

AURORAEHR

VERSION 2.1

§170.315(B)(10) ELECTRONIC HEALTH INFORMATION EXPORT – DOCUMENTATION

§170.315(b)(10) Electronic Health Information export

Overview

AuroraEHR's EHI Export feature allows privileged users to export a single patient's EHI data. This functionality simplifies the retrieval of clinical and demographic data housed within the system. This document serves as a guide for users, providing instructions on performing the export features and detailing the file structure and formats of the extracted files.

Intended Users

Users who are members of the following User Groups can utilize the EHI Data Export feature:

- Administrator
- Billing Manager
- Clinical Manager
- Front Office Manager

Single Patient Data Export

Data Export creates a zip file containing data for the selected patients and the selected categories of data. Data will either be in PDF format (for categories with **(report)** in the title) or CSV format. The zip file is placed onto the user's desktop.

Access the **Data Export** screen through **AuroraEHR > Data Export**.

Data Export

Account#: Provider: Location:
Seen From: 11/10/2020 To: 11/10/2023
☐ Only Patients With a Closed Encounter

Show Patients

Account#	First Name	Last Name
00000	Sam	BigZero
000666888	JOHN	SMITH
00118	Mehdi	Shuns
1007	Mary	Poppins
105	Ralph	Heffner
11910	Liz	Ard
11913	Cole	Andersonian, Sr.
11914	Ruby	Orson
15262	VANESSA	THOMAS
15593	GLADYS	TALYS

Export Selected Select All

- ☐ Select All
- ☐ Account Data (report)
- ☐ Charges/Payments
- ☐ Notes/Instructions

- ☐ Problems/Diagnoses
- ☐ Review of Systems
- ☐ Social/Family/Surgical History
- ☐ Orders: Tests and Results (report)
- ☐ Vital Signs
- ☐ Additional Clinical Data

Data Export screen

Account#: Enter an account that you want to limit the export to or leave blank. Note that suspended accounts are excluded from the filter. If this filter is used, all other filters are ignored.

Provider: Enter a provider code to limit which patients are shown to those having had an appointment with that provider. You can leave this blank to include patients seen by any provider in your practice. This filter is ignored if the **Account#** filter is used.

Location: Enter a location code to limit which patients are shown to those having had an appointment at that location. You can leave this blank to include patients seen at any location in your practice. This filter is ignored if the **Account#** filter is used.

Seen From and To: Enter a date range to limit which patients are shown to those having an appointment within the date range. If the **Account#** filter is not used, then a date range must be provided. This filter is ignored if the **Account#** filter is used.

Only Patients With a Closed Encounter: Select this box to limit which patients are shown to those with at least one closed encounter. This filter is ignored if the **Account#** filter is used.

Click the **Show Patients** button to populate the browse with a list of accounts that can be exported. Pressing the CTRL key on the keyboard while clicking can be used to select multiple accounts. Pressing the SHIFT while clicking can be used to select contiguous accounts.

NOTE: At most, 10 accounts can be exported at once. Multiple, separate, exports can be run if more than 10 accounts need to be exported. For large exports contact Client Services.

Click the **Export Selected** button, and a zip file will be created that contains files for each selected category to export for each patient. This may take a long time to run. When the export is complete, a message is displayed showing the destination and export file name, along with the number of patients whose records were successfully exported:

Note: The export is audited separately for each patient selected. This includes who requested the exported, when, and what categories were selected.

