Appendix H - Hpi Follow Up.....	95

EHI Export Data Dictionary

This Data Dictionary ("dictionary") is the sole property of Modernizing Medicine, Inc. ("ModMed"). By accessing or using the dictionary you hereby agree to maintain the dictionary and its contents in confidence and to not share the dictionary or any of its contents with any third parties without prior written authorization from ModMed.

Document purpose

This dictionary describes the tables and columns contained in the ModMed EHI Single Patient dataset. Refer to the training manual for more detailed usage information.

When using this data dictionary, please note the following:

- Practice Management (PM) tables and columns are included in the dataset and will be empty for practices not using PM.
- All date/timestamp fields are recorded using UTC time, unless the field has the "_Id" suffix.
- In fields with the "_Id" suffix" the date/time was converted to local time using the time zone value for the record (facility or user time zone).
- String type columns with an unrestricted length (equivalent to text and long text types) will have a value of -1 in the Field Length column of the Data Dictionary sheet.

The following groups are used to logically organize tables:

Lookup	Static lookup tables for medical and industry codes
Practice	Practice/firm information, including facilities and staff members.
Document Management	Log of file attachments, including those not assigned to a patient. Physical attachments are excluded
Office Flow	Facility_resource, facility_resource_detail, and facility_resource_utilization_log to track patient flow in the office.
Patient	Patient demographic and clinical information not captured as part of visit-related data (see below groupings for visit-related data.)
eLab	Electronic lab orders and results.
Pathology	Log of biopsies and results.
Prescription	Prescriptions
Ophth Pretesting	Pretesting tests and measurement sets for Ophthalmology
Appointment	Appointment data, including waitlist and reminders (PM only).
Visit	Visit-related data that describe the visit as a whole or are not part of an individual component (i.e. HPI, Diagnosis).
CC/HPI	Chief Complaints/History of Present Illness
Exam	Exams in the Virtual Exam Room
Diagnosis	Findings/Impression in the Virtual Exam Room
Procedure	Procedures/Plans in the Virtual Exam Room
PM Financials	Financial tables related to Practice Management
Inventory	Inventory information, including products, packages, package sales, stock and patient charges for products

Longitudinal Tracking

Some tables do not track data longitudinally (i.e. change history), this is captured in the "Longitudinal tracking" column

Y	Longitudinally tracked - new row(s) for each visit (or item), once a visit is finalized cannot be modified.
N	Not tracked over time, data is the most recent information as of when the data was exported.
L	New entry for each item, but changes to the item are not tracked over time (data is the most recent information as of when the data was exported).
S	Static lookup table

