code for 'Primary Level of Care'.

Column Name: level_of_care_value

Column Type: varchar

Max Length: 50

The description associated with level_of_care_code. See level_of_care_code for more information.

Column Name: next_review_date

Column Type: date
'Next Review Date'

Column Name: option_desc
Column Type: varchar
Max Length: 50
The name of the form that last updated the row of data.

Column Name: option_id
Column Type: varchar
Max Length: 50
The unique ID of the form that last updated the row of data.

Column Name: original_data_entry_person
Column Type: varchar
Max Length: 50
The user name that originally entered this row of data.

Column Name: original_date_entry
Column Type: date
The date this row of data was originally updated.

Column Name: original_time_entry
Column Type: varchar
Max Length: 50
The time this row of data was originally updated.

Column Name: performing_provider
Column Type: varchar
Max Length: 50
The code for 'Performing Provider'.

Column Name: performing_prov_type
Column Type: varchar
Max Length: 50
The code for 'Provider Type'.

Column Name: performing_prv_type_value
Column Type: varchar
Max Length: 50
The description associated with performing_prv_type_code. See performing_prv_type_code for more information.

Column Name: perf_provider_name
Column Type: varchar
Max Length: 50
The description of the associated performing_provider. See performing_provider for more information.

Column Name: planned_admit_date
Column Type: date

'Planned Admit Date'

Column Name: prevent_push_code

Column Type: varchar

Max Length: 50

The code for 'Prevent Approved Services From Pushing To Parent System'.

Column Name: prevent_push_value

Column Type: varchar

Max Length: 50

The description associated with prevent_push_code. See prevent_push_code for more information.

Column Name: primary_account_code

Column Type: varchar

Max Length: 50

'Primary Account'

Column Name: primary_account_value

Column Type: varchar

Max Length: 50

The description associated with primary_account_code. See primary_account_code for more information.

Column Name: primary_diagnosis

Column Type: varchar

Max Length: 50

'Primary Diagnosis Authorized'

Column Name: prim_dsm4_diag_code

Column Type: varchar

Max Length: 40

The DSM-IV code for the primary diagnosis.

Column Name: prim_dsm4_diag_value

Column Type: varchar

Max Length: 40

The description associated with prim_dsm4_diag_code. See prim_dsm4_diag_code for more information.

Column Name: prim_icd10_diag_code

Column Type: varchar

Max Length: 40

The ICD-10 code for the primary diagnosis.

Column Name: prim_icd10_diag_value

Column Type: varchar

Max Length: 40

The description associated with prim_icd10_diag_code. See prim_icd10_diag_code for more information.

Column Name: prim_icd9_diag_code

Column Type: varchar

Max Length: 40

The ICD-9 code for the primary diagnosis.

Column Name: prim_icd9_diag_value

Column Type: varchar

Max Length: 40

The description associated with prim_icd9_diag_code. See prim_icd9_diag_code for more information.

Column Name: provider_connect_user

Column Type: varchar

Max Length: 150

The provider connect user ID associated with this request.

Column Name: provider_name

Column Type: varchar

Max Length: 50

The description of the associated PROVID, See PROVID for more information.

Column Name: provider_to_be_auth

Column Type: varchar

Max Length: 50

'Provider to be Authorized'

Column Name: prov_pgm_link

Column Type: varchar

Max Length: 50

The unique ID of the provider's program.

Column Name: prov_pgm_name

Column Type: varchar

Max Length: 50

The name of the provider's program.

Column Name: prov_submitting_request

Column Type: varchar

Max Length: 50

The ID of the contracting provider that submitted this service authorization request.

Column Name: rem_liab_total

Column Type: numeric

'Remaining Total Liability'

Column Name: sec_dsm4_diag_code

Column Type: varchar

Max Length: 40

The DSM-IV code for the secondary diagnosis.

Column Name: sec_dsm4_diag_value

Column Type: varchar

Max Length: 40

The description associated with sec_dsm4_diag_code. See sec_dsm4_diag_code for more information.

Column Name: sec_icd10_diag_code
Column Type: varchar
Max Length: 40
The ICD-10 code for the secondary diagnosis.

Column Name: sec_icd10_diag_value
Column Type: varchar
Max Length: 40
The description associated with sec_icd10_diag_code. See sec_icd10_diag_code for more information.

Column Name: sec_icd9_diag_code
Column Type: varchar
Max Length: 40
The ICD-9 code for the secondary diagnosis.

Column Name: sec_icd9_diag_value
Column Type: varchar
Max Length: 40
The description associated with sec_icd9_diag_code. See sec_icd9_diag_code for more information.

Column Name: secondary_diagnosis
Column Type: varchar
Max Length: 50
'Secondary Diagnosis Authorized'

Column Name: status_code
Column Type: varchar
Max Length: 50
The code for 'Status'.

Column Name: status_value
Column Type: varchar
Max Length: 50
The description associated with status_code. See status_code for more information.

Column Name: total_estimated_liab
Column Type: numeric
'Total Estimated Liability'

Column Name: type_of_auth_code
Column Type: varchar
Max Length: 50
The code for 'Type Of Authorization'.

Column Name: type_of_auth_value
Column Type: varchar
Max Length: 50
The description associated with type_of_auth_code. See type_of_auth_code for more information.

Column Name: unique_case_identifer
Column Type: varchar
Max Length: 50
'Associated Case'

Documentation for form: Service_Authorization_(Unlimited_Codes)

Table Name: SYSTEM.service_auth_svc

Table Description: This table returns the allowance of services for an authorization from 'Contracting Provider Service Authorization', 'Funding Source Service Authorization', 'Service Authorization', and 'Service Authorization (Unlimited Codes)' forms.

Column Name: ID
Column Type: integer

Column Name: AUTUniqueID
Column Type: varchar
Max Length: 50
The unique ID of the service authorization.

Column Name: FACILITY
Column Type: integer
The system code the service authorization is defined in.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID the service authorization applies to.

Column Name: PROVID
Column Type: varchar
Max Length: 20
The ID of the authorized service provider.

Column Name: authorization_number
Column Type: varchar
Max Length: 50
'Authorization Number'

Column Name: begin_date_of_service
Column Type: date
'Begin Date of Service'

Column Name: claimed_units
Column Type: integer

The number of units of service already claimed under this authorization.

Column Name: end_date_of_service

Column Type: date

'End Date of Service'

Column Name: estimated_liability_code

Column Type: numeric

'Estimated Liability Code'

Column Name: frequency_limit

Column Type: numeric

'Frequency Limit'.

Column Name: frequency_periods

Column Type: numeric

'Frequency Periods'.

Column Name: frequency_type_code

Column Type: varchar

Max Length: 50

The code for 'Frequency Type'.

Column Name: frequency_type_value

Column Type: varchar

Max Length: 50

The description associated with frequency_type_code See frequency_type_code for more information.

Column Name: procedure_code

Column Type: varchar

Max Length: 50

The code for 'Code Authorized'.

Column Name: procedure_code_type

Column Type: varchar

Max Length: 50

The code for 'Procedure Code Type'.

Column Name: procedure_code_type_value

Column Type: varchar

Max Length: 50

The description associated with procedure_code_type_code. See procedure_code_type_code for more information.

Column Name: procedure_value

Column Type: varchar

Max Length: 50

The description associated with procedure_code. See procedure_code for more information.

Column Name: remain_liability

Column Type: numeric
The amount of liability the funding source has for this service.

Column Name: requested_units
Column Type: varchar
Max Length: 50
'Requested Units'

Column Name: row_number
Column Type: integer
The number of the authorized service within this authorization.

Column Name: units_authorized
Column Type: varchar
Max Length: 50
'Units Authorized'

Documentation for form: 837_Institutional_Defaults

Table Name: SYSTEM.billing_837i_claim_data

Table Description: This table returns the information stored in the '837 Institutional Defaults' form.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: BATCHID
Column Type: varchar
Max Length: 50
'Batch Number'

Column Name: CMI_uniqueid
Column Type: varchar
Max Length: 50
The unique ID associated with a row of data.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: JOIN_TO_837I_SBI_Uniqueid
Column Type: varchar
Max Length: 50
'837I Claim Data To Subscriber Data Link (Internal)'

Column Name: JOIN_TO_UBFUniqueid
Column Type: varchar
Max Length: 50
'Claim'

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: attach_control_number
Column Type: varchar
Max Length: 50
'Attachment Control Number (PWK-06)'

Column Name: attachment_description
Column Type: varchar
Max Length: 50
'Attachment Description (PWK-07)'

Column Name: attach_report_type_code
Column Type: varchar
Max Length: 50
'Attachment Report Type Code (PWK-01)'

Column Name: attach_transmiss_code
Column Type: varchar
Max Length: 50
'Attachment Transmission Code (PWK-02)'

Column Name: attend_phys_prov_ident
Column Type: varchar
Max Length: 50
'Attending Physician/Provider Primary Identifier (NM1-09)'

Column Name: attend_phys_sec_identif
Column Type: varchar
Max Length: 50
'Attending Physician/Provider Secondary Identifier (REF-02)'

Column Name: att_phy_id_code_qual_1
Column Type: varchar
Max Length: 50
'Identification Code Qualifier (NM1-08)'

Column Name: att_phys_first_name
Column Type: varchar
Max Length: 50
'Attending Physician/Provider First Name (NM1-04)'

Column Name: att_phys_last_name
Column Type: varchar
Max Length: 60
'Attending Physician/Provider Last Name (NM1-03)'

Column Name: att_phys_mid_name
Column Type: varchar
Max Length: 50
'Attending Physician/Provider Middle Name (NM1-05)'

Column Name: claim_orig_reference_num
Column Type: varchar
Max Length: 50
'Claim Original Reference Number (REF(F8)-02)'

Column Name: condition_code_1
Column Type: varchar
Max Length: 50
'Condition Code 1 (HI-01.2)'

Column Name: condition_code_2
Column Type: varchar
Max Length: 50
'Condition Code 2 (HI-02.2)'

Column Name: condition_code_3
Column Type: varchar
Max Length: 50
'Condition Code 3 (HI-03.2)'

Column Name: condition_code_4
Column Type: varchar
Max Length: 50
'Condition Code 4 (HI-04.2)'

Column Name: condition_code_5
Column Type: varchar
Max Length: 50
'Condition Code 5 (HI-05.2)'

Column Name: condition_code_6
Column Type: varchar
Max Length: 50
'Condition Code 6 (HI-06.2)'

Column Name: condition_code_7
Column Type: varchar
Max Length: 50
'Condition Code 7 (HI-07.2)'

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
The offset in hours from UTC on when the data was saved.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
The time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
The time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
The short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
The UTC date and time the data was saved.

Column Name: delay_reason_code

Column Type: varchar

Max Length: 50

'Delay Reason Code (CLM-20)'

Column Name: entity_type_qualifier

Column Type: varchar

Max Length: 50

'Entity Type Qualifier (NM1-02)'

Column Name: health_cr_diagn_ind_code

Column Type: varchar

Max Length: 50

'Health Care Diagnosis Industry Code (HI-03)'

Column Name: lab_identif_code_qualif

Column Type: varchar

Max Length: 50

'Identification Code Qualifier (NM1-08)'

Column Name: lab_or_fac_add_line_1

Column Type: varchar

Max Length: 50

'Laboratory or Facility Address Line 1 (N3-01)'

Column Name: lab_or_fac_add_line_2

Column Type: varchar

Max Length: 50

'Laboratory or Facility Address Line 2 (N3-02)'

Column Name: lab_or_fac_city_name

Column Type: varchar

Max Length: 50

'Laboratory or Facility City Name (N4-01)'

Column Name: lab_or_fac_country_code

Column Type: varchar

Max Length: 50

'Country Code (N4-04)'

Column Name: lab_or_facility_name

Column Type: varchar

Max Length: 50

'Laboratory or Facility Name (NM1-03)'

Column Name: lab_or_fac_post_zone_zip

Column Type: varchar

Max Length: 10

'Laboratory or Facility Postal Zone or Zip (N4-03)'

Column Name: labor_fac_prim_identif
Column Type: varchar
Max Length: 50
'Laboratory or Facility Primary Identifier (NM1-09)'

Column Name: lab_prov_tax_code
Column Type: varchar
Max Length: 50
'Provider Taxonomy Code (PRV-03)'

Column Name: lab_or_fac_state_or_prov

Documentation for form: 837_Professional_Defaults

Table Name: SYSTEM.billing_837p_claim_data

Table Description: This table returns the information stored in the '837 Professional Defaults' form.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: BATCHCODE

Column Type: varchar

Max Length: 50

'Batch Number'

Column Name: CMP_uniqueid

Column Type: varchar

Max Length: 50

The unique ID associated with a row of data.

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: JOIN_TO_837P_SBP_Uniqueid

Column Type: varchar

Max Length: 50

'837P Claim Data To Subscriber Data Link (Internal)'

Column Name: JOIN_TO_HCF_Uniqueid

Column Type: varchar

Max Length: 50

'Claim'

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: accident_date
Column Type: date
'Accident Date (DTP(439)-03)'

Column Name: attach_control_number
Column Type: varchar
Max Length: 50
'Attachment Control Number (PWK-06)'

Max Length: 50
'Claim Original Reference Number (REF(F8)-02)'

Column Name: country_code
Column Type: varchar
Max Length: 50
'Country Code (CLM-11.5)'

Column Name: data_entry_by

Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
The offset in hours from UTC on when the data was saved.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
The time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
The time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
The short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
The UTC date and time the data was saved.

Column Name: delay_reason_code
Column Type: varchar
Max Length: 50
'Delay Reason Code (CLM-20)'

Column Name: delay_reason_value
Column Type: varchar
Max Length: 50
The description associated with delay_reason_code. See delay_reason_code for more information.

Column Name: entity_type_qualif
Column Type: varchar
Max Length: 50
'Entity Type Qualifier (NM1-02)'

Column Type: varchar
Max Length: 50
The unique ID associated with a row of data.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
The offset in hours from UTC on when the data was saved.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
The time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
The time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
The short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40

The user ID who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name who last updated the row.

Column Name: data_entry_utc

Column Type: timestamp

The UTC date and time the data was saved.

Column Name: lab_or_fac_add_line

Column Type: varchar

Max Length: 50

'Laboratory or Facility Address Line (N3-01)'

Column Name: lab_or_fac_city_name

Column Type: varchar

Max Length: 50

'Laboratory or Facility City Name (N4-01)'

Column Name: lab_or_fac_id_code_qual

Column Type: varchar

Max Length: 50

'Identification Code Qualifier (NM1-08)'

Column Name: lab_or_fac_name

Column Type: varchar

Max Length: 60

'Laboratory or Facility Name (NM1-03)'

Column Name: lab_or_fac_post_or_zip

Column Type: varchar

Max Length: 50

'Laboratory or Facility Postal Zone or ZIP (N4-03)'

Column Name: lab_or_fac_prim_identif

Column Type: varchar

Max Length: 50

'Laboratory or Facility Primary Identifier (NM1-09)'

Column Name: lab_or_fac_ste_prv_cde

Column Type: varchar

Max Length: 50

'Laboratory or Facility State or Province Code (N4-02)'

Column Name: option_desc

Column Type: varchar

Max Length: 80

The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: prior_auth_or_ref_num
Column Type: varchar
Max Length: 50
'Prior Authorization or Referral Number (REF-02)'

Column Name: proced_modifier_1
Column Type: varchar
Max Length: 50
'Procedure Modifier 1 (SV1-01.4)'

Column Name: proced_modifier_2
Column Type: varchar
Max Length: 50
'Procedure Modifier 2 (SV1-01.5)'

Column Name: proced_modifier_3
Column Type: varchar
Max Length: 50
'Procedure Modifier 3 (SV1-01.6)'

Column Name: prod_or_serv_id_qualif
Column Type: varchar
Max Length: 50
'Product or Service ID Qualifier (SV1-01.3)'

Column Name: refer_ident_qualif
Column Type: varchar
Max Length: 50
'Reference Identification Qualifier (REF-01)'

Column Name: rend_prov_first_name
Column Type: varchar
Max Length: 50
'Rendering Provider First Name (NM1-04)'

Column Name: rend_prov_id_code_qual
Column Type: varchar
Max Length: 50
'Identification Code Qualifier (NM1-08)'

Column Name: rend_prov_identifier
Column Type: varchar
Max Length: 50
'Rendering Provider Identifier (NM1-09)'

Column Name: rend_provider_tax_code

Column Type: varchar

Max Length: 50

'Provider Taxonomy Code (PRV-03)'

Column Name: rend_prov_middle_name

Column Type: varchar

Max Length: 50

'Rendering Provider Middle Name (NM1-05)'

Column Name: rend_prov_sec_ident

Column Type: varchar

Max Length: 50

'Rendering Provider Secondary Identifier (REF-02)'

Column Name: rnd_prv_lst_or_org_nme

Column Type: varchar

Max Length: 60

'Rendering Provider Last or Organization Name (NM1-03)'

Documentation for form: 837_Health_Care_Claim_Institutional

Table Name: SYSTEM.batch_clm_svc_void_replac

Table Description: This table stores connection between replacement services and original services.

Column Name: ID

Column Type: integer

Column Name: BATCHID

Column Type: varchar

Max Length: 50

The Replacement Batch ID

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: JOIN_TO_HCF_UBF_Type

Column Type: varchar

Max Length: 50

The Replacement Claim HCF or UBF Type

Column Name: JOIN_TO_HCFUniqueid

Column Type: varchar

Max Length: 50
The Replacement Claim HCF Unique ID

Column Name: JOIN_TO_UBFHCFUniqueid
Column Type: varchar
Max Length: 50
The Replacement Claim HCF or UBF Unique ID

Column Name: JOIN_TO_UBFUniqueid
Column Type: varchar
Max Length: 50
The Replacement Claim UBF Unique ID

Column Name: ORIG_BATCHID
Column Type: varchar
Max Length: 50
The Original Batch ID that has been replaced.

Column Name: ORIG_JOIN_TO_HCF_UBF_Type
Column Type: varchar
Max Length: 50
The Original Claim HCF or UBF type that has been replaced.

Column Name: ORIG_JOIN_TO_HCFUniqueid
Column Type: varchar
Max Length: 50
The Original Claim HCF Unique ID that has been replaced.

Column Name: ORIG_JOIN_TO_UBFUniqueid
Column Type: varchar
Max Length: 50
The Original Claim UBF Unique ID that has been replaced.

Column Name: ORIG_SVCUniqueid
Column Type: varchar
Max Length: 50
The Original SVC Unique ID that has been replaced.

Column Name: SVCUniqueid
Column Type: varchar
Max Length: 50
The Replacement SVC Unique ID.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar

Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 40
The unique ID of the form that last updated the row.

Documentation for form: 837_Health_Care_Claim_Institutional

Table Name: SYSTEM.batch_ub_claim_lvl_sup

Table Description: This table returns information related to claims that are part of an 837.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID of the batch.

Column Name: CLAIMID
Column Type: integer
'Claim ID'

Column Name: FACILITY
Column Type: integer
The system code the revenue code is defined in.

Column Name: PATID
Column Type: varchar
Max Length: 20
The Unique ID of the 'Client'.

Column Name: PROVID
Column Type: varchar
Max Length: 50
'Provider'

Column Name: UBFuniqueid
Column Type: varchar
Max Length: 50
Reference to UB92 claim processing.

Column Name: con_cod_code
Column Type: varchar
Max Length: 50
'Condition Code 1'

Column Name: con_cod_sh_value
Column Type: varchar
Max Length: 255
The value of con_cod_code. See con_cod_code for more information.

Column Name: con_cod_value
Column Type: varchar
Max Length: 4096
The value of con_cod_code. See con_cod_code for more information.

Column Name: dem_project_id
Column Type: varchar
Max Length: 50
The 'Demonstration Project Identifier (2300-REF-02)'.

Column Name: diag_proc_code_qual_code
Column Type: varchar
Max Length: 50
'Diagnosis/Procedure Code Qualifier'

Column Name: diag_proc_code_qual_value
Column Type: varchar
Max Length: 50
The value of diag_proc_code_qual_code. See diag_proc_code_qual_code for more information.

Column Name: drg_code

Column Type: varchar
Max Length: 50
'Diagnosis/Procedure Code Qualifier'

Column Name: drg_value
Column Type: varchar
Max Length: 50
The value of drg_code. See drg_code for more information.

Column Name: ext_cau_of_inj_10_code
Column Type: varchar
Max Length: 50
'External Cause of Injury 10 (2300-HI-10-2)'

Column Name: ext_cau_of_inj_10_value
Column Type: varchar
Max Length: 50
The value of ext_cau_of_inj_10_code. See ext_cau_of_inj_10_code for more information.

Column Name: ext_cau_of_inj_11_code
Column Type: varchar
Max Length: 50
'External Cause of Injury 11 (2300-HI-11-2)'

Column Name: ext_cau_of_inj_11_value
Column Type: varchar
Max Length: 50
The value of ext_cau_of_inj_11_code. See ext_cau_of_inj_11_code for more information.

Column Name: ext_cau_of_inj_12_code
Column Type: varchar
Max Length: 50
'External Cause of Injury 12 (2300-HI-12-2)'

Column Name: ext_cau_of_inj_12_value
Column Type: varchar
Max Length: 50
The value of ext_cau_of_inj_12_code. See ext_cau_of_inj_12_code for more information.

Column Name: ext_cau_of_inj_1_code
Column Type: varchar
Max Length: 50
'External Cause of Injury 1 (2300-HI-01-2)'

Column Name: ext_cau_of_inj_1_value
Column Type: varchar
Max Length: 50
The value of ext_cau_of_inj_1_code. See ext_cau_of_inj_1_code for more information.

Column Name: ext_cau_of_inj_2_code

Column Type: varchar
Max Length: 50
'External Cause of Injury 2 (2300-HI-02-2)'

Column Name: ext_cau_of_inj_2_value
Column Type: varchar
Max Length: 50
The value of ext_cau_of_inj_2_code. See ext_cau_of_inj_2_code for more information.

Column Name: ext_cau_of_inj_3_code
Column Type: varchar
Max Length: 50
'External Cause of Injury 3 (2300-HI-03-2)'

Column Name: ext_cau_of_inj_3_value
Column Type: varchar
Max Length: 50
The value of ext_cau_of_inj_3_code. See ext_cau_of_inj_3_code for more information.

Column Name: ext_cau_of_inj_4_code
Column Type: varchar
Max Length: 50
'External Cause of Injury 4 (2300-HI-04-2)'

Column Name: ext_cau_of_inj_4_value
Column Type: varchar
Max Length: 50
The value of ext_cau_of_inj_4_code. See ext_cau_of_inj_4_code for more information.

Column Name: ext_cau_of_inj_5_code
Column Type: varchar
Max Length: 50
'External Cause of Injury 5 (2300-HI-05-2)'

Column Name: ext_cau_of_inj_5_value
Column Type: varchar
Max Length: 50
The value of ext_cau_of_inj_5_code. See ext_cau_of_inj_5_code for more information.

Column Name: ext_cau_of_inj_6_code
Column Type: varchar
Max Length: 50
'External Cause of Injury 6 (2300-HI-06-2)'

Column Name: ext_cau_of_inj_6_value
Column Type: varchar
Max Length: 50
The value of ext_cau_of_inj_6_code. See ext_cau_of_inj_6_code for more information.

Column Name: ext_cau_of_inj_7_code

Column Type: varchar
Max Length: 50
'External Cause of Injury 7 (2300-HI-07-2)'

Column Name: ext_cau_of_inj_7_value
Column Type: varchar
Max Length: 50
The value of ext_cau_of_inj_7_code. See ext_cau_of_inj_7_code for more information.

Column Name: ext_cau_of_inj_8_code
Column Type: varchar
Max Length: 50
'External Cause of Injury 8 (2300-HI-08-2)'

Column Name: ext_cau_of_inj_8_value
Column Type: varchar
Max Length: 50
The value of ext_cau_of_inj_8_code. See ext_cau_of_inj_8_code for more information.

Column Name: ext_cau_of_inj_9_code
Column Type: varchar
Max Length: 50
'External Cause of Injury 9 (2300-HI-09-2)'

Column Name: ext_cau_of_inj_9_value
Column Type: varchar
Max Length: 50
The value of ext_cau_of_inj_9_code. See ext_cau_of_inj_9_code for more information.

Column Name: member_id
Column Type: numeric
The UniqueID of the 'Client'

Column Name: occ_cod_10_code
Column Type: varchar
Max Length: 50
'Occurrence Code 10 (2300-HI-10-2)'

Column Name: occ_cod_10_value
Column Type: varchar
Max Length: 50
The value of occ_cod_10_code. See occ_cod_10_code for more information.

Column Name: occ_cod_11_code
Column Type: varchar
Max Length: 50
'Occurrence Code 11 (2300-HI-11-2)'

Column Name: occ_cod_11_value
Column Type: varchar

Max Length: 50

The value of occ_cod_11_code. See occ_cod_11_code for more information.

Column Name: occ_cod_12_code

Column Type: varchar

Max Length: 50

'Occurrence Code 12 (2300-HI-01-2)'

Column Name: occ_cod_12_value

Column Type: varchar

Max Length: 50

The value of occ_cod_12_code. See occ_cod_12_code for more information.

Column Name: occ_cod_1_code

Column Type: varchar

Max Length: 50

'Occurrence Code 1 (2300-HI-01-2)'

Column Name: occ_cod_1_value

Column Type: varchar

Max Length: 50

The value of occ_cod_1_code. See occ_cod_1_code for more information.

Column Name: occ_cod_2_code

Column Type: varchar

Max Length: 50

'Occurrence Code 2 (2300-HI-02-2)'

Column Name: occ_cod_2_value

Column Type: varchar

Max Length: 50

The value of occ_cod_2_code. See occ_cod_2_code for more information.

Column Name: occ_cod_3_code

Column Type: varchar

Max Length: 50

'Occurrence Code 3 (2300-HI-03-2)'

Column Name: occ_cod_3_value

Column Type: varchar

Max Length: 50

The value of occ_cod_3_code. See occ_cod_3_code for more information.

Column Name: occ_cod_4_code

Column Type: varchar

Max Length: 50

'Occurrence Code 1 (2300-HI-04-2)'

Column Name: occ_cod_4_value

Column Type: varchar

Max Length: 50

The value of occ_cod_4_code. See occ_cod_4_code for more information.

Column Name: occ_cod_5_code

Column Type: varchar

Max Length: 50

'Occurrence Code 5 (2300-HI-05-2)'

Column Name: occ_cod_5_value

Column Type: varchar

Max Length: 50

The value of occ_cod_5_code. See occ_cod_5_code for more information.

Column Name: occ_cod_6_code

Column Type: varchar

Max Length: 50

'Occurrence Code 6 (2300-HI-06-2)'

Column Name: occ_cod_6_value

Column Type: varchar

Max Length: 50

The value of occ_cod_6_code. See occ_cod_6_code for more information.

Column Name: occ_cod_7_code

Column Type: varchar

Max Length: 50

'Occurrence Code 7 (2300-HI-07-2)'

Column Name: occ_cod_7_value

Column Type: varchar

Max Length: 50

The value of occ_cod_7_code. See occ_cod_7_code for more information.

Column Name: occ_cod_8_code

Column Type: varchar

Max Length: 50

'Occurrence Code 8 (2300-HI-08-2)'

Column Name: occ_cod_8_value

Column Type: varchar

Max Length: 50

The value of occ_cod_8_code. See occ_cod_8_code for more information.

Column Name: occ_cod_9_code

Column Type: varchar

Max Length: 50

'Occurrence Code 9 (2300-HI-09-2)'

Column Name: occ_cod_9_value

Column Type: varchar

Max Length: 50

The value of occ_cod_9_code. See occ_cod_9_code for more information.

Column Name: occ_dat_1

Column Type: date

'Occurrence Date 1 (2300-HI-01-4)'

Column Name: occ_dat_10

'Value Code 10 (2300-HI-10-2)'

Column Name: val_cod_10_value
Column Type: varchar
Max Length: 50
The value of val_cod_10_code. See val_cod_10_code for more information.

Column Name: val_cod_11_code
Column Type: varchar
Max Length: 50
'Value Code 11 (2300-HI-11-2)'

Column Name: val_cod_11_value

Column Type: varchar
Max Length: 50
The value of val_cod_11_code. See val_cod_11_code for more information.

Column Name: val_cod_12_code
Column Type: varchar
Max Length: 50
'Value Code 12 (2300-HI-12-2)'

Column Name: val_cod_12_value
Column Type: varchar
Max Length: 50
The value of val_cod_12_code. See val_cod_12_code for more information.

Column Name: val_cod_1_code
Column Type: varchar
Max Length: 50
'Value Code 1 (2300-HI-1-2)'

Column Name: val_cod_1_value
Column Type: varchar
Max Length: 50
The value of val_cod_1_code. See val_cod_1_code for more information.

Column Name: val_cod_2_code
Column Type: varchar
Max Length: 50
'Value Code 2 (2300-HI-02-2)'

Column Name: val_cod_2_value
Column Type: varchar
Max Length: 50
The value of val_cod_2_code. See val_cod_2_code for more information.

Column Name: val_cod_3_code
Column Type: varchar
Max Length: 50
'Value Code 3 (2300-HI-03-2)'

Column Name: val_cod_3_value
Column Type: varchar
Max Length: 50
The value of val_cod_3_code. See val_cod_3_code for more information.

Column Name: val_cod_4_code
Column Type: varchar
Max Length: 50
'Value Code 4 (2300-HI-04-2)'

Column Name: val_cod_4_value

Column Type: varchar
Max Length: 50
The value of val_cod_4_code. See val_cod_4_code for more information.

Column Name: val_cod_5_code
Column Type: varchar
Max Length: 50
'Value Code 5 (2300-HI-05-2)'

Column Name: val_cod_5_value
Column Type: varchar
Max Length: 50
The value of val_cod_5_code. See val_cod_5_code for more information.

Column Name: val_cod_6_code
Column Type: varchar
Max Length: 50
'Value Code 6 (2300-HI-06-2)'

Column Name: val_cod_6_value
Column Type: varchar
Max Length: 50
The value of val_cod_6_code. See val_cod_6_code for more information.

Column Name: val_cod_7_code
Column Type: varchar
Max Length: 50
'Value Code 7 (2300-HI-07-2)'

Column Name: val_cod_7_value
Column Type: varchar
Max Length: 50
The value of val_cod_7_code. See val_cod_7_code for more information.

Column Type: varchar
Max Length: 50
'Value Code 8 (2300-HI-08-2)'

Column Name: val_cod_8_value
Column Type: varchar
Max Length: 50
The value of val_cod_8_code. See val_cod_8_code for more information.

Column Name: val_cod_9_code
Column Type: varchar
Max Length: 50
'Value Code 9 (2300-HI-09-2)'

Column Name: val_cod_9_value

Column Type: varchar

Max Length: 50

The value of val_cod_9_code. See val_cod_9_code for more information.

Documentation for form: 837_Health_Care_Claim_Institutional

Table Name: SYSTEM.billing_837_clm

Table Description: This table returns error data from an 837 file.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: FACILITY

Column Type: integer

The system code the data was generated for.

Column Name: address_info_1

Column Type: varchar

Max Length: 50

The address line 1.

Column Name: address_info_2

Column Type: varchar

Max Length: 50

The address line 2.

Column Name: amount_qual_code

Column Type: varchar

Max Length: 50

The amount qualifier code.

Column Name: city_name

Column Type: varchar

Max Length: 50

The city name.

Column Name: claim_file_ind_code

Column Type: varchar

Max Length: 50

The claim file index code.

Column Name: claim_status_code

Column Type: varchar

Max Length: 50

The claim status code.

Column Name: claim_submt_id

Column Type: varchar

Max Length: 50

The claim submit ID.

Column Name: claim_submt_reason_code

Column Type: varchar

Max Length: 50

The claim submit reason code.

Column Name: clm_index

Column Type: varchar

Max Length: 50

The claim index.

Column Name: country_code

Column Type: varchar

Max Length: 50

'Country'

Column Name: credit_debit_flag_code

Column Type: varchar

Max Length: 50

Details if credit or debit is chosen.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 40

The user name that last updated the row.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_time

Column Type: varchar

Max Length: 10

The time the row was last updated.

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 40

The 'User ID' who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The 'User Description' of the 'User ID' that last updated the row.

Column Name: date_time_format_qual
Column Type: varchar
Max Length: 50
The date time format.

Column Name: date_time_period
Column Type: varchar
Max Length: 50
The date/time period.

Column Name: date_time_qualifier
Column Type: varchar
Max Length: 50
The date/time.

Column Name: delay_reason_code
Column Type: varchar
Max Length: 50
'Daily Reason code'

Column Name: description
Column Type: varchar
Max Length: 50
'Description'

Column Name: entity_id_code
Column Type: varchar
Max Length: 50
The database being accessed.

Column Name: entity_relat_code
Column Type: varchar
Max Length: 50
The entity relation code.

Column Name: entity_type_qualifier
Column Type: varchar
Max Length: 50
The database type code.

Column Name: file_index
Column Type: varchar
Max Length: 50
The file index.

Column Name: file_info_str
Column Type: varchar
Max Length: 50
The file information string.

Column Name: file_name
Column Type: varchar
Max Length: 255
'File Name'

Column Name: file_status
Column Type: varchar
Max Length: 50
'File Status'

Column Name: head_index
Column Type: integer
The head index.