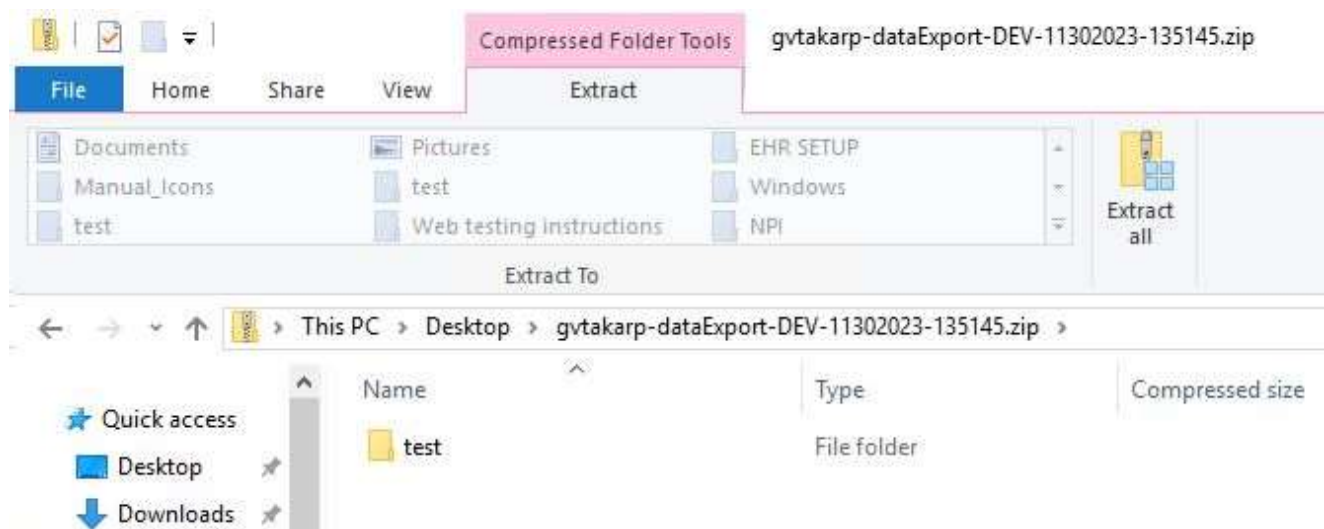

Patient Population Data Export

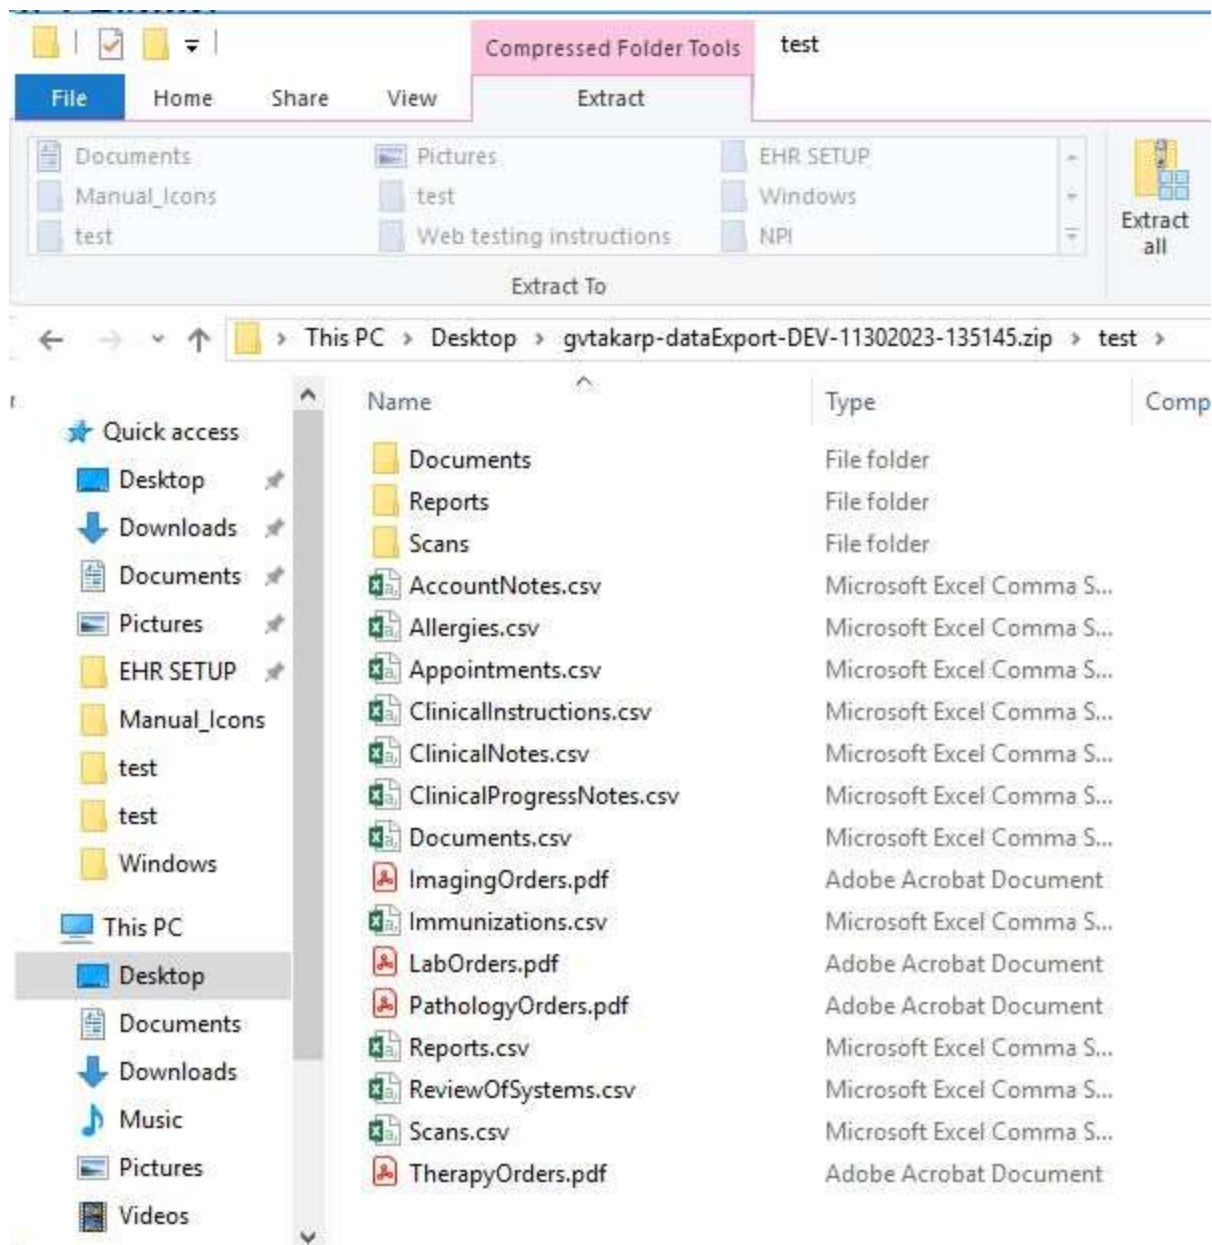

AuroraEHR offers the capability to export all data for a patient population. The exported data will be delivered in a .zip folder, adhering to the same format outlined below. To initiate a patient population export, please submit a request to gvti@practice-alt.com.