Database Tables

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
1	Practice	_info	Metadata for dataset deliverable		N		Y	Daily
2	Lookup	loinc	Lookup table for loinc code descriptions.		S		Y	Daily
3	Lookup	icd9	Lookup table for ICD9 code descriptions		S		Y	Daily
4	Lookup	icd10	Lookup table for ICD10 code descriptions		S		Y	Daily
5	Lookup	snomed	Lookup table for snomed code descriptions		S		Y	Daily
6	Lookup	quality_measure	MIPS Quality measures		S			Daily
7	Lookup	pi_objective	MIPS Promoting Interoperability (PI) objectives/measures.		S			Daily
8	Lookup	improvement_activity	MIPS Improvement Activities (IA).		S			Daily
9	Practice	firm	Firm (practice)		N		Y	Daily
10	Practice	gpro	Group Practice Reporting Option (GPRO) settings. See staff_mips_settings for providers assigned to a GPRO.	firm	N			Daily
11	Practice	facility	Practice location (facility). One or more per firm.	business_unit firm region	N		Y	Daily
12	Practice	facility_phone_number	Facility phone numbers. Zero or more per facility.	facility	N		Y	Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
13	Practice	billing_provider_phone_number	Billing provider phone numbers. Zero or more per facility.	facility	N		Y	Daily
14	Practice	staff	Staff member of a firm (Doctor, Medical Assistant, Receptionist, etc.)	staff firm facility	N		Y	Daily
15	Practice	staff_clinical_registry_enrollment	Staff Clinical Registry Enrollment	staff	N			Daily
16	Practice	staff_credentials	Staff credentials. Zero or more per staff member.	staff	N		Y	Daily
17	Practice	staff_specialty	Staff specialties. Zero or more per staff member.	staff	N		Y	Daily
18	Practice	staff_phone_number	Staff phone numbers. Zero or more per staff member.	staff	N		Y	Daily
19	Practice	staff_cds_alert_setting	Clinical decision support provider alert settings. One row per staff member/alert enabled	staff	N			Daily
20	Practice	staff_specialized_registry	Specialized Registries that a provider is submitting data to. One row per provider/registry	staff	N			Daily
21	Practice	staff_mips_settings	MIPS settings for a staff member. One row per staff member/reporting year.	staff gpro	N			Daily
22	Practice	referral_contact	Referral contact (person). One row per firm/referral contact	firm	N		Y	Daily
23	Practice	referral_contact_specialty	Referral contact specialties. Zero or more per referral contact.	referral_contact	N		Y	Daily
24	Practice	referral_institution	Referral institution. One row per firm/referral institution	firm	N		Y	Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
25	Practice	referral_institution_specialty	Referral institution specialties. Zero or more per referral institution.	referral_institution	N		Y	Daily
26	Practice	lab	Laboratories added in Firm Admin as well as e-Labs set up for the practice. One row per firm/lab.	firm	N			Daily
27	Practice	lab_facility	Facilities for a lab. One row per lab/facility.	lab	N			Daily
28	Practice	lab_account_staff	Doctor (staff) lab accounts. One row per lab/staff member.	lab staff	N			Daily
29	Practice	lab_account_facility	Firm facility lab accounts. One row per lab/facility.	lab facility	N			Daily
30	Practice	firm_group	Staff Group Management. Staff groups allow the firm administrator to send Intramail messages to multiple staff members at one time and it also allows staff members to share protocols. One row per group.	firm	N			Daily
31	Practice	firm_group_member	Practice group member table. A staff member can belong to multiple groups. One row per staff member per group.	staff firm_group	N			Daily
32	Practice	protocol	Visit protocol created by a staff member. One row per protocol.	staff firm	N			Daily
33	Practice	protocol_category	Protocol category. One row per category per protocol	staff protocol	N			Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
34	Practice	protocol_log	Protocol usage log. One row per protocol usage.	staff visit patient protocol	Y			Daily
35	Practice	protocol_shared	Identifies protocol shared between practice groups or individual staff members. One row per staff or group member.	staff firm_group protocol	N			Daily
36	Practice	business_unit	Business unit for facility. One business unit can be associated with many facilities	staff firm	N	PM	Y	Daily
37	Practice	business_unit_staff_access	Business unit to staff mapping table. User will have ability to view bills, reports and any financial actions based on the User Privilege set for each user for each business unit	staff business_unit	N	PM	Y	Daily
38	Practice	business_unit_payer_specific_identifier	Business unit to contracted payer(s) mapping table.	business_unit payer	N	PM	Y	Daily
39	Practice	business_unit_batch_setting	Stores financial batches configuration for business units.	business_unit	N	PM	Y	Daily
40	PM Financials	financial_category	Payer's financial category for billing.	firm	N	PM	Y	Daily
41	Practice	firm_denial_management_setting	Denial management settings configured by practice. One row per practice.	firm	Y	PM		Daily
42	Practice	firm_denial_management_specific_association_payer	Denial management settings configured by practice stores the list of payers associated with a	payer firm	Y	PM		Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
			specific assignee. One or more rows for each specific payer.	firm_denial_management_setting				
43	Practice	firm_denial_management_specific_assignee_denial_category	Denial management settings store the list of denial categories associated with a specific assignee. One or more rows per specific assignee.	firm_denial_management_specific_assignee_payer firm	Y	PM		Daily