Column Name: health_care_code_info_1
Column Type: varchar
Max Length: 50
'Health Care Code Information 1'

Column Name: health_care_code_info_10
Column Type: varchar
Max Length: 50
'Health Care Code Information 10'

Column Name: health_care_code_info_11
Column Type: varchar
Max Length: 50
'Health Care Code Information 11'

Column Name: health_care_code_info_12
Column Type: varchar
Max Length: 50
'Health Care Code Information 12'

Column Name: health_care_code_info_2
Column Type: varchar
Max Length: 50
'Health Care Code Information 2'

Column Name: health_care_code_info_3
Column Type: varchar
Max Length: 50
'Health Care Code Information 3'

Column Name: health_care_code_info_4
Column Type: varchar
Max Length: 50
'Health Care Code Information 4'

Column Name: health_care_code_info_5
Column Type: varchar
Max Length: 50
'Health Care Code Information 5'

Column Name: health_care_code_info_6
Column Type: varchar
Max Length: 50
'Health Care Code Information 6'

Column Name: health_care_code_info_7
Column Type: varchar
Max Length: 50
'Health Care Code Information 7'

Column Name: health_care_code_info_8
Column Type: varchar
Max Length: 50
'Health Care Code Information 8'

Column Name: health_care_code_info_9
Column Type: varchar
Max Length: 50
'Health Care Code Information 9'

Column Name: health_care_serv_loc
Column Type: varchar
Max Length: 50
'Health Care Service Location'

Column Name: id_code
Column Type: varchar
Max Length: 50
The ID code.

Column Name: id_code_qualifier
Column Type: varchar
Max Length: 50
The ID code qualifier.

Column Name: level_of_service_code
Column Type: varchar
Max Length: 50
The level of service code.

Column Name: location_id
Column Type: varchar
Max Length: 50
The location ID.

Column Name: location_qualifier
Column Type: varchar
Max Length: 50
The location qualifier.

Column Name: monetary_amount
Column Type: varchar
Max Length: 50
'Monetary Amount'

Column Name: name_first
Column Type: varchar
Max Length: 50
'First Name'

Column Name: name_last_org_name
Column Type: varchar
Max Length: 50
'Original Last Name'

Column Name: name_middle
Column Type: varchar
Max Length: 50
'Middle Name'

Column Name: name_prefix
Column Type: varchar
Max Length: 50
'Prefix'

Column Name: name_suffix
Column Type: varchar
Max Length: 50
'Suffix'

Column Name: non_inst_claim_code
Column Type: varchar
Max Length: 50
'None Instant Claim Code'

Column Name: patient_sig_source_code
Column Type: varchar
Max Length: 50
The patient signature source code.

Column Name: postal_code
Column Type: varchar
Max Length: 50
'Postal Code'

Column Name: prov_accept_code
Column Type: varchar
Max Length: 50
'Provider Accept Code'

Column Name: provider_agree_code
Column Type: varchar
Max Length: 50
'Provider Agree Code'

Column Name: provider_code
Column Type: varchar
Max Length: 50
'Provider Code'

Column Name: provider_org_code
Column Type: varchar
Max Length: 50
'Provider Organization Code'

Column Name: provider_spec_inf
Column Type: varchar
Max Length: 50
'Provider Specific Information'

Column Name: ptp_index
Column Type: varchar
Max Length: 50
The PTP index.

Column Name: ref_id
Column Type: varchar
Max Length: 50
'Reference ID'

Column Name: ref_id_1
Column Type: varchar
Max Length: 50
'Reference ID 1'

Column Name: ref_id_2
Column Type: varchar
Max Length: 50
'Reference ID 2'

Column Name: ref_id_pat_id
Column Type: varchar
Max Length: 50
'Reference ID/Client ID'

Column Name: ref_id_qual
Column Type: varchar
Max Length: 50
'Reference ID qualifier'

Column Name: ref_id_qual_pat_id
Column Type: varchar
Max Length: 50
'Reference ID qualifier/Client ID'

Column Name: related_causes_info
Column Type: varchar
Max Length: 50
'Related Causes Information'

Column Name: release_of_info_code
Column Type: varchar
Max Length: 50
'Release of Information code'

Column Name: segment
Column Type: varchar
Max Length: 80
The particular segment being accessed.

Column Name: segment_index
Column Type: varchar
Max Length: 50
The segment index.

Column Name: special_prog_code
Column Type: varchar
Max Length: 50
'Special Progress Code'

Column Name: state_or_prov_code
Column Type: varchar
Max Length: 50
'State or Provider Code'

Column Name: sub_index
Column Type: varchar
Max Length: 50
The sub index.

Column Name: version
Column Type: varchar
Max Length: 20
The 837 version.

Column Name: yes_no_cond_resp_code_1
Column Type: varchar
Max Length: 50
'Yes/No Condition Response Code 1'

Column Name: yes_no_cond_resp_code_2
Column Type: varchar
Max Length: 50
'Yes/No Condition Response Code 2'

Column Name: yes_no_cond_resp_code_3
Column Type: varchar
Max Length: 50
'Yes/No Condition Response Code 3'

Column Name: yes_no_cond_resp_code_4
Column Type: varchar
Max Length: 50
'Yes/No Condition Response Code 4'

Documentation for form: 837_Health_Care_Claim_Institutional

Table Name: SYSTEM.billing_837_compile_post

Table Description: This table returns compile/post data from an 837.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer
The system code the data was generated for.

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique service string.

Column Name: authorization_number
Column Type: varchar

Max Length: 100
'Authorization Number'

Column Name: batch_number
Column Type: varchar
Max Length: 50
'Batch Number'

Column Name: claim_counter
Column Type: integer
The claim being accessed.

Column Name: claim_date_range_flag
Column Type: varchar
Max Length: 100
Was the claim submitted with more than one date.

Column Name: claim_status_code
Column Type: varchar
Max Length: 50
'Claim Status Code'

Column Name: copay_amount
Column Type: numeric
'Copay Amount'

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The 'User ID' who last last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
The 'User Description' of the 'User ID'.

Column Name: date_of_claim
Column Type: date
The date the claim was filed.

Column Name: deductible_amount
Column Type: numeric
'Deductible amount'

Column Name: diagnosis_code_1
Column Type: varchar
Max Length: 50
'Diagnosis Code 1'

Column Name: diagnosis_code_2
Column Type: varchar
Max Length: 50
'Diagnosis Code 2'

Column Name: diagnosis_code_3
Column Type: varchar
Max Length: 50
'Diagnosis Code 3'

Column Name: diagnosis_code_4
Column Type: varchar
Max Length: 50
'Diagnosis Code 4'

Column Name: diagnosis_code_5
Column Type: varchar
Max Length: 50
'Diagnosis Code 5'

Column Name: diagnosis_code_6
Column Type: varchar
Max Length: 50
'Diagnosis Code 6'

Column Name: diagnosis_code_7
Column Type: varchar
Max Length: 50
'Diagnosis Code 7'

Column Name: diagnosis_code_8
Column Type: varchar

Max Length: 50
'Diagnosis Code 8'

Column Name: diagnosis_ref_code
Column Type: varchar
Max Length: 50
'Diagnosis Reference Code'

Column Name: diagnosis_ref_value
Column Type: varchar
Max Length: 200
The description associated with diagnosis_ref_code. See diagnosis_ref_code for more information.

Column Name: diagnosis_value_1
Column Type: varchar
Max Length: 200
The description associated with diagnosis_code_1. See diagnosis_value_code for more information.

Column Name: diagnosis_value_2
Column Type: varchar
Max Length: 200
The description associated with diagnosis_code_2. See diagnosis_value_code for more information.

Column Name: diagnosis_value_3
Column Type: varchar
Max Length: 200
The description associated with diagnosis_code_3. See diagnosis_value_code for more information.

Column Name: diagnosis_value_4
Column Type: varchar
Max Length: 200
The description associated with diagnosis_code_4. See diagnosis_value_code for more information.

Column Name: diagnosis_value_5
Column Type: varchar
Max Length: 200
The description associated with diagnosis_code_5. See diagnosis_value_code for more information.

Column Name: diagnosis_value_6
Column Type: varchar
Max Length: 200
The description associated with diagnosis_code_6. See diagnosis_value_code for more information.

Column Name: diagnosis_value_7
Column Type: varchar
Max Length: 200
The description associated with diagnosis_code_7. See diagnosis_value_code for more information.

Column Name: diagnosis_value_8
Column Type: varchar

Max Length: 200

The description associated with diagnosis_code_8. See diagnosis_value_code for more information.

Column Name: duration

Column Type: varchar

Max Length: 50

'Duration'

Column Name: expected_disbursement_amount

Column Type: numeric

'Expected Disbursement Amount'

Column Name: explanation_of_coverage

Column Type: varchar

Max Length: 500

'Explanation of Coverage'

Column Name: fee_table_amount

Column Type: numeric

'Fee Table Amount'

Column Name: file_index

Column Type: varchar

Max Length: 50

The file index.

Column Name: file_info_str

Column Type: varchar

Max Length: 225

The file information string.

Column Name: file_name

Column Type: varchar

Max Length: 200

'File Name'

Column Name: file_status

Column Type: varchar

Max Length: 50

'File Status'

Column Name: funding_source_id

Column Type: varchar

Max Length: 50

'Funding Source ID'

Column Name: funding_source_name

Column Type: varchar

Max Length: 100

'Funding Source Name'

Column Name: level_of_care_code
Column Type: varchar
Max Length: 50
'Level of Care'

Column Name: level_of_care_value
Column Type: varchar
Max Length: 100
The description associated with level_of_care_code. See level_of_care_code for more information.

Column Name: line_item_control_number
Column Type: varchar
Max Length: 50
The line item control number.

Column Name: line_note
Column Type: varchar
Max Length: 500
'Line Note'

Column Name: location
Column Type: varchar
Max Length: 50
'Location'

Column Name: measurement_code_code
Column Type: varchar
Max Length: 100
'Measurement Code (837-2400-SV103/SV204)'.

Column Name: measurement_code_value
Column Type: varchar
Max Length: 50
The description associated with measurement_code_code. See measurement_code_code for more information.

Column Name: member_id
Column Type: varchar
Max Length: 20
'Member ID'

Column Name: member_name
Column Type: varchar
Max Length: 100
'Member Name'

Column Name: patient_control_number
Column Type: varchar
Max Length: 100

'Patient Control Number'

Column Name: performing_provider_index

Column Type: varchar

Max Length: 50

'Performing Provider Index'

Column Name: performing_provider_name

Column Type: varchar

Max Length: 100

'Performing Provider Name'

Column Name: procedure_code_code

Column Type: varchar

Max Length: 50

'Procedure Code'

Column Name: procedure_code_value

Column Type: varchar

Max Length: 200

The description associated with procedure_code_code. See procedure_code_code for more information.

Column Name: provider_id

Column Type: integer

'Provider ID;

Column Name: provider_name

Column Type: varchar

Max Length: 100

'Provider Name'

Column Name: provider_sort

Column Type: varchar

Max Length: 50

'Provider Sort'

Column Name: represent_admission

Column Type: varchar

Max Length: 50

'Represent Admission'

Column Name: result_string

Column Type: varchar

Max Length: 1000

The result string.

Column Name: service_counter

Column Type: integer

The particular service being accessed.

Column Name: service_date
Column Type: date
'Service Date'

Column Name: service_end_time
Column Type: varchar
Max Length: 10
'Service End Time'

Column Name: service_start_time
Column Type: varchar
Max Length: 10
'Service Start Time'

Column Name: service_units
Column Type: numeric
'Service Units'

Column Name: third_party_amount_paid
Column Type: numeric
'Third Party Amount Paid'

Column Name: third_party_payer_amt_1
Column Type: numeric
'Third Party Amount Paid 1'

Column Name: third_party_payer_amt_2
Column Type: numeric
'Third Party Amount Paid 2'

Column Name: third_party_payer_amt_3
Column Type: numeric
'Third Party Amount Paid 3'

Column Name: third_party_payer_amt_4
Column Type: numeric
'Third Party Amount Paid 4'

Column Name: third_party_payer_amt_5
Column Type: numeric
'Third Party Amount Paid 5'

Column Name: third_party_payer_amt_6
Column Type: numeric
'Third Party Amount Paid 6'

Column Name: third_party_payer_code_1
Column Type: varchar
Max Length: 50
'Third Party Payer 1'

Column Name: third_party_payer_code_2
Column Type: varchar
Max Length: 50
'Third Party Payer 2'

Column Name: third_party_payer_code_3
Column Type: varchar
Max Length: 50
'Third Party Payer 3'

Column Name: third_party_payer_code_4
Column Type: varchar
Max Length: 50
'Third Party Payer 4'

Column Name: third_party_payer_code_5
Column Type: varchar
Max Length: 50
'Third Party Payer 5'

Column Name: third_party_payer_code_6
Column Type: varchar
Max Length: 50
'Third Party Payer 6'

Column Name: third_party_payer_value_1
Column Type: varchar
Max Length: 50
The description associated with third_party_payer_code_1. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_2
Column Type: varchar
Max Length: 50
The description associated with third_party_payer_code_2. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_3
Column Type: varchar
Max Length: 50
The description associated with third_party_payer_code_3. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_4
Column Type: varchar
Max Length: 50
The description associated with third_party_payer_code_4. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_5

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_code_5. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_6

Column Type: varchar

Max Length: 50

The description associated with third_party_payer__code_6. See third_party_payer_value_code for more information.

Column Name: total_charge

Column Type: numeric

'Total Charge'

Column Name: type_of_service_code

Column Type: varchar

Max Length: 50

'Type of Service'

Column Name: type_of_service_value

Column Type: varchar

Max Length: 100

The description associated with type_of_service_code. See type_of_service_code for more information.

Column Name: version

Column Type: varchar

Max Length: 20

The 837 version.

Documentation for form: 837_Health_Care_Claim_Institutional

Table Name: SYSTEM.billing_837_error

Table Description: This table returns error data from an 837 file.

Column Name: ID

Column Type: varchar

Max Length: 254

Column Name: FACILITY

Column Type: integer

The system code the data was generated for.

Column Name: data_entry_by

Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The 'User ID' that last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
The 'User Description' of the 'User ID'.

Column Name: error_message
Column Type: varchar
Max Length: 500
'Error Message'

Column Name: error_type_code
Column Type: integer
'Error Type'

Column Name: error_type_value
Column Type: varchar
Max Length: 50
The description associated with error_type_code. See error_type_code for more information.

Column Name: file_index
Column Type: varchar
Max Length: 50
The file index.

Column Name: file_info_str
Column Type: varchar
Max Length: 50

The file information string.

Column Name: file_name
Column Type: varchar
Max Length: 255
The file name.

Column Name: file_status
Column Type: varchar
Max Length: 50
'File Status'

Column Name: unique_counter
Column Type: integer
The unique counter.

Column Name: version
Column Type: varchar
Max Length: 20
837 version.

Documentation for form: 837_Health_Care_Claim_Institutional

Table Name: SYSTEM.billing_837_file

Table Description: This table returns data about an 837 file.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer
The system code the data was generated for.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date

Column Type: date
The date the row was last updated.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The 'User ID' that last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
The 'User Description' of the 'User ID'.

Column Name: file_index
Column Type: varchar
Max Length: 50
The file index.

Column Name: file_info_str
Column Type: varchar
Max Length: 50
The file information string.

Column Name: file_name
Column Type: varchar
Max Length: 255
'File Path\Name'

Column Name: file_status
Column Type: varchar
Max Length: 50
'File Status'

Column Name: segment
Column Type: varchar
Max Length: 80
The particular segment being accessed.

Column Name: segment_index
Column Type: varchar
Max Length: 50
The segment counter.

Column Name: version
Column Type: varchar

Max Length: 20
837 version.

Documentation for form: 837_Health_Care_Claim_Institutional

Table Name: SYSTEM.billing_837i_compile_post

Table Description: This table returns the information stored in the '837 Health Care Claim Institutional' form.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The service unique ID.

Column Name: adm_diagnosis_code
Column Type: varchar
Max Length: 50
'Admission Diagnosis Code'

Column Name: adm_diagnosis_value
Column Type: varchar
Max Length: 200
The description associated with adm_diagnosis_code. See adm_diagnosis_code for more information.

Column Name: admission_date
Column Type: date
'Admission Date'

Column Name: admission_hour
Column Type: varchar
Max Length: 50
'Admission Hour'

Column Name: admission_source
Column Type: varchar
Max Length: 50
'Admission Source'

Column Name: admission_type
Column Type: varchar
Max Length: 50
'Admission Type'

Column Name: authorization_number
Column Type: varchar
Max Length: 100
'Authorization Number'

Column Name: batch_number
Column Type: varchar
Max Length: 50
'Batch Number'

Column Name: claim_counter
Column Type: integer
'Claim Counter'

Column Name: claim_date_range_flag
Column Type: varchar
Max Length: 100
Was the claim submitted with more than one date.

Column Name: claim_status_code
Column Type: varchar
Max Length: 50
'Claim Status Code'

Column Name: copay_amount
Column Type: numeric
'Copay Amount'

Column Name: covered_days
Column Type: integer
'Covered Days'

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the service.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The user ID who last updated the service.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
The user name who last updated the service.

Column Name: date_of_claim
Column Type: date
'Date of Claim'

Column Name: deductible_amount
Column Type: numeric
'Deductible Amount'

Column Name: diagnosis_code_1
Column Type: varchar
Max Length: 50
'Diagnosis Code 1'

Column Name: diagnosis_code_10
Column Type: varchar
Max Length: 50
'Diagnosis Code 10'

Column Name: diagnosis_code_11
Column Type: varchar
Max Length: 50
'Diagnosis Code 11'

Column Name: diagnosis_code_12
Column Type: varchar
Max Length: 50
'Diagnosis Code 12'

Column Name: diagnosis_code_2
Column Type: varchar
Max Length: 50
'Diagnosis Code 2'

Column Name: diagnosis_code_3

Column Type: varchar
Max Length: 50
'Diagnosis Code 3'

Column Name: diagnosis_code_4
Column Type: varchar
Max Length: 50
'Diagnosis Code 4'

Column Name: diagnosis_code_5
Column Type: varchar
Max Length: 50
'Diagnosis Code 5'

Column Name: diagnosis_code_6
Column Type: varchar
Max Length: 50
'Diagnosis Code 6'

Column Name: diagnosis_code_7
Column Type: varchar
Max Length: 50
'Diagnosis Code 7'

Column Name: diagnosis_code_8
Column Type: varchar
Max Length: 50
'Diagnosis Code 8'

Column Name: diagnosis_code_9
Column Type: varchar
Max Length: 50
'Diagnosis Code 9'

Column Name: diagnosis_ref_code
Column Type: varchar
Max Length: 50
'Diagnosis Reference Code'

Column Name: diagnosis_ref_value
Column Type: varchar
Max Length: 200
The description associated with diagnosis_ref_code. See diagnosis_ref_code for more information.

Column Name: diagnosis_value_1
Column Type: varchar
Max Length: 200
The description associated with diagnosis_code_1. See diagnosis_code_1 for more information.

Column Name: diagnosis_value_10

Column Type: varchar

Max Length: 200

The description associated with diagnosis_code_10. See diagnosis_code_10 for more information.

Column Name: diagnosis_value_11

Column Type: varchar

Max Length: 200

The description associated with diagnosis_code_11. See diagnosis_code_11 for more information.

Column Name: diagnosis_value_12

Column Type: varchar

Max Length: 200

The description associated with diagnosis_code_12. See diagnosis_code_12 for more information.

Column Name: diagnosis_value_2

Column Type: varchar

Max Length: 200

The description associated with diagnosis_code_2. See diagnosis_code_2 for more information.

Column Name: diagnosis_value_3

Column Type: varchar

Max Length: 200

The description associated with diagnosis_code_3. See diagnosis_code_3 for more information.

Column Name: diagnosis_value_4

Column Type: varchar

Max Length: 200

The description associated with diagnosis_code_4. See diagnosis_code_4 for more information.

Column Name: diagnosis_value_5

Column Type: varchar

Max Length: 200

The description associated with diagnosis_code_5. See diagnosis_code_5 for more information.

Column Name: diagnosis_value_6

Column Type: varchar

Max Length: 200

The description associated with diagnosis_code_6. See diagnosis_code_6 for more information.

Column Name: diagnosis_value_7

Column Type: varchar

Max Length: 200

The description associated with diagnosis_code_7. See diagnosis_code_7 for more information.

Column Name: diagnosis_value_8

Column Type: varchar

Max Length: 200

The description associated with diagnosis_code_8. See diagnosis_code_8 for more information.

Column Name: diagnosis_value_9

Column Type: varchar

Max Length: 200

The description associated with diagnosis_code_9. See diagnosis_code_9 for more information.

Column Name: discharge_hour

Column Type: varchar

Max Length: 50

'Discharge Hour'

Column Name: duration

Column Type: varchar

Max Length: 50

'Duration'

Column Name: expected_disbursement_amount

Column Type: numeric

'Expected Disbursement Amount'

Column Name: explanation_of_coverage

Column Type: varchar

Max Length: 500

'Explanation of Coverage'

Column Name: federal_tax

Column Type: varchar

Max Length: 50

'Federal Tax'

Column Name: fee_table_amount

Column Type: numeric

'Fee Table Amount'

Column Name: file_index

Column Type: varchar

Max Length: 50

'File Index'

Column Name: file_info_str

Column Type: varchar

Max Length: 50

'File Information String'

Column Name: file_name

Column Type: varchar

Max Length: 250

'File Name'

Column Name: file_status

Column Type: varchar

Max Length: 50

'File Status'

Column Name: from_date

Column Type: date

'From Date'

Column Name: funding_source_id

Column Type: varchar

Max Length: 50

'Funding Source'

Column Name: funding_source_name

Column Type: varchar

Max Length: 100

'Funding Source Name'

Column Name: level_of_care_code

Column Type: varchar

Max Length: 50

'Level of Care'

Column Name: level_of_care_value

Column Type: varchar

Max Length: 100

The description associated with level_of_care_code. See level_of_care_code for more information.

Column Name: line_item_control_number

Column Type: varchar

Max Length: 50

'Line Item Control Number'

Column Name: line_note

Column Type: varchar

Max Length: 500

'Line Note'

Column Name: location

Column Type: varchar

Max Length: 50

'Location'

Column Name: measurement_code_code

Column Type: varchar

Max Length: 100

'Measurement Code (837-2400-SV103/SV204)'.

Column Name: measurement_code_value

Column Type: varchar

Max Length: 50

The description associated with measurement_code_code. See measurement_code_code for more information.

Column Name: member_id
Column Type: varchar
Max Length: 20
'Member ID'

Column Name: member_name
Column Type: varchar
Max Length: 100
'Member Name'

Column Name: non_covered_days
Column Type: integer
'Non Covered Days'

Column Name: patient_control_number
Column Type: varchar
Max Length: 100
'Patient Control Number'

Column Name: performing_provider_index
Column Type: varchar
Max Length: 50
'Performing Provider Index'

Column Name: performing_provider_name
Column Type: varchar
Max Length: 100
'Performing Provider Name'

Column Name: prin_diagnosis_code
Column Type: varchar
Max Length: 50
'Principal Diagnosis'

Column Name: prin_diagnosis_value
Column Type: varchar
Max Length: 200
The description associated with prin_diagnosis_code. See prin_diagnosis_code for more information.

Column Name: procedure_code_code
Column Type: varchar
Max Length: 50
'Provider Code'

Column Name: procedure_code_type
Column Type: varchar
Max Length: 50

'Procedure Code Type'

Column Name: procedure_code_value

Column Type: varchar

Max Length: 200

The description associated with procedure_code_code. See procedure_code_code for more information.

Column Name: provider_id

Column Type: integer

'Provider ID'

Column Name: provider_name

Column Type: varchar

Max Length: 100

'Provider'

Column Name: provider_sort

Column Type: varchar

Max Length: 50

'Provider Sort'

Column Name: represent_admission

Column Type: varchar

Max Length: 50

'Represent Admission'

Column Name: result_string

Column Type: varchar

Max Length: 1000

'Result String'

Column Name: service_counter

Column Type: integer

'Service Counter'

Column Name: service_date

Column Type: date

'Service Date'

Column Name: service_units

Column Type: numeric

'Service Units'

Column Name: status

Column Type: varchar

Max Length: 50

'Status'

Column Name: third_party_amount_paid

Column Type: numeric

'Third Party Amount Paid'

Column Name: third_party_payer_amt_1

Column Type: numeric

'Third Party payer Amount 1'

Column Type: varchar

Max Length: 50

'Third Party Payer Code 1'

Column Name: third_party_payer_code_2

Column Type: varchar

Max Length: 50

'Third Party Payer Code 2'

Column Name: third_party_payer_code_3

Column Type: varchar

Max Length: 50

'Third Party Payer Code 3'

Column Name: third_party_payer_code_4

Column Type: varchar

Max Length: 50

'Third Party Payer Code 4'

Column Name: third_party_payer_code_5

Column Type: varchar

Max Length: 50

'Third Party Payer Code 5'

Column Name: third_party_payer_code_6

Column Type: varchar

Max Length: 50

'Third Party Payer Code 6'

Column Name: third_party_payer_value_1

Column Type: varchar

Max Length: 50

The description associated with third_party_payer__code_1. See third_party_payer_code_1 for more information.

Column Name: third_party_payer_value_2

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_code_2. See third_party_payer_code_2 for more information.

Column Name: third_party_payer_value_3

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_code_3. See third_party_payer_code_3 for more information.

Column Name: third_party_payer_value_4

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_code_4. See third_party_payer_code_4 for more information.

Column Name: third_party_payer_value_5

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_code_5. See third_party_payer_code_5 for more information.

Column Name: third_party_payer_value_6

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_code_6. See third_party_payer_code_6 for more information.

Column Name: thought_date

Column Type: date

'Through Date'

Column Name: total_charge

Column Type: numeric

'Total Charge'

Column Name: type_of_bill
Column Type: varchar
Max Length: 50
'Type of Bill'

Column Name: type_of_service_code
Column Type: varchar
Max Length: 50
'Type of Service Code'

Column Name: type_of_service_value
Column Type: varchar
Max Length: 100
The description associated with type_of_service_code. See type_of_service_code for more information.

Column Name: version
Column Type: varchar
Max Length: 20
'Version'

Documentation for form: 837_Health_Care_Claim_Institutional

Table Name: SYSTEM.mso_999_error

Table Description: This table returns 837 file data.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date

The date the row was last updated.

Column Name: data_entry_time

Column Type: varchar

Max Length: 10

The time the row was last updated.

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 50

The user ID who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 50

The user name who last updated the row.

Column Name: error_message

Column Type: varchar

Max Length: 500

The 'Error Message'.

Column Name: file_997_created

Column Type: varchar

Max Length: 50

Indicates whether the file was created.

Column Name: file_index

Column Type: varchar

Max Length: 50

The file index.

Column Name: file_info_str

Column Type: varchar

Max Length: 50

The file information string.

Column Name: file_info_str_997

Column Type: varchar

Max Length: 50

The 997 file info string.

Column Name: file_name

Column Type: varchar

Max Length: 50

The 'File Name'.

Column Name: file_name_997

Column Type: varchar

Max Length: 50

The 997 file name.

Column Name: file_status
Column Type: varchar
Max Length: 50
The 'File Status'.

Column Name: unique_counter
Column Type: varchar
Max Length: 50
The unique counter.

Column Name: version
Column Type: varchar
Max Length: 20
The 837 version.

Column Name: version_999
Column Type: varchar
Max Length: 20
The 997 version.

Documentation for form: 837_Health_Care_Claim_Institutional

Table Name: SYSTEM.mso_999_file

Table Description: This table returns 837 file data.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 50
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: file_997_created
Column Type: varchar
Max Length: 50
Indicates whether the file was created.

Column Name: file_index
Column Type: varchar
Max Length: 50
The file index.

Column Name: file_info_str
Column Type: varchar
Max Length: 50
The file information string.

Column Name: file_info_str_997
Column Type: varchar
Max Length: 50
The 997 file info string.

Column Name: file_name
Column Type: varchar
Max Length: 255
The 'File Name'.

Column Name: file_name_997
Column Type: varchar
Max Length: 255
The 997 file name.

Column Name: file_status
Column Type: varchar
Max Length: 50
The 'File Status'.

Column Name: version
Column Type: varchar
Max Length: 20
The 837 version.

Column Name: version_999
Column Type: varchar
Max Length: 20
The 997 version.

Documentation for form: Fast_Service_Entry

Table Name: SYSTEM.batch_clm_svc_adj_codes

Table Description: This table returns adjustment codes assigned to services during claim adjudication, as well as HIPAA cross reference information associated to those codes.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID for the batch.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: adj_amount
Column Type: varchar
Max Length: 50
The adjustment amount associated with the EOB message.

Column Name: adj_code_code
Column Type: varchar
Max Length: 50
The adjustment code associated with the EOB message.

Column Name: adj_code_value
Column Type: varchar
Max Length: 50
The description associated with adj_code_code. See adj_code_code for more information.

Column Name: adj_group_code_5010_code
Column Type: varchar
Max Length: 50
The HIPAA version 5010 adjustment group code associated with the EOB message.

Column Name: adj_group_code_5010_value
Column Type: varchar
Max Length: 50
The description associated with adj_group_code_5010_code. See adj_group_code_5010_code for more information.

Column Name: adj_group_code_code
Column Type: varchar
Max Length: 50
The adjustment group code associated with the EOB message.

Column Name: adj_group_code_value
Column Type: varchar
Max Length: 50
The description associated with adj_group_code_code. See adj_group_code_code for more information.

Column Name: adj_reason_code_code

Column Type: varchar

Max Length: 50

The adjustment reason code associated with the EOB message.

Column Name: adj_reason_code_value

Column Type: varchar

Max Length: 4096

The description associated with adj_reason_code_code. See adj_reason_code_code for more information.

Column Name: apd_status_code

Column Type: varchar

Max Length: 50

Dictionary code for the claim status associated to the EOB message.

Column Name: apd_status_value

Column Type: varchar

Max Length: 50

The description associated with apd_status_code. See apd_status_code for more information.

Column Name: eob_message_code

Column Type: numeric

The unique numeric ID of the EOB message.

Column Name: eob_message_value

Column Type: varchar

Max Length: 50

The description associated with eob_message_code. See eob_message_code for more information.

Documentation for form: Fast_Service_Entry

Table Name: SYSTEM.batch_clm_svc_detail

Table Description: This table returns detailed information on MSO services.

Column Name: ID

Column Type: integer

Column Name: BATCHID

Column Type: varchar

Max Length: 50

The unique ID for the batch.

Column Name: CLAIMID

Column Type: integer

The claim number.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: GUID
Column Type: varchar
Max Length: 50
A unique identifier used internally to validate data.

Column Name: JOIN_TO_AUTUniqueid
Column Type: varchar
Max Length: 50
The unique ID for the associated authorization.

Column Name: JOIN_TO_HCF_UBF_Type
Column Type: varchar
Max Length: 50
Indicator of whether this claim is of type "HCFA" or "UB92".

Column Name: JOIN_TO_HCFUniqueid
Column Type: varchar
Max Length: 50
The unique ID for the claim if it is of type "HCFA".

Column Name: JOIN_TO_UBFHCFUniqueid
Column Type: varchar
Max Length: 50
The unique ID for the claim.

Column Name: JOIN_TO_UBFUniqueid
Column Type: varchar
Max Length: 50
The unique ID for the claim if it is of type "UB92".

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: PPIuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the associated performing provider.

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: UTCTimestamp

Column Type: timestamp
The UTC time when the row was last updated.

Column Name: VOUCHERID
Column Type: integer
The unique ID for the voucher.

Column Name: ability_to_pay_amt
Column Type: numeric
The ability to pay amount deducted from the service.

Column Name: account_code
Column Type: varchar
Max Length: 50
The authorization account code.

Column Name: account_level
Column Type: varchar
Max Length: 50
The authorization account level.

Column Name: account_level_name
Column Type: varchar
Max Length: 50
The authorization account level name.

Column Name: account_name
Column Type: varchar
Max Length: 50
The authorization account name.

Column Name: add_on_notes
Column Type: varchar
Max Length: 32000
Add-on notes.

Column Name: adjudication_code
Column Type: varchar
Max Length: 50
The adjudication code.

Column Name: adjustment_reason_code
Column Type: varchar
Max Length: 50
One or more dictionary codes for claim adjustment reasons.

Column Name: adjustment_reason_value
Column Type: varchar
Max Length: 255

The description associated with adjustment_reason_code. See adjustment_reason_code for more information.

Column Name: approved_units

Column Type: numeric

Approved units.

Column Name: associated_code

Column Type: varchar

Max Length: 50

Associated code.

Column Name: authorization_assoc_code

Column Type: varchar

Max Length: 50

The authorization associated code.

Column Name: authorization_number

Column Type: varchar

Max Length: 50

The authorization number.

Column Name: authorization_valid_code

Column Type: varchar

Max Length: 50

Indicator of whether the authorization is valid.

Column Name: authorization_valid_value

Column Type: varchar

Max Length: 50

The description associated with authorization_valid_code. See authorization_valid_code for more information.

Column Name: blackout_id

Column Type: integer

The unique blackout ID.

Column Name: carelink_service_ID

Column Type: varchar

Max Length: 50

The carelink service ID.

Column Name: claim_number_837

Column Type: varchar

Max Length: 50

837 claim number for the service.

Column Name: claim_status_code

Column Type: varchar

Max Length: 50

Dictionary code for the claim status.

Column Name: claim_status_reason_code

Column Type: varchar

Max Length: 50

Dictionary code for the claim status reason.