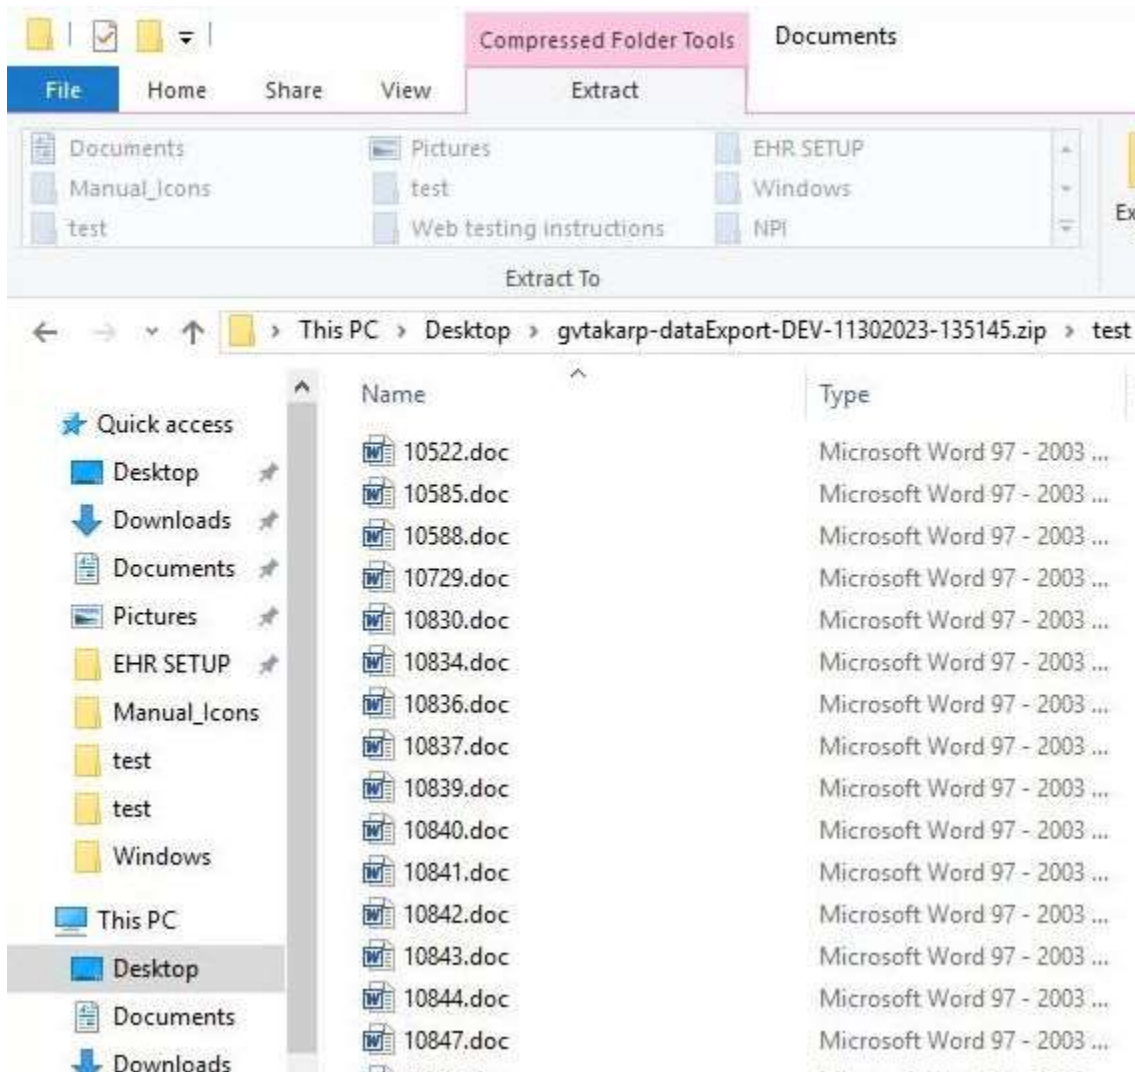

Export Format

Each export results in a single zip file. The name of the zip file is formatted as [user id]-dataExport-[practice code]-[current date/time formatted as MMddyyyyHHmmss].zip. For example, an export zip file could be called *gvtstag-dataExport-DEV-11272023114100.zip*. The zip file is organized into sub-folders for each patient account included in the export and that sub-folder containing the exported data for that patient account. If the *Documents/Scans/Reports* export category is chosen, then three additional sub-folders are created for each exported patient account: Documents, Scans, and Reports. These sub-folders contain the actual document, scan, or report files. The categories as outlined in the below *Supported Categories for Export* detail the specific names of the files/folders created when an export is started. An example export may look like the following

[add screenshot of windows explorer showing directories and files of an export]

Supported Categories for Export

Each category lists a table showing each column in the CSV or searchable field in the PDF. As well, the table shows a brief description for each column or searchable field.

Account Data (report)

The **Account Data** report produces a PDF document called **AccountData.pdf** that comprises all information pertaining to the patient's account.

Field	Explanation
Account Information	Full name, DOB, SS#, Address, contact information, ethnicity, language, and employment status
Services	Practice-specific classifications attributed to the patient
Associated Providers/Lawyers	The list of associated providers and lawyers
Billing information	Account balances and personal statements

Clinical Information	Diagnoses, history of accident/injury, dates of illness, admission, discharge, disability status, and/or return to work
Overrides	Information that "overrides" default handling of this patient in AuroraEHR. Additionally, contains patient's location, pharmacy, and rounds/census information.
Audit Details	History of information changes
Emergency Contact	Information about the contact designated as an emergency contact
Account Contacts	Contact information about the people who are important factors in a patient's care.
All Account Payors	The list of payors attached to the patient's account
Account Employers	The list of patient's employers
Charges/Payments	All charges and payments of an account

Charges/Payments

The export of charges and payments information is dissected to three spreadsheets containing: charges, payments, and charge transactions.

The **Charges.csv** spreadsheet contains charges for the exported account.

Field	Explanation
PRACTICE	Practice name
ACCOUNT NO	Unique ID of the patient in AuroraEHR
FIRST NAME	Patient's first name
LAST NAME	Patient's last name
SERVICE DT	Date of service
PROVIDER	Provider code in AuroraEHR and name
LOCATION	Location code in AuroraEHR and name
DIAG 1	Diagnosis codes (ICD10)
DIAG 2	
DIAG 3	
DIAG 4	
PROCEDURE	Procedure code for billing (usually CPT)
QUANTITY	The number of times this procedure was billed for this service date.
CHARGE AMT	Amount charged
REF PROVIDER	Referring provider's code in AuroraEHR and name
FIRST PAYOR	Primary payor name
RELATIVE VALUE	Number of RVUs
REF PROVIDER 2	Second referring provider's code in AuroraEHR and name
OTHER PROVIDER	Other provider's code in AuroraEHR and name
MODIFIERS	The list of procedure modifiers
CLAIM	Claim number
AGE	Age of the patient as of the charge's service date as a whole number. Format is: • In days if the patient's age is between 1 and 13 days old • For example: <i>8 days</i> • In weeks if the patient's age is between 14 and 60 days old • For example: <i>3 weeks</i> • In months if the patient's age is between 61 and 729 days old • For example: <i>15 mos</i> • In years if the patient's age is more older than 729 days • For example: <i>35 yrs</i>
STATUS	Status of the charge. Possible values are: • A - Active

