§170.315(b)(10) Electronic Health Information Export – Documentation

Overview

CareCloud Charts v3.0 supports **§170.315(b)(10) Electronic Health Information export** by using CCD Export for Single Patient and Bulk Export as per the standards specified in § 170.205(a)(4) HL7® Implementation Guide for CDA® Release 2: Consolidated CDA Templates for Clinical Notes (US Realm) and Patient demographic/insurance, appointments, Billing information and documents export in pdf format.

Detailed Formats and Structures Offered

- Clinical Data (Single Patient Export and Bulk Patient Export in XML/HTML Format)
- Patient Demographics, Insurance, Appointments, Provider-to-patient messages, and Billing Data in PDF format
- Documents (Signed encounter notes including progress notes, available lab results, radiology reports, and any other scanned or uploaded document exported in PDF format)

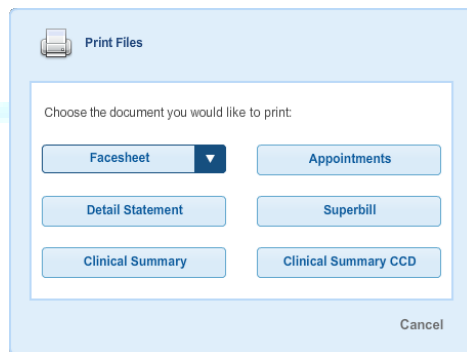

§170.315(b)(10) Electronic Health Information Export – Documentation

Clinical Data – Single Patient Export

Steps to Export CCD for Single Patient

- In the Patient Application, open the Patient's Account by selecting the designated patient
- In the Patient's Account, click on the Print Icon
- The user is presented with multiple options including, 'Clinical Summary CCD'
- Click on the 'Clinical Summary CCD' button and the user is prompted to select the download location to save the patient's CCD in XML Format

§170.315(b)(10) Electronic Health Information Export – Documentation

Clinical Data – Bulk Patient Export

Steps to Export CCDA for Patient Population

- In the Analytics Application, Navigate to the Clinical Section
- Select Patient List
- Select Desired Filter Settings
- Navigate to Options Tab and select 'Render Format' as CDA
- Click Run Report
- A **Zipped File** is generated, and the user can designate the download location of the zipped CCDA file in **XML** format.

The screenshot displays the 'Analytics' application interface. On the left is a navigation sidebar with categories: Reports Home, Advanced Analytics, Appointments, Transactions, Accounts Receivable, Patients, Authorizations, Claims, Requests, and Management. Under 'Management', 'Clinical' is expanded, and 'Patient List' is selected. The main content area has tabs for 'Filtering' and 'Options'. The 'Options' tab is active, showing settings for report generation. At the top right of the main area are buttons for 'Reset Report', 'Save Report', and 'Run Report'. The settings include:

- Format:** Detail (selected) or Summary
- Render Format:** New Tab: PDF (selected) or CDA (selected via 'Export as')
- Export as:** XLS, PDF, CSV, CDA (CDA is selected)
- Documentation:** Show Applied Filters (checked)
- Name:** Patient List
- Description:** (empty text field)
- Sharing:** Share (button)
- Grouping:** Three dropdown menus, all set to 'No Group'
- Sorting:** Two dropdown menus, both set to 'No Sort'

 At the bottom of the main area are buttons for 'Back', 'Reset Report', 'Save Report', and 'Run Report'. The footer includes a 'Search Help...' field, a 'Chat' button, and a copyright notice: 'CPT® only © 2023 American Medical Association. All Rights Reserved.'

§170.315(b)(10) Electronic Health Information Export – Documentation

Patient Demographic/ Insurance

PDF Format – This file offers a comprehensive view of the patient’s demographics and insurance details and is structured for clarity and ease of access.

Advance Directive

PDF Format – This file offers a comprehensive view of the patient’s Advance Directive and is structured for clarity and ease of access.

Appointments

PDF Format – This file offers a comprehensive view of the patient’s Appointments and is structured for clarity and ease of access.

Provider-to-Patient Messages

PDF Format – This file offers a comprehensive view of the messages and is structured for clarity and ease of access.

Billing Data (Claim)

PDF Format – This file offers a comprehensive view of billing data (CPT, ICD, Modifier) and is structured for clarity and ease of access.

Within the Analytics Application, clients have the option to export Appointments, Patient Demographic and Insurance details, patient messages and claim data in PDF Format.

Documents

PDF Format – This includes signed progress notes, available lab results, radiology reports and any other scanned or uploaded document in the patient’s record.

Organizational Structure

The files created by the export are saved to a folder specified by the user/practice. Documents can be sorted and categorized by type (Lab Results/ Reports, Imaging Reports, etc.).

FHIR Data Export

CareCloud Charts’ FHIR Server creates a single-patient FHIR resource Document Reference and supports FHIR Bulk Data EHI Export for the patient population as described in §170.315(b)(10)(ii).