Column Name: claim_status_reason_value

Column Type: varchar

Max Length: 4096

The description associated with claim_status_reason_code. See claim_status_reason_code for more information.

Column Name: claim_status_value

Column Type: varchar

Max Length: 50

The description associated with claim_status_code. See claim_status_code for more information.

Column Name: comments

Column Type: varchar

Max Length: 32766

Comments regarding the service.

Column Name: contains_overridden_field

Column Type: varchar

Max Length: 1

Indicator of whether there is an overridden field.If "Y", indicates that this service detail contains one or more fields whose values were manually overridden.

Column Name: copay_applies_to_ded_code

Column Type: varchar

Max Length: 50

'Co-Pay Counts Towards Deductible'

Column Name: copay_applies_to_ded_value

Column Type: varchar

Max Length: 50

The description associated with copay_applies_to_ded_code. See copay_applies_to_ded_code for more information.

Column Name: cost_center_code

Column Type: varchar

Max Length: 50

Dictionary code for the cost center.

Column Name: cost_center_value

Column Type: varchar

Max Length: 50

The description associated with cost_center_code. See cost_center_code for more information.

Column Name: covered_CBPuniqueid
Column Type: varchar
Max Length: 50
The unique ID for plan covered services.

Column Name: covered_LIBuniqueid
Column Type: varchar
Max Length: 50
The unique ID for plan liability rules level.

Column Name: covered_PLANID
Column Type: varchar
Max Length: 50
The unique ID for the associated coverage plan.

Column Name: cpt_code_code
Column Type: varchar
Max Length: 50
The CPT code.

Column Name: cpt_code_value
Column Type: varchar
Max Length: 80
The description associated with cpt_code_code. See cpt_code_code for more information.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 50

The user ID who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name who last updated the row.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: date_of_service

Column Type: date

The date the service was rendered.

Column Name: date_of_service_end

Column Type: date

The date the service ended.

Column Name: delay_reason_code

Column Type: varchar

Max Length: 50

Dictionary code indicating the reason the claim was delayed.

Column Name: delay_reason_value

Column Type: varchar

Max Length: 50

The description associated with delay_reason_code. See delay_reason_code for more information.

Column Name: diagnosis_code

Column Type: varchar

Max Length: 50

Diagnosis code associated with the service.

Column Name: diagnosis_reference

Column Type: varchar
Max Length: 50
Diagnosis reference.

Column Name: diagnosis_reference_2
Column Type: varchar
Max Length: 50
Diagnosis reference 2.

Column Name: diagnosis_reference_3
Column Type: varchar
Max Length: 50
Diagnosis reference 3.

Column Name: diagnosis_reference_4
Column Type: varchar
Max Length: 50
Diagnosis reference 4.

Column Name: diagnosis_value
Column Type: varchar
Max Length: 200
The description associated with diagnosis_code. See diagnosis_code for more information.

Column Name: discipline_code
Column Type: varchar
Max Length: 40
Dictionary code indicating the medical discipline under which the service was rendered.

Column Name: discipline_value
Column Type: varchar
Max Length: 40
The description associated with discipline_code. See discipline_code for more information.

Column Name: documentation_time
Column Type: numeric
For group services, the documentation time

Column Name: drug_ref_id
Column Type: varchar
Max Length: 50
The service drug reference ID.

Column Name: drug_ref_id_qual
Column Type: varchar
Max Length: 50
The service drug reference qualifier.

Column Name: duration
Column Type: varchar

Max Length: 50
The service duration.

Column Name: ebpss_csi_code
Column Type: varchar
Max Length: 32000
Dictionary code indicating the evidence-based practices / service strategies (CSI) code for the service.

Column Name: ebpss_csi_value
Column Type: varchar
Max Length: 255
The description associated with ebpss_csi_code. See ebpss_csi_code for more information.

Column Name: ebpss_csi_value_long
Column Type: varchar
Max Length: 4096
The description associated with ebpss_csi_value_code. See ebpss_csi_value_code for more information.

Column Name: eligible_provider_code
Column Type: varchar
Max Length: 50
Indicator of whether the provider was eligible or not.

Column Name: eligible_provider_value
Column Type: varchar
Max Length: 50
The description associated with eligible_provider_code. See eligible_provider_code for more information.

Column Name: emergency_indicator_code
Column Type: varchar
Max Length: 50
'Emergency Indicator (837P-2400-SV109)'

Column Name: emergency_indicator_value
Column Type: varchar
Max Length: 50
The description associated with emergency_indicator_code. See emergency_indicator_code for more information.

Column Name: expected_disburse
Column Type: numeric
Expected disbursement for the service.

Column Name: explan_of_coverage
Column Type: varchar
Max Length: 32766
Explanation of coverage.

Column Name: group_service_units
Column Type: varchar

Max Length: 50
For group services, the total approved group service units

Column Name: group_service_units_day
Column Type: varchar
Max Length: 50
For group services, the total approved group service units per day

Column Name: hcpcs_code
Column Type: varchar
Max Length: 50
The HCPCS code.

Column Name: is_this_an_admission_code
Column Type: varchar
Max Length: 50
'Does This Service Represent An Admission'

Column Name: is_this_an_admission_value
Column Type: varchar
Max Length: 50
The description associated with is_this_an_admission_code. See is_this_an_admission_code for more information.

Column Name: level_of_care
Column Type: varchar
Max Length: 50
Level of care.

Column Name: line_item_control_num
Column Type: varchar
Max Length: 50
Line item control number.

Column Name: line_note_code
Column Type: varchar
Max Length: 50
Indicator dictionary code of the type of information captured in the service line note text.

Column Name: line_note_code_val
Column Type: varchar
Max Length: 50
The description associated with line_note_code_code. See line_note_code_code for more information.

Column Name: line_note_text
Column Type: varchar
Max Length: 80
Service line note text.

Column Name: location_code

Column Type: varchar
Max Length: 50
The service location code.

Column Name: location_value
Column Type: varchar
Max Length: 50
The description associated with location_code. See location_code for more information.

Column Name: manual_service_code
Column Type: varchar
Max Length: 50
Manual service code.

Column Name: manual_service_descript
Column Type: varchar
Max Length: 80
Manual service description.

Column Name: measurement_code_code
Column Type: varchar
Max Length: 50
'Measurement Code (837-2400-SV103/SV204)'.

Column Name: measurement_code_value
Column Type: varchar
Max Length: 50
The description associated with measurement_code_code. See measurement_code_code for more information.

Column Name: member_copay
Column Type: numeric
Member co-pay.

Column Name: member_deductible
Column Type: numeric
Member deductible.

Column Name: member_enrolled_dos_code
Column Type: varchar
Max Length: 50
'Member Enrolled On Date Of Service'

Column Name: member_enrolled_dos_value
Column Type: varchar
Max Length: 50
The description associated with member_enrolled_dos_code. See member_enrolled_dos_code for more information.

Column Name: member_id

Column Type: numeric
Member ID.

Column Name: national_drug_code
Column Type: varchar
Max Length: 50
National drug code.

Column Name: number_in_group
Column Type: numeric
For group services, the number of members in the group

Column Name: num_counselor_in_group
Column Type: numeric
For group services, the number of counselors in the group

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: original_proc_code_code
Column Type: varchar
Max Length: 50
Original procedure code.

Column Name: original_proc_code_type
Column Type: varchar
Max Length: 50
Original procedure type.

Column Name: original_proc_code_value
Column Type: varchar
Max Length: 80
The description associated with original_proc_code_code. See original_proc_code_code for more information.

Column Name: parent_nspace_link_to_DD
Column Type: varchar
Max Length: 50
Link to the associated parent service in SYSTEM.billing_tx_history.

Column Name: patient_account_number
Column Type: varchar
Max Length: 50

Patient account number.

Column Name: perf_prov_name
Column Type: varchar
Max Length: 50
Name of the performing provider.

Column Name: place_of_service_code
Column Type: varchar
Max Length: 50
Place of service code.

Column Name: population_code
Column Type: varchar
Max Length: 50
Population code.

Column Name: population_value
Column Type: varchar
Max Length: 50
The description associated with population_code. See population_code for more information.

Column Name: prev_batch_pended_from
Column Type: varchar
Max Length: 500
Previous batch the service was pended from.

Column Name: primary_service_id
Column Type: varchar
Max Length: 50
The primary service ID.

Column Name: private_pay_amt
Column Type: numeric
Private pay amount.

Column Name: private_pay_payer_code
Column Type: varchar
Max Length: 50
Payer code for private pay.

Column Name: private_pay_payer_value
Column Type: varchar
Max Length: 50
The description associated with private_pay_payer_code. See private_pay_payer_code for more information.

Column Name: proc_code_type_for_adj
Column Type: varchar
Max Length: 50

Procedure code type of adjustment.

Column Name: procedure_code_code
Column Type: varchar
Max Length: 50
Procedure code.

Column Name: procedure_code_type
Column Type: varchar
Max Length: 50
Procedure code type.

Column Name: procedure_code_value
Column Type: varchar
Max Length: 80
The description associated with procedure_code_code. See procedure_code_code for more information.

Column Name: procedure_code_with_mod
Column Type: varchar
Max Length: 50
Procedure code with modifier.

Column Name: provider_to_be_auth
Column Type: varchar
Max Length: 50
Provider to be authorized.

Column Name: prov_pgm_link
Column Type: varchar
Max Length: 50
Provider program link.

Column Name: prov_pgm_name
Column Type: varchar
Max Length: 50
Provider program name.

Column Name: quantity
Column Type: varchar
Max Length: 50
Quantity.

Column Name: ref_p4
Column Type: varchar
Max Length: 50
REF*P4 segment

Column Name: remark_codes
Column Type: varchar
Max Length: 500

Claim status remark codes returned on an 837.

Column Name: remark_codes_value

Column Type: varchar

Max Length: 5096

The description associated with remark_codes_code. See remark_codes_code for more information.

Column Name: revenue_code_code

Column Type: varchar

Max Length: 50

Revenue code.

Column Name: revenue_code_value

Column Type: varchar

Max Length: 80

The description associated with revenue_code_code. See revenue_code_code for more information.

Column Name: service_comments

Column Type: varchar

Max Length: 32766

Service comments.

Column Name: service_end_time

Column Type: time

Service end time.

Column Name: service_start_time

Column Type: time

Service start time.

Column Name: service_units

Column Type: numeric

Service units.

Column Name: svc_bundle_837_id

Column Type: varchar

Max Length: 50

Service bundle 837 ID.

Column Name: svc_counts_as_visit

Column Type: varchar

Max Length: 50

Indicator code of whether the service counts as a visit.

Column Name: system_index

Column Type: varchar

Max Length: 50

Service index.

Column Name: third_party_amount_paid

Column Type: numeric
Third party amount paid

Column Name: third_party_payer_amt_1
Column Type: numeric
Third party payer amount 1.

Column Name: third_party_payer_amt_2
Column Type: numeric
Third party payer amount 2.

Column Name: third_party_payer_amt_3
Column Type: numeric
Third party payer amount 3.

Column Name: third_party_payer_amt_4
Column Type: numeric
Third party payer amount 4.

Column Name: third_party_payer_amt_5
Column Type: numeric
Third party payer amount 5.

Column Name: third_party_payer_amt_6
Column Type: numeric
Third party payer amount 6.

Column Name: third_party_payer_code_1
Column Type: varchar
Max Length: 50
Third party payer code 1.

Column Name: third_party_payer_code_2
Column Type: varchar
Max Length: 50
Third party payer code 2.

Column Name: third_party_payer_code_3
Column Type: varchar
Max Length: 50
Third party payer code 3.

Column Name: third_party_payer_code_4
Column Type: varchar
Max Length: 50
Third party payer code 4.

Column Name: third_party_payer_code_5
Column Type: varchar
Max Length: 50

Third party payer code 5.

Column Name: third_party_payer_code_6

Column Type: varchar

Max Length: 50

Third party payer code 6.

Column Name: third_party_payer_value_1

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_2

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_3

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_4

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_5

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_6

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: thrd_prty_allowed_amt

Column Type: numeric

Third party allowed amount.

Column Name: thrd_prty_billed_amt

Column Type: numeric

Third party billed amount

Column Name: thrd_prty_pay_adj_amt_11
Column Type: numeric

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_45

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_allow_1
Column Type: numeric
Third party payment allowed amount 1.

Column Name: thrd_prty_pay_allow_2
Column Type: numeric
Third party payment allowed amount 2.

Column Name: thrd_prty_pay_allow_3
Column Type: numeric
Third party payment allowed amount 3.

Column Name: thrd_prty_pay_allow_4
Column Type: numeric
Third party payment allowed amount 4.

Column Name: thrd_prty_pay_billed_1
Column Type: numeric
Third party payment billed 1.

Column Name: thrd_prty_pay_billed_2
Column Type: numeric
Third party payment billed 2.

Column Name: thrd_prty_pay_billed_3
Column Type: numeric
Third party payment billed 3.

Column Name: thrd_prty_pay_billed_4
Column Type: numeric
Third party payment billed 4.

Column Name: thrd_prty_pvt_pay_amt
Column Type: numeric
Third party private pay amount.

Column Name: total_charge
Column Type: numeric
Total charge for the service.

Column Name: total_fee_table_amt
Column Type: numeric
Total fee table amount for the service.

Column Name: travel_time
Column Type: numeric
For group services, the travel time

Column Name: trt_prov_type

Column Type: varchar
Max Length: 50
Treatment provider type.

Column Name: type_of_service_code
Column Type: varchar
Max Length: 50
Dictionary code indicating whether the type of authorization is inpatient or outpatient.

Column Name: type_of_service_value
Column Type: varchar
Max Length: 50
The description associated with type_of_service_code. See type_of_service_code for more information.

Column Name: unique_row_id
Column Type: varchar
Max Length: 50
The unique row ID.

Column Name: unit_of_measurement
Column Type: varchar
Max Length: 50
Unit of measurement.

Documentation for form: Fast_Service_Entry

Table Name: SYSTEM.batch_clm_svc_detail_ss

Table Description: This table returns site specific fields for MSO services.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID for the batch.

Column Name: CLAIMID
Column Type: integer
The claim number.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: ss_batch_clm_date_1
Column Type: date
SS Batch Claim Date 1.

Column Name: ss_batch_clm_date_10
Column Type: date
SS Batch Claim Date 10.

Column Name: ss_batch_clm_date_2
Column Type: date
SS Batch Claim Date 2.

Column Name: ss_batch_clm_date_3
Column Type: date
SS Batch Claim Date 3.

Column Name: ss_batch_clm_date_4
Column Type: date
SS Batch Claim Date 4.

Column Name: ss_batch_clm_date_5
Column Type: date
SS Batch Claim Date 5.

Column Name: ss_batch_clm_date_6
Column Type: date
SS Batch Claim Date 6.

Column Name: ss_batch_clm_date_7
Column Type: date
SS Batch Claim Date 7.

Column Name: ss_batch_clm_date_8
Column Type: date
SS Batch Claim Date 8.

Column Name: ss_batch_clm_date_9
Column Type: date
SS Batch Claim Date 9.

Column Name: ss_batch_clm_dict_10_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 10 Cdoe.

Column Name: ss_batch_clm_dict_10_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 10 Value.

Column Name: ss_batch_clm_dict_1_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 1 Code.

Column Name: ss_batch_clm_dict_1_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 1 Value.

Column Name: ss_batch_clm_dict_2_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 2 Code.

Column Name: ss_batch_clm_dict_2_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 2 Value.

Column Name: ss_batch_clm_dict_3_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 3 Code.

Column Name: ss_batch_clm_dict_3_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 3 Value.

Column Name: ss_batch_clm_dict_4_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 4 Code.

Column Name: ss_batch_clm_dict_4_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 4 Value.

Column Name: ss_batch_clm_dict_5_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 5 Code.

Column Name: ss_batch_clm_dict_5_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 5 Value.

Column Name: ss_batch_clm_dict_6_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 6 Code.

Column Name: ss_batch_clm_dict_6_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 6 Value.

Column Name: ss_batch_clm_dict_7_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 7 Code.

Column Name: ss_batch_clm_dict_7_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 7 Value.

Column Name: ss_batch_clm_dict_8_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 8 Code.

Column Name: ss_batch_clm_dict_8_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 8 Value.

Column Name: ss_batch_clm_dict_9_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 9 Code.

Column Name: ss_batch_clm_dict_9_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 9 Value.

Column Name: ss_batch_clm_mult_1_code
Column Type: varchar
Max Length: 50
SS Batch Claim Multiple Select Dictionary 1 Code.

Column Name: ss_batch_clm_mult_1_shval
Column Type: varchar
Max Length: 255
SS Batch Claim Multiple Select Dictionary 1 Short Value.

Column Name: ss_batch_clm_mult_1_value
Column Type: varchar
Max Length: 4096
SS Batch Claim Multiple Select Dictionary 1 Full Value.

Column Name: ss_batch_clm_mult_2_code
Column Type: varchar
Max Length: 50
SS Batch Claim Multiple Select Dictionary 2 Code.

Column Name: ss_batch_clm_mult_2_shval
Column Type: varchar
Max Length: 255
SS Batch Claim Multiple Select Dictionary 2 Short Value.

Column Name: ss_batch_clm_mult_2_value
Column Type: varchar
Max Length: 4096
SS Batch Claim Multiple Select Dictionary 2 Full Value.

Column Name: ss_batch_clm_mult_3_code
Column Type: varchar
Max Length: 50
SS Batch Claim Multiple Select Dictionary 3 Code.

Column Name: ss_batch_clm_mult_3_shval
Column Type: varchar
Max Length: 255
SS Batch Claim Multiple Select Dictionary 3 Short Value.

Column Name: ss_batch_clm_mult_3_value
Column Type: varchar
Max Length: 4096
SS Batch Claim Multiple Select Dictionary 3 Full Value.

Column Name: ss_batch_clm_mult_4_code
Column Type: varchar
Max Length: 50
SS Batch Claim Multiple Select Dictionary 4 Code.

Column Name: ss_batch_clm_mult_4_shval
Column Type: varchar
Max Length: 255
SS Batch Claim Multiple Select Dictionary 4 Short Value.

Column Name: ss_batch_clm_mult_4_value
Column Type: varchar
Max Length: 4096
SS Batch Claim Multiple Select Dictionary 4 Full Value.

Column Name: ss_batch_clm_mult_5_code
Column Type: varchar
Max Length: 50
SS Batch Claim Multiple Select Dictionary 5 Code.

Column Name: ss_batch_clm_mult_5_shval
Column Type: varchar
Max Length: 255
SS Batch Claim Multiple Select Dictionary 5 Short Value.

Column Name: ss_batch_clm_mult_5_value
Column Type: varchar
Max Length: 4096
SS Batch Claim Multiple Select Dictionary 5 Full Value.

Column Name: ss_batch_clm_scr_txt_1
Column Type: varchar
Max Length: 32766
SS Batch Claim Scrolling Free Text 1.

Column Name: ss_batch_clm_scr_txt_10
Column Type: varchar
Max Length: 32766
SS Batch Claim Scrolling Free Text 10.

Column Name: ss_batch_clm_scr_txt_2

Documentation for form: Fast_Service_Entry

Table Name: SYSTEM.provider_monthly_max

Table Description: This table returns services that contribute towards a provider's monthly dollar max.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID for the batch.

Column Name: CLAIMID
Column Type: integer
The claim number.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: PROVID
Column Type: varchar
Max Length: 50
'Provider'

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: auth_used
Column Type: varchar
Max Length: 50
The number of the authorization that this service falls under.

Column Name: dollars_used
Column Type: varchar
Max Length: 50

Column Name: max_month
Column Type: integer
The month that this service will be credited against.

Column Name: max_year
Column Type: integer
The year that this service will be credited against.

Column Name: pended
Column Type: varchar
Max Length: 50
A flag indicating whether the service was pended due to exhaustion of monthly max dollars.

Documentation for form: Claim_Processing_(UB-04)

Table Name: SYSTEM.batch_clm_svc_adj_codes

Table Description: This table returns adjustment codes assigned to services during claim adjudication, as well as HIPAA cross reference information associated to those codes.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID for the batch.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: adj_amount
Column Type: varchar
Max Length: 50
The adjustment amount associated with the EOB message.

Column Name: adj_code_code
Column Type: varchar
Max Length: 50
The adjustment code associated with the EOB message.

Column Name: adj_code_value
Column Type: varchar
Max Length: 50
The description associated with adj_code_code. See adj_code_code for more information.

Column Name: adj_group_code_5010_code
Column Type: varchar
Max Length: 50
The HIPAA version 5010 adjustment group code associated with the EOB message.

Column Name: adj_group_code_5010_value
Column Type: varchar

Max Length: 50

The description associated with adj_group_code_5010_code. See adj_group_code_5010_code for more information.

Column Name: adj_group_code_code

Column Type: varchar

Max Length: 50

The adjustment group code associated with the EOB message.

Column Name: adj_group_code_value

Column Type: varchar

Max Length: 50

The description associated with adj_group_code_code. See adj_group_code_code for more information.

Column Name: adj_reason_code_code

Column Type: varchar

Max Length: 50

The adjustment reason code associated with the EOB message.

Column Name: adj_reason_code_value

Column Type: varchar

Max Length: 4096

The description associated with adj_reason_code_code. See adj_reason_code_code for more information.

Column Name: apd_status_code

Column Type: varchar

Max Length: 50

Dictionary code for the claim status associated to the EOB message.

Column Name: apd_status_value

Column Type: varchar

Max Length: 50

The description associated with apd_status_code. See apd_status_code for more information.

Column Name: eob_message_code

Column Type: numeric

The unique numeric ID of the EOB message.

Column Name: eob_message_value

Column Type: varchar

Max Length: 50

The description associated with eob_message_code. See eob_message_code for more information.

Documentation for form: Claim_Processing_(UB-04)

Table Name: SYSTEM.batch_clm_svc_detail

Table Description: This table returns detailed information on MSO services.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID for the batch.

Column Name: CLAIMID
Column Type: integer
The claim number.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: GUID
Column Type: varchar
Max Length: 50
A unique identifier used internally to validate data.

Column Name: JOIN_TO_AUTUniqueid
Column Type: varchar
Max Length: 50
The unique ID for the associated authorization.

Column Name: JOIN_TO_HCF_UBF_Type
Column Type: varchar
Max Length: 50
Indicator of whether this claim is of type "HCFA" or "UB92".

Column Name: JOIN_TO_HCFUniqueid
Column Type: varchar
Max Length: 50
The unique ID for the claim if it is of type "HCFA".

Column Name: JOIN_TO_UBFHCFUniqueid
Column Type: varchar
Max Length: 50
The unique ID for the claim.

Column Name: JOIN_TO_UBFUniqueid
Column Type: varchar
Max Length: 50
The unique ID for the claim if it is of type "UB92".

Column Name: PATID
Column Type: varchar

Max Length: 20
The client ID associated with the data.

Column Name: PPluniqueid
Column Type: varchar
Max Length: 50
The unique ID for the associated performing provider.

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: UTCTimestamp
Column Type: timestamp
The UTC time when the row was last updated.

Column Name: VOUCHERID
Column Type: integer
The unique ID for the voucher.

Column Name: ability_to_pay_amt
Column Type: numeric
The ability to pay amount deducted from the service.

Column Name: account_code
Column Type: varchar
Max Length: 50
The authorization account code.

Column Name: account_level
Column Type: varchar
Max Length: 50
The authorization account level.

Column Name: account_level_name
Column Type: varchar
Max Length: 50
The authorization account level name.

Column Name: account_name
Column Type: varchar
Max Length: 50
The authorization account name.

Column Name: add_on_notes
Column Type: varchar
Max Length: 32000
Add-on notes.

Column Name: adjudication_code

Column Type: varchar

Max Length: 50

The adjudication code.

Column Name: adjustment_reason_code

Column Type: varchar

Max Length: 50

One or more dictionary codes for claim adjustment reasons.

Column Name: adjustment_reason_value

Column Type: varchar

Max Length: 255

The description associated with adjustment_reason_code. See adjustment_reason_code for more information.

Column Name: approved_units

Column Type: numeric

Approved units.

Column Name: associated_code

Column Type: varchar

Max Length: 50

Associated code.

Column Name: authorization_assoc_code

Column Type: varchar

Max Length: 50

The authorization associated code.

Column Name: authorization_number

Column Type: varchar

Max Length: 50

The authorization number.

Column Name: authorization_valid_code

Column Type: varchar

Max Length: 50

Indicator of whether the authorization is valid.

Column Name: authorization_valid_value

Column Type: varchar

Max Length: 50

The description associated with authorization_valid_code. See authorization_valid_code for more information.

Column Name: blackout_id

Column Type: integer

The unique blackout ID.

Column Name: carelink_service_ID
Column Type: varchar
Max Length: 50
The carelink service ID.

Column Name: claim_number_837
Column Type: varchar
Max Length: 50
837 claim number for the service.

Column Name: claim_status_code
Column Type: varchar
Max Length: 50
Dictionary code for the claim status.

Column Name: claim_status_reason_code
Column Type: varchar
Max Length: 50
Dictionary code for the claim status reason.

Column Name: claim_status_reason_value
Column Type: varchar
Max Length: 4096
The description associated with claim_status_reason_code. See claim_status_reason_code for more information.

Column Name: claim_status_value
Column Type: varchar
Max Length: 50
The description associated with claim_status_code. See claim_status_code for more information.

Column Name: comments
Column Type: varchar
Max Length: 32766
Comments regarding the service.

Column Name: contains_overridden_field
Column Type: varchar
Max Length: 1
Indicator of whether there is an overridden field.If "Y", indicates that this service detail contains one or more fields whose values were manually overridden.

Column Name: copay_applies_to_ded_code
Column Type: varchar
Max Length: 50
'Co-Pay Counts Towards Deductible'

Column Name: copay_applies_to_ded_value
Column Type: varchar
Max Length: 50

The description associated with copay_applies_to_ded_code. See copay_applies_to_ded_code for more information.

Column Name: cost_center_code
Column Type: varchar
Max Length: 50
Dictionary code for the cost center.

Column Name: cost_center_value
Column Type: varchar
Max Length: 50
The description associated with cost_center_code. See cost_center_code for more information.

Column Name: covered_CBPuniqueid
Column Type: varchar
Max Length: 50
The unique ID for plan covered services.

Column Name: covered_LIBuniqueid
Column Type: varchar
Max Length: 50
The unique ID for plan liability rules level.

Column Name: covered_PLANID
Column Type: varchar
Max Length: 50
The unique ID for the associated coverage plan.

Column Name: cpt_code_code
Column Type: varchar
Max Length: 50
The CPT code.

Column Name: cpt_code_value
Column Type: varchar
Max Length: 80
The description associated with cpt_code_code. See cpt_code_code for more information.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date

The date the row was last updated.

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time

Column Type: varchar

Max Length: 50

The time the row was last updated.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 50

The user ID who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name who last updated the row.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: date_of_service

Column Type: date

The date the service was rendered.

Column Name: date_of_service_end

Column Type: date

The date the service ended.

Column Name: delay_reason_code

Column Type: varchar

Max Length: 50

Dictionary code indicating the reason the claim was delayed.

Column Name: delay_reason_value

Column Type: varchar

Max Length: 50

The description associated with delay_reason_code. See delay_reason_code for more information.

Column Name: diagnosis_code

Column Type: varchar

Max Length: 50

Diagnosis code associated with the service.

Column Name: diagnosis_reference

Column Type: varchar

Max Length: 50

Diagnosis reference.

Column Name: diagnosis_reference_2

Column Type: varchar

Max Length: 50

Diagnosis reference 2.

Column Name: diagnosis_reference_3

Column Type: varchar

Max Length: 50

Diagnosis reference 3.

Column Name: diagnosis_reference_4

Column Type: varchar

Max Length: 50

Diagnosis reference 4.

Column Name: diagnosis_value

Column Type: varchar

Max Length: 200

The description associated with diagnosis_code. See diagnosis_code for more information.

Column Name: discipline_code

Column Type: varchar

Max Length: 40

Dictionary code indicating the medical discipline under which the service was rendered.

Column Name: discipline_value

Column Type: varchar

Max Length: 40

The description associated with discipline_code. See discipline_code for more information.

Column Name: documentation_time

Column Type: numeric

For group services, the documentation time

Column Name: drug_ref_id
Column Type: varchar
Max Length: 50
The service drug reference ID.

Column Name: drug_ref_id_qual
Column Type: varchar
Max Length: 50
The service drug reference qualifier.

Column Name: duration
Column Type: varchar
Max Length: 50
The service duration.

Column Name: ebpss_csi_code
Column Type: varchar
Max Length: 32000
Dictionary code indicating the evidence-based practices / service strategies (CSI) code for the service.

Column Name: ebpss_csi_value
Column Type: varchar
Max Length: 255
The description associated with ebpss_csi_code. See ebpss_csi_code for more information.

Column Name: ebpss_csi_value_long
Column Type: varchar
Max Length: 4096
The description associated with ebpss_csi_value_code. See ebpss_csi_value_code for more information.

Column Name: eligible_provider_code
Column Type: varchar
Max Length: 50
Indicator of whether the provider was eligible or not.

Column Name: eligible_provider_value
Column Type: varchar
Max Length: 50
The description associated with eligible_provider_code. See eligible_provider_code for more information.

Column Name: emergency_indicator_code
Column Type: varchar
Max Length: 50
'Emergency Indicator (837P-2400-SV109)'

Column Name: emergency_indicator_value
Column Type: varchar
Max Length: 50

The description associated with emergency_indicator_code. See emergency_indicator_code for more information.

Column Name: expected_disburse
Column Type: numeric
Expected disbursement for the service.

Column Name: explan_of_coverage
Column Type: varchar
Max Length: 32766
Explanation of coverage.

Column Name: group_service_units
Column Type: varchar
Max Length: 50
For group services, the total approved group service units

Column Name: group_service_units_day
Column Type: varchar
Max Length: 50
For group services, the total approved group service units per day

Column Name: hcpcs_code
Column Type: varchar
Max Length: 50
The HCPCS code.

Column Name: is_this_an_admission_code
Column Type: varchar
Max Length: 50
'Does This Service Represent An Admission'

Column Name: is_this_an_admission_value
Column Type: varchar
Max Length: 50
The description associated with is_this_an_admission_code. See is_this_an_admission_code for more information.

Column Name: level_of_care
Column Type: varchar
Max Length: 50
Level of care.

Column Name: line_item_control_num
Column Type: varchar
Max Length: 50
Line item control number.

Column Name: line_note_code
Column Type: varchar

Max Length: 50

Indicator dictionary code of the type of information captured in the service line note text.

Column Name: line_note_code_val

Column Type: varchar

Max Length: 50

The description associated with line_note_code_code. See line_note_code_code for more information.

Column Name: line_note_text

Column Type: varchar

Max Length: 80

Service line note text.

Column Name: location_code

Column Type: varchar

Max Length: 50

The service location code.

Column Name: location_value

Column Type: varchar

Max Length: 50

The description associated with location_code. See location_code for more information.

Column Name: manual_service_code

Column Type: varchar

Max Length: 50

Manual service code.

Column Name: manual_service_descript

Column Type: varchar

Max Length: 80

Manual service description.

Column Name: measurement_code_code

Column Type: varchar

Max Length: 50

'Measurement Code (837-2400-SV103/SV204)'.

Column Name: measurement_code_value

Column Type: varchar

Max Length: 50

The description associated with measurement_code_code. See measurement_code_code for more information.

Column Name: member_copay

Column Type: numeric

Member co-pay.

Column Name: member_deductible

Column Type: numeric

Member deductible.

Column Name: member_enrolled_dos_code

Column Type: varchar

Max Length: 50

'Member Enrolled On Date Of Service'

Column Name: member_enrolled_dos_value

Column Type: varchar

Max Length: 50

The description associated with member_enrolled_dos_code. See member_enrolled_dos_code for more information.

Column Name: member_id

Column Type: numeric

Member ID.

Column Name: national_drug_code

Column Type: varchar

Max Length: 50

National drug code.

Column Name: number_in_group

Column Type: numeric

For group services, the number of members in the group

Column Name: num_counselor_in_group

Column Type: numeric

For group services, the number of counselors in the group

Column Name: option_desc

Column Type: varchar

Max Length: 80

The name of the form that last updated the row.

Column Name: option_id

Column Type: varchar

Max Length: 20

The unique ID of the form that last updated the row.

Column Name: original_proc_code_code

Column Type: varchar

Max Length: 50

Original procedure code.

Column Name: original_proc_code_type

Column Type: varchar

Max Length: 50

Original procedure type.

Column Name: original_proc_code_value

Column Type: varchar

Max Length: 80

The description associated with original_proc_code_code. See original_proc_code_code for more information.

Column Name: parent_nspace_link_to_DD

Column Type: varchar

Max Length: 50

Link to the associated parent service in SYSTEM.billing_tx_history.

Column Name: patient_account_number

Column Type: varchar

Max Length: 50

Patient account number.

Column Name: perf_prov_name

Column Type: varchar

Max Length: 50

Name of the performing provider.

Column Name: place_of_service_code

Column Type: varchar

Max Length: 50

Place of service code.

Column Name: population_code

Column Type: varchar

Max Length: 50

Population code.

Column Name: population_value

Column Type: varchar

Max Length: 50

The description associated with population_code. See population_code for more information.

Column Name: prev_batch_pended_from

Column Type: varchar

Max Length: 500

Previous batch the service was pended from.

Column Name: primary_service_id

Column Type: varchar

Max Length: 50

The primary service ID.

Column Name: private_pay_amt

Column Type: numeric

Private pay amount.