	• I - Inactive • J - On hold when due from personal • H - On hold
DOCUMENT NBR	Document number in the system
ZIP CODE	The patient's zip code
CASH	The total amount paid thus far: includes payments and refunds
CREDITS	The total amount of non-cash payments such as contractual allowances and courtesies
INTEREST	The total amount of interest accumulated
BALANCE	The remaining balance on the charge
AUTH	The reference or authorization number on the charge

The **Payments.csv** spreadsheet contains payments for the exported account.

Field	Explanation
ACCOUNT NO	Unique ID of the patient in AuroraEHR
CLAIM	Claim number against which the payment was made
SERVICE DATE	Date of service of the charge
PROCEDURE	Procedure code for billing (usually CPT) of the charge
DESCRIPTION	Procedure description of the charge
DIVISION	Division code from the charge
LOCATION	Location's code in AuroraEHR and name, from the charge
PROVIDER	Provider's code in AuroraEHR and name, from the charge
DEPOSIT DT	Date of deposit
FIN CLASS	Financial class of the payment's payor
REPT GRP	Report group of the payment's payor
PAYOR GRP	Report group of the payment's payor
PAYOR	Payor code of the payment's payor
REMIT TYPE	Code and explanation of the remit type
REMIT	Explanation of the remit type
PAY AMOUNT	Amount of the payment, including cash and non-cash payments. Will be \$0.00 if the payment was interest, and thus doesn't affect the charge balance.
INT AMOUNT	Amount of interest
DOCUMENT	Document number, often the check number

NOTE	Note text, if any
ENTRY DT	Date of entry
USER ID	ID of the user who created the entry
STATUS	Payment status, possible values are: • A - Active • I - Inactive • H - On hold

The **ChargeTransactions.csv** spreadsheet contains audit information for charges/payments for the exported account.

Field	Explanation
ACCOUNT NO	Unique ID of the patient in AuroraEHR
CLAIM	Claim number
TRANS DT	Date of the transaction. Formatted as MM/dd/yyyy
TRANS TM	Time of the transaction. Formatted as HH:mm:ss:mmm
PAYOR	Payor's code in AuroraEHR and name
DESCRIPTION	Description of the transaction
PAYOR FROM	For billing transactions, the name of the payor involved
REASON	The description or reason that the transaction was created
FORM	For billing transactions, the billing form used
RUN NO	For billing transactions, the run number
ENTRY DT	Date of entry. Formatted as MM/dd/yyyy
STATUS	The status of the charge as of the transaction's date/time. Status of the charge. Possible values are: • A - Active • I - Inactive • J - hold when due from personal • H - hold

Notes/Instructions

The export of notes and instructions is split into three spreadsheets containing: account notes, clinical instructions, and progress notes.

The **AccountNotes.csv** spreadsheet contains patient notes. The content of the note is dependent on the type of note.

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Note Type	The note's type or category. For example, could be: • Billing • Family Display • Medical • Surgery • Important
Priority	Whether the note is marked as important
Text	Text of the note
Date Record was Created	The date the record was created. Formatted MM/dd/yyyy.

The **ClinicalInstructions.csv** spreadsheet contains clinically relevant instructions that are used during a patient's appointment.

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment for which these instructions are to be used.
For Phase	The phase of the appointment where the instructions should be used.
Instruction text	Text of the instruction
Date Record was Created	The date the record was created. Formatted MM/dd/yyyy.

The **ClinicalProgressNotes.csv** spreadsheet contains notes entered at the time of the appointment by the provider or other staff members. These notes can range from progress notes, orders, clinically relevant information, or other details that should be noted at the time of the appointment.

Note: Order notes are included only if both the RN and provider signatures are present, other notes require only provider's signature. Staff Notes (those where the description begins **staff note) are omitted regardless of whether they are signed. Amended notes are also only included if they are properly signed for.