44	Practice	fee_schedule	Fee schedule for payers and providers as configured in the practice setting. One row per fee schedule.	provider_group	N	PM	Y	Daily
45	Practice	fee_schedule_entry	Captures data from the "Manage Fees" user interface. This table only captures CPT entries that have been entered or overridden by the practice. CPT entries that default to the medicare fee schedule and have not been overridden are not stored in this table. One row per CPT code, per facility.	fee_schedule provider_group facility	N	PM	Y	Daily
46	Practice	fee_schedule_facility	Fee schedule to facility mapping table. One row per fee schedule per facility.	fee_schedule facility	N	PM	Y	Daily
47	Practice	fee_schedule_payer	Fee schedule to payer mapping table. One row per fee schedule per payer.	fee_schedule payer	N	PM	Y	Daily
48	Practice	fee_schedule_import_file	Table with information about CSV files imported into a fee schedule. One row per imported file per facility.	fee_schedule facility	N	PM	Y	Daily
49	Practice	payer	Payer (insurance company) set up by the practice. One row per payer/firm	firm financial_category	N	PM	Y	Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
50	Practice	additional_payer_id entifier	Stores additional identifiers associated with a payer	payer firm	N	PM	Y	Daily
51	Practice	payer_address	Payer address table	payer	N	PM	Y	Daily
52	Practice	payer_plan	Payer plan table	payer	N	PM	Y	Daily
53	Practice	payer_plan_address	Mapping table for payer_plan to payer_address	payer_plan payer_address	N	PM	Y	Daily
54	Practice	payer_authorization _requirement	Payer Authorization Requirement table	payer	N	PM	Y	Daily
55	Practice	payer_state_code	Mapping of Payers to their individual state codes as configured in the practice setting for state reporting. One row per payer per state code.	payer firm	N	PM	Y	Daily
56	Practice	appointment_type	Appointment type table	firm	N	PM	Y	Daily
57	Practice	appointment_type_ link	Appointment types mapping table	appointment_type	N	PM	Y	Daily
58	Practice	appointment_group _block	Appointment Calendar preferences for appointment group and block categories. One row per preference category	staff firm	N	PM	Y	Daily
59	Practice	appointment_group _block_link	Appointment group to appointment type mapping table. Only appointment groups can be linked to appointment types.	appointment_type appointment_group_block	N	PM	Y	Daily
60	Practice	appointment_calen dar	Appointment calendar showing scheduled group, block, and type preferences by provider and by facility. One row per preference category series.	staff firm facility	N	PM	Y	Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
			Modifications made to date/time columns are tracked in the appointment_calendar_edit table.	appointment_group_block				
61	Practice	appointment_calendar_access	Permission access configurations for appointment calendar. Access is granted to staff per provider calendar	staff facility	N	PM	Y	Daily
62	Practice	appointment_calendar_edit	Reports any modifications made to the time columns of a preference category series.	appointment_calendar staff	Y	PM	Y	Daily
63	Practice	division	Divisions are used to group locations and providers together for reporting and billing purposes.	firm	N	PM	Y	Daily
64	Practice	division_staff	Division to staff mapping table.	division staff	N	PM	Y	Daily
65	Practice	division_facility	Division to facility mapping table.	division facility	N	PM	Y	Daily
66	Practice	referral_source	Referral Source Tracking as configured in the Practice Settings. One row per referral transaction.	firm referral_type	N	PM	Y	Daily
67	Practice	referral_type	Referral types. One row per referral type.	firm	N		Y	Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
68	Practice	referral_source_link	Patient referral sources link table. One row per referral transaction	firm patient referral_contact referral_type visit referral_source referral_institution appointment staff bill	Y		Y	Daily
69	Practice	provider_group	Provider groups are used to group providers together to a given fee schedule.	firm	N		Y	Daily
70	Practice	provider_group_member	Providers to provider groups mapping table.	provider_group staff	N		Y	Daily
71	Practice	patient_referring_provider	Patient to Referring Provider mapping table.	firm patient referral_contact	N	PM	Y	Daily
72	Practice	patient_primary_care_provider	Patient to Primary Care Provider mapping table.	firm patient referral_contact	N	PM	Y	Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
73	Practice	visit_referral	Visit to referring provider mapping table.	visit patient referral_contact	N	PM	Y	Daily
74	MIPS	mips_score	MIPS overall score and scores for each performance category. Calculated nightly, not directly entered by providers (see date_calculated field). Can be different that what is displayed in the EMA MIPS Overview. One row per provider. DISCLAIMER: The displayed scores and calculated values are estimated based on the data recorded within EMA. These estimated scores and values may differ from those determined by the Centers for Medicare & Medicaid Services.	staff firm gpro	N			Daily
75	MIPS	mips_quality_measure_score	Quality measures scores as part of the overall Quality score. One row per MIPS score/Quality measure.	mips_score gpro staff	N			Daily
76	MIPS	mips_pi_objective_score	PI objectives scores as part of the overall PI score. One row per MIPS score/PI objective.	mips_score	N			Daily
77	MIPS	mips_quality_selection_ep	Quality measure selections for an Eligible Professional (single provider). One row per provider/measure.	staff	N			Daily