Column Name: private_pay_payer_code
Column Type: varchar
Max Length: 50
Payer code for private pay.

Column Name: private_pay_payer_value
Column Type: varchar
Max Length: 50
The description associated with private_pay_payer_code. See private_pay_payer_code for more information.

Column Name: proc_code_type_for_adj
Column Type: varchar
Max Length: 50
Procedure code type of adjustment.

Column Name: procedure_code_code
Column Type: varchar
Max Length: 50
Procedure code.

Column Name: procedure_code_type
Column Type: varchar
Max Length: 50
Procedure code type.

Column Name: procedure_code_value
Column Type: varchar
Max Length: 80
The description associated with procedure_code_code. See procedure_code_code for more information.

Column Name: procedure_code_with_mod
Column Type: varchar
Max Length: 50
Procedure code with modifier.

Column Name: provider_to_be_auth
Column Type: varchar
Max Length: 50
Provider to be authorized.

Column Name: prov_pgm_link
Column Type: varchar
Max Length: 50
Provider program link.

Column Name: prov_pgm_name
Column Type: varchar
Max Length: 50
Provider program name.

Column Name: quantity
Column Type: varchar
Max Length: 50
Quantity.

Column Name: ref_p4
Column Type: varchar
Max Length: 50
REF*P4 segment

Column Name: remark_codes
Column Type: varchar
Max Length: 500
Claim status remark codes returned on an 837.

Column Name: remark_codes_value
Column Type: varchar
Max Length: 5096
The description associated with remark_codes_code. See remark_codes_code for more information.

Column Name: revenue_code_code
Column Type: varchar
Max Length: 50
Revenue code.

Column Name: revenue_code_value
Column Type: varchar
Max Length: 80
The description associated with revenue_code_code. See revenue_code_code for more information.

Column Name: service_comments
Column Type: varchar
Max Length: 32766
Service comments.

Column Name: service_end_time
Column Type: time
Service end time.

Column Name: service_start_time
Column Type: time
Service start time.

Column Name: service_units
Column Type: numeric
Service units.

Column Name: svc_bundle_837_id
Column Type: varchar

Max Length: 50
Service bundle 837 ID.

Column Name: svc_counts_as_visit
Column Type: varchar
Max Length: 50
Indicator code of whether the service counts as a visit.

Column Name: system_index
Column Type: varchar
Max Length: 50
Service index.

Column Name: third_party_amount_paid
Column Type: numeric
Third party amount paid

Column Name: third_party_payer_amt_1
Column Type: numeric
Third party payer amount 1.

Column Name: third_party_payer_amt_2
Column Type: numeric
Third party payer amount 2.

Column Name: third_party_payer_amt_3
Column Type: numeric
Third party payer amount 3.

Column Name: third_party_payer_amt_4
Column Type: numeric
Third party payer amount 4.

Column Name: third_party_payer_amt_5
Column Type: numeric
Third party payer amount 5.

Column Name: third_party_payer_amt_6
Column Type: numeric
Third party payer amount 6.

Column Name: third_party_payer_code_1
Column Type: varchar
Max Length: 50
Third party payer code 1.

Column Name: third_party_payer_code_2
Column Type: varchar
Max Length: 50
Third party payer code 2.

Column Name: third_party_payer_code_3

Column Type: varchar

Max Length: 50

Third party payer code 3.

Column Name: third_party_payer_code_4

Column Type: varchar

Max Length: 50

Third party payer code 4.

Column Name: third_party_payer_code_5

Column Type: varchar

Max Length: 50

Third party payer code 5.

Column Name: third_party_payer_code_6

Column Type: varchar

Max Length: 50

Third party payer code 6.

Column Name: third_party_payer_value_1

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_2

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_3

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_4

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_5

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_6

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: thrd_prty_allowed_amt

Column Type: numeric

Third party allowed amount.

Column Name: thrd_prty_billed_amt

Column Type: numeric

Third party billed amount

Column Name: thrd_prty_pay_adj_amt_11

Column Type: numeric

Third party payment adjustment amount 11.

Column Name: thrd_prty_pay_adj_amt_12

Column Type: numeric

Third party payment adjustment amount 12.

Column Name: thrd_prty_pay_adj_amt_13

Column Type: numeric

Third party payment adjustment amount 13.

Column Name: thrd_prty_pay_adj_amt_14

Column Type: numeric

Third party payment adjustment amount 14.

Column Name: thrd_prty_pay_adj_amt_15

Column Type: numeric

Third party payment adjustment amount 15.

Column Name: thrd_prty_pay_adj_amt_21

Column Type: numeric

Third party payment adjustment amount 21.

Column Name: thrd_prty_pay_adj_amt_22

Column Type: numeric

Third party payment adjustment amount 22.

Column Name: thrd_prty_pay_adj_amt_23

Column Type: numeric

Third party payment adjustment amount 23.

Column Name: thrd_prty_pay_adj_amt_24

Column Type: numeric

Third party payment adjustment amount 24.

Column Name: thrd_prty_pay_adj_amt_25
Column Type: numeric
Third party payment adjustment amount 25.

Column Name: thrd_prty_pay_adj_amt_31
Column Type: numeric
Third party payment adjustment amount 31.

Column Name: thrd_prty_pay_adj_amt_32
Column Type: numeric
Third party payment adjustment amount 32.

Column Name: thrd_prty_pay_adj_amt_33
Column Type: numeric
Third party payment adjustment amount 33.

Column Name: thrd_prty_pay_adj_amt_34
Column Type: numeric
Third party payment adjustment amount 34.

Column Name: thrd_prty_pay_adj_amt_35
Column Type: numeric
Third party payment adjustment amount 35.

Column Name: thrd_prty_pay_adj_amt_41
Column Type: numeric
Third party payment adjustment amount 41.

Column Name: thrd_prty_pay_adj_amt_42
Column Type: numeric
Third party payment adjustment amount 42.

Column Name: thrd_prty_pay_adj_amt_43
Column Type: numeric
Third party payment adjustment amount 43.

Column Name: thrd_prty_pay_adj_amt_44
Column Type: numeric
Third party payment adjustment amount 44.

Column Name: thrd_prty_pay_adj_amt_45
Column Type: numeric
Third party payment adjustment amount 45.

Column Name: thrd_prty_pay_adj_code_11
Column Type: varchar
Max Length: 50
Third party payment adjustment code 11.

Column Name: thrd_prty_pay_adj_code_12
Column Type: varchar
Max Length: 50
Third party payment adjustment code 12.

Column Name: thrd_prty_pay_adj_code_13
Column Type: varchar
Max Length: 50
Third party payment adjustment code 13.

Column Name: thrd_prty_pay_adj_code_14
Column Type: varchar
Max Length: 50
Third party payment adjustment code 14.

Column Name: thrd_prty_pay_adj_code_15
Column Type: varchar
Max Length: 50
Third party payment adjustment code 15.

Column Name: thrd_prty_pay_adj_code_21
Column Type: varchar
Max Length: 50
Third party payment adjustment code 21.

Column Name: thrd_prty_pay_adj_code_22
Column Type: varchar
Max Length: 50
Third party payment adjustment code 22.

Column Name: thrd_prty_pay_adj_code_23
Column Type: varchar
Max Length: 50
Third party payment adjustment code 23.

Column Name: thrd_prty_pay_adj_code_24
Column Type: varchar
Max Length: 50
Third party payment adjustment code 24.

Column Name: thrd_prty_pay_adj_code_25
Column Type: varchar
Max Length: 50
Third party payment adjustment code 25.

Column Name: thrd_prty_pay_adj_code_31
Column Type: varchar
Max Length: 50
Third party payment adjustment code 31.

Column Name: thrd_prty_pay_adj_code_32
Column Type: varchar
Max Length: 50
Third party payment adjustment code 32.

Column Name: thrd_prty_pay_adj_code_33
Column Type: varchar
Max Length: 50
Third party payment adjustment code 33.

Column Name: thrd_prty_pay_adj_code_34
Column Type: varchar
Max Length: 50
Third party payment adjustment code 34.

Column Name: thrd_prty_pay_adj_code_35
Column Type: varchar
Max Length: 50
Third party payment adjustment code 35.

Column Name: thrd_prty_pay_adj_code_41
Column Type: varchar
Max Length: 50
Third party payment adjustment code 41.

Column Name: thrd_prty_pay_adj_code_42
Column Type: varchar
Max Length: 50
Third party payment adjustment code 42.

Column Name: thrd_prty_pay_adj_code_43
Column Type: varchar
Max Length: 50
Third party payment adjustment code 43.

Column Name: thrd_prty_pay_adj_code_44
Column Type: varchar
Max Length: 50
Third party payment adjustment code 44.

Column Name: thrd_prty_pay_adj_code_45
Column Type: varchar
Max Length: 50
Third party payment adjustment code 45.

Column Name: thrd_prty_pay_adj_val_11
Column Type: varchar
Max Length: 50
The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_12

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_13

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_14

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_15

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_21

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_22

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_23

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_24

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_25

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_31

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_32

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_33

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_34

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_35

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_41

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_42

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_43

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_44

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_45

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_allow_1

Column Type: numeric

Third party payment allowed amount 1.

Column Name: thrd_prty_pay_allow_2

Column Type: numeric

Third party payment allowed amount 2.

Column Name: thrd_prty_pay_allow_3

Column Type: numeric

Third party payment allowed amount 3.

Column Name: thrd_prty_pay_allow_4

Column Type: numeric

Third party payment allowed amount 4.

Column Name: thrd_prty_pay_billed_1

Column Type: numeric

Third party payment billed 1.

Column Name: thrd_prty_pay_billed_2

Column Type: numeric

Third party payment billed 2.

Column Name: thrd_prty_pay_billed_3

Column Type: numeric

Third party payment billed 3.

Column Name: thrd_prty_pay_billed_4

Column Type: numeric

Third party payment billed 4.

Column Name: thrd_prty_pvt_pay_amt

Column Type: numeric

Third party private pay amount.

Column Name: total_charge
Column Type: numeric
Total charge for the service.

Column Name: total_fee_table_amt
Column Type: numeric
Total fee table amount for the service.

Column Name: travel_time
Column Type: numeric
For group services, the travel time

Column Name: trt_prov_type
Column Type: varchar
Max Length: 50
Treatment provider type.

Column Name: type_of_service_code
Column Type: varchar
Max Length: 50
Dictionary code indicating whether the type of authorization is inpatient or outpatient.

Column Name: type_of_service_value
Column Type: varchar
Max Length: 50
The description associated with type_of_service_code. See type_of_service_code for more information.

Column Name: unique_row_id
Column Type: varchar
Max Length: 50
The unique row ID.

Column Name: unit_of_measurement
Column Type: varchar
Max Length: 50
Unit of measurement.

Documentation for form: Claim_Processing_(UB-04)

Table Name: SYSTEM.batch_clm_svc_detail_ss

Table Description: This table returns site specific fields for MSO services.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID for the batch.

Column Name: CLAIMID
Column Type: integer
The claim number.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: ss_batch_clm_date_1
Column Type: date
SS Batch Claim Date 1.

Column Name: ss_batch_clm_date_10
Column Type: date
SS Batch Claim Date 10.

Column Name: ss_batch_clm_date_2
Column Type: date
SS Batch Claim Date 2.

Column Name: ss_batch_clm_date_3
Column Type: date
SS Batch Claim Date 3.

Column Name: ss_batch_clm_date_4
Column Type: date
SS Batch Claim Date 4.

Column Name: ss_batch_clm_date_5
Column Type: date
SS Batch Claim Date 5.

Column Name: ss_batch_clm_date_6
Column Type: date
SS Batch Claim Date 6.

Column Name: ss_batch_clm_date_7
Column Type: date
SS Batch Claim Date 7.

Column Name: ss_batch_clm_date_8
Column Type: date
SS Batch Claim Date 8.

Column Name: ss_batch_clm_date_9
Column Type: date
SS Batch Claim Date 9.

Column Name: ss_batch_clm_dict_10_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 10 Cdoe.

Column Name: ss_batch_clm_dict_10_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 10 Value.

Column Name: ss_batch_clm_dict_1_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 1 Code.

Column Name: ss_batch_clm_dict_1_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 1 Value.

Column Name: ss_batch_clm_dict_2_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 2 Code.

Column Name: ss_batch_clm_dict_2_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 2 Value.

Column Name: ss_batch_clm_dict_3_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 3 Code.

Column Name: ss_batch_clm_dict_3_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 3 Value.

Column Name: ss_batch_clm_dict_4_code

Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 4 Code.

Column Name: ss_batch_clm_dict_4_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 4 Value.

Column Name: ss_batch_clm_dict_5_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 5 Code.

Column Name: ss_batch_clm_dict_5_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 5 Value.

Column Name: ss_batch_clm_dict_6_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 6 Code.

Column Name: ss_batch_clm_dict_6_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 6 Value.

Column Name: ss_batch_clm_dict_7_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 7 Code.

Column Name: ss_batch_clm_dict_7_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 7 Value.

Column Name: ss_batch_clm_dict_8_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 8 Code.

Column Name: ss_batch_clm_dict_8_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 8 Value.

Column Name: ss_batch_clm_dict_9_code

Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 9 Code.

Column Name: ss_batch_clm_dict_9_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 9 Value.

Column Name: ss_batch_clm_mult_1_code
Column Type: varchar
Max Length: 50
SS Batch Claim Multiple Select Dictionary 1 Code.

Column Name: ss_batch_clm_mult_1_shval
Column Type: varchar
Max Length: 255
SS Batch Claim Multiple Select Dictionary 1 Short Value.

Column Name: ss_batch_clm_mult_1_value
Column Type: varchar
Max Length: 4096
SS Batch Claim Multiple Select Dictionary 1 Full Value.

Column Name: ss_batch_clm_mult_2_code
Column Type: varchar
Max Length: 50
SS Batch Claim Multiple Select Dictionary 2 Code.

Column Name: ss_batch_clm_mult_2_shval
Column Type: varchar
Max Length: 255
SS Batch Claim Multiple Select Dictionary 2 Short Value.

Column Name: ss_batch_clm_mult_2_value
Column Type: varchar
Max Length: 4096
SS Batch Claim Multiple Select Dictionary 2 Full Value.

Column Name: ss_batch_clm_mult_3_code
Column Type: varchar
Max Length: 50
SS Batch Claim Multiple Select Dictionary 3 Code.

Column Name: ss_batch_clm_mult_3_shval
Column Type: varchar
Max Length: 255
SS Batch Claim Multiple Select Dictionary 3 Short Value.

Column Name: ss_batch_clm_mult_3_value

Column Type: varchar
Max Length: 4096
SS Batch Claim Multiple Select Dictionary 3 Full Value.

Column Name: ss_batch_clm_mult_4_code
Column Type: varchar
Max Length: 50
SS Batch Claim Multiple Select Dictionary 4 Code.

Column Name: ss_batch_clm_mult_4_shval
Column Type: varchar
Max Length: 255
SS Batch Claim Multiple Select Dictionary 4 Short Value.

Column Name: ss_batch_clm_mult_4_value
Column Type: varchar
Max Length: 4096
SS Batch Claim Multiple Select Dictionary 4 Full Value.

Column Name: ss_batch_clm_mult_5_code
Column Type: varchar
Max Length: 50
SS Batch Claim Multiple Select Dictionary 5 Code.

Column Name: ss_batch_clm_mult_5_shval
Column Type: varchar
Max Length: 255
SS Batch Claim Multiple Select Dictionary 5 Short Value.

Column Name: ss_batch_clm_mult_5_value
Column Type: varchar
Max Length: 4096
SS Batch Claim Multiple Select Dictionary 5 Full Value.

Column Name: ss_batch_clm_scr_txt_1
Column Type: varchar
Max Length: 32766
SS Batch Claim Scrolling Free Text 1.

Column Name: ss_batch_clm_scr_txt_10
Column Type: varchar
Max Length: 32766
SS Batch Claim Scrolling Free Text 10.

Column Name: ss_batch_clm_scr_txt_2
Column Type: varchar
Max Length: 32766
SS Batch Claim Scrolling Free Text 2.

Column Name: ss_batch_clm_scr_txt_3

Column Type: varchar
Max Length: 32766
SS Batch Claim Scrolling Free Text 3.

Column Name: ss_batch_clm_scr_txt_4
Column Type: varchar
Max Length: 32766
SS Batch Claim Scrolling Free Text 4.

Column Name: ss_batch_clm_scr_txt_5
Column Type: varchar
Max Length: 32766
SS Batch Claim Scrolling Free Text 5.

Column Name: ss_batch_clm_scr_txt_6
Column Type: varchar
Max Length: 32766
SS Batch Claim Scrolling Free Text 6.

Column Name: ss_batch_clm_scr_txt_7
Column Type: varchar
Max Length: 32766
SS Batch Claim Scrolling Free Text 7.

Column Name: ss_batch_clm_scr_txt_8
Column Type: varchar
Max Length: 32766
SS Batch Claim Scrolling Free Text 8.

Column Name: ss_batch_clm_scr_txt_9
Column Type: varchar
Max Length: 32766
SS Batch Claim Scrolling Free Text 9.

Column Name: ss_batch_clm_time_1
Column Type: varchar
Max Length: 50
SS Batch Claim Time 1.

Column Name: ss_batch_clm_time_10
Column Type: varchar
Max Length: 50
SS Batch Claim Time 10.

Column Name: ss_batch_clm_time_2
Column Type: varchar
Max Length: 50
SS Batch Claim Time 2.

Column Name: ss_batch_clm_time_3

Column Type: varchar
Max Length: 50
SS Batch Claim Time 3.

Column Name: ss_batch_clm_time_4
Column Type: varchar
Max Length: 50
SS Batch Claim Time 4.

Column Name: ss_batch_clm_time_5
Column Type: varchar
Max Length: 50
SS Batch Claim Time 5.

Column Name: ss_batch_clm_time_6
Column Type: varchar
Max Length: 50
SS Batch Claim Time 6.

Column Name: ss_batch_clm_time_7
Column Type: varchar
Max Length: 50
SS Batch Claim Time 7.

Documentation for form: Claim_Processing_(UB-04)

Table Name: SYSTEM.provider_monthly_max

Table Description: This table returns services that contribute towards a provider's monthly dollar max.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID for the batch.

Column Name: CLAIMID
Column Type: integer
The claim number.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: PROVID
Column Type: varchar
Max Length: 50
'Provider'

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: auth_used
Column Type: varchar
Max Length: 50
The number of the authorization that this service falls under.

Column Name: dollars_used
Column Type: varchar
Max Length: 50

Column Name: max_month
Column Type: integer
The month that this service will be credited against.

Column Name: max_year
Column Type: integer

The year that this service will be credited against.

Column Name: pended

Column Type: varchar

Max Length: 50

A flag indicating whether the service was pended due to exhaustion of monthly max dollars.

Documentation for form: Claim_Processing_with_Override_(UB-04)

Table Name: SYSTEM.batch_clm_svc_adj_codes

Table Description: This table returns adjustment codes assigned to services during claim adjudication, as well as HIPAA cross reference information associated to those codes.

Column Name: ID

Column Type: integer

Column Name: BATCHID

Column Type: varchar

Max Length: 50

The unique ID for the batch.

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: SVCUniqueid

Column Type: varchar

Max Length: 50

The unique ID for the service.

Column Name: adj_amount

Column Type: varchar

Max Length: 50

The adjustment amount associated with the EOB message.

Column Name: adj_code_code

Column Type: varchar

Max Length: 50

The adjustment code associated with the EOB message.

Column Name: adj_code_value

Column Type: varchar

Max Length: 50

The description associated with adj_code_code. See adj_code_code for more information.

Column Name: adj_group_code_5010_code

Column Type: varchar

Max Length: 50

The HIPAA version 5010 adjustment group code associated with the EOB message.

Column Name: adj_group_code_5010_value

Column Type: varchar

Max Length: 50

The description associated with adj_group_code_5010_code. See adj_group_code_5010_code for more information.

Column Name: adj_group_code_code

Column Type: varchar

Max Length: 50

The adjustment group code associated with the EOB message.

Column Name: adj_group_code_value

Column Type: varchar

Max Length: 50

The description associated with adj_group_code_code. See adj_group_code_code for more information.

Column Name: adj_reason_code_code

Column Type: varchar

Max Length: 50

The adjustment reason code associated with the EOB message.

Column Name: adj_reason_code_value

Column Type: varchar

Max Length: 4096

The description associated with adj_reason_code_code. See adj_reason_code_code for more information.

Column Name: apd_status_code

Column Type: varchar

Max Length: 50

Dictionary code for the claim status associated to the EOB message.

Column Name: apd_status_value

Column Type: varchar

Max Length: 50

The description associated with apd_status_code. See apd_status_code for more information.

Column Name: eob_message_code

Column Type: numeric

The unique numeric ID of the EOB message.

Column Name: eob_message_value

Column Type: varchar

Max Length: 50

The description associated with eob_message_code. See eob_message_code for more information.

Documentation for form: Claim_Processing_with_Override_(UB-04)

Table Name: SYSTEM.batch_clm_svc_detail

Table Description: This table returns detailed information on MSO services.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID for the batch.

Column Name: CLAIMID
Column Type: integer
The claim number.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: GUID
Column Type: varchar
Max Length: 50
A unique identifier used internally to validate data.

Column Name: JOIN_TO_AUTUniqueid
Column Type: varchar
Max Length: 50
The unique ID for the associated authorization.

Column Name: JOIN_TO_HCF_UBF_Type
Column Type: varchar
Max Length: 50
Indicator of whether this claim is of type "HCFA" or "UB92".

Column Name: JOIN_TO_HCFUniqueid
Column Type: varchar
Max Length: 50
The unique ID for the claim if it is of type "HCFA".

Column Name: JOIN_TO_UBFHCFUniqueid
Column Type: varchar
Max Length: 50
The unique ID for the claim.

Column Name: JOIN_TO_UBFUniqueid
Column Type: varchar
Max Length: 50
The unique ID for the claim if it is of type "UB92".

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: PPIuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the associated performing provider.

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: UTCTimestamp
Column Type: timestamp
The UTC time when the row was last updated.

Column Name: VOUCHERID
Column Type: integer
The unique ID for the voucher.

Column Name: ability_to_pay_amt
Column Type: numeric
The ability to pay amount deducted from the service.

Column Name: account_code
Column Type: varchar
Max Length: 50
The authorization account code.

Column Name: account_level
Column Type: varchar
Max Length: 50
The authorization account level.

Column Name: account_level_name
Column Type: varchar
Max Length: 50
The authorization account level name.

Column Name: account_name
Column Type: varchar

Max Length: 50
The authorization account name.

Column Name: add_on_notes
Column Type: varchar
Max Length: 32000
Add-on notes.

Column Name: adjudication_code
Column Type: varchar
Max Length: 50
The adjudication code.

Column Name: adjustment_reason_code
Column Type: varchar
Max Length: 50
One or more dictionary codes for claim adjustment reasons.

Column Name: adjustment_reason_value
Column Type: varchar
Max Length: 255
The description associated with adjustment_reason_code. See adjustment_reason_code for more information.

Column Name: approved_units
Column Type: numeric
Approved units.

Column Name: associated_code
Column Type: varchar
Max Length: 50
Associated code.

Column Name: authorization_assoc_code
Column Type: varchar
Max Length: 50
The authorization associated code.

Column Name: authorization_number
Column Type: varchar
Max Length: 50
The authorization number.

Column Name: authorization_valid_code
Column Type: varchar
Max Length: 50
Indicator of whether the authorization is valid.

Column Name: authorization_valid_value
Column Type: varchar

Max Length: 50

The description associated with authorization_valid_code. See authorization_valid_code for more information.

Column Name: blackout_id

Column Type: integer

The unique blackout ID.

Column Name: carelink_service_ID

Column Type: varchar

Max Length: 50

The carelink service ID.

Column Name: claim_number_837

Column Type: varchar

Max Length: 50

837 claim number for the service.

Column Name: claim_status_code

Column Type: varchar

Max Length: 50

Dictionary code for the claim status.

Column Name: claim_status_reason_code

Column Type: varchar

Max Length: 50

Dictionary code for the claim status reason.

Column Name: claim_status_reason_value

Column Type: varchar

Max Length: 4096

The description associated with claim_status_reason_code. See claim_status_reason_code for more information.

Column Name: claim_status_value

Column Type: varchar

Max Length: 50

The description associated with claim_status_code. See claim_status_code for more information.

Column Name: comments

Column Type: varchar

Max Length: 32766

Comments regarding the service.

Column Name: contains_overridden_field

Column Type: varchar

Max Length: 1

Indicator of whether there is an overridden field.If "Y", indicates that this service detail contains one or more fields whose values were manually overridden.

Column Name: copay_applies_to_ded_code
Column Type: varchar
Max Length: 50
'Co-Pay Counts Towards Deductible'

Column Name: copay_applies_to_ded_value
Column Type: varchar
Max Length: 50
The description associated with copay_applies_to_ded_code. See copay_applies_to_ded_code for more information.

Column Name: cost_center_code
Column Type: varchar
Max Length: 50
Dictionary code for the cost center.

Column Name: cost_center_value
Column Type: varchar
Max Length: 50
The description associated with cost_center_code. See cost_center_code for more information.

Column Name: covered_CBPuniqueid
Column Type: varchar
Max Length: 50
The unique ID for plan covered services.

Column Name: covered_LIBuniqueid
Column Type: varchar
Max Length: 50
The unique ID for plan liability rules level.

Column Name: covered_PLANID
Column Type: varchar
Max Length: 50
The unique ID for the associated coverage plan.

Column Name: cpt_code_code
Column Type: varchar
Max Length: 50
The CPT code.

Column Name: cpt_code_value
Column Type: varchar
Max Length: 80
The description associated with cpt_code_code. See cpt_code_code for more information.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: date_of_service
Column Type: date
The date the service was rendered.

Column Name: date_of_service_end

Column Type: date

The date the service ended.

Column Name: delay_reason_code

Column Type: varchar

Max Length: 50

Dictionary code indicating the reason the claim was delayed.

Column Name: delay_reason_value

Column Type: varchar

Max Length: 50

The description associated with delay_reason_code. See delay_reason_code for more information.

Column Name: diagnosis_code

Column Type: varchar

Max Length: 50

Diagnosis code associated with the service.

Column Name: diagnosis_reference

Column Type: varchar

Max Length: 50

Diagnosis reference.

Column Name: diagnosis_reference_2

Column Type: varchar

Max Length: 50

Diagnosis reference 2.

Column Name: diagnosis_reference_3

Column Type: varchar

Max Length: 50

Diagnosis reference 3.

Column Name: diagnosis_reference_4

Column Type: varchar

Max Length: 50

Diagnosis reference 4.

Column Name: diagnosis_value

Column Type: varchar

Max Length: 200

The description associated with diagnosis_code. See diagnosis_code for more information.

Column Name: discipline_code

Column Type: varchar

Max Length: 40

Dictionary code indicating the medical discipline under which the service was rendered.

Column Name: discipline_value

Column Type: varchar

Max Length: 40

The description associated with discipline_code. See discipline_code for more information.

Column Name: documentation_time

Column Type: numeric

For group services, the documentation time

Column Name: drug_ref_id

Column Type: varchar

Max Length: 50

The service drug reference ID.

Column Name: drug_ref_id_qual

Column Type: varchar

Max Length: 50

The service drug reference qualifier.

Column Name: duration

Column Type: varchar

Max Length: 50

The service duration.

Column Name: ebpss_csi_code

Column Type: varchar

Max Length: 32000

Dictionary code indicating the evidence-based practices / service strategies (CSI) code for the service.

Column Name: ebpss_csi_value

Column Type: varchar

Max Length: 255

The description associated with ebpss_csi_code. See ebpss_csi_code for more information.

Column Name: ebpss_csi_value_long

Column Type: varchar

Max Length: 4096

The description associated with ebpss_csi_value_code. See ebpss_csi_value_code for more information.

Column Name: eligible_provider_code

Column Type: varchar

Max Length: 50

Indicator of whether the provider was eligible or not.

Column Name: eligible_provider_value

Column Type: varchar

Max Length: 50

The description associated with eligible_provider_code. See eligible_provider_code for more information.

Column Name: emergency_indicator_code

Column Type: varchar
Max Length: 50
'Emergency Indicator (837P-2400-SV109)'

Column Name: emergency_indicator_value
Column Type: varchar
Max Length: 50
The description associated with emergency_indicator_code. See emergency_indicator_code for more information.

Column Name: expected_disburse
Column Type: numeric
Expected disbursement for the service.

Column Name: explan_of_coverage
Column Type: varchar
Max Length: 32766
Explanation of coverage.

Column Name: group_service_units
Column Type: varchar
Max Length: 50
For group services, the total approved group service units

Column Name: group_service_units_day
Column Type: varchar
Max Length: 50
For group services, the total approved group service units per day

Column Name: hcpcs_code
Column Type: varchar
Max Length: 50
The HCPCS code.

Column Name: is_this_an_admission_code
Column Type: varchar
Max Length: 50
'Does This Service Represent An Admission'

Column Name: is_this_an_admission_value
Column Type: varchar
Max Length: 50
The description associated with is_this_an_admission_code. See is_this_an_admission_code for more information.

Column Name: level_of_care
Column Type: varchar
Max Length: 50
Level of care.

Column Name: line_item_control_num
Column Type: varchar
Max Length: 50
Line item control number.

Column Name: line_note_code
Column Type: varchar
Max Length: 50
Indicator dictionary code of the type of information captured in the service line note text.

Column Name: line_note_code_val
Column Type: varchar
Max Length: 50
The description associated with line_note_code_code. See line_note_code_code for more information.

Column Name: line_note_text
Column Type: varchar
Max Length: 80
Service line note text.

Column Name: location_code
Column Type: varchar
Max Length: 50
The service location code.

Column Name: location_value
Column Type: varchar
Max Length: 50
The description associated with location_code. See location_code for more information.

Column Name: manual_service_code
Column Type: varchar
Max Length: 50
Manual service code.

Column Name: manual_service_descript
Column Type: varchar
Max Length: 80
Manual service description.

Column Name: measurement_code_code
Column Type: varchar
Max Length: 50
'Measurement Code (837-2400-SV103/SV204)'.

Column Name: measurement_code_value
Column Type: varchar
Max Length: 50
The description associated with measurement_code_code. See measurement_code_code for more information.

Column Name: member_copay
Column Type: numeric
Member co-pay.

Column Name: member_deductible
Column Type: numeric
Member deductible.

Column Name: member_enrolled_dos_code
Column Type: varchar
Max Length: 50
'Member Enrolled On Date Of Service'

Column Name: member_enrolled_dos_value
Column Type: varchar
Max Length: 50
The description associated with member_enrolled_dos_code. See member_enrolled_dos_code for more information.

Column Name: member_id
Column Type: numeric
Member ID.

Column Name: national_drug_code
Column Type: varchar
Max Length: 50
National drug code.

Column Name: number_in_group
Column Type: numeric
For group services, the number of members in the group

Column Name: num_counselor_in_group
Column Type: numeric
For group services, the number of counselors in the group

Column Name: option_desc
Column Type: varchar
Max Length: 80
The name of the form that last updated the row.

Column Name: option_id
Column Type: varchar
Max Length: 20
The unique ID of the form that last updated the row.

Column Name: original_proc_code_code
Column Type: varchar
Max Length: 50

Original procedure code.

Column Name: original_proc_code_type

Column Type: varchar

Max Length: 50

Original procedure type.

Column Name: original_proc_code_value

Column Type: varchar

Max Length: 80

The description associated with original_proc_code_code. See original_proc_code_code for more information.

Column Name: parent_nspace_link_to_DD

Column Type: varchar

Max Length: 50

Link to the associated parent service in SYSTEM.billing_tx_history.

Column Name: patient_account_number

Column Type: varchar

Max Length: 50

Patient account number.

Column Name: perf_prov_name

Column Type: varchar

Max Length: 50

Name of the performing provider.

Column Name: place_of_service_code

Column Type: varchar

Max Length: 50

Place of service code.

Column Name: population_code

Column Type: varchar

Max Length: 50

Population code.

Column Name: population_value

Column Type: varchar

Max Length: 50

The description associated with population_code. See population_code for more information.

Column Name: prev_batch_pended_from

Column Type: varchar

Max Length: 500

Previous batch the service was pended from.

Column Name: primary_service_id

Column Type: varchar

Max Length: 50
The primary service ID.

Column Name: private_pay_amt
Column Type: numeric
Private pay amount.

Column Name: private_pay_payer_code
Column Type: varchar
Max Length: 50
Payer code for private pay.

Column Name: private_pay_payer_value
Column Type: varchar
Max Length: 50
The description associated with private_pay_payer_code. See private_pay_payer_code for more information.

Column Name: proc_code_type_for_adj
Column Type: varchar
Max Length: 50
Procedure code type of adjustment.

Column Name: procedure_code_code
Column Type: varchar
Max Length: 50
Procedure code.

Column Name: procedure_code_type
Column Type: varchar
Max Length: 50
Procedure code type.

Column Name: procedure_code_value
Column Type: varchar
Max Length: 80
The description associated with procedure_code_code. See procedure_code_code for more information.

Column Name: procedure_code_with_mod
Column Type: varchar
Max Length: 50
Procedure code with modifier.

Column Name: provider_to_be_auth
Column Type: varchar
Max Length: 50
Provider to be authorized.

Column Name: prov_pgm_link
Column Type: varchar

Max Length: 50
Provider program link.

Column Name: prov_pgm_name
Column Type: varchar
Max Length: 50
Provider program name.

Column Name: quantity
Column Type: varchar
Max Length: 50
Quantity.

Column Name: ref_p4
Column Type: varchar
Max Length: 50
REF*P4 segment

Column Name: remark_codes
Column Type: varchar
Max Length: 500
Claim status remark codes returned on an 837.

Column Name: remark_codes_value
Column Type: varchar
Max Length: 5096
The description associated with remark_codes_code. See remark_codes_code for more information.

Column Name: revenue_code_code
Column Type: varchar
Max Length: 50
Revenue code.

Column Name: revenue_code_value
Column Type: varchar
Max Length: 80
The description associated with revenue_code_code. See revenue_code_code for more information.

Column Name: service_comments
Column Type: varchar
Max Length: 32766
Service comments.

Column Name: service_end_time
Column Type: time
Service end time.

Column Name: service_start_time
Column Type: time
Service start time.

Column Name: service_units
Column Type: numeric
Service units.

Column Name: svc_bundle_837_id
Column Type: varchar
Max Length: 50
Service bundle 837 ID.

Column Name: svc_counts_as_visit
Column Type: varchar
Max Length: 50
Indicator code of whether the service counts as a visit.

Column Name: system_index
Column Type: varchar
Max Length: 50
Service index.

Column Name: third_party_amount_paid
Column Type: numeric
Third party amount paid

Column Name: third_party_payer_amt_1
Column Type: numeric
Third party payer amount 1.

Column Name: third_party_payer_amt_2
Column Type: numeric
Third party payer amount 2.

Column Name: third_party_payer_amt_3
Column Type: numeric
Third party payer amount 3.

Column Name: third_party_payer_amt_4
Column Type: numeric
Third party payer amount 4.

Column Name: third_party_payer_amt_5
Column Type: numeric
Third party payer amount 5.

Column Name: third_party_payer_amt_6
Column Type: numeric
Third party payer amount 6.

Column Name: third_party_payer_code_1
Column Type: varchar

Max Length: 50
Third party payer code 1.

Column Name: third_party_payer_code_2
Column Type: varchar
Max Length: 50
Third party payer code 2.

Column Name: third_party_payer_code_3
Column Type: varchar
Max Length: 50
Third party payer code 3.

Column Name: third_party_payer_code_4
Column Type: varchar
Max Length: 50
Third party payer code 4.

Column Name: third_party_payer_code_5
Column Type: varchar
Max Length: 50
Third party payer code 5.

Column Name: third_party_payer_code_6
Column Type: varchar
Max Length: 50
Third party payer code 6.

Column Name: third_party_payer_value_1
Column Type: varchar
Max Length: 50
The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_2
Column Type: varchar
Max Length: 50
The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_3
Column Type: varchar
Max Length: 50
The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_4
Column Type: varchar
Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_5

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_6

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: thrd_prty_allowed_amt

Column Type: numeric

Third party allowed amount.

Column Name: thrd_prty_billed_amt

Column Type: numeric

Third party billed amount

Column Name: thrd_prty_pay_adj_amt_11

Column Type: numeric

Third party payment adjustment amount 11.

Column Name: thrd_prty_pay_adj_amt_12

Column Type: numeric

Third party payment adjustment amount 12.

Column Name: thrd_prty_pay_adj_amt_13

Column Type: numeric

Third party payment adjustment amount 13.

Column Name: thrd_prty_pay_adj_amt_14

Column Type: numeric

Third party payment adjustment amount 14.

Column Name: thrd_prty_pay_adj_amt_15

Column Type: numeric

Third party payment adjustment amount 15.

Column Name: thrd_prty_pay_adj_amt_21

Column Type: numeric

Third party payment adjustment amount 21.

Column Name: thrd_prty_pay_adj_amt_22

Column Type: numeric

Third party payment adjustment amount 22.

Column Name: thrd_prty_pay_adj_amt_23
Column Type: numeric
Third party payment adjustment amount 23.

Column Name: thrd_prty_pay_adj_amt_24
Column Type: numeric
Third party payment adjustment amount 24.

Column Name: thrd_prty_pay_adj_amt_25
Column Type: numeric
Third party payment adjustment amount 25.

Column Name: thrd_prty_pay_adj_amt_31
Column Type: numeric
Third party payment adjustment amount 31.

Column Name: thrd_prty_pay_adj_amt_32
Column Type: numeric
Third party payment adjustment amount 32.

Column Name: thrd_prty_pay_adj_amt_33
Column Type: numeric
Third party payment adjustment amount 33.

Column Name: thrd_prty_pay_adj_amt_34
Column Type: numeric
Third party payment adjustment amount 34.

Column Name: thrd_prty_pay_adj_amt_35
Column Type: numeric
Third party payment adjustment amount 35.

Column Name: thrd_prty_pay_adj_amt_41
Column Type: numeric
Third party payment adjustment amount 41.

Column Name: thrd_prty_pay_adj_amt_42
Column Type: numeric
Third party payment adjustment amount 42.

Column Name: thrd_prty_pay_adj_amt_43
Column Type: numeric
Third party payment adjustment amount 43.

Column Name: thrd_prty_pay_adj_amt_44
Column Type: numeric
Third party payment adjustment amount 44.

Column Name: thrd_prty_pay_adj_amt_45

Column Type: numeric
Third party payment adjustment amount 45.

Column Name: thrd_prty_pay_adj_code_11
Column Type: varchar
Max Length: 50
Third party payment adjustment code 11.

Column Name: thrd_prty_pay_adj_code_12
Column Type: varchar
Max Length: 50
Third party payment adjustment code 12.

Column Name: thrd_prty_pay_adj_code_13
Column Type: varchar
Max Length: 50
Third party payment adjustment code 13.

Column Name: thrd_prty_pay_adj_code_14
Column Type: varchar
Max Length: 50
Third party payment adjustment code 14.

Column Name: thrd_prty_pay_adj_code_15
Column Type: varchar
Max Length: 50
Third party payment adjustment code 15.

Column Name: thrd_prty_pay_adj_code_21
Column Type: varchar
Max Length: 50
Third party payment adjustment code 21.

Column Name: thrd_prty_pay_adj_code_22
Column Type: varchar
Max Length: 50
Third party payment adjustment code 22.

Column Name: thrd_prty_pay_adj_code_23
Column Type: varchar
Max Length: 50
Third party payment adjustment code 23.

Column Name: thrd_prty_pay_adj_code_24
Column Type: varchar
Max Length: 50
Third party payment adjustment code 24.

Column Name: thrd_prty_pay_adj_code_25
Column Type: varchar

Max Length: 50

Third party payment adjustment code 25.

Column Name: thrd_prty_pay_adj_code_31

Column Type: varchar

Max Length: 50

Third party payment adjustment code 31.

Column Name: thrd_prty_pay_adj_code_32

Column Type: varchar

Max Length: 50

Third party payment adjustment code 32.

Column Name: thrd_prty_pay_adj_code_33

Column Type: varchar

Max Length: 50

Third party payment adjustment code 33.

Column Name: thrd_prty_pay_adj_code_34

Column Type: varchar

Max Length: 50

Third party payment adjustment code 34.

Column Name: thrd_prty_pay_adj_code_35

Column Type: varchar

Max Length: 50

Third party payment adjustment code 35.

Column Name: thrd_prty_pay_adj_code_41

Column Type: varchar

Max Length: 50

Third party payment adjustment code 41.

Column Name: thrd_prty_pay_adj_code_42

Column Type: varchar

Max Length: 50

Third party payment adjustment code 42.

Column Name: thrd_prty_pay_adj_code_43

Column Type: varchar

Max Length: 50

Third party payment adjustment code 43.

Column Name: thrd_prty_pay_adj_code_44

Column Type: varchar

Max Length: 50

Third party payment adjustment code 44.

Column Name: thrd_prty_pay_adj_code_45

Column Type: varchar

Max Length: 50

Third party payment adjustment code 45.

Column Name: thrd_prty_pay_adj_val_11

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_12

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_13

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_14

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_15

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_21

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_22

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_23

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_24

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_25

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_31

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_32

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_33

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_34

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_35

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_41

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_42

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_43

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_44

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_45

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_allow_1

Column Type: numeric

Third party payment allowed amount 1.

Column Name: thrd_prty_pay_allow_2

Column Type: numeric

Third party payment allowed amount 2.

Column Name: thrd_prty_pay_allow_3

Column Type: numeric

Third party payment allowed amount 3.

Column Name: thrd_prty_pay_allow_4

Column Type: numeric

Third party payment allowed amount 4.

Column Name: thrd_prty_pay_billed_1

Column Type: numeric

Third party payment billed 1.

Column Name: thrd_prty_pay_billed_2

Column Type: numeric

Third party payment billed 2.

Column Name: thrd_prty_pay_billed_3

Column Type: numeric

Third party payment billed 3.

Column Name: thrd_prty_pay_billed_4
Column Type: numeric
Third party payment billed 4.

Column Name: thrd_prty_pvt_pay_amt
Column Type: numeric
Third party private pay amount.

Column Name: total_charge
Column Type: numeric
Total charge for the service.

Column Name: total_fee_table_amt
Column Type: numeric
Total fee table amount for the service.

Column Name: travel_time
Column Type: numeric
For group services, the travel time

Column Name: trt_prov_type
Column Type: varchar
Max Length: 50
Treatment provider type.

Column Name: type_of_service_code
Column Type: varchar
Max Length: 50
Dictionary code indicating whether the type of authorization is inpatient or outpatient.

Column Name: type_of_service_value
Column Type: varchar
Max Length: 50
The description associated with type_of_service_code. See type_of_service_code for more information.

Column Name: unique_row_id
Column Type: varchar
Max Length: 50
The unique row ID.

Column Name: unit_of_measurement
Column Type: varchar
Max Length: 50
Unit of measurement.

Documentation for form: Claim_Processing_with_Override_(UB-04)

Table Name: SYSTEM.batch_clm_svc_detail_ss

Table Description: This table returns site specific fields for MSO services.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID for the batch.

Column Name: CLAIMID
Column Type: integer
The claim number.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: ss_batch_clm_date_1
Column Type: date
SS Batch Claim Date 1.

Column Name: ss_batch_clm_date_10
Column Type: date
SS Batch Claim Date 10.

Column Name: ss_batch_clm_date_2
Column Type: date
SS Batch Claim Date 2.

Column Name: ss_batch_clm_date_3
Column Type: date
SS Batch Claim Date 3.

Column Name: ss_batch_clm_date_4
Column Type: date
SS Batch Claim Date 4.

Column Name: ss_batch_clm_date_5

Column Type: date
SS Batch Claim Date 5.

Column Name: ss_batch_clm_date_6
Column Type: date
SS Batch Claim Date 6.

Column Name: ss_batch_clm_date_7
Column Type: date
SS Batch Claim Date 7.

Column Name: ss_batch_clm_date_8
Column Type: date
SS Batch Claim Date 8.

Column Name: ss_batch_clm_date_9
Column Type: date
SS Batch Claim Date 9.

Column Name: ss_batch_clm_dict_10_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 10 Cdoe.

Column Name: ss_batch_clm_dict_10_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 10 Value.

Column Name: ss_batch_clm_dict_1_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 1 Code.

Column Name: ss_batch_clm_dict_1_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 1 Value.

Column Name: ss_batch_clm_dict_2_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 2 Code.

Column Name: ss_batch_clm_dict_2_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 2 Value.

Column Name: ss_batch_clm_dict_3_code

Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 3 Code.

Column Name: ss_batch_clm_dict_3_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 3 Value.

Column Name: ss_batch_clm_dict_4_code
Column Type: varchar
Max Length: 50

Documentation for form: Claim_Processing_with_Override_(UB-04)

Table Name: SYSTEM.provider_monthly_max

Table Description: This table returns services that contribute towards a provider's monthly dollar max.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID for the batch.

Column Name: CLAIMID
Column Type: integer
The claim number.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: PROVID
Column Type: varchar
Max Length: 50
'Provider'

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: auth_used
Column Type: varchar
Max Length: 50

The number of the authorization that this service falls under.

Column Name: dollars_used
Column Type: varchar
Max Length: 50

Column Name: max_month
Column Type: integer
The month that this service will be credited against.

Column Name: max_year
Column Type: integer
The year that this service will be credited against.

Column Name: pended
Column Type: varchar
Max Length: 50
A flag indicating whether the service was pended due to exhaustion of monthly max dollars.

Documentation for form: Claim_Processing_(CMS_1500)

Table Name: SYSTEM.batch_claim_lvl_core

Table Description: This table returns information related to claims that are part of a batch.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID of the batch.

Column Name: CLAIMID
Column Type: integer
'Claim ID'

Column Name: Claim_Type_Code
Column Type: varchar
Max Length: 50
The claim type of the batch.

Column Name: Claim_Unique_ID
Column Type: varchar
Max Length: 50

The value of Claim_Type_Code. See Claim_Type_Code for more information.

Column Name: FACILITY

Column Type: integer

The system code in which the batch was created.

Column Name: GUID

Column Type: varchar

Max Length: 50

The unique ID of the row.

Column Name: HCFuniqueid

Column Type: varchar

Max Length: 50

Reference to HFCA 1500 claim processing.

Column Name: PATID

Column Type: varchar

Max Length: 20

The unique ID of the client.

Column Name: PROVID

Column Type: varchar

Max Length: 50

'Provider'

Column Name: UBFuniqueid

Column Type: varchar

Max Length: 50

Reference to UB92 claim processing.

Column Name: UTCTimestamp

Column Type: timestamp

The UTC time when the row was last updated.

Column Name: accept_assignment_code

Column Type: varchar

Max Length: 50

'Accept Assignment'

Column Name: accept_assignment_value

Column Type: varchar

Max Length: 50

The value of accept_assignment_code. See accept_assignment_code for more information.

Column Name: admission_date

Column Type: date

The date of the admission.

Column Name: admission_diagnosis_icd10

Column Type: varchar

Max Length: 50

The ICD 9 code for admitting_diagnosis.

Column Name: admission_diagnosis_icd10_value

Column Type: varchar

Max Length: 200

The value of admission_diagnosis_icd10. See admission_diagnosis_icd10 for more information.

Column Name: admission_diagnosis_icd9

Column Type: varchar

Max Length: 50

The ICD 9 code for admitting_diagnosis.

Column Name: admission_diagnosis_icd9_value

Column Type: varchar

Max Length: 200

The value of admission_diagnosis_icd9. See admission_diagnosis_icd9 for more information.

Column Name: admissiondiagnosisobject

Column Type: varchar

Max Length: 50

The admission diagnosis object.

Column Name: admission_hour

Column Type: varchar

Max Length: 50

The hour of the admission.

Column Name: admission_source_code

Column Type: varchar

Max Length: 50

The source of the admission.

Column Name: admission_source_value

Column Type: varchar

Max Length: 50

The value of admission_source_code. See admission_source_code for more information.

Column Name: admission_type_code

Column Type: varchar

Max Length: 50

The type of the admission.

Column Name: admission_type_value

Column Type: varchar

Max Length: 50

The value of admission_type_code. See admission_type_code for more information.

Column Name: admitting_diagnosis

Column Type: varchar
Max Length: 50
The diagnosis at the time of admission.

Column Name: admitting_diagnosis_value
Column Type: varchar
Max Length: 200
The value of admitting_diagnosis. See admitting_diagnosis for more information.

Column Name: amount_of_claim
Column Type: varchar
Max Length: 50
The amount of the claim.

Column Name: attending_physician
Column Type: varchar
Max Length: 50
The attending practitioner.

Column Name: attending_practitioner
Column Type: varchar
Max Length: 50
'Attending Practitioner'

Column Name: billing_enumerator
Column Type: varchar
Max Length: 50
The ProviderConnect billing enumerator for the claim.

Column Name: claim_date_range_flag
Column Type: varchar
Max Length: 50
Was the claim submitted with more than one date.

Column Name: claim_freq_type_code
Column Type: varchar
Max Length: 50
'Claim Frequency Code (2300-CLM-05-3)'

Column Name: claim_level_comments
Column Type: varchar
Max Length: 32766
'Claim Level Comments'

Column Name: claim_note_code
Column Type: varchar
Max Length: 50
'Claim Note Reference Code'

Column Name: claim_note_code_val

Column Type: varchar
Max Length: 50
The value of claim_note_code. See claim_note_code for more information.

Column Name: claim_note_text
Column Type: varchar
Max Length: 80
'Claim Note Text'

Column Name: cond_rel_to_auto_acc_code
Column Type: varchar
Max Length: 50
'Condition Related To Auto Accident'

Column Name: cond_rel_to_auto_acc_value
Column Type: varchar
Max Length: 50
The value of cond_rel_to_auto_acc_code. See cond_rel_to_auto_acc_code for more information.

Column Name: cond_rel_to_emp_code
Column Type: varchar
Max Length: 50
'Condition Related To Employment'

Column Name: cond_rel_to_emp_value
Column Type: varchar
Max Length: 50
The value of cond_rel_to_emp_code. See cond_rel_to_emp_code for more information.

Column Name: cond_rel_to_oth_acc_code
Column Type: varchar
Max Length: 50
'Condition Related To Other Accident'

Column Name: cond_rel_to_oth_acc_value
Column Type: varchar
Max Length: 50
The value of cond_rel_to_oth_acc_code. See cond_rel_to_oth_acc_code for more information.

Column Name: covered_days
Column Type: integer
The days covered in the batch.

Column Name: curr_charges
Column Type: numeric
'Current Charges Entered'

Column Name: data_entry_by
Column Type: varchar
Max Length: 40

The user who last updated the row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 50

The 'User Description'.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time

Column Type: varchar

Max Length: 50

The time the row was last updated.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 50

The 'User ID' that last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name that last updated the row.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: date_of_curr_ill

Column Type: date

'Date Of Current Illness/Injury/Pregnancy'

Column Name: discharge_hour

Column Type: varchar

Max Length: 50

The hour the client was discharged.

Column Name: eighth_diagnosis

Column Type: varchar

Max Length: 50

'Eighth Diagnosis'

Column Name: eighth_diagnosis_icd10

Column Type: varchar

Max Length: 50

The ICD 10 Code for eighth_diagnosis. See eighth_diagnosis for more information.

Column Name: eighth_diagnosis_icd10_value

Column Type: varchar

Max Length: 200

The System Code in which 270 file is compiled.

Column Name: eighth_diagnosis_icd9

Column Type: varchar

Max Length: 50

The ICD 9 Code for eighth_diagnosis.

Column Name: eighth_diagnosis_icd9_value

Column Type: varchar

Max Length: 200

The value of eighth_diagnosis_icd9. See eighth_diagnosis_icd9 for more information.

Column Name: eighthdiagnosisobject

Column Type: varchar

Max Length: 50

The eighth diagnosis object.

Column Name: eighth_diagnosis_value

Column Type: varchar

Max Length: 200

The value of eighth_diagnosis. See eighth_diagnosis for more information.

Column Name: ein_code

Column Type: varchar

Max Length: 50

'EIN'

Column Name: ein_value

Column Type: varchar

Max Length: 50

The value of ein_code. See ein_code for more information.

Column Name: eleventh_diagnosis

Column Type: varchar

Max Length: 50

'Eleventh Diagnosis'

Column Name: eleventh_diagnosis_icd10

Column Type: varchar

Max Length: 50

The ICD 10 Code for eleventh_diagnosis.

Column Name: eleventh_diagnosis_icd10_value

Column Type: varchar

Max Length: 200

The value of eleventh_diagnosis_icd10. See eleventh_diagnosis_icd10 for more information.

Column Name: eleventh_diagnosis_icd9

Column Type: varchar

Max Length: 50

The ICD 9 Code of eleventh_diagnosis.

Column Name: eleventh_diagnosis_icd9_value

Column Type: varchar

Max Length: 200

The value of eleventh_diagnosis_icd9. See eleventh_diagnosis_icd9 for more information.

Column Name: eleventhdiagnosisobject

Column Type: varchar

Max Length: 50

The eleventh diagnosis object.

Column Name: eleventh_diagnosis_value

Column Type: varchar

Max Length: 200

The value of eleventh_diagnosis. See eleventh_diagnosis for more information.

Column Name: facility_code_value

Column Type: varchar

Max Length: 50

The value of the facility code.

Column Name: fifth_diagnosis

Column Type: varchar

Max Length: 50

'Fifth Diagnosis'

Column Name: fifth_diagnosis_icd10

Column Type: varchar

Max Length: 50

The ICD 10 Code for fifth_diagnosis.

Column Name: fifth_diagnosis_icd10_value

Column Type: varchar

Max Length: 200

The value of fifth_diagnosis_icd10. See fifth_diagnosis_icd10 for more information.

Column Name: fifth_diagnosis_icd9

Column Type: varchar

Max Length: 50

The ICD 9 Code for fifth_diagnosis.

Column Name: fifth_diagnosis_icd9_value

Column Type: varchar

Max Length: 200

The value of fifth_diagnosis_icd9. See fifth_diagnosis_icd9 for more information.

Column Name: fifthdiagnosisobject

Column Type: varchar

Max Length: 50

The fifth diagnosis object.

Column Name: fifth_diagnosis_value

Column Type: varchar

Max Length: 200

The value of fifth_diagnosis. See fifth_diagnosis for more information.

Column Name: first_date_sim_ill

Column Type: date

'First Date Of Similar Illness'

Column Name: first_diagnosis

Column Type: varchar

Max Length: 50

'First Diagnosis'

Column Name: first_diagnosis_icd10

Column Type: varchar

Max Length: 50

The ICD 10 Code for first_diagnosis.

Column Name: first_diagnosis_icd10_value

Column Type: varchar

Max Length: 200

The value of first_diagnosis_icd10. See first_diagnosis_icd10 for more information.

Column Name: first_diagnosis_icd9

Column Type: varchar

Max Length: 50

The ICD 9 Code for first_diagnosis.

Column Name: first_diagnosis_icd9_value
Column Type: varchar
Max Length: 200
The value of first_diagnosis_icd9. See first_diagnosis_icd9 for more information.

Column Name: firstdiagnosisobject
Column Type: varchar
Max Length: 50
The first diagnosis object.

Column Name: first_diagnosis_value
Column Type: varchar
Max Length: 200
The value of first_diagnosis. See first_diagnosis for more information.

Column Name: fourth_diagnosis
Column Type: varchar
Max Length: 50
'Fourth Dianosis'

Column Name: fourth_diagnosis_icd10
Column Type: varchar
Max Length: 50
The ICD 10 Code for fourth_diagnosis.

Column Name: fourth_diagnosis_icd10_value
Column Type: varchar
Max Length: 200
The value iof fourth_diagnosis_icd10. See fourth_diagnosis_icd10 for more information.

Column Name: fourth_diagnosis_icd9
Column Type: varchar
Max Length: 50
The ICD 9 Code for fourth_diagnosis.

Column Name: fourth_diagnosis_icd9_value
Column Type: varchar
Max Length: 200
The value of fourth_diagnosis_icd9. See fourth_diagnosis_icd9 for more information.

Column Name: fourthdiagnosisobject
Column Type: varchar
Max Length: 50
The fourth diagnosis object.

Column Name: fourth_diagnosis_value
Column Type: varchar
Max Length: 200
The value of fourth_diagnosis. See fourth_diagnosis for more information.

Column Name: from_date
Column Type: date
The from date.

Column Name: hosp_from_date
Column Type: date
'Hospitalization From Date'

Column Name: hosp_thru_date
Column Type: date
'Hospitalization Through Date'

Column Name: medical_record_num
Column Type: varchar
Max Length: 50
'Medical Record Number'

Column Name: member_id
Column Type: numeric
'Member Name Or ID'

Column Name: ninth_diagnosis
Column Type: varchar
Max Length: 50
'Ninth Diagnosis'

Column Name: ninth_diagnosis_icd10
Column Type: varchar
Max Length: 50
The ICD 10 Code for ninth_diagnosis.

Column Name: ninth_diagnosis_icd10_value
Column Type: varchar
Max Length: 200
The value of ninth_diagnosis_icd10. See ninth_diagnosis_icd10 for more information.

Column Name: ninth_diagnosis_icd9
Column Type: varchar
Max Length: 50
The ICD 9 Code of ninth_diagnosis.

Column Name: ninth_diagnosis_icd9_value
Column Type: varchar
Max Length: 200
The value of ninth_diagnosis_icd9. See ninth_diagnosis_icd9 for more information.

Column Name: ninthdiagnosisobject
Column Type: varchar
Max Length: 50

The ninth diagnosis object.

Column Name: ninth_diagnosis_value

Column Type: varchar

Max Length: 200

The value of ninth_diagnosis. See ninth_diagnosis for more information.

Column Name: non_covered_days

Column Type: integer

'Non-Covered Days'

Column Name: option_desc

Column Type: varchar

Max Length: 50

The name of the form that last updated the row.

Column Name: option_id

Column Type: varchar

Max Length: 50

The unique ID of the form that last updated the row.

Column Name: orig_submission_code

Column Type: varchar

Max Length: 50

'Original Submission Code'

Column Name: outside_lab_charges

Column Type: numeric

'Outside Lab Charges'

Column Name: outside_lab_code

Column Type: varchar

Max Length: 50

'Outside Lab'

Column Name: outside_lab_value

Column Type: varchar

Max Length: 50

The value of outside_lab_code. See outside_lab_code for more information.

Column Name: patient_control_number

Column Type: varchar

Max Length: 50

The patient control number.

Column Name: patient_paid_amt

Column Type: numeric

The patient paid amount.

Column Name: patient_status_code

Column Type: varchar
Max Length: 50
'Patient Status'

Column Name: patient_status_value
Column Type: varchar
Max Length: 50
The value of patient_status_code. See patient_status_code for more information.

Column Name: payer_claim_control_number
Column Type: varchar
Max Length: 50
The payer claim control number.

Column Name: pre_on_adm_eight_code
Column Type: varchar
Max Length: 50
'Present On Admission Indicator (Eighth) (2300-HI-08-9)'

Column Name: pre_on_adm_eight_value
Column Type: varchar
Max Length: 50
The value of pre_on_adm_eight_code. See pre_on_adm_eight_code for more information.

Column Name: pre_on_adm_elev_code
Column Type: varchar
Max Length: 50
'Present On Admission Indicator (Eleventh) (2300-HI-11-9)'

Column Name: pre_on_adm_elev_value
Column Type: varchar
Max Length: 50
The value of pre_on_adm_elev_code. See pre_on_adm_elev_code for more information.

Column Name: pre_on_adm_fifth_code
Column Type: varchar
Max Length: 50
'Present On Admission Indicator (Fifth) (2300-HI-05-9)'

Column Name: pre_on_adm_fifth_value
Column Type: varchar
Max Length: 50
The value of pre_on_adm_fifth_code. See pre_on_adm_fifth_code for more information.

Column Name: pre_on_adm_first_code
Column Type: varchar
Max Length: 50
'Present On Admission Indicator (first) (2300-HI-01-9)'

Column Name: pre_on_adm_first_value

Column Type: varchar

Max Length: 50

The value of pre_on_adm_first_code. See pre_on_adm_first_code for more information.

Column Name: pre_on_adm_four_code

Column Type: varchar

Max Length: 50

'Present On Admission Indicator (Fourth) (2300-HI-04-9)'

Column Name: pre_on_adm_four_value

Column Type: varchar

Max Length: 50

The value of pre_on_adm_four_code. See pre_on_adm_four_code for more information.

Column Name: pre_on_adm_ninth_code

Column Type: varchar

Max Length: 50

'Present On Admission Indicator (Ninth) (2300-HI-09-9)'

Column Name: pre_on_adm_ninth_value

Column Type: varchar

Max Length: 50

The value of pre_on_adm_ninth_code. See pre_on_adm_ninth_code for more information.

Column Name: pre_on_adm_princ_code

Column Type: varchar

Max Length: 50

'Present On Admission Indicator (Principal) (2300-HI-01-9)'

Column Name: pre_on_adm_princ_value

Column Type: varchar

Max Length: 50

The value of pre_on_adm_princ_code. See pre_on_adm_princ_code for more information.

Column Name: pre_on_adm_secon_code

Column Type: varchar

Max Length: 50

'Present On Admission Indicator (second) (2300-HI-02-9)'

Column Name: pre_on_adm_secon_value

Column Type: varchar

Max Length: 50

The value of pre_on_adm_secon_code. See pre_on_adm_secon_code for more information.

Column Name: pre_on_adm_seven_code

Column Type: varchar

Max Length: 50

'Present On Admission Indicator (Seventh) (2300-HI-07-9)'

Column Name: pre_on_adm_seven_value

Column Type: varchar

Max Length: 50

The value of pre_on_adm_seven_code. See pre_on_adm_seven_code for more information.

Column Name: pre_on_adm_sixth_code

Column Type: varchar

Max Length: 50

'Present On Admission Indicator (Sixth) (2300-HI-06-9)'

Column Name: pre_on_adm_sixth_value

Column Type: varchar

Max Length: 50

The value of pre_on_adm_sixth_code. See pre_on_adm_sixth_code for more information.

Column Name: pre_on_adm_tenth_code

Column Type: varchar

Max Length: 50

'Present On Admission Indicator (Tenth) (2300-HI-10-9)'

Column Name: pre_on_adm_tenth_value

Column Type: varchar

Max Length: 50

The value of pre_on_adm_tenth_code. See pre_on_adm_tenth_code for more information.

Column Name: pre_on_adm_third_code

Column Type: varchar

Max Length: 50

'Present On Admission Indicator (Third) (2300-HI-03-9)'

Column Name: pre_on_adm_third_value

Column Type: varchar

Max Length: 50

The value of pre_on_adm_third_code. See pre_on_adm_third_code for more information.

Column Name: pre_on_adm_twelv_code

Column Type: varchar

Max Length: 50

'Present On Admission Indicator (Twelfth) (2300-HI-12-9)'

Column Name: pre_on_adm_twelv_value

Column Type: varchar

Max Length: 50

The value of pre_on_adm_twelv_code. See pre_on_adm_twelv_code for more information.

Column Name: principal_diagnosis

Column Type: varchar

Max Length: 50

'Principal Diagnosis'

Column Name: principal_diagnosis_icd10

Column Type: varchar
Max Length: 50
The ICD 10 Code for principal_diagnosis.

Column Name: principal_diagnosis_icd10_value
Column Type: varchar
Max Length: 200
The value of principal_diagnosis_icd10. See principal_diagnosis_icd10 for more information.

Column Name: principal_diagnosis_icd9
Column Type: varchar
Max Length: 50
The ICD 9 Code for principal_diagnosis.

Column Name: principal_diagnosis_icd9_value
Column Type: varchar
Max Length: 200
The value of principal_diagnosis_icd9. See principal_diagnosis_icd9 for more information.

Column Name: principaldiagnosisobject
Column Type: varchar
Max Length: 50
The principal diagnosis object.

Column Name: principal_diagnosis_value
Column Type: varchar
Max Length: 200
'Principal Diagnosis'

Column Name: prior_auth_number
Column Type: varchar
Max Length: 50
'Prior Authorization Number'

Column Name: referring_physician
Column Type: varchar
Max Length: 50
'Referring Physician'

Column Name: resubmission_code
Column Type: varchar
Max Length: 50
'Resubmission Code'

Column Name: second_diagnosis
Column Type: varchar
Max Length: 50
'Second Diagnosis'

Column Name: second_diagnosis_icd10

Column Type: varchar
Max Length: 50
The ICD 10 Code for second_diagnosis.

Column Name: second_diagnosis_icd10_value
Column Type: varchar
Max Length: 200
The value of second_diagnosis_icd10. See second_diagnosis_icd10 for more information.

Column Name: second_diagnosis_icd9
Column Type: varchar
Max Length: 50
The ICD 9 Code for second_diagnosis.

Column Name: second_diagnosis_icd9_value
Column Type: varchar
Max Length: 200
The value of second_diagnosis_icd9. See second_diagnosis_icd9 for more information.

Column Name: seconddiagnosisobject
Column Type: varchar
Max Length: 50
The second diagnosis object.

Column Name: second_diagnosis_value
Column Type: varchar
Max Length: 200
The value of second_diagnosis. See second_diagnosis for more information.

Column Name: seventh_diagnosis
Column Type: varchar
Max Length: 50
'Seventh Diagnosis'

Column Name: seventh_diagnosis_icd10
Column Type: varchar
Max Length: 50
The ICD 10 code for seventh_diagnosis.

Column Name: seventh_diagnosis_icd10_value
Column Type: varchar
Max Length: 200
The value of seventh_diagnosis_icd10. See seventh_diagnosis_icd10 for more information.

Column Name: seventh_diagnosis_icd9
Column Type: varchar
Max Length: 50
The ICD 9 Code for seventh_diagnosis.

Column Name: seventh_diagnosis_icd9_value

Column Type: varchar

Max Length: 200

The value of seventh_diagnosis_icd9. See seventh_diagnosis_icd9 for more information.

Column Name: seventhdiagnosisobject

Column Type: varchar

Max Length: 50

The seventh diagnosis object.

Column Name: seventh_diagnosis_value

Column Type: varchar

Max Length: 200

The value of seventh_diagnosis. See seventh_diagnosis for more information.

Column Name: sixth_diagnosis

Column Type: varchar

Max Length: 50

'Sixth Diagnosis'

Column Name: sixth_diagnosis_icd10

Column Type: varchar

Max Length: 50

The ICD 10 code for sixth_diagnosis.

Column Name: sixth_diagnosis_icd10_value

Column Type: varchar

Max Length: 200

The value of sixth_diagnosis_icd10. See sixth_diagnosis_icd10 for more information.

Column Name: sixth_diagnosis_icd9

Column Type: varchar

Max Length: 50

The ICD 9 Code for sixth_diagnosis.