78	MIPS	mips_quality_selection_gp	Quality measure selections for a Group Practice (GPRO). One row per GPRO/measure.	gpro	N			Daily
79	MIPS	mips_pi_selection_ep	PI selections for objectives that are not computed from provider behavior (i.e. attestations) for an	staff	N			Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
			Eligible Professional (single provider). One row per provider/objective attested to.					
80	MIPS	mips_pi_selection_gp	PI selections for objectives that are not computed from provider behavior (i.e. attestations) for a Group Practice (GPRO). One row per GPRO/objective attested to.	gpro	N			Daily
81	MIPS	mips_ia_selection_ep	Improvement Activity selections for an Eligible Professional (single provider). One row per provider/activity.	staff	N			Daily
82	MIPS	mips_ia_selection_gp	Improvement Activity selections for a Group Practice (GPRO). One row per GPRO/activity.	gpro	N			Daily
83	Patient	patient	Patient demographics, practice data, and single-response clipboard information	firm referral_contact appointment financial_category staff facility	N		Y	Daily
84	Patient	guarantor	Patient's guarantor information.	patient	N	PM	Y	Daily
85	Patient	patient_case	Patient's case information. Typically associated with workers compensation, auto accidents or personal injuries.	staff patient insurance_policy	Y		Y	Daily
86	Patient	patient_race	Patient races. Zero or more races per patient	patient	N			Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
87	Patient	patient_case_attachment	Patient case to file attachment mapping table.	file_attachment patient patient_case	N			Daily
88	Patient	patient_case_contact	Patient's contact information for case.	patient patient_case	N		Y	Daily
89	Patient	insurance_policy_authorization	Insurance policy authorization.	patient referral_contact patient_case insurance_policy staff	N	PM	Y	Daily
90	Patient	insurance_policy_authorization_attachment	Insurance policy to file attachment mapping table.	insurance_policy_authorization file_attachment patient	N	PM		Daily
91	Patient	insurance_policy_authorization_appt_type	Insurance policy authorization to specific appointment types mapping table.	insurance_policy_authorization patient appointment_type	N	PM	Y	Daily
92	Patient	card_on_file	Patient credit cards documented in patient chart. One row per patient per card.	staff patient	N	PM	Y	Daily
93	Patient	patient_business_unit_setting	Lookup for information on whether patient statements are enabled for a Patient, for a specific business unit. One row per patient per business unit.	business_unit patient	S	PM	Y	Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
94	Patient	patient_sticky_note_history	Patient Sticky Note History provides one row of history per patient edit of their sticky note	patient	L			Daily
95	Patient	insurance_group	Insurance group information. One row per patient/insurance group. Collected from PMS or manual entry.	patient	N		Y	Daily
96	Patient	insurance_policy	Insurance policy information. One row per patient/insurance policy. Collected from PMS or manual entry.	patient payer payer_plan fee_schedule payer_address	N		Y	Daily
97	Patient	insurance_group_policy	Insurance policy assigned to one or more groups. One row per group/policy	patient insurance_policy insurance_group	N		Y	Daily
98	Patient	insurance_policy_phone_number	Phone number(s) associated with an insurance policy. One row per policy/phone number.	patient insurance_policy	N			Daily
99	Patient	insurance_policy_address	Address(es) associated with an insurance policy. One row per policy/address.	patient insurance_policy	N			Daily
100	Patient	patient_pharmacy	Pharmacies assigned to a patient. One row per patient/pharmacy. Collected from Surescripts or manual entry.	patient	N			Daily
101	Patient	patient_flag	Patient flags containing pertinent patient information that can be useful for scheduling	firm patient	N			Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
102	Patient	patient_history	Patient history specific to the medical domain (single-response only). One row per patient.	patient	N			Daily
103	Patient	medical_history	Past medical history information. Includes conditions from generic Past Medical History and specialty-specific medical history. Zero or more entries per patient. Since 5.16, users can add custom conditions with SNOMED codes, so the snomed column contains the most accurate information.	patient	N			Daily
104	Patient	surgical_history	Surgical history details. Includes surgeries from generic Past Medical History and specialty-specific medical history. Zero or more rows per patient. Since 5.16, users can add custom conditions with SNOMED codes, so the snomed column contains the most accurate information.	patient	N			Daily
105	Patient	specialty_pediatric_history	Specialty-specific pediatric history. Zero or more entries per patient. Since 5.16, users can add custom conditions with SNOMED codes, so the snomed column contains the most accurate information.	patient	N	ORTHOPE ICS ENT RHEUMAT OLOGY		Daily
106	Patient	specialty_family_his tory	Specialty-specific family history. Zero or more entries per patient. Since 5.16, users can add custom conditions with SNOMED codes, so the snomed column contains the most accurate information.	patient	N	DERMATOL OGY PLASTICS ORTHOPE ICS ENT		Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
						GI RHEUMATOLOGY UROLOGY		