Column Name: sixth_diagnosis_icd9_value

Column Type: varchar

Max Length: 200

The value of sixth_diagnosis_icd9. See sixth_diagnosis_icd9 for more information.

Column Name: sixthdiagnosisobject

Column Type: varchar

Max Length: 50

The sixth diagnosis object.

Column Name: sixth_diagnosis_value

Column Type: varchar

Max Length: 200

The value of sixth_diagnosis. See sixth_diagnosis for more information.

Column Name: ssn_code

Column Type: varchar
Max Length: 50
'SSN'

Column Name: ssn_value
Column Type: varchar
Max Length: 50
The value of ssn_code. See ssn_code for more information.

Column Name: status
Column Type: varchar
Max Length: 50
The status of the claim.

Column Name: tenth_diagnosis
Column Type: varchar
Max Length: 50
'Tenth Diagnosis'

Column Name: tenth_diagnosis_icd10
Column Type: varchar
Max Length: 50
The ICD 10 Code for tenth_diagnosis.

Column Name: tenth_diagnosis_icd10_value
Column Type: varchar
Max Length: 200
The value of tenth_diagnosis_icd10. See tenth_diagnosis_icd10 for more information.

Column Name: tenth_diagnosis_icd9
Column Type: varchar
Max Length: 50
The ICD 9 Code for tenth_diagnosis.

Column Name: tenth_diagnosis_icd9_value
Column Type: varchar
Max Length: 200
The value of tenth_diagnosis_icd9. See tenth_diagnosis_icd9 for more information.

Column Name: tenthdiagnosisobject
Column Type: varchar
Max Length: 50
The tenth diagnosis object.

Column Name: tenth_diagnosis_value
Column Type: varchar
Max Length: 200
The value of tenth_diagnosis. See tenth_diagnosis for more information.

Column Name: third_diagnosis

Column Type: varchar
Max Length: 50
'Third Diagnosis'

Column Name: third_diagnosis_icd10
Column Type: varchar
Max Length: 50
The ICD 10 Code for third_diagnosis.

Column Name: third_diagnosis_icd10_value
Column Type: varchar
Max Length: 200
The value of third_diagnosis_icd10. See third_diagnosis_icd10 for information.

Column Name: third_diagnosis_icd9
Column Type: varchar
Max Length: 50
The ICD 9 Code for third_diagnosis.

Column Name: third_diagnosis_icd9_value
Column Type: varchar
Max Length: 200
The value of third_diagnosis_icd9. See third_diagnosis_icd9 for more information.

Column Name: thirddiagnosisobject
Column Type: varchar
Max Length: 50
The third diagnosis object.

Column Name: third_diagnosis_value
Column Type: varchar
Max Length: 200
The value of third_diagnosis. See third_diagnosis for more information.

Column Name: through_date
Column Type: date
The through date.

Column Name: tot_disbursement_amt
Column Type: numeric
'Total Expected Disbursement'

Column Name: tot_fee_table_amt
Column Type: numeric
'Total Fee Table Amount'

Column Name: trt_fac_member
Column Type: varchar
Max Length: 50
'Facility member'

Column Name: twelfth_diagnosis

Column Type: varchar

Max Length: 50

'Twelfth Diagnosis'

Column Name: twelfth_diagnosis_icd10

Column Type: varchar

Max Length: 50

The ICD 10 Code for twelfth_diagnosis.

Column Name: twelfth_diagnosis_icd10_value

Column Type: varchar

Max Length: 200

The value of twelfth_diagnosis_icd10. See twelfth_diagnosis_icd10 for more information.

Column Name: twelfth_diagnosis_icd9

Column Type: varchar

Max Length: 50

The ICD 9 Code for twelfth_diagnosis.

Column Name: twelfth_diagnosis_icd9_value

Column Type: varchar

Max Length: 200

The value of twelfth_diagnosis_icd9. See twelfth_diagnosis_icd9 for more information.

Column Name: twelfthdiagnosisobject

Column Type: varchar

Max Length: 50

The twelfth diagnosis object.

Column Name: twelfth_diagnosis_value

Column Type: varchar

Max Length: 200

The value of twelfth_diagnosis. See twelfth_diagnosis for more information.

Column Name: type_of_bill_code

Column Type: varchar

Max Length: 50

The type of bill.

Column Name: type_of_bill_value

Column Type: varchar

Max Length: 50

The value of typeofbillcode. See typeofbillcode for more information.

Column Name: unable_work_from_dat

Column Type: date

'Unable To Work From Date'

Column Name: unable_work_thru_dat
Column Type: date
'Unable To Work Through Date'

Column Name: unique_row_id
Column Type: varchar
Max Length: 50
The unique ID of the row.

Documentation for form: Claim_Processing_(CMS_1500)

Table Name: SYSTEM.batch_clm_svc_adj_codes

Table Description: This table returns adjustment codes assigned to services during claim adjudication, as well as HIPAA cross reference information associated to those codes.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID for the batch.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: adj_amount
Column Type: varchar
Max Length: 50
The adjustment amount associated with the EOB message.

Column Name: adj_code_code
Column Type: varchar
Max Length: 50
The adjustment code associated with the EOB message.

Column Name: adj_code_value
Column Type: varchar
Max Length: 50

The description associated with adj_code_code. See adj_code_code for more information.

Column Name: adj_group_code_5010_code

Column Type: varchar

Max Length: 50

The HIPAA version 5010 adjustment group code associated with the EOB message.

Column Name: adj_group_code_5010_value

Column Type: varchar

Max Length: 50

The description associated with adj_group_code_5010_code. See adj_group_code_5010_code for more information.

Column Name: adj_group_code_code

Column Type: varchar

Max Length: 50

The adjustment group code associated with the EOB message.

Column Name: adj_group_code_value

Column Type: varchar

Max Length: 50

The description associated with adj_group_code_code. See adj_group_code_code for more information.

Column Name: adj_reason_code_code

Column Type: varchar

Max Length: 50

The adjustment reason code associated with the EOB message.

Column Name: adj_reason_code_value

Column Type: varchar

Max Length: 4096

The description associated with adj_reason_code_code. See adj_reason_code_code for more information.

Column Name: apd_status_code

Column Type: varchar

Max Length: 50

Dictionary code for the claim status associated to the EOB message.

Column Name: apd_status_value

Column Type: varchar

Max Length: 50

The description associated with apd_status_code. See apd_status_code for more information.

Column Name: eob_message_code

Column Type: numeric

The unique numeric ID of the EOB message.

Column Name: eob_message_value

Column Type: varchar

Max Length: 50

The description associated with eob_message_code. See eob_message_code for more information.

Documentation for form: Claim_Processing_(CMS_1500)

Table Name: SYSTEM.batch_clm_svc_detail

Table Description: This table returns detailed information on MSO services.

Column Name: ID

Column Type: integer

Column Name: BATCHID

Column Type: varchar

Max Length: 50

The unique ID for the batch.

Column Name: CLAIMID

Column Type: integer

The claim number.

Column Name: FACILITY

Column Type: integer

The system code in which the data was stored.

Column Name: GUID

Column Type: varchar

Max Length: 50

A unique identifier used internally to validate data.

Column Name: JOIN_TO_AUTUniqueid

Column Type: varchar

Max Length: 50

The unique ID for the associated authorization.

Column Name: JOIN_TO_HCF_UBF_Type

Column Type: varchar

Max Length: 50

Indicator of whether this claim is of type "HCFA" or "UB92".

Column Name: JOIN_TO_HCFUniqueid

Column Type: varchar

Max Length: 50

The unique ID for the claim if it is of type "HCFA".

Column Name: JOIN_TO_UBFHCFUniqueid

Column Type: varchar

Max Length: 50
The unique ID for the claim.

Column Name: JOIN_TO_UBFUniqueid
Column Type: varchar
Max Length: 50
The unique ID for the claim if it is of type "UB92".

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: PPluniqueid
Column Type: varchar
Max Length: 50
The unique ID for the associated performing provider.

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: UTCTimestamp
Column Type: timestamp
The UTC time when the row was last updated.

Column Name: VOUCHERID
Column Type: integer
The unique ID for the voucher.

Column Name: ability_to_pay_amt
Column Type: numeric
The ability to pay amount deducted from the service.

Column Name: account_code
Column Type: varchar
Max Length: 50
The authorization account code.

Column Name: account_level
Column Type: varchar
Max Length: 50
The authorization account level.

Column Name: account_level_name
Column Type: varchar
Max Length: 50
The authorization account level name.

Column Name: account_name
Column Type: varchar
Max Length: 50
The authorization account name.

Column Name: add_on_notes
Column Type: varchar
Max Length: 32000
Add-on notes.

Column Name: adjudication_code
Column Type: varchar
Max Length: 50
The adjudication code.

Column Name: adjustment_reason_code
Column Type: varchar
Max Length: 50
One or more dictionary codes for claim adjustment reasons.

Column Name: adjustment_reason_value
Column Type: varchar
Max Length: 255
The description associated with adjustment_reason_code. See adjustment_reason_code for more information.

Column Name: approved_units
Column Type: numeric
Approved units.

Column Name: associated_code
Column Type: varchar
Max Length: 50
Associated code.

Column Name: authorization_assoc_code
Column Type: varchar
Max Length: 50
The authorization associated code.

Column Name: authorization_number
Column Type: varchar
Max Length: 50
The authorization number.

Column Name: authorization_valid_code
Column Type: varchar
Max Length: 50
Indicator of whether the authorization is valid.

Column Name: authorization_valid_value

Column Type: varchar

Max Length: 50

The description associated with authorization_valid_code. See authorization_valid_code for more information.

Column Name: blackout_id

Column Type: integer

The unique blackout ID.

Column Name: carelink_service_ID

Column Type: varchar

Max Length: 50

The carelink service ID.

Column Name: claim_number_837

Column Type: varchar

Max Length: 50

837 claim number for the service.

Column Name: claim_status_code

Column Type: varchar

Max Length: 50

Dictionary code for the claim status.

Column Name: claim_status_reason_code

Column Type: varchar

Max Length: 50

Dictionary code for the claim status reason.

Column Name: claim_status_reason_value

Column Type: varchar

Max Length: 4096

The description associated with claim_status_reason_code. See claim_status_reason_code for more information.

Column Name: claim_status_value

Column Type: varchar

Max Length: 50

The description associated with claim_status_code. See claim_status_code for more information.

Column Name: comments

Column Type: varchar

Max Length: 32766

Comments regarding the service.

Column Name: contains_overridden_field

Column Type: varchar

Max Length: 1

Indicator of whether there is an overridden field.If "Y", indicates that this service detail contains one or more fields whose values were manually overridden.

Column Name: copay_applies_to_ded_code

Column Type: varchar

Max Length: 50

'Co-Pay Counts Towards Deductible'

Column Name: copay_applies_to_ded_value

Column Type: varchar

Max Length: 50

The description associated with copay_applies_to_ded_code. See copay_applies_to_ded_code for more information.

Column Name: cost_center_code

Column Type: varchar

Max Length: 50

Dictionary code for the cost center.

Column Name: cost_center_value

Column Type: varchar

Max Length: 50

The description associated with cost_center_code. See cost_center_code for more information.

Column Name: covered_CBPuniqueid

Column Type: varchar

Max Length: 50

The unique ID for plan covered services.

Column Name: covered_LIBuniqueid

Column Type: varchar

Max Length: 50

The unique ID for plan liability rules level.

Column Name: covered_PLANID

Column Type: varchar

Max Length: 50

The unique ID for the associated coverage plan.

Column Name: cpt_code_code

Column Type: varchar

Max Length: 50

The CPT code.

Column Name: cpt_code_value

Column Type: varchar

Max Length: 80

The description associated with cpt_code_code. See cpt_code_code for more information.

Column Name: data_entry_by

Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: date_of_service
Column Type: date
The date the service was rendered.

Column Name: date_of_service_end
Column Type: date
The date the service ended.

Column Name: delay_reason_code
Column Type: varchar
Max Length: 50
Dictionary code indicating the reason the claim was delayed.

Column Name: delay_reason_value
Column Type: varchar
Max Length: 50
The description associated with delay_reason_code. See delay_reason_code for more information.

Column Name: diagnosis_code
Column Type: varchar
Max Length: 50
Diagnosis code associated with the service.

Column Name: diagnosis_reference
Column Type: varchar
Max Length: 50
Diagnosis reference.

Column Name: diagnosis_reference_2
Column Type: varchar
Max Length: 50
Diagnosis reference 2.

Column Name: diagnosis_reference_3
Column Type: varchar
Max Length: 50
Diagnosis reference 3.

Column Name: diagnosis_reference_4
Column Type: varchar
Max Length: 50
Diagnosis reference 4.

Column Name: diagnosis_value
Column Type: varchar
Max Length: 200
The description associated with diagnosis_code. See diagnosis_code for more information.

Column Name: discipline_code
Column Type: varchar

Max Length: 40

Dictionary code indicating the medical discipline under which the service was rendered.

Column Name: discipline_value

Column Type: varchar

Max Length: 40

The description associated with discipline_code. See discipline_code for more information.

Column Name: documentation_time

Column Type: numeric

For group services, the documentation time

Column Name: drug_ref_id

Column Type: varchar

Max Length: 50

The service drug reference ID.

Column Name: drug_ref_id_qual

Column Type: varchar

Max Length: 50

The service drug reference qualifier.

Column Name: duration

Column Type: varchar

Max Length: 50

The service duration.

Column Name: ebpss_csi_code

Column Type: varchar

Max Length: 32000

Dictionary code indicating the evidence-based practices / service strategies (CSI) code for the service.

Column Name: ebpss_csi_value

Column Type: varchar

Max Length: 255

The description associated with ebpss_csi_code. See ebpss_csi_code for more information.

Column Name: ebpss_csi_value_long

Column Type: varchar

Max Length: 4096

The description associated with ebpss_csi_value_code. See ebpss_csi_value_code for more information.

Column Name: eligible_provider_code

Column Type: varchar

Max Length: 50

Indicator of whether the provider was eligible or not.

Column Name: eligible_provider_value

Column Type: varchar

Max Length: 50

The description associated with eligible_provider_code. See eligible_provider_code for more information.

Column Name: emergency_indicator_code

Column Type: varchar

Max Length: 50

'Emergency Indicator (837P-2400-SV109)'

Column Name: emergency_indicator_value

Column Type: varchar

Max Length: 50

The description associated with emergency_indicator_code. See emergency_indicator_code for more information.

Column Name: expected_disburse

Column Type: numeric

Expected disbursement for the service.

Column Name: explan_of_coverage

Column Type: varchar

Max Length: 32766

Explanation of coverage.

Column Name: group_service_units

Column Type: varchar

Max Length: 50

For group services, the total approved group service units

Column Name: group_service_units_day

Column Type: varchar

Max Length: 50

For group services, the total approved group service units per day

Column Name: hcpcs_code

Column Type: varchar

Max Length: 50

The HCPCS code.

Column Name: is_this_an_admission_code

Column Type: varchar

Max Length: 50

'Does This Service Represent An Admission'

Column Name: is_this_an_admission_value

Column Type: varchar

Max Length: 50

The description associated with is_this_an_admission_code. See is_this_an_admission_code for more information.

Column Name: level_of_care

Column Type: varchar

Max Length: 50

Level of care.

Column Name: line_item_control_num

Column Type: varchar

Max Length: 50

Line item control number.

Column Name: line_note_code

Column Type: varchar

Max Length: 50

Indicator dictionary code of the type of information captured in the service line note text.

Column Name: line_note_code_val

Column Type: varchar

Max Length: 50

The description associated with line_note_code_code. See line_note_code_code for more information.

Column Name: line_note_text

Column Type: varchar

Max Length: 80

Service line note text.

Column Name: location_code

Column Type: varchar

Max Length: 50

The service location code.

Column Name: location_value

Column Type: varchar

Max Length: 50

The description associated with location_code. See location_code for more information.

Column Name: manual_service_code

Column Type: varchar

Max Length: 50

Manual service code.

Column Name: manual_service_descript

Column Type: varchar

Max Length: 80

Manual service description.

Column Name: measurement_code_code

Column Type: varchar

Max Length: 50

'Measurement Code (837-2400-SV103/SV204)'.

Column Name: measurement_code_value

Column Type: varchar

Max Length: 50

The description associated with measurement_code_code. See measurement_code_code for more information.

Column Name: member_copay

Column Type: numeric

Member co-pay.

Column Name: member_deductible

Column Type: numeric

Member deductible.

Column Name: member_enrolled_dos_code

Column Type: varchar

Max Length: 50

'Member Enrolled On Date Of Service'

Column Name: member_enrolled_dos_value

Column Type: varchar

Max Length: 50

The description associated with member_enrolled_dos_code. See member_enrolled_dos_code for more information.

Column Name: member_id

Column Type: numeric

Member ID.

Column Name: national_drug_code

Column Type: varchar

Max Length: 50

National drug code.

Column Name: number_in_group

Column Type: numeric

For group services, the number of members in the group

Column Name: num_counselor_in_group

Column Type: numeric

For group services, the number of counselors in the group

Column Name: option_desc

Column Type: varchar

Max Length: 80

The name of the form that last updated the row.

Column Name: option_id

Column Type: varchar

Max Length: 20

The unique ID of the form that last updated the row.

Column Name: original_proc_code_code
Column Type: varchar
Max Length: 50
Original procedure code.

Column Name: original_proc_code_type
Column Type: varchar
Max Length: 50
Original procedure type.

Column Name: original_proc_code_value
Column Type: varchar
Max Length: 80
The description associated with original_proc_code_code. See original_proc_code_code for more information.

Column Name: parent_nspace_link_to_DD
Column Type: varchar
Max Length: 50
Link to the associated parent service in SYSTEM.billing_tx_history.

Column Name: patient_account_number
Column Type: varchar
Max Length: 50
Patient account number.

Column Name: perf_prov_name
Column Type: varchar
Max Length: 50
Name of the performing provider.

Column Name: place_of_service_code
Column Type: varchar
Max Length: 50
Place of service code.

Column Name: population_code
Column Type: varchar
Max Length: 50
Population code.

Column Name: population_value
Column Type: varchar
Max Length: 50
The description associated with population_code. See population_code for more information.

Column Name: prev_batch_pended_from
Column Type: varchar
Max Length: 500
Previous batch the service was pended from.

Column Name: primary_service_id
Column Type: varchar
Max Length: 50
The primary service ID.

Column Name: private_pay_amt
Column Type: numeric
Private pay amount.

Column Name: private_pay_payer_code
Column Type: varchar
Max Length: 50
Payer code for private pay.

Column Name: private_pay_payer_value
Column Type: varchar
Max Length: 50
The description associated with private_pay_payer_code. See private_pay_payer_code for more information.

Column Name: proc_code_type_for_adj
Column Type: varchar
Max Length: 50
Procedure code type of adjustment.

Column Name: procedure_code_code
Column Type: varchar
Max Length: 50
Procedure code.

Column Name: procedure_code_type
Column Type: varchar
Max Length: 50
Procedure code type.

Column Name: procedure_code_value
Column Type: varchar
Max Length: 80
The description associated with procedure_code_code. See procedure_code_code for more information.

Column Name: procedure_code_with_mod
Column Type: varchar
Max Length: 50
Procedure code with modifier.

Column Name: provider_to_be_auth
Column Type: varchar
Max Length: 50
Provider to be authorized.

Column Name: prov_pgm_link
Column Type: varchar
Max Length: 50
Provider program link.

Column Name: prov_pgm_name
Column Type: varchar
Max Length: 50
Provider program name.

Column Name: quantity
Column Type: varchar
Max Length: 50
Quantity.

Column Name: ref_p4
Column Type: varchar
Max Length: 50
REF*P4 segment

Column Name: remark_codes
Column Type: varchar
Max Length: 500
Claim status remark codes returned on an 837.

Column Name: remark_codes_value
Column Type: varchar
Max Length: 5096
The description associated with remark_codes_code. See remark_codes_code for more information.

Column Name: revenue_code_code
Column Type: varchar
Max Length: 50
Revenue code.

Column Name: revenue_code_value
Column Type: varchar
Max Length: 80
The description associated with revenue_code_code. See revenue_code_code for more information.

Column Name: service_comments
Column Type: varchar
Max Length: 32766
Service comments.

Column Name: service_end_time
Column Type: time
Service end time.

Column Name: service_start_time
Column Type: time
Service start time.

Column Name: service_units
Column Type: numeric
Service units.

Column Name: svc_bundle_837_id
Column Type: varchar
Max Length: 50
Service bundle 837 ID.

Column Name: svc_counts_as_visit
Column Type: varchar
Max Length: 50
Indicator code of whether the service counts as a visit.

Column Name: system_index
Column Type: varchar
Max Length: 50
Service index.

Column Name: third_party_amount_paid
Column Type: numeric
Third party amount paid

Column Name: third_party_payer_amt_1
Column Type: numeric
Third party payer amount 1.

Column Name: third_party_payer_amt_2
Column Type: numeric
Third party payer amount 2.

Column Name: third_party_payer_amt_3
Column Type: numeric
Third party payer amount 3.

Column Name: third_party_payer_amt_4
Column Type: numeric
Third party payer amount 4.

Column Name: third_party_payer_amt_5
Column Type: numeric
Third party payer amount 5.

Column Name: third_party_payer_amt_6
Column Type: numeric
Third party payer amount 6.

Column Name: third_party_payer_code_1
Column Type: varchar
Max Length: 50
Third party payer code 1.

Column Name: third_party_payer_code_2
Column Type: varchar
Max Length: 50
Third party payer code 2.

Column Name: third_party_payer_code_3
Column Type: varchar
Max Length: 50
Third party payer code 3.

Column Name: third_party_payer_code_4
Column Type: varchar
Max Length: 50
Third party payer code 4.

Column Name: third_party_payer_code_5
Column Type: varchar
Max Length: 50
Third party payer code 5.

Column Name: third_party_payer_code_6
Column Type: varchar
Max Length: 50
Third party payer code 6.

Column Name: third_party_payer_value_1
Column Type: varchar
Max Length: 50
The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_2
Column Type: varchar
Max Length: 50
The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_3
Column Type: varchar
Max Length: 50
The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_4

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_5

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_6

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: thrd_prty_allowed_amt

Column Type: numeric

Third party allowed amount.

Column Name: thrd_prty_billed_amt

Column Type: numeric

Third party billed amount

Column Name: thrd_prty_pay_adj_amt_11

Column Type: numeric

Third party payment adjustment amount 11.

Column Name: thrd_prty_pay_adj_amt_12

Column Type: numeric

Third party payment adjustment amount 12.

Column Name: thrd_prty_pay_adj_amt_13

Column Type: numeric

Third party payment adjustment amount 13.

Column Name: thrd_prty_pay_adj_amt_14

Column Type: numeric

Third party payment adjustment amount 14.

Column Name: thrd_prty_pay_adj_amt_15

Column Type: numeric

Third party payment adjustment amount 15.

Column Name: thrd_prty_pay_adj_amt_21

Column Type: numeric

Third party payment adjustment amount 21.

Column Name: thrd_prty_pay_adj_amt_22

Column Type: numeric
Third party payment adjustment amount 22.

Column Name: thrd_prty_pay_adj_amt_23
Column Type: numeric
Third party payment adjustment amount 23.

Column Name: thrd_prty_pay_adj_amt_24
Column Type: numeric
Third party payment adjustment amount 24.

Column Name: thrd_prty_pay_adj_amt_25
Column Type: numeric
Third party payment adjustment amount 25.

Column Name: thrd_prty_pay_adj_amt_31
Column Type: numeric
Third party payment adjustment amount 31.

Column Name: thrd_prty_pay_adj_amt_32
Column Type: numeric
Third party payment adjustment amount 32.

Column Name: thrd_prty_pay_adj_amt_33
Column Type: numeric
Third party payment adjustment amount 33.

Column Name: thrd_prty_pay_adj_amt_34
Column Type: numeric
Third party payment adjustment amount 34.

Column Name: thrd_prty_pay_adj_amt_35
Column Type: numeric
Third party payment adjustment amount 35.

Column Name: thrd_prty_pay_adj_amt_41
Column Type: numeric
Third party payment adjustment amount 41.

Column Name: thrd_prty_pay_adj_amt_42
Column Type: numeric
Third party payment adjustment amount 42.

Column Name: thrd_prty_pay_adj_amt_43
Column Type: numeric
Third party payment adjustment amount 43.

Column Name: thrd_prty_pay_adj_amt_44
Column Type: numeric
Third party payment adjustment amount 44.

Column Name: thrd_prty_pay_adj_amt_45
Column Type: numeric
Third party payment adjustment amount 45.

Column Name: thrd_prty_pay_adj_code_11
Column Type: varchar
Max Length: 50
Third party payment adjustment code 11.

Column Name: thrd_prty_pay_adj_code_12
Column Type: varchar
Max Length: 50
Third party payment adjustment code 12.

Column Name: thrd_prty_pay_adj_code_13
Column Type: varchar
Max Length: 50
Third party payment adjustment code 13.

Column Name: thrd_prty_pay_adj_code_14
Column Type: varchar
Max Length: 50
Third party payment adjustment code 14.

Column Name: thrd_prty_pay_adj_code_15
Column Type: varchar
Max Length: 50
Third party payment adjustment code 15.

Column Name: thrd_prty_pay_adj_code_21
Column Type: varchar
Max Length: 50
Third party payment adjustment code 21.

Column Name: thrd_prty_pay_adj_code_22
Column Type: varchar
Max Length: 50
Third party payment adjustment code 22.

Column Name: thrd_prty_pay_adj_code_23
Column Type: varchar
Max Length: 50
Third party payment adjustment code 23.

Column Name: thrd_prty_pay_adj_code_24
Column Type: varchar
Max Length: 50
Third party payment adjustment code 24.

Column Name: thrd_prty_pay_adj_code_25
Column Type: varchar
Max Length: 50
Third party payment adjustment code 25.

Column Name: thrd_prty_pay_adj_code_31
Column Type: varchar
Max Length: 50
Third party payment adjustment code 31.

Column Name: thrd_prty_pay_adj_code_32
Column Type: varchar
Max Length: 50
Third party payment adjustment code 32.

Column Name: thrd_prty_pay_adj_code_33
Column Type: varchar
Max Length: 50
Third party payment adjustment code 33.

Column Name: thrd_prty_pay_adj_code_34
Column Type: varchar
Max Length: 50
Third party payment adjustment code 34.

Column Name: thrd_prty_pay_adj_code_35
Column Type: varchar
Max Length: 50
Third party payment adjustment code 35.

Column Name: thrd_prty_pay_adj_code_41
Column Type: varchar
Max Length: 50
Third party payment adjustment code 41.

Column Name: thrd_prty_pay_adj_code_42
Column Type: varchar
Max Length: 50
Third party payment adjustment code 42.

Column Name: thrd_prty_pay_adj_code_43
Column Type: varchar
Max Length: 50
Third party payment adjustment code 43.

Column Name: thrd_prty_pay_adj_code_44
Column Type: varchar
Max Length: 50
Third party payment adjustment code 44.

Column Name: thrd_prty_pay_adj_code_45

Column Type: varchar

Max Length: 50

Third party payment adjustment code 45.

Column Name: thrd_prty_pay_adj_val_11

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_12

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_13

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_14

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_15

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_21

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_22

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_23

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_24

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_25

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_31

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_32

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_33

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_34

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_35

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_41

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_42

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_43

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_44

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_45

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_allow_1

Column Type: numeric

Third party payment allowed amount 1.

Column Name: thrd_prty_pay_allow_2

Column Type: numeric

Third party payment allowed amount 2.

Column Name: thrd_prty_pay_allow_3

Column Type: numeric

Third party payment allowed amount 3.

Column Name: thrd_prty_pay_allow_4

Column Type: numeric

Third party payment allowed amount 4.

Column Name: thrd_prty_pay_billed_1

Column Type: numeric

Third party payment billed 1.

Column Name: thrd_prty_pay_billed_2

Column Type: numeric

Third party payment billed 2.

Column Name: thrd_prty_pay_billed_3

Column Type: numeric
Third party payment billed 3.

Column Name: thrd_prty_pay_billed_4
Column Type: numeric
Third party payment billed 4.

Column Name: thrd_prty_pvt_pay_amt
Column Type: numeric
Third party private pay amount.

Column Name: total_charge
Column Type: numeric
Total charge for the service.

Column Name: total_fee_table_amt
Column Type: numeric
Total fee table amount for the service.

Column Name: travel_time
Column Type: numeric
For group services, the travel time

Column Name: trt_prov_type
Column Type: varchar
Max Length: 50
Treatment provider type.

Column Name: type_of_service_code
Column Type: varchar
Max Length: 50
Dictionary code indicating whether the type of authorization is inpatient or outpatient.

Column Name: type_of_service_value
Column Type: varchar
Max Length: 50
The description associated with type_of_service_code. See type_of_service_code for more information.

Column Name: unique_row_id
Column Type: varchar
Max Length: 50
The unique row ID.

Column Name: unit_of_measurement
Column Type: varchar
Max Length: 50
Unit of measurement.

Documentation for form: Claim_Processing_(CMS_1500)

Table Name: SYSTEM.batch_clm_svc_detail_ss

Table Description: This table returns site specific fields for MSO services.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID for the batch.

Column Name: CLAIMID
Column Type: integer
The claim number.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: ss_batch_clm_date_1
Column Type: date
SS Batch Claim Date 1.

Column Name: ss_batch_clm_date_10
Column Type: date
SS Batch Claim Date 10.

Column Name: ss_batch_clm_date_2
Column Type: date
SS Batch Claim Date 2.

Column Name: ss_batch_clm_date_3
Column Type: date
SS Batch Claim Date 3.

Column Name: ss_batch_clm_date_4
Column Type: date
SS Batch Claim Date 4.

Column Name: ss_batch_clm_date_5

Column Type: date
SS Batch Claim Date 5.

Column Name: ss_batch_clm_date_6
Column Type: date
SS Batch Claim Date 6.

Column Name: ss_batch_clm_date_7
Column Type: date
SS Batch Claim Date 7.

Column Name: ss_batch_clm_date_8
Column Type: date
SS Batch Claim Date 8.

Column Name: ss_batch_clm_date_9
Column Type: date
SS Batch Claim Date 9.

Column Name: ss_batch_clm_dict_10_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 10 Cdoe.

Column Name: ss_batch_clm_dict_10_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 10 Value.

Column Name: ss_batch_clm_dict_1_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 1 Code.

Column Name: ss_batch_clm_dict_1_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 1 Value.

Column Name: ss_batch_clm_dict_2_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 2 Code.

Column Name: ss_batch_clm_dict_2_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 2 Value.

Column Name: ss_batch_clm_dict_3_code

Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 3 Code.

Column Name: ss_batch_clm_dict_3_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 3 Value.

Column Name: ss_batch_clm_dict_4_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 4 Code.

Column Name: ss_batch_clm_dict_4_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 4 Value.

Column Name: ss_batch_clm_dict_5_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 5 Code.

Column Name: ss_batch_clm_dict_5_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 5 Value.

Column Name: ss_batch_clm_dict_6_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 6 Code.

Column Name: ss_batch_clm_dict_6_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 6 Value.

Column Name: ss_batch_clm_dict_7_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 7 Code.

Column Name: ss_batch_clm_dict_7_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 7 Value.

Column Name: ss_batch_clm_dict_8_code

Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 8 Code.

Column Name: ss_batch_clm_dict_8_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 8 Value.

Column Name: ss_batch_clm_dict_9_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 9 Code.

Column Name: ss_batch_clm_dict_9_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 9 Value.

Column Name: ss_batch_clm_mult_1_code
Column Type: varchar
Max Length: 50
SS Batch Claim Multiple Select Dictionary 1 Code.

Column Name: ss_batch_clm_mult_1_shval
Column Type: varchar
Max Length: 255
SS Batch Claim Multiple Select Dictionary 1 Short Value.

Column Name: ss_batch_clm_mult_1_value
Column Type: varchar
Max Length: 4096
SS Batch Claim Multiple Select Dictionary 1 Full Value.

Column Name: ss_batch_clm_mult_2_code
Column Type: varchar
Max Length: 50
SS Batch Claim Multiple Select Dictionary 2 Code.

Column Name: ss_batch_clm_mult_2_shval
Column Type: varchar
Max Length: 255
SS Batch Claim Multiple Select Dictionary 2 Short Value.

Column Name: ss_batch_clm_mult_2_value
Column Type: varchar
Max Length: 4096
SS Batch Claim Multiple Select Dictionary 2 Full Value.

Column Name: ss_batch_clm_mult_3_code

Column Type: varchar
Max Length: 50
SS Batch Claim Multiple Select Dictionary 3 Code.

Column Name: ss_batch_clm_mult_3_shval
Column Type: varchar
Max Length: 255
SS Batch Claim Multiple Select Dictionary 3 Short Value.

Column Name: ss_batch_clm_mult_3_value
Column Type: varchar
Max Length: 4096
SS Batch Claim Multiple Select Dictionary 3 Full Value.

Column Name: ss_batch_clm_mult_4_code
Column Type: varchar
Max Length: 50
SS Batch Claim Multiple Select Dictionary 4 Code.

Column Name: ss_batch_clm_mult_4_shval
Column Type: varchar
Max Length: 255
SS Batch Claim Multiple Select Dictionary 4 Short Value.

Column Name: ss_batch_clm_mult_4_value
Column Type: varchar
Max Length: 4096
SS Batch Claim Multiple Select Dictionary 4 Full Value.