107	Patient	specialty_history	Specialty-specific history that does not fit into medical, surgical, pediatric, or family history. Zero or more entries per patient. Since 5.16, users can add custom conditions with SNOMED codes, so the snomed column contains the most accurate information.	patient	N	PLASTICS ORTHOPEDICS		Daily
108	Patient	social_history	Social history details. Includes alcohol, drug use, sexual activity, and driving. Zero or more rows per patient.	patient	N			Daily
109	Patient	medication	Patient current medication list. Zero or more entries per patient	rx patient	L			Daily
110	Patient	allergy	Zero or more allergies per patient. Based on FirstDataBank (FDB).	patient	L			Daily
111	Patient	family_history	Patient family history conditions list, may be zero or more entries per patient. Based on SNOMED family history terms.	patient	L			Daily
112	Patient	problem_list	Patient problem list, may be zero or more entries per patient. Based on ICD9, ICD10, and SNOMED. Codes generated from a diagnosis and conditions selected in the clipboard add codes to this table.	patient diagnosis	L			Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
113	Patient	procedure_log	Patient procedure log, may be zero or more entries per patient. Based on SNOMED and LOINC. Some procedures recorded in the procedure table do not add entries this table. May include codes that are not procedures, see type column.	patient	L			Daily
114	Patient	immunization	Immunization recorded in the patient clipboard. One row per patient/immunization. NOTE: does not include immunizations given from a procedure or plan.	staff patient	N			Daily
115	Patient	gyn_history	Patient gynecological medical history information.	patient	N			Daily
116	Patient	patient_reproductive_stage	Contains data about a patient's reproductive stage.	patient	N			Daily
117	Patient	patient_menstrual_history	Contains data about a patient's menstrual history.	patient	N			Daily
118	Patient	patient_hpv_vaccine_history	Contains data about a patient's hpv vaccination history.	patient	N			Daily
119	Patient	patient_pregnancy_status_intent	Contains data about a patient's pregnancy status and intent.	patient	N			Daily
120	Patient	patient_pregnancy	Contains data about a patient's ongoing or past pregnancy.	staff patient patient_pregnancy_history facility	N			Daily
121	Patient	patient_pregnancy_baby	Contains the names and sex of the baby or babies in an ongoing or past patient's pregnancy.	patient_pregnancy patient	N			Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
122	Patient	patient_pregnancy_exposure_questionnaire	Contains the results of the 'Genetic and Environmental Exposures' questionnaire for a pregnant patient. One record for each answered question.	patient_pregnancy patient	N			Daily
123	Patient	pregnancy_chart_patient_vitals	Contains vital signs of the baby or babies related to a patient's pregnancy, captured during an OB/GYN visit.	patient_pregnancy visit patient	N			Daily
124	Patient	pregnancy_chart_baby_vitals	Contains vital signs of the baby or babies related to a patient's pregnancy, captured during an OB/GYN visit.	patient_pregnancy visit patient	N			Daily
125	Patient	patient_pregnancy_delivery_procedure	Contains the list of procedures applied during a pregnancy delivery.	patient_pregnancy patient	N			Daily
126	Patient	patient_pregnancy_history	Contains data about a patient's pregnancy history.	patient	N			Daily
127	Patient	patient_pregnancy_history_baby	Contains data about a baby in a patient's pregnancy history.	patient patient_pregnancy_history	N			Daily
128	Patient	patient_pregnancy_history_complication	Complications related to a patient's pregnancy history.	patient patient_pregnancy_history	N			Daily
129	Patient	chart_note	Stores comments associated with a patient's chart. One row per chart note.	visit staff firm patient	N			Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
130	Patient	chart_segmentation_event	Chart segmentation report table, one row per event.	staff patient	N			Daily
131	Patient	chart_note_signature	Stores signatures associated with a patient's chart notes. One row per chart note signature.	chart_note patient staff	N			Daily
132	Document Management	document_category	Document categories for file attachments, faxes, etc. One row per firm/category.	firm	L			Daily
133	Document Management	document_firm	Stores metadata about documents associated with a firm. One row per document, per firm.	firm document_category	N			Daily
134	Document Management	file_attachment	Log of file attachments, including those not assigned to a patient. One row per file. NOTE: file contents are not included in this table.	firm patient document_category diagnosis elab_order procedure visit document_firm procedure_body_location staff lab_request	L			Daily
135	Document Management	fax_template	Stores metadata associated with fax templates. One row per firm/template.	firm	N			Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency
136	Document Management	fax_management	One row per outbound fax. This table contains additional metadata associated with outbound faxes.	visit patient fax_template staff	N			Daily
137	Document Management	fax_outbound	Queued and sent outbound faxes. One row per outbound fax.	patient referral_contact visit referral_institution fax_template fax_management staff	N			Daily
138	Document Management	fax_inbound	Inbound faxes. One row per inbound fax.	file_attachment patient fax_line	N			Daily
139	eLab	result_log	Log of test result received and their status	firm patient elab_order visit file_attachment referral_institution elab_order_result	L			Daily

IDX	Grouping	Table	Description	Relationships	Longitudinal Tracking	Product/ Vertical	Financial Priority Delivery	Refresh Frequency

Appendix B - Visual Acuity

Unnamed: 0	Unnamed: 1	Unnamed: 2	Unnamed: 3	Unnamed: 4	Unnamed: 5	Unnamed: 6	Unnamed: 7	Unnamed: 8
Column Names								
All visual acuity fields have a 6-character suffix (including underscore) indicating the nature of the visual acuity test								
Character	1	2	3	4	5	6		
	N: near D: distance	s: uncorrected c: corrected	c	—	O	D: right eye S: left eye U: both eyes		
For example, a column named: visual_acuity_dcc_od reads "Visual Acuity - Distance, Corrected, Right eye"								
All combinations:								
Column suffix	Description							
_dcc_od	Distance, Corrected, Right eye							
_dcc_os	Distance, Corrected, Left eye							
_dcc_ou	Distance, Corrected, Both eyes							
_ncc_od	Near, Corrected, Right eye							
_ncc_os	Near, Corrected, Left eye							
_ncc_ou	Near, Corrected, Both eyes							

_dsc_od	Distance, Uncorrected, Right eye							
_dsc_os	Distance, Uncorrected, Left eye							
_dsc_ou	Distance, Uncorrected, Both eyes							
_nsc_od	Near, Uncorrected, Right eye							
_nsc_os	Near, Uncorrected, Left eye							
_nsc_ou	Near, Uncorrected, Both eyes							

Distance Values

All values can have a plus or minus value appended to it (i.e. +1, -3, etc.)