Column Name: ss_batch_clm_mult_5_code
Column Type: varchar
Max Length: 50
SS Batch Claim Multiple Select Dictionary 5 Code.

Column Name: ss_batch_clm_mult_5_shval
Column Type: varchar
Max Length: 255
SS Batch Claim Multiple Select Dictionary 5 Short Value.

Column Name: ss_batch_clm_mult_5_value
Column Type: varchar
Max Length: 4096
SS Batch Claim Multiple Select Dictionary 5 Full Value.

Column Name: ss_batch_clm_scr_txt_1
Column Type: varchar
Max Length: 32766
SS Batch Claim Scrolling Free Text 1.

Column Name: ss_batch_clm_scr_txt_10

Column Type: varchar
Max Length: 32766
SS Batch Claim Scrolling Free Text 10.

Documentation for form: Claim_Processing_(CMS_1500)

Table Name: SYSTEM.provider_monthly_max

Table Description: This table returns services that contribute towards a provider's monthly dollar max.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID for the batch.

Column Name: CLAIMID
Column Type: integer
The claim number.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: PROVID
Column Type: varchar
Max Length: 50
'Provider'

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: auth_used
Column Type: varchar
Max Length: 50
The number of the authorization that this service falls under.

Column Name: dollars_used
Column Type: varchar
Max Length: 50

Column Name: max_month
Column Type: integer
The month that this service will be credited against.

Column Name: max_year
Column Type: integer
The year that this service will be credited against.

Column Name: pended
Column Type: varchar
Max Length: 50
A flag indicating whether the service was pended due to exhaustion of monthly max dollars.

Documentation for form:

Claim_Processing_with_Override_(CMS_1500)

Table Name: SYSTEM.batch_clm_svc_adj_codes

Table Description: This table returns adjustment codes assigned to services during claim adjudication, as well as HIPAA cross reference information associated to those codes.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID for the batch.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: adj_amount
Column Type: varchar
Max Length: 50
The adjustment amount associated with the EOB message.

Column Name: adj_code_code
Column Type: varchar

Max Length: 50

The adjustment code associated with the EOB message.

Column Name: adj_code_value

Column Type: varchar

Max Length: 50

The description associated with adj_code_code. See adj_code_code for more information.

Column Name: adj_group_code_5010_code

Column Type: varchar

Max Length: 50

The HIPAA version 5010 adjustment group code associated with the EOB message.

Column Name: adj_group_code_5010_value

Column Type: varchar

Max Length: 50

The description associated with adj_group_code_5010_code. See adj_group_code_5010_code for more information.

Column Name: adj_group_code_code

Column Type: varchar

Max Length: 50

The adjustment group code associated with the EOB message.

Column Name: adj_group_code_value

Column Type: varchar

Max Length: 50

The description associated with adj_group_code_code. See adj_group_code_code for more information.

Column Name: adj_reason_code_code

Column Type: varchar

Max Length: 50

The adjustment reason code associated with the EOB message.

Column Name: adj_reason_code_value

Column Type: varchar

Max Length: 4096

The description associated with adj_reason_code_code. See adj_reason_code_code for more information.

Column Name: apd_status_code

Column Type: varchar

Max Length: 50

Dictionary code for the claim status associated to the EOB message.

Column Name: apd_status_value

Column Type: varchar

Max Length: 50

The description associated with apd_status_code. See apd_status_code for more information.

Column Name: eob_message_code

Column Type: numeric
The unique numeric ID of the EOB message.

Column Name: eob_message_value
Column Type: varchar
Max Length: 50
The description associated with eob_message_code. See eob_message_code for more information.

Documentation for form:

Claim_Processing_with_Override_(CMS_1500)

Table Name: SYSTEM.batch_clm_svc_detail

Table Description: This table returns detailed information on MSO services.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID for the batch.

Column Name: CLAIMID
Column Type: integer
The claim number.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: GUID
Column Type: varchar
Max Length: 50
A unique identifier used internally to validate data.

Column Name: JOIN_TO_AUTUniqueid
Column Type: varchar
Max Length: 50
The unique ID for the associated authorization.

Column Name: JOIN_TO_HCF_UBF_Type
Column Type: varchar
Max Length: 50
Indicator of whether this claim is of type "HCFA" or "UB92".

Column Name: JOIN_TO_HCFUniqueid
Column Type: varchar
Max Length: 50
The unique ID for the claim if it is of type "HCFA".

Column Name: JOIN_TO_UBFHCFUniqueid
Column Type: varchar
Max Length: 50
The unique ID for the claim.

Column Name: JOIN_TO_UBFUniqueid
Column Type: varchar
Max Length: 50
The unique ID for the claim if it is of type "UB92".

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: PPluniqueid
Column Type: varchar
Max Length: 50
The unique ID for the associated performing provider.

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: UTCTimestamp
Column Type: timestamp
The UTC time when the row was last updated.

Column Name: VOUCHERID
Column Type: integer
The unique ID for the voucher.

Column Name: ability_to_pay_amt
Column Type: numeric
The ability to pay amount deducted from the service.

Column Name: account_code
Column Type: varchar
Max Length: 50
The authorization account code.

Column Name: account_level
Column Type: varchar

Max Length: 50
The authorization account level.

Column Name: account_level_name
Column Type: varchar
Max Length: 50
The authorization account level name.

Column Name: account_name
Column Type: varchar
Max Length: 50
The authorization account name.

Column Name: add_on_notes
Column Type: varchar
Max Length: 32000
Add-on notes.

Column Name: adjudication_code
Column Type: varchar
Max Length: 50
The adjudication code.

Column Name: adjustment_reason_code
Column Type: varchar
Max Length: 50
One or more dictionary codes for claim adjustment reasons.

Column Name: adjustment_reason_value
Column Type: varchar
Max Length: 255
The description associated with adjustment_reason_code. See adjustment_reason_code for more information.

Column Name: approved_units
Column Type: numeric
Approved units.

Column Name: associated_code
Column Type: varchar
Max Length: 50
Associated code.

Column Name: authorization_assoc_code
Column Type: varchar
Max Length: 50
The authorization associated code.

Column Name: authorization_number
Column Type: varchar

Max Length: 50
The authorization number.

Column Name: authorization_valid_code
Column Type: varchar
Max Length: 50
Indicator of whether the authorization is valid.

Column Name: authorization_valid_value
Column Type: varchar
Max Length: 50
The description associated with authorization_valid_code. See authorization_valid_code for more information.

Column Name: blackout_id
Column Type: integer
The unique blackout ID.

Column Name: carelink_service_ID
Column Type: varchar
Max Length: 50
The carelink service ID.

Column Name: claim_number_837
Column Type: varchar
Max Length: 50
837 claim number for the service.

Column Name: claim_status_code
Column Type: varchar
Max Length: 50
Dictionary code for the claim status.

Column Name: claim_status_reason_code
Column Type: varchar
Max Length: 50
Dictionary code for the claim status reason.

Column Name: claim_status_reason_value
Column Type: varchar
Max Length: 4096
The description associated with claim_status_reason_code. See claim_status_reason_code for more information.

Column Name: claim_status_value
Column Type: varchar
Max Length: 50
The description associated with claim_status_code. See claim_status_code for more information.

Column Name: comments

Column Type: varchar
Max Length: 32766
Comments regarding the service.

Column Name: contains_overridden_field
Column Type: varchar
Max Length: 1
Indicator of whether there is an overridden field.If "Y", indicates that this service detail contains one or more fields whose values were manually overridden.

Column Name: copay_applies_to_ded_code
Column Type: varchar
Max Length: 50
'Co-Pay Counts Towards Deductible'

Column Name: copay_applies_to_ded_value
Column Type: varchar
Max Length: 50
The description associated with copay_applies_to_ded_code. See copay_applies_to_ded_code for more information.

Column Name: cost_center_code
Column Type: varchar
Max Length: 50
Dictionary code for the cost center.

Column Name: cost_center_value
Column Type: varchar
Max Length: 50
The description associated with cost_center_code. See cost_center_code for more information.

Column Name: covered_CBPuniqueid
Column Type: varchar
Max Length: 50
The unique ID for plan covered services.

Column Name: covered_LIBuniqueid
Column Type: varchar
Max Length: 50
The unique ID for plan liability rules level.

Column Name: covered_PLANID
Column Type: varchar
Max Length: 50
The unique ID for the associated coverage plan.

Column Name: cpt_code_code
Column Type: varchar
Max Length: 50
The CPT code.

Column Name: cpt_code_value

Column Type: varchar

Max Length: 80

The description associated with cpt_code_code. See cpt_code_code for more information.

Column Name: data_entry_by

Column Type: varchar

Max Length: 40

The user who last updated the row.

Column Name: data_entry_by_option

Column Type: varchar

Max Length: 50

The user name that last updated the row.

Column Name: data_entry_date

Column Type: date

The date the row was last updated.

Column Name: data_entry_offset

Column Type: numeric

the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time

Column Type: varchar

Max Length: 50

The time the row was last updated.

Column Name: data_entry_time_j

Column Type: time

the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all

Column Type: varchar

Max Length: 255

the time zone information for when the data was saved.

Column Name: data_entry_timezone_short

Column Type: varchar

Max Length: 8

the short abbreviation for the timezone

Column Name: data_entry_user_id

Column Type: varchar

Max Length: 50

The user ID who last updated the row.

Column Name: data_entry_user_name

Column Type: varchar

Max Length: 40

The user name who last updated the row.

Column Name: data_entry_utc

Column Type: timestamp

the UTC date and time the data was saved.

Column Name: date_of_service

Column Type: date

The date the service was rendered.

Column Name: date_of_service_end

Column Type: date

The date the service ended.

Column Name: delay_reason_code

Column Type: varchar

Max Length: 50

Dictionary code indicating the reason the claim was delayed.

Column Name: delay_reason_value

Column Type: varchar

Max Length: 50

The description associated with delay_reason_code. See delay_reason_code for more information.

Column Name: diagnosis_code

Column Type: varchar

Max Length: 50

Diagnosis code associated with the service.

Column Name: diagnosis_reference

Column Type: varchar

Max Length: 50

Diagnosis reference.

Column Name: diagnosis_reference_2

Column Type: varchar

Max Length: 50

Diagnosis reference 2.

Column Name: diagnosis_reference_3

Column Type: varchar

Max Length: 50

Diagnosis reference 3.

Column Name: diagnosis_reference_4

Column Type: varchar

Max Length: 50

Diagnosis reference 4.

Column Name: diagnosis_value

Column Type: varchar

Max Length: 200

The description associated with diagnosis_code. See diagnosis_code for more information.

Column Name: discipline_code

Column Type: varchar

Max Length: 40

Dictionary code indicating the medical discipline under which the service was rendered.

Column Name: discipline_value

Column Type: varchar

Max Length: 40

The description associated with discipline_code. See discipline_code for more information.

Column Name: documentation_time

Column Type: numeric

For group services, the documentation time

Column Name: drug_ref_id

Column Type: varchar

Max Length: 50

The service drug reference ID.

Column Name: drug_ref_id_qual

Column Type: varchar

Max Length: 50

The service drug reference qualifier.

Column Name: duration

Column Type: varchar

Max Length: 50

The service duration.

Column Name: ebpss_csi_code

Column Type: varchar

Max Length: 32000

Dictionary code indicating the evidence-based practices / service strategies (CSI) code for the service.

Column Name: ebpss_csi_value

Column Type: varchar

Max Length: 255

The description associated with ebpss_csi_code. See ebpss_csi_code for more information.

Column Name: ebpss_csi_value_long

Column Type: varchar

Max Length: 4096

The description associated with ebpss_csi_value_code. See ebpss_csi_value_code for more information.

Column Name: eligible_provider_code

Column Type: varchar
Max Length: 50
Indicator of whether the provider was eligible or not.

Column Name: eligible_provider_value
Column Type: varchar
Max Length: 50
The description associated with eligible_provider_code. See eligible_provider_code for more information.

Column Name: emergency_indicator_code
Column Type: varchar
Max Length: 50
'Emergency Indicator (837P-2400-SV109)'

Column Name: emergency_indicator_value
Column Type: varchar
Max Length: 50
The description associated with emergency_indicator_code. See emergency_indicator_code for more information.

Column Name: expected_disburse
Column Type: numeric
Expected disbursement for the service.

Column Name: explan_of_coverage
Column Type: varchar
Max Length: 32766
Explanation of coverage.

Column Name: group_service_units
Column Type: varchar
Max Length: 50
For group services, the total approved group service units

Column Name: group_service_units_day
Column Type: varchar
Max Length: 50
For group services, the total approved group service units per day

Column Name: hcpcs_code
Column Type: varchar
Max Length: 50
The HCPCS code.

Column Name: is_this_an_admission_code
Column Type: varchar
Max Length: 50
'Does This Service Represent An Admission'

Column Name: is_this_an_admission_value

Column Type: varchar

Max Length: 50

The description associated with is_this_an_admission_code. See is_this_an_admission_code for more information.

Column Name: level_of_care

Column Type: varchar

Max Length: 50

Level of care.

Column Name: line_item_control_num

Column Type: varchar

Max Length: 50

Line item control number.

Column Name: line_note_code

Column Type: varchar

Max Length: 50

Indicator dictionary code of the type of information captured in the service line note text.

Column Name: line_note_code_val

Column Type: varchar

Max Length: 50

The description associated with line_note_code_code. See line_note_code_code for more information.

Column Name: line_note_text

Column Type: varchar

Max Length: 80

Service line note text.

Column Name: location_code

Column Type: varchar

Max Length: 50

The service location code.

Column Name: location_value

Column Type: varchar

Max Length: 50

The description associated with location_code. See location_code for more information.

Column Name: manual_service_code

Column Type: varchar

Max Length: 50

Manual service code.

Column Name: manual_service_descript

Column Type: varchar

Max Length: 80

Manual service description.

Column Name: measurement_code_code
Column Type: varchar
Max Length: 50
'Measurement Code (837-2400-SV103/SV204)'

Column Name: measurement_code_value
Column Type: varchar
Max Length: 50
The description associated with measurement_code_code. See measurement_code_code for more information.

Column Name: member_copay
Column Type: numeric
Member co-pay.

Column Name: member_deductible
Column Type: numeric
Member deductible.

Column Name: member_enrolled_dos_code
Column Type: varchar
Max Length: 50
'Member Enrolled On Date Of Service'

Column Name: member_enrolled_dos_value
Column Type: varchar
Max Length: 50
The description associated with member_enrolled_dos_code. See member_enrolled_dos_code for more information.

Column Name: member_id
Column Type: numeric
Member ID.

Column Name: national_drug_code
Column Type: varchar
Max Length: 50
National drug code.

Column Name: number_in_group
Column Type: numeric
For group services, the number of members in the group

Column Name: num_counselor_in_group
Column Type: numeric
For group services, the number of counselors in the group

Column Name: option_desc
Column Type: varchar
Max Length: 80

The name of the form that last updated the row.

Column Name: option_id

Column Type: varchar

Max Length: 20

The unique ID of the form that last updated the row.

Column Name: original_proc_code_code

Column Type: varchar

Max Length: 50

Original procedure code.

Column Name: original_proc_code_type

Column Type: varchar

Max Length: 50

Original procedure type.

Column Name: original_proc_code_value

Column Type: varchar

Max Length: 80

The description associated with original_proc_code_code. See original_proc_code_code for more information.

Column Name: parent_nspace_link_to_DD

Column Type: varchar

Max Length: 50

Link to the associated parent service in SYSTEM.billing_tx_history.

Column Name: patient_account_number

Column Type: varchar

Max Length: 50

Patient account number.

Column Name: perf_prov_name

Column Type: varchar

Max Length: 50

Name of the performing provider.

Column Name: place_of_service_code

Column Type: varchar

Max Length: 50

Place of service code.

Column Name: population_code

Column Type: varchar

Max Length: 50

Population code.

Column Name: population_value

Column Type: varchar

Max Length: 50

The description associated with population_code. See population_code for more information.

Column Name: prev_batch_pended_from

Column Type: varchar

Max Length: 500

Previous batch the service was pended from.

Column Name: primary_service_id

Column Type: varchar

Max Length: 50

The primary service ID.

Column Name: private_pay_amt

Column Type: numeric

Private pay amount.

Column Name: private_pay_payer_code

Column Type: varchar

Max Length: 50

Payer code for private pay.

Column Name: private_pay_payer_value

Column Type: varchar

Max Length: 50

The description associated with private_pay_payer_code. See private_pay_payer_code for more information.

Column Name: proc_code_type_for_adj

Column Type: varchar

Max Length: 50

Procedure code type of adjustment.

Column Name: procedure_code_code

Column Type: varchar

Max Length: 50

Procedure code.

Column Name: procedure_code_type

Column Type: varchar

Max Length: 50

Procedure code type.

Column Name: procedure_code_value

Column Type: varchar

Max Length: 80

The description associated with procedure_code_code. See procedure_code_code for more information.

Column Name: procedure_code_with_mod

Column Type: varchar

Max Length: 50
Procedure code with modifier.

Column Name: provider_to_be_auth
Column Type: varchar
Max Length: 50
Provider to be authorized.

Column Name: prov_pgm_link
Column Type: varchar
Max Length: 50
Provider program link.

Column Name: prov_pgm_name
Column Type: varchar
Max Length: 50
Provider program name.

Column Name: quantity
Column Type: varchar
Max Length: 50
Quantity.

Column Name: ref_p4
Column Type: varchar
Max Length: 50
REF*P4 segment

Column Name: remark_codes
Column Type: varchar
Max Length: 500
Claim status remark codes returned on an 837.

Column Name: remark_codes_value
Column Type: varchar
Max Length: 5096
The description associated with remark_codes_code. See remark_codes_code for more information.

Column Name: revenue_code_code
Column Type: varchar
Max Length: 50
Revenue code.

Column Name: revenue_code_value
Column Type: varchar
Max Length: 80
The description associated with revenue_code_code. See revenue_code_code for more information.

Column Name: service_comments
Column Type: varchar

Max Length: 32766
Service comments.

Column Name: service_end_time
Column Type: time
Service end time.

Column Name: service_start_time
Column Type: time
Service start time.

Column Name: service_units
Column Type: numeric
Service units.

Column Name: svc_bundle_837_id
Column Type: varchar
Max Length: 50
Service bundle 837 ID.

Column Name: svc_counts_as_visit
Column Type: varchar
Max Length: 50
Indicator code of whether the service counts as a visit.

Column Name: system_index
Column Type: varchar
Max Length: 50
Service index.

Column Name: third_party_amount_paid
Column Type: numeric
Third party amount paid

Column Name: third_party_payer_amt_1
Column Type: numeric
Third party payer amount 1.

Column Name: third_party_payer_amt_2
Column Type: numeric
Third party payer amount 2.

Column Name: third_party_payer_amt_3
Column Type: numeric
Third party payer amount 3.

Column Name: third_party_payer_amt_4
Column Type: numeric
Third party payer amount 4.

Column Name: third_party_payer_amt_5
Column Type: numeric
Third party payer amount 5.

Column Name: third_party_payer_amt_6
Column Type: numeric
Third party payer amount 6.

Column Name: third_party_payer_code_1
Column Type: varchar
Max Length: 50
Third party payer code 1.

Column Name: third_party_payer_code_2
Column Type: varchar
Max Length: 50
Third party payer code 2.

Column Name: third_party_payer_code_3
Column Type: varchar
Max Length: 50
Third party payer code 3.

Column Name: third_party_payer_code_4
Column Type: varchar
Max Length: 50
Third party payer code 4.

Column Name: third_party_payer_code_5
Column Type: varchar
Max Length: 50
Third party payer code 5.

Column Name: third_party_payer_code_6
Column Type: varchar
Max Length: 50
Third party payer code 6.

Column Name: third_party_payer_value_1
Column Type: varchar
Max Length: 50
The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_2
Column Type: varchar
Max Length: 50
The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_3

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_4

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_5

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: third_party_payer_value_6

Column Type: varchar

Max Length: 50

The description associated with third_party_payer_value_code. See third_party_payer_value_code for more information.

Column Name: thrd_prty_allowed_amt

Column Type: numeric

Third party allowed amount.

Column Name: thrd_prty_billed_amt

Column Type: numeric

Third party billed amount

Column Name: thrd_prty_pay_adj_amt_11

Column Type: numeric

Third party payment adjustment amount 11.

Column Name: thrd_prty_pay_adj_amt_12

Column Type: numeric

Third party payment adjustment amount 12.

Column Name: thrd_prty_pay_adj_amt_13

Column Type: numeric

Third party payment adjustment amount 13.

Column Name: thrd_prty_pay_adj_amt_14

Column Type: numeric

Third party payment adjustment amount 14.

Column Name: thrd_prty_pay_adj_amt_15

Column Type: numeric

Third party payment adjustment amount 15.

Column Name: thrd_prty_pay_adj_amt_21

Column Type: numeric

Third party payment adjustment amount 21.

Column Name: thrd_prty_pay_adj_amt_22

Column Type: numeric

Third party payment adjustment amount 22.

Column Name: thrd_prty_pay_adj_amt_23

Column Type: numeric

Third party payment adjustment amount 23.

Column Name: thrd_prty_pay_adj_amt_24

Column Type: numeric

Third party payment adjustment amount 24.

Column Name: thrd_prty_pay_adj_amt_25

Column Type: numeric

Third party payment adjustment amount 25.

Column Name: thrd_prty_pay_adj_amt_31

Column Type: numeric

Third party payment adjustment amount 31.

Column Name: thrd_prty_pay_adj_amt_32

Column Type: numeric

Third party payment adjustment amount 32.

Column Name: thrd_prty_pay_adj_amt_33

Column Type: numeric

Third party payment adjustment amount 33.

Column Name: thrd_prty_pay_adj_amt_34

Column Type: numeric

Third party payment adjustment amount 34.

Column Name: thrd_prty_pay_adj_amt_35

Column Type: numeric

Third party payment adjustment amount 35.

Column Name: thrd_prty_pay_adj_amt_41

Column Type: numeric

Third party payment adjustment amount 41.

Column Name: thrd_prty_pay_adj_amt_42

Column Type: numeric

Third party payment adjustment amount 42.

Column Name: thrd_prty_pay_adj_amt_43
Column Type: numeric
Third party payment adjustment amount 43.

Column Name: thrd_prty_pay_adj_amt_44
Column Type: numeric
Third party payment adjustment amount 44.

Column Name: thrd_prty_pay_adj_amt_45
Column Type: numeric
Third party payment adjustment amount 45.

Column Name: thrd_prty_pay_adj_code_11
Column Type: varchar
Max Length: 50
Third party payment adjustment code 11.

Column Name: thrd_prty_pay_adj_code_12
Column Type: varchar
Max Length: 50
Third party payment adjustment code 12.

Column Name: thrd_prty_pay_adj_code_13
Column Type: varchar
Max Length: 50
Third party payment adjustment code 13.

Column Name: thrd_prty_pay_adj_code_14
Column Type: varchar
Max Length: 50
Third party payment adjustment code 14.

Column Name: thrd_prty_pay_adj_code_15
Column Type: varchar
Max Length: 50
Third party payment adjustment code 15.

Column Name: thrd_prty_pay_adj_code_21
Column Type: varchar
Max Length: 50
Third party payment adjustment code 21.

Column Name: thrd_prty_pay_adj_code_22
Column Type: varchar
Max Length: 50
Third party payment adjustment code 22.

Column Name: thrd_prty_pay_adj_code_23
Column Type: varchar
Max Length: 50

Third party payment adjustment code 23.

Column Name: thrd_prty_pay_adj_code_24

Column Type: varchar

Max Length: 50

Third party payment adjustment code 24.

Column Name: thrd_prty_pay_adj_code_25

Column Type: varchar

Max Length: 50

Third party payment adjustment code 25.

Column Name: thrd_prty_pay_adj_code_31

Column Type: varchar

Max Length: 50

Third party payment adjustment code 31.

Column Name: thrd_prty_pay_adj_code_32

Column Type: varchar

Max Length: 50

Third party payment adjustment code 32.

Column Name: thrd_prty_pay_adj_code_33

Column Type: varchar

Max Length: 50

Third party payment adjustment code 33.

Column Name: thrd_prty_pay_adj_code_34

Column Type: varchar

Max Length: 50

Third party payment adjustment code 34.

Column Name: thrd_prty_pay_adj_code_35

Column Type: varchar

Max Length: 50

Third party payment adjustment code 35.

Column Name: thrd_prty_pay_adj_code_41

Column Type: varchar

Max Length: 50

Third party payment adjustment code 41.

Column Name: thrd_prty_pay_adj_code_42

Column Type: varchar

Max Length: 50

Third party payment adjustment code 42.

Column Name: thrd_prty_pay_adj_code_43

Column Type: varchar

Max Length: 50

Third party payment adjustment code 43.

Column Name: thrd_prty_pay_adj_code_44

Column Type: varchar

Max Length: 50

Third party payment adjustment code 44.

Column Name: thrd_prty_pay_adj_code_45

Column Type: varchar

Max Length: 50

Third party payment adjustment code 45.

Column Name: thrd_prty_pay_adj_val_11

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_12

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_13

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_14

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_15

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_21

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_22

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_23

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_24

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_25

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_31

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_32

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_33

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_34

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_35

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_41

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_42

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_43

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_44

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_adj_val_45

Column Type: varchar

Max Length: 50

The description associated with thrd_prty_pay_adj_val_code. See thrd_prty_pay_adj_val_code for more information.

Column Name: thrd_prty_pay_allow_1

Column Type: numeric

Third party payment allowed amount 1.

Column Name: thrd_prty_pay_allow_2

Column Type: numeric

Third party payment allowed amount 2.

Column Name: thrd_prty_pay_allow_3

Column Type: numeric

Third party payment allowed amount 3.

Column Name: thrd_prty_pay_allow_4

Column Type: numeric

Third party payment allowed amount 4.

Column Name: thrd_prty_pay_billed_1

Column Type: numeric
Third party payment billed 1.

Column Name: thrd_prty_pay_billed_2
Column Type: numeric
Third party payment billed 2.

Column Name: thrd_prty_pay_billed_3
Column Type: numeric
Third party payment billed 3.

Column Name: thrd_prty_pay_billed_4
Column Type: numeric
Third party payment billed 4.

Column Name: thrd_prty_pvt_pay_amt
Column Type: numeric
Third party private pay amount.

Column Name: total_charge
Column Type: numeric
Total charge for the service.

Column Name: total_fee_table_amt
Column Type: numeric
Total fee table amount for the service.

Column Name: travel_time
Column Type: numeric
For group services, the travel time

Column Name: trt_prov_type
Column Type: varchar
Max Length: 50
Treatment provider type.

Column Name: type_of_service_code
Column Type: varchar
Max Length: 50
Dictionary code indicating whether the type of authorization is inpatient or outpatient.

Column Name: type_of_service_value
Column Type: varchar
Max Length: 50
The description associated with type_of_service_code. See type_of_service_code for more information.

Column Name: unique_row_id
Column Type: varchar
Max Length: 50
The unique row ID.

Column Name: unit_of_measurement
Column Type: varchar
Max Length: 50
Unit of measurement.

Documentation for form:

Claim_Processing_with_Override_(CMS_1500)

Table Name: SYSTEM.batch_clm_svc_detail_ss

Table Description: This table returns site specific fields for MSO services.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID for the batch.

Column Name: CLAIMID
Column Type: integer
The claim number.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: ss_batch_clm_date_1
Column Type: date
SS Batch Claim Date 1.

Column Name: ss_batch_clm_date_10
Column Type: date
SS Batch Claim Date 10.

Column Name: ss_batch_clm_date_2
Column Type: date
SS Batch Claim Date 2.

Column Name: ss_batch_clm_date_3
Column Type: date
SS Batch Claim Date 3.

Column Name: ss_batch_clm_date_4
Column Type: date
SS Batch Claim Date 4.

Column Name: ss_batch_clm_date_5
Column Type: date
SS Batch Claim Date 5.

Column Name: ss_batch_clm_date_6
Column Type: date
SS Batch Claim Date 6.

Column Name: ss_batch_clm_date_7
Column Type: date
SS Batch Claim Date 7.

Column Name: ss_batch_clm_date_8
Column Type: date
SS Batch Claim Date 8.

Column Name: ss_batch_clm_date_9
Column Type: date
SS Batch Claim Date 9.

Column Name: ss_batch_clm_dict_10_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 10 Cdoe.

Column Name: ss_batch_clm_dict_10_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 10 Value.

Column Name: ss_batch_clm_dict_1_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 1 Code.

Column Name: ss_batch_clm_dict_1_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 1 Value.

Column Name: ss_batch_clm_dict_2_code

Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 2 Code.

Column Name: ss_batch_clm_dict_2_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 2 Value.

Column Name: ss_batch_clm_dict_3_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 3 Code.

Column Name: ss_batch_clm_dict_3_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 3 Value.

Column Name: ss_batch_clm_dict_4_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 4 Code.

Column Name: ss_batch_clm_dict_4_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 4 Value.

Column Name: ss_batch_clm_dict_5_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 5 Code.

Column Name: ss_batch_clm_dict_5_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 5 Value.

Column Name: ss_batch_clm_dict_6_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 6 Code.

Column Name: ss_batch_clm_dict_6_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 6 Value.

Column Name: ss_batch_clm_dict_7_code

Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 7 Code.

Column Name: ss_batch_clm_dict_7_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 7 Value.

Column Name: ss_batch_clm_dict_8_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 8 Code.

Column Name: ss_batch_clm_dict_8_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 8 Value.

Column Name: ss_batch_clm_dict_9_code
Column Type: varchar
Max Length: 50
SS Batch Claim Dictionary 9 Code.

Column Name: ss_batch_clm_dict_9_value
Column Type: varchar
Max Length: 40
SS Batch Claim Dictionary 9 Value.

Column Name: ss_batch_clm_mult_1_code
Column Type: varchar
Max Length: 50
SS Batch Claim Multiple Select Dictionary 1 Code.

Column Name: ss_batch_clm_mult_1_shval
Column Type: varchar
Max Length: 255
SS Batch Claim Multiple Select Dictionary 1 Short Value.

Column Name: ss_batch_clm_mult_1_value
Column Type: varchar
Max Length: 4096
SS Batch Claim Multiple Select Dictionary 1 Full Value.

Column Name: ss_batch_clm_mult_2_code
Column Type: varchar

Documentation for form:

Claim_Processing_with_Override_(CMS_1500)

Table Name: SYSTEM.provider_monthly_max

Table Description: This table returns services that contribute towards a provider's monthly dollar max.

Column Name: ID
Column Type: integer

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The unique ID for the batch.

Column Name: CLAIMID
Column Type: integer
The claim number.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: PROVID
Column Type: varchar
Max Length: 50
'Provider'

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID for the service.

Column Name: auth_used
Column Type: varchar
Max Length: 50
The number of the authorization that this service falls under.

Column Name: dollars_used
Column Type: varchar
Max Length: 50

Column Name: max_month
Column Type: integer
The month that this service will be credited against.

Column Name: max_year
Column Type: integer
The year that this service will be credited against.

Column Name: pended
Column Type: varchar
Max Length: 50
A flag indicating whether the service was pended due to exhaustion of monthly max dollars.

Documentation for form: Provider_Fee_Definition

Table Name: SYSTEM.table_prov_fee_byprog

Table Description: This table returns the information stored in the 'Provider Fee Definition' form.

Column Name: ID
Column Type: integer

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: FUNDSRCID
Column Type: varchar
Max Length: 50
'Funding Source'

Column Name: GUID
Column Type: varchar
Max Length: 50
A unique ID used to identify a row of data

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID the provider fee definition applies to.

Column Name: PLANID
Column Type: varchar
Max Length: 50
'Plan'

Column Name: PROCEDURE_CODE
Column Type: varchar
Max Length: 50
'Procedure Code'

Column Name: PROVID
Column Type: varchar
Max Length: 50
'Provider'

Column Name: UTCTimestamp
Column Type: timestamp
The UTCTimestamp associated with update installation.

Column Name: age_max
Column Type: numeric
'Maximum Age'

Column Name: age_min
Column Type: numeric
'Minimum Age'

Column Name: allow_dupl_services_code
Column Type: varchar
Max Length: 50
'Allow Duplicate Services on the Same Day?'

Column Name: allow_dupl_services_value
Column Type: varchar
Max Length: 50
The description associated with allow_dupl_services_code. See allow_dupl_services_code for more information.

Column Name: amount
Column Type: numeric
'Amount'

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: discipline_code
Column Type: varchar
Max Length: 50
'Performing Provider's License Type'

Column Name: discipline_value
Column Type: varchar
Max Length: 50
The description associated with discipline_code. See discipline_code for more information.

Column Name: duration_max
Column Type: numeric
'Maximum Duration'

Column Name: duration_min
Column Type: numeric
'Minimum Duration'

Column Name: effective_date
Column Type: date
'Effective Date'

Column Name: expiration_date
Column Type: date
'Expiration Date'

Column Name: fund_src_name
Column Type: varchar
Max Length: 50
The funding source name associated with FUNDSRCID.

Column Name: gl_expense_account
Column Type: varchar
Max Length: 50
'GL Expense Account'

Column Name: max_approved_units
Column Type: numeric
'Maximum Approved Units'

Column Name: member_name
Column Type: varchar
Max Length: 50
Member name

Column Name: override_fee_in_pm
Column Type: varchar
Max Length: 50
'Override Fee in PM'

Column Name: plan_name
Column Type: varchar
Max Length: 50
The plan name associated with PLANID.