Value	Chart Value	Description	Abbreviation	Metre	Decimal	LogMAR	SNOMED

7013	Telephony error
8021	No answer
8025	Busy

204000	Rendering error
204001	Rendering error
205000	Quota exceeded (Prepaid card depleted)
205001	Internal System error (FindRoute)
206001	Internal System Error (LocalSender)
-4	Fax is being handled
-99	Fax is being handled
-1062	Fax is being handled
-1004	Fax is being handled
7200	Unspecified fax failure
8010	The remote fax machine hung up before receiving fax
6002	No route available

Appendix D - Patient History

Unnamed: 0	Unnamed: 1
Patient history lists all have the following columns: value, snomed, secondary_snomed	
RECOMMENDATION: use snomed column to identify conditions. Descriptions for each snomed code can be looked up in the snomed table.	
Before EMA 5.16, the patient clipboard contained hard-coded list of conditions for users to select (the "value" field)	
With the 5.16 custom clipboard feature, the clipboard items were converted to SNOMED values, and practices can add their own SNOMED codes	
For backwards compatibility, if a SNOMED code can be mapped to a enum value, that is stored in the "value" field	
For historical data that was entered using the enum, those values are mapped to a snomed code in the "snomed" and "secondary_snomed" columns	
The social history table has the following values:	
SEX_NONE	Are you sexually active? - No
SEX_ONE	Are you sexually active? - Yes, one partner
SEX_MULTIPLE	Are you sexually active? - Yes, multiple partners
SEX_SAME	Is your partner the same gender as yourself?
DRUG_USE	Illicit drug use?
DRUG_USE_IV	IV drug use
DRUG_USE_IV_WITHIN_PAST_12_MONTHS	IV drug use within the past 12 months
ETOH_NONE	Do you consume alcohol (EtOH or grain alcohol)? - EtOH none
ETOH_ONE	Do you consume alcohol (EtOH or grain alcohol)? - EtOH less than 1 drink per day
ETOH_TWO	Do you consume alcohol (EtOH or grain alcohol)? - EtOH 1-2 drinks per day
ETOH_THREE	Do you consume alcohol (EtOH or grain alcohol)? - EtOH 3 or more drinks per day
HOME_SAFE	Do you feel safe at home? - Yes

HOME_UNSAFE	Do you feel safe at home? - No
OTHER	Other
NONE	None
DRIVE_DAYTIME	Drive in the Daytime
DRIVE_NIGHT	Drive at Night

Appendix E - Visit Bill As

Code	Description
NEW_PATIENT	New Patient
ESTABLISHED_PATIENT	Established Patient
OUTPATIENT_CONSULTATION	Outpatient Consultation - Non-Medicare Only
INPATIENT_CONSULTATION	Inpatient Consultation - Non-Medicare Only
NURSING_HOME_NEW_PATIENT	Nursing Home - New Patient
ASSISTED_LIVING_NEW_PATIENT	Assisted Living - New Patient
PRIVATE_HOME_VISIT_NEW_PATIENT	Private Home Visit - New Patient
NURSING_HOME_ESTABLISHED_PATIENT	Nursing Home - Established Patient
ASSISTED_LIVING_ESTABLISHED_PATIENT	Assisted Living - Established Patient
PRIVATE_HOME_VISIT_ESTABLISHED_PATIENT	Private Home Visit - Established Patient

Appendix F: Immunization Public

Code	Description
PC01	No reminder/recall
PC12	Only recall to provider no reminder
PC10	Only reminder to provider no recall
PC06	Recall only - any method
PC07	Recall only - no calls
PC11	Recall to provider
PC04	Reminder only - any method
PC05	Reminder only - no calls
PC09	Reminder to provider
PC02	Reminder/recall - any method
PC03	Reminder/recall - no calls
PC08	Reminder/recall - to provider

Appendix G - Cancer Log Values

Table	Column	Values (or Value: Description)
cancer_log	behavior	BENIGN: Benign UNCERTAIN: Uncertain whether benign or malignant IN_SITU: In Situ, non-invasive MALIGNANT: Malignant, primary site MALIGNANT_METASTATIC: Malignant, metastatic MALIGNANT_UNCERTAIN: Malignant, uncertain whether primary or metastatic