Column Name: primary_level_of_care_code
Column Type: varchar
Max Length: 50
'Authorized Level of Care'

Column Name: primary_level_of_care_value
Column Type: varchar
Max Length: 50
The description associated with primary_level_of_care_code. See primary_level_of_care_code for more information.

Column Name: procedure_code_type_code
Column Type: varchar
Max Length: 50
'Enter/Edit CPT Or Revenue Code Fee Information'

Column Name: procedure_code_type_value
Column Type: varchar
Max Length: 50
The description associated with procedure_code_type_code. See procedure_code_type_code for more information.

Column Name: proc_group_code
Column Type: varchar
Max Length: 50
'Procedure Code Group'

Column Name: proc_group_value
Column Type: varchar
Max Length: 50
The description associated with proc_group_code. See proc_group_code for more information.

Column Name: prov_pgm_link
Column Type: varchar
Max Length: 50
'Contracting Provider Program'

Column Name: prov_pgm_name
Column Type: varchar
Max Length: 50
The contracting provider program name associated with provider_program.

Column Name: rcc
Column Type: integer
'Ratio of Cost to Charge (RCC)'

Column Name: rcc_percent
Column Type: integer
'Effective Ratio of Cost to Charge Percentage'

Column Name: rcc_percent_use_code
Column Type: varchar
Max Length: 50
'Effective Ratio of Cost to Charge Percentage to Use'

Column Name: rcc_percent_use_value
Column Type: varchar
Max Length: 50
The description associated with rcc_percent_use_code. See rcc_percent_use_code for more information.

Column Name: state_report1
Column Type: varchar
Max Length: 80
'State Reporting Field 1'

Column Name: state_report2
Column Type: varchar
Max Length: 80
'State Reporting Field 2'

Column Name: state_report3

Column Type: varchar
Max Length: 80
'State Reporting Field 3'

Column Name: status
Column Type: varchar
Max Length: 50
'Status'

Documentation for form: Retro_Claim_Adjudication

Table Name: SYSTEM.retro_claim_adjudications

Table Description: This table returns data stored from the 'Retro Claim Adjudication' form.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: BATCHID
Column Type: varchar
Max Length: 50
'Batch Number'

Column Name: EOBID
Column Type: integer
The unique ID of the EOB associated with this adjudication.

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: GUID
Column Type: varchar
Max Length: 50
A unique identifier used internally to validate data.

Column Name: HCFuniqueid
Column Type: varchar
Max Length: 50
The unique ID of the HCFA 1500 claim associated with this adjudication.

Column Name: JOIN_to_payment_history
Column Type: varchar
Max Length: 50
A unique ID used to link the payment/adjustment tables.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: PROVID
Column Type: varchar
Max Length: 50
The unique ID of the provider associated with the claim.

Column Name: SVC_count
Column Type: integer
The number of services in the claim service detail record.

Column Name: SVCuniqueid
Column Type: varchar
Max Length: 50
The unique ID of the claim service detail record associated with this adjudication.

Column Name: UTCTimestamp
Column Type: timestamp
The UTC time when the row was filed.

Column Name: adjustment_code
Column Type: varchar
Max Length: 50
The code for 'Adjustment Code'.

Column Name: adjustment_code_value
Column Type: varchar
Max Length: 50
The description of the associated adjustment_code_code. See adjustment_code_code for more information.

Column Name: batch_description
Column Type: varchar
Max Length: 4096
The 'Batch Name/Description' of the batch.

Column Name: comments
Column Type: varchar
Max Length: 32000
'Comments'

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user name that last updated the row of data.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated the row of data.

Column Name: data_entry_date
Column Type: date
The date the row of data was last updated.

Column Name: data_entry_offset
Column Type: numeric
the offset in hours from UTC on when the data was saved.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row of data was last updated.

Column Name: data_entry_time_j
Column Type: time
the time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
the time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
the short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID that last updated the row of data.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the service.

Column Name: data_entry_utc
Column Type: timestamp
the UTC date and time the data was saved.

Column Name: date_of_service
Column Type: date
'Date of Service'

Column Name: fee_change
Column Type: varchar
Max Length: 1
The code for whether or not the fee for this service has been updated.

Column Name: option_desc
Column Type: varchar
Max Length: 50
The name of the form that last updated the row of data.

Column Name: option_id
Column Type: varchar

Max Length: 50

The unique ID of the form that last updated the row of data.

Column Name: original_approved_units

Column Type: numeric

'Original Approved Units'

Column Name: original_disb_amount

Column Type: numeric

'Original Disbursement Amount'

Column Name: original_duration

Column Type: numeric

'Original Duration'

Column Name: original_mem_copay

Column Type: numeric

'Original Member Co-Pay'

Column Name: original_mem_deductible

Column Type: numeric

'Original Member Deductible'

Column Name: original_service_fee

Column Type: numeric

'Original Service Fee'

Column Name: original_third_party_pmt

Column Type: numeric

'Original Third Party Payment'

Column Name: pm_group_code

Column Type: varchar

Max Length: 50

The group code from the parent namespace.

Column Name: pm_reason_code

Column Type: varchar

Max Length: 50

The reason code from the parent namespace.

Column Name: pm_remark_code_1

Column Type: varchar

Max Length: 50

The remark code 1 from the parent namespace.

Column Name: pm_remark_code_2

Column Type: varchar

Max Length: 50

The remark code 2 from the parent namespace.

Column Name: pm_remark_code_3
Column Type: varchar
Max Length: 50
The remark code 3 from the parent namespace.

Column Name: pm_remark_code_4
Column Type: varchar
Max Length: 50
The remark code 4 from the parent namespace.

Column Name: pm_remark_code_5
Column Type: varchar
Max Length: 50
The remark code 5 from the parent namespace.

Column Name: procedure_code
Column Type: varchar
Max Length: 50
The code for the service or procedure.

Column Name: procedure_code_type
Column Type: varchar
Max Length: 50
The code for whether the batch item in question is a revenue code or a CPT code.

Column Name: procedure_code_type_value
Column Type: varchar
Max Length: 50
The description associated with procedure_code_type_code. See procedure_code_type_code for more information.

Column Name: procedure_code_value
Column Type: varchar
Max Length: 50
The description of the associated procedure_code_code. See procedure_code_code for more information.

Column Name: processed
Column Type: varchar
Max Length: 1
Whether or not the claim adjudication has been updated.

Column Name: system_generated
Column Type: varchar
Max Length: 1
The code for whether or not this row of data is system-generated.

Column Name: take_back_amount
Column Type: numeric
'Take Back Amount'

Column Name: take_back_duration
Column Type: numeric
'Take Back Duration'

Column Name: take_back_units
Column Type: numeric
'Take Back Units'

Column Name: updated_approved_units
Column Type: numeric
'Updated Approved Units'

Column Name: updated_disb_amount
Column Type: numeric
'Updated Disbursement Amount'

Column Name: updated_duration
Column Type: numeric
'Updated Duration'

Column Name: updated_mem_copay
Column Type: numeric
'Updated Member Co-Pay'

Column Name: updated_mem_deductible
Column Type: numeric
'Updated Member Deductible'

Column Name: updated_service_fee
Column Type: numeric
'Updated Service Fee'

Column Name: updated_third_party_pmt
Column Type: numeric
'Updated Third Party Payment'

Column Name: withhold_payment_code
Column Type: varchar
Max Length: 50
The code for 'Withhold Payment'.

Column Name: withhold_payment_value
Column Type: varchar
Max Length: 50
The description of the associated withhold_payment_code. See withhold_payment_code for more information.

Documentation for form: Claim_Processing_Blackout

Table Name: SYSTEM.clm_proc_blackout

Table Description: This table returns claim processing blackout information.

Column Name: ID
Column Type: integer

Column Name: FACILITY
Column Type: integer
The system code in which the data was stored.

Column Name: FUNDSRCID
Column Type: varchar
Max Length: 50
Funding Source ID

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID associated with the data.

Column Name: PROVID
Column Type: varchar
Max Length: 50
Provider

Column Name: authorization_number
Column Type: varchar
Max Length: 50
The authorization number.

Column Name: blackout_dates_code
Column Type: varchar
Max Length: 32000
The blackout dates code

Column Name: blackout_dates_sh_value
Column Type: varchar
Max Length: 255
The blackout dates

Column Name: blackout_dates_value
Column Type: varchar
Max Length: 4096
The blackout dates

Column Name: blackout_end_date
Column Type: date
The blackout end dates

Column Name: blackout_reason_code
Column Type: varchar
Max Length: 50
The blackout reason code

Column Name: blackout_reason_value
Column Type: varchar
Max Length: 50
The blackout reason

Column Name: blackout_start_date
Column Type: date
The blackout start dates

Column Name: claim_status_code
Column Type: varchar
Max Length: 50
The claim status code

Column Name: claim_status_reason_code
Column Type: varchar
Max Length: 50
The claim status reason code

Column Name: claim_status_reason_value
Column Type: varchar
Max Length: 4096
The claim status reason

Column Name: claim_status_value
Column Type: varchar
Max Length: 50
The claim status

Column Name: comments
Column Type: varchar
Max Length: 32766
The comments

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar

Max Length: 50
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_offset
Column Type: numeric
The offset in hours from UTC on when the data was saved.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row was last updated.

Column Name: data_entry_time_j
Column Type: time
The time with fractional seconds when the data was saved.

Column Name: data_entry_timezone_info_all
Column Type: varchar
Max Length: 255
The time zone information for when the data was saved.

Column Name: data_entry_timezone_short
Column Type: varchar
Max Length: 8
The short abbreviation for the timezone

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 50
The user ID who last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row.

Column Name: data_entry_utc
Column Type: timestamp
The UTC date and time the data was saved.

Column Name: deleted
Column Type: bit
The deleted flag

Column Name: option_id
Column Type: varchar

Max Length: 20
The Option ID

Documentation for form: 835_Health_Care_Claim_Payment/Advice

Table Name: SYSTEM.billing_835o_claim

Table Description: This table returns claim information from an 835.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The batch ID.

Column Name: EOBID
Column Type: integer
The explanation of benefits ID.

Column Name: FACILITY
Column Type: integer
The system code the data was generated for.

Column Name: FUNDSRCID
Column Type: varchar
Max Length: 50
The funding source ID.

Column Name: PATID
Column Type: varchar
Max Length: 20
The client ID.

Column Name: PROVID
Column Type: varchar
Max Length: 50
'Contracting Provider'

Column Name: batch_name_desc
Column Type: varchar
Max Length: 50
The batch name.

Column Name: claim_filing_ind_code
Column Type: varchar
Max Length: 2
'Claim Filing Indicator Code (2100-CLP-06)'

Column Name: claim_from_date
Column Type: date
'Claim From Date'

Column Name: claim_index
Column Type: varchar
Max Length: 50
The claim index.

Column Name: claim_number
Column Type: varchar
Max Length: 50
'MSO Claim Number (2300-CLP-07)'

Column Name: claim_pay_amt
Column Type: numeric
'Claim Payment Amount (2100-CLP-04)'

Column Name: claim_status_code
Column Type: varchar
Max Length: 2
'Claim Status Code (2100-CLP-02)'

Column Name: claim_thru_date
Column Type: date
'Claim Through Date'

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The 'User ID' that last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The 'User Description' of the 'User ID'.

Column Name: file_index
Column Type: varchar
Max Length: 50
The file index.

Column Name: file_info_str
Column Type: varchar
Max Length: 255
The file information string.

Column Name: file_status
Column Type: varchar
Max Length: 50
'File Status'

Column Name: fund_src_name
Column Type: varchar
Max Length: 50
'Funding Source Name'

Column Name: has_Errors
Column Type: varchar
Max Length: 50
The flag indicating if there are any errors with this file index.

Column Name: patient_control_number
Column Type: varchar
Max Length: 100
The patient control number.

Column Name: pat_responsibility_amt
Column Type: numeric
'Patient Responsibility Amount (2100-CLP-05)'

Column Name: provider_name
Column Type: varchar
Max Length: 50
The contracting provider name.

Column Name: tot_claim_chg_amt
Column Type: numeric
'Total Claim Charge Amount (2100-CLP-03)'

Column Name: version
Column Type: varchar
Max Length: 20
835 version.

Documentation for form: 835_Health_Care_Claim_Payment/Advice

Table Name: SYSTEM.billing_835o_claim_adj

Table Description: This table returns claim adjustment information from an 835.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Type: varchar
Max Length: 50
'Contracting Provider'

Column Name: adj_index
Column Type: varchar
Max Length: 50
The adjustment index.

Column Name: claim_adj_amt
Column Type: numeric
The adjustment amount.

Column Name: claim_adj_group_code
Column Type: varchar
Max Length: 2
The claim adjustment group code.

Column Name: claim_adj_reason_code
Column Type: varchar
Max Length: 5
The claim adjustment reason code.

Column Name: claim_index
Column Type: varchar
Max Length: 50
The claim index.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The 'User ID' that last updated the row.

Column Name: data_entry_user_name

Column Type: varchar
Max Length: 40
The 'User Description' of the 'User ID'.

Column Name: file_index
Column Type: varchar
Max Length: 50
The file index.

Column Name: file_info_str
Column Type: varchar
Max Length: 255
The file information string.

Column Name: patient_control_number
Column Type: varchar
Max Length: 100
The patient control number.

Column Name: version
Column Type: varchar
Max Length: 20
835 version.

Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The 'User ID' that last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The 'User Description' of the 'User ID'.

Column Name: file_index
Column Type: varchar
Max Length: 50
The file index.

Column Name: file_info_str
Column Type: varchar
Max Length: 255
The file information string.

Column Name: file_status
Column Type: varchar
Max Length: 50
'File Status'

Column Name: provider_name
Column Type: varchar
Max Length: 50
The contracting provider name.

Column Name: segment

Column Type: varchar
Max Length: 255
The particular segment being accessed.

Column Name: segment_index
Column Type: varchar
Max Length: 50
The segment counter.

Column Name: version
Column Type: varchar
Max Length: 20
835 version.

Documentation for form: 835_Health_Care_Claim_Payment/Advice

Table Name: SYSTEM.billing_835o_service_adj

Table Description: This table returns 835 service adjustment data.

Column Name: ID
Column Type: varchar
Max Length: 254

Column Name: BATCHID
Column Type: varchar
Max Length: 50
The batch ID.

Max Length: 50
'Contracting Provider'

Column Name: adj_index
Column Type: varchar
Max Length: 50
The adjustment index.

Column Name: claim_index
Column Type: varchar
Max Length: 50
The claim index.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user who last updated the row.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 40
The user name that last updated the row.

Column Name: data_entry_date
Column Type: date
The date the row was last updated.

Column Name: data_entry_time
Column Type: varchar
Max Length: 10
The time the row was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The 'User ID' that last updated the row.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The 'User Description' of the 'User ID'.

Column Name: file_index
Column Type: varchar
Max Length: 50
The file index.

Column Name: file_info_str
Column Type: varchar
Max Length: 255
The file information string.

Column Name: patient_control_number
Column Type: varchar
Max Length: 100
A client's unique number provided by the provider to retrieve records.

Column Name: service_adj_amt
Column Type: numeric
The adjustment amount.

Column Name: service_adj_group_code
Column Type: varchar
Max Length: 2
The claim adjustment group code.

Column Name: service_adj_reason_code
Column Type: varchar
Max Length: 5
The claim adjustment reason code. Details why a claim was paid differently than it was billed.

Column Name: service_adj_remark_code
Column Type: varchar
Max Length: 1024
The claim adjustment remark code. Details supplemental information from a claim adjustment reason code.

Column Name: service_adj_remark_qua
Column Type: varchar
Max Length: 1024
The claim adjustment remark qualifier.

Column Name: service_index
Column Type: varchar
Max Length: 50
The service index.

Column Name: version
Column Type: varchar
Max Length: 20
835 version.

Max Length: 50

Documentation for form: Contracting_Provider_Service_Authorization

Table Name: SYSTEM.service_auth_detail

Table Description: This table returns service authorization information from 'Contracting Provider Service Authorization', 'Funding Source Service Authorization', 'Service Authorization', and 'Service Authorization (Unlimited Codes)' forms.

Column Name: ID
Column Type: integer

Column Name: AUTuniqueid
Column Type: varchar
Max Length: 50

The unique ID of the service authorization.

Column Name: FACILITY

Column Type: integer

The system code the service authorization is defined in.

Column Name: FUNDSRCID

Column Type: varchar

Max Length: 50

The ID number of the funding source this authorization applies to.

Column Name: GUID

Column Type: varchar

Max Length: 50

An ID number for the authorization that is likely to be unique, even on other system codes.

Column Name: JOIN_TO_contract_CORuniqueid

Column Type: varchar

Max Length: 50

The unique ID of the funding source's registration.

Column Name: JOIN_TO_member_CONuniqueid

Column Type: varchar

Max Length: 50

The unique ID of the client's enrollment in the funding source's plan.

Column Name: JOIN_TO_provider_REGuniqueid

Column Type: varchar

Max Length: 50

The unique ID of the contracting provider's registration history.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID associated with the service authorization.

Column Name: PLAN_ID

Column Type: varchar

Max Length: 50

The code for 'Benefit Plan'.

Column Name: PROVID

Column Type: varchar

Max Length: 50

The ID number of the contracting provider this authorization applies to.

Column Name: UTCTimeStamp

Column Type: timestamp

The date and time the authorization was made, in coordinated universal time.

Column Name: account_code

Column Type: varchar

Max Length: 50

The code for 'Account'.

Column Name: account_level

Column Type: varchar

Max Length: 50

The level of the budget tracking account.

Column Name: account_level_name

Column Type: varchar

Max Length: 50

The name of the budget tracking account level.

Column Name: account_status_code

Column Type: varchar

Max Length: 50

The code for 'Status'.

Column Name: account_status_value

Column Type: varchar

Max Length: 50

The description associated with account_status_code. See account_status_code for more information.

Column Name: account_value

Column Type: varchar

Max Length: 50

The description associated with account_code. See account_code for more information.

Column Name: auth_grouping_code

Column Type: varchar

Max Length: 50

The code for 'Authorization Grouping'.

Column Name: auth_grouping_value

Column Type: varchar

Max Length: 50

The description associated with auth_grouping_code. See auth_grouping_code for more information.

Column Name: auth_grp_or_indiv_code

Column Type: varchar

Max Length: 50

The code for 'Individual Authorizations Or Authorization Grouping'.

Column Name: auth_grp_or_indiv_value

Column Type: varchar

Max Length: 50

The description associated with auth_grp_or_indiv_code. See auth_grp_or_indiv_code for more information.

Column Name: auth_level_care_code
Column Type: varchar
Max Length: 50
The code for 'Authorized Level of Care'.

Column Name: auth_level_care_value
Column Type: varchar
Max Length: 50
The description associated with auth_level_care_code. See auth_level_care_code for more information.

Column Name: authorization_number
Column Type: varchar
Max Length: 50
'Authorization Number'

Column Name: auth_status_change_day
Column Type: varchar
Max Length: 50
The day the 'Current Authorization Status' changed from "Pending to Approved".

Column Name: auth_status_change_min
Column Type: varchar
Max Length: 50
The minute the 'Current Authorization Status' changed from "Pending to Approved".

Column Name: auth_status_change_sec
Column Type: varchar
Max Length: 50
The second the 'Current Authorization Status' changed from "Pending to Approved".

Column Name: auth_type_code
Column Type: varchar
Max Length: 50
The code for 'Authorization Type'.

Column Name: auth_type_value
Column Type: varchar
Max Length: 1024
The description associated with auth_type_code. See auth_type_code for more information.

Column Name: begin_date_of_auth
Column Type: date
'Begin Date of Authorization'

Column Name: clm_stat_inh_svc_cd
Column Type: varchar
Max Length: 50
The code for 'Claim Status for Inhibited Services'.

Column Name: clm_stat_inh_svc_val

Column Type: varchar

Max Length: 50

The description associated with clm_stat_inh_svc_code. See clm_stat_inh_svc_code for more information.

Column Name: clm_stat_reas_inh_svc_cd

Column Type: varchar

Max Length: 50

The code for 'Claim Status Reason for Inhibited Services'.

Column Name: clm_stat_reas_inh_svc_val

Column Type: varchar

Max Length: 50

The description associated with clm_stat_reas_inh_svc_code. See clm_stat_reas_inh_svc_code for more information.

Column Name: comments_on_auth

Column Type: varchar

Max Length: 32766

'Comments On Authorization'

Column Name: cont_prov_auth

Column Type: varchar

Max Length: 40

'Contracting Provider Authorization'

Column Name: cpauth_denied_amount

Column Type: numeric

The total estimated liability for denied member authorizations tied to contracting provider auth.

Column Name: curr_auth_stat_reas_code

Column Type: varchar

Max Length: 50

The code for 'Current Authorization Status Reason'.

Column Name: curr_auth_stat_reas_value

Column Type: varchar

Max Length: 50

The description associated with curr_auth_stat_reas_code. See curr_auth_stat_reas_code for more information.

Column Name: curr_auth_status_code

Column Type: varchar

Max Length: 50

The code for 'Current Authorization Status'.

Column Name: curr_auth_status_value

Column Type: varchar

Max Length: 50

The description associated with curr_auth_status_code. See curr_auth_status_code for more information.

Column Name: data_entry_by
Column Type: varchar
Max Length: 40
The user name that last updated the row of data.

Column Name: data_entry_by_option
Column Type: varchar
Max Length: 50
The user name that last updated the row of data.

Column Name: data_entry_date
Column Type: date
The date the row of data was last updated.

Column Name: data_entry_time
Column Type: varchar
Max Length: 50
The time the row of data was last updated.

Column Name: data_entry_user_id
Column Type: varchar
Max Length: 40
The user ID who last updated the row of data.

Column Name: data_entry_user_name
Column Type: varchar
Max Length: 40
The user name who last updated the row of data.

Column Name: end_date_of_auth
Column Type: date
'End Date of Authorization'

Column Name: financial_eligibility
Column Type: varchar
Max Length: 32766
Information on the client's financial eligibility.

Column Name: funding_source_name
Column Type: varchar
Max Length: 50
The name of the funding source.

Column Name: inhibit_adj_code
Column Type: varchar
Max Length: 50
The code for 'Inhibit Adjudication For Services Claimed During Authorization Period'.

Column Name: inhibit_adj_value

Column Type: varchar

Max Length: 50

The description associated with inhibit_adj_code. See inhibit_adj_code for more information.

Column Name: inhibit_cpt_svc_code_code

Column Type: varchar

Max Length: 1024

The code for 'Exclude CPT Service Code'.

Column Name: inhibit_cpt_svc_code_val

Column Type: varchar

Max Length: 1024

The description associated with inhibit_cpt_svc_code_code. See inhibit_cpt_svc_code_code for more information.

Column Name: inhibit_procedure_group_cd

Column Type: varchar

Max Length: 1024

The code for 'Exclude Procedure Code Group Definition'.

Column Name: inhibit_procedure_group_val

Column Type: varchar

Max Length: 1024

The description associated with inhibit_procedure_group_code. See inhibit_procedure_group_code for more information.

Column Name: inhibit_revenue_code_code

Column Type: varchar

Max Length: 1024

The code for 'Exclude Revenue Code'.

Column Name: inhibit_revenue_code_val

Column Type: varchar

Max Length: 1024

The description associated with inhibit_revenue_code_code. See inhibit_revenue_code_code for more information.

Column Name: init_or_contin_auth_code

Column Type: varchar

Max Length: 50

The code for 'Initial Or Continuing Authorization'.

Column Name: init_or_contin_auth_value

Column Type: varchar

Max Length: 50

The description associated with init_or_contin_auth_code. See init_or_contin_auth_code for more information.

Column Name: internal_comments

Column Type: varchar

Max Length: 32766
'Internal Comments'

Column Name: jointoprimdiagnosis
Column Type: varchar
Max Length: 40
The unique ID of the primary diagnosis.

Column Name: jointosecdiagnosis
Column Type: varchar
Max Length: 40
The unique ID of the secondary diagnosis.

Column Name: letter_type_code
Column Type: varchar
Max Length: 50
The code for 'Letter Type'.

Column Name: letter_type_value
Column Type: varchar
Max Length: 50
The description associated with letter_type_code. See letter_type_code for more information.

Column Name: level_of_care_code
Column Type: varchar
Max Length: 50
The code for 'Primary Level of Care'.

Column Name: level_of_care_value
Column Type: varchar
Max Length: 50
The description associated with level_of_care_code. See level_of_care_code for more information.

Column Name: next_review_date
Column Type: date
'Next Review Date'

Column Name: option_desc
Column Type: varchar
Max Length: 50
The name of the form that last updated the row of data.

Column Name: option_id
Column Type: varchar
Max Length: 50
The unique ID of the form that last updated the row of data.

Column Name: original_data_entry_person
Column Type: varchar
Max Length: 50

The user name that originally entered this row of data.

Column Name: original_date_entry

Column Type: date

The date this row of data was originally updated.

Column Name: original_time_entry

Column Type: varchar

Max Length: 50

The time this row of data was originally updated.

Column Name: performing_provider

Column Type: varchar

Max Length: 50

The code for 'Performing Provider'.

Column Name: performing_prov_type

Column Type: varchar

Max Length: 50

The code for 'Provider Type'.

Column Name: performing_prv_type_value

Column Type: varchar

Max Length: 50

The description associated with performing_prv_type_code. See performing_prv_type_code for more information.

Column Name: perf_provider_name

Column Type: varchar

Max Length: 50

The description of the associated performing_provider. See performing_provider for more information.

Column Name: planned_admit_date

Column Type: date

'Planned Admit Date'

Column Name: prevent_push_code

Column Type: varchar

Max Length: 50

The code for 'Prevent Approved Services From Pushing To Parent System'.

Column Name: prevent_push_value

Column Type: varchar

Max Length: 50

The description associated with prevent_push_code. See prevent_push_code for more information.

Column Name: primary_account_code

Column Type: varchar

Max Length: 50

'Primary Account'

Column Name: primary_account_value

Column Type: varchar

Max Length: 50

The description associated with primary_account_code. See primary_account_code for more information.

Column Name: primary_diagnosis

Column Type: varchar

Max Length: 50

'Primary Diagnosis Authorized'

Column Name: prim_dsm4_diag_code

Column Type: varchar

Max Length: 40

The DSM-IV code for the primary diagnosis.

Column Name: prim_dsm4_diag_value

Column Type: varchar

Max Length: 40

The description associated with prim_dsm4_diag_code. See prim_dsm4_diag_code for more information.

Column Name: prim_icd10_diag_code

Column Type: varchar

Max Length: 40

The ICD-10 code for the primary diagnosis.

Column Name: prim_icd10_diag_value

Column Type: varchar

Max Length: 40

The description associated with prim_icd10_diag_code. See prim_icd10_diag_code for more information.

Column Name: prim_icd9_diag_code

Column Type: varchar

Max Length: 40

The ICD-9 code for the primary diagnosis.

Column Name: prim_icd9_diag_value

Column Type: varchar

Max Length: 40

The description associated with prim_icd9_diag_code. See prim_icd9_diag_code for more information.

Column Name: provider_connect_user

Column Type: varchar

Max Length: 150

The provider connect user ID associated with this request.

Column Name: provider_name

Column Type: varchar

Max Length: 50

The description of the associated PROVID, See PROVID for more information.

Column Name: provider_to_be_auth
Column Type: varchar
Max Length: 50
'Provider to be Authorized'

Column Name: prov_pgm_link
Column Type: varchar
Max Length: 50
The unique ID of the provider's program.

Column Name: prov_pgm_name
Column Type: varchar
Max Length: 50
The name of the provider's program.

Column Name: prov_submitting_request
Column Type: varchar
Max Length: 50
The ID of the contracting provider that submitted this service authorization request.

Column Name: rem_liab_total
Column Type: numeric
'Remaining Total Liability'

Column Name: sec_dsm4_diag_code
Column Type: varchar
Max Length: 40
The DSM-IV code for the secondary diagnosis.

Column Name: sec_dsm4_diag_value
Column Type: varchar
Max Length: 40
The description associated with sec_dsm4_diag_code. See sec_dsm4_diag_code for more information.

Column Name: sec_icd10_diag_code
Column Type: varchar
Max Length: 40
The ICD-10 code for the secondary diagnosis.

Column Name: sec_icd10_diag_value
Column Type: varchar
Max Length: 40
The description associated with sec_icd10_diag_code. See sec_icd10_diag_code for more information.

Column Name: sec_icd9_diag_code
Column Type: varchar
Max Length: 40
The ICD-9 code for the secondary diagnosis.

Column Name: sec_icd9_diag_value

Column Type: varchar

Max Length: 40

The description associated with sec_icd9_diag_code. See sec_icd9_diag_code for more information.

Column Name: secondary_diagnosis

Column Type: varchar

Max Length: 50

'Secondary Diagnosis Authorized'

Column Name: status_code

Column Type: varchar

Max Length: 50

The code for 'Status'.

Column Name: status_value

Column Type: varchar

Max Length: 50

The description associated with status_code. See status_code for more information.

Column Name: total_estimated_liab

Column Type: numeric

'Total Estimated Liability'

Column Name: type_of_auth_code

Column Type: varchar

Max Length: 50

The code for 'Type Of Authorization'.

Column Name: type_of_auth_value

Column Type: varchar

Max Length: 50

The description associated with type_of_auth_code. See type_of_auth_code for more information.

Column Name: unique_case_idenfier

Column Type: varchar

Max Length: 50

'Associated Case'

Documentation for form: Contracting_Provider_Service_Authorization

Table Name: SYSTEM.service_auth_ss_provider

Table Description: The table returns site specific data associated with service authorization of a contracting provider.

Column Name: ID

Column Type: integer

Column Name: FACILITY

Column Type: integer

System Code the data is stored in

Column Name: PROVID

Column Type: varchar

Max Length: 20

MSO Contracting Provider ID

Column Name: AUTuniqueid

Column Type: varchar

Max Length: 50

Unique service authorization ID for MSO contracting provider

Column Name: ss_single_dict_9_code

Column Type: varchar

Max Length: 50

Site Specific Single Select Dictionary 9 Code. MSO Dictionary 10811.09 in provider file.

Column Name: ss_single_dict_9_value

Column Type: varchar

Max Length: 50

The description associated with ss_single_dict_9_code. See ss_single_dict_9_code for more information.

Column Name: ss_time_1

Column Type: varchar

Max Length: 50

Site Specific Time 1

Column Name: ss_time_10

Column Type: varchar

Max Length: 50

Site Specific Time 10

Column Name: ss_time_2

Column Type: varchar

Max Length: 50

Site Specific Time 2

Column Name: ss_time_3

Column Type: varchar

Max Length: 50

Site Specific Time 3

Column Name: ss_time_4

Column Type: varchar

Max Length: 50

Site Specific Time 4

Column Name: ss_time_5

Column Type: varchar

Max Length: 50

Site Specific Time 5

Column Name: ss_time_6

Column Type: varchar

Max Length: 50

Site Specific Time 6

Column Name: ss_time_7

Column Type: varchar

Max Length: 50

Site Specific Time 7

Column Name: ss_time_8

Column Type: varchar

Max Length: 50

Site Specific Time 8

Column Name: ss_time_9

Column Type: varchar

Max Length: 50

Site Specific Time 9

Documentation for form: Contracting_Provider_Service_Authorization

Table Name: SYSTEM.service_auth_svc

Table Description: This table returns the allowance of services for an authorization from 'Contracting Provider Service Authorization', 'Funding Source Service Authorization', 'Service Authorization', and 'Service Authorization (Unlimited Codes)' forms.

Column Name: ID

Column Type: integer

Column Name: AUTUniqueID

Column Type: varchar

Max Length: 50

The unique ID of the service authorization.

Column Name: FACILITY

Column Type: integer

The system code the service authorization is defined in.

Column Name: PATID

Column Type: varchar

Max Length: 20

The client ID the service authorization applies to.

Column Name: PROVID

Column Type: varchar

Max Length: 20

The ID of the authorized service provider.

Column Name: authorization_number

Column Type: varchar

Max Length: 50

'Authorization Number'

Column Name: begin_date_of_service

Column Type: date

'Begin Date of Service'

Column Name: claimed_units
Column Type: integer
The number of units of service already claimed under this authorization.

Column Name: end_date_of_service
Column Type: date
'End Date of Service'

Column Name: estimated_liability_code
Column Type: numeric
'Estimated Liability Code'

Column Name: frequency_limit
Column Type: numeric
'Frequency Limit'.

Column Name: frequency_periods
Column Type: numeric
'Frequency Periods'.

Column Name: frequency_type_code
Column Type: varchar
Max Length: 50
The code for 'Frequency Type'.

Column Name: frequency_type_value
Column Type: varchar
Max Length: 50
The description associated with frequency_type_code See frequency_type_code for more information.

Column Name: procedure_code
Column Type: varchar
Max Length: 50
The code for 'Code Authorized'.

Column Name: procedure_code_type
Column Type: varchar
Max Length: 50
The code for 'Procedure Code Type'.

Column Name: procedure_code_type_value
Column Type: varchar
Max Length: 50
The description associated with procedure_code_type_code. See procedure_code_type_code for more information.

Column Name: procedure_value
Column Type: varchar
Max Length: 50
The description associated with procedure_code. See procedure_code for more information.

Column Name: remain_liability

Column Type: numeric

The amount of liability the funding source has for this service.

Column Name: requested_units

Column Type: varchar

Max Length: 50

'Requested Units'

Column Name: row_number

Column Type: integer

The number of the authorized service within this authorization.

Column Name: units_authorized

Column Type: varchar

Max Length: 50

'Units Authorized'