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR

Accession#	The unique ID of the appointment for which these notes were entered.
Is an Amendment?	Indicates whether this note is an amendment for a note entered earlier
Amendment Source	Source of the new information, if not AuroraEHR
Primary Signature	Signature of the user, stating that this note is complete. Typically will be of the appointment provider.
Primary Signature Signed Date	Date of the signature. Formatted MM/dd/yyyy
Primary Signature Signed Time	Time of the signature. Formatted hh:mm:ss am
2nd Signature	Secondary signature. Needed for certain note types. Typically will be of someone other than the provider, who is able to sign off on notes like a supervising nurse, an RN, etc.
2nd Signature Signed Date	Date of the second signature. Formatted MM/dd/yyyy
2nd Signature Signed Time	Time of the second signature. Formatted hh:mm:ss am
Description	A brief description of the note type or purpose.
Progress Note	The note text itself

Appointments

The **Appointments.csv** spreadsheet contains the exported patient's appointments.

Field	Explanation
ACCOUNT NO	Unique ID of the patient in AuroraEHR
APPT_DATE	Date of the appointment. Formatted MM/dd/yyyy
APPT_TIME	Time of the appointment. Formatted hh:mm am
APPT_MINUTES	Length of the appointment in minutes
REASON	Purpose of the appointment
PROVIDER	The appointment provider's code in AuroraEHR and name
LOCATION	The code in AuroraEHR and name of the location of the appointment.
REMARK	Any notes on the appointment. Typically used to indicate if the patient was contacted, if the appointment had to be rescheduled, or reason why the patient couldn't make it.
KEPT/FAIL	Status of the appointment. A value of FAIL means that the patient didn't show up, and didn't give prior warning.

Documents/Scans/Reports

The export of documents, scans, and reports contains account and clinical level files that have been generated in AuroraEHR or have been imported or otherwise transferred into AuroraEHR. These could be insurance documents, clinical summaries, lab reports, etc.

The **Documents.csv** spreadsheet contains the exported account level documents. A separate **Documents** folder contains the actual files in a **PDF** format. The **Exported File Path** field can be used to relate a row in the spreadsheet to a file in the **Documents** folder.

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment for which this document is associated.
Document#	The document's unique ID. Is a number.
Document Type	Type of the document in Rexpert. Possible values include: • Medical Report • Referral Document • Patient Instructions
Description	Description of the document
Exported File Path	The path to the document within this export
Date & Time Document was Dictated	The date and time this document was originally dictated, typically filled in by a transcription service.
Date & Time Patient was Seen	The date and time of the patient's appointment, or when actually seen.
Date & Time Document was Transcribed	The date and time this document was originally transcribed, typically filled in by a transcription service
Provider	The code in AuroraEHR and name of the provider responsible for the document's contents
Status	The status of the document. Will always be Signed/Completed Document
Date Record was Created	The date that record was first started

The **Scans.csv** spreadsheet contains the exported images, scans, or other account level files that have been imported into AuroraEHR. A separate **Scans** folder contains the actual files in their original format. The **Exported File Path** field can be used to relate a row in the spreadsheet to a file in the **Scans** folder.

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR.
Scan#	The image/scan's unique numeric ID
Type	The file type such as .pdf, .jpg, etc.
Description	Description of the image/scan
Exported File Path	Path to the actual image/scan within this export
Date Record was Created	The date that the record of the image/scan was first started. This isn't necessarily the same as the date that the contents of the image/scan were created.

The **Reports.csv** spreadsheet contains the exported clinical files that have been received from outside AuroraEHR: other practices, referring providers, etc. A separate **Reports** folder contains the actual files in their original format. The **Exported File Path** field can be used to relate a row in the spreadsheet to a file in the **Reports** folder.

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Report#	The report's unique numeric ID
Date Report was Written	Date of the report. Formatted MM/dd/yyyy.
Summary of Care Date	If this report is a Summary of Care, indicates the date the care was given. Formatted MM/dd/yyyy.
Description	Description of the outside report
Report Sent By	The code in AuroraEHR and name of the referring provider who sent the report.
Note	Any further information noted about the outside report
Exported File Path	The path to the actual report within this export.
Needs Review?	Indicates whether this incoming report still needs to be reviewed
Reviewed By	The user in AuroraEHR who reviewed the report, if any.
Reviewed on Date	The date the report was reviewed. Formatted MM/dd/yyyy.
Reviewed at Time	The time the report was reviewed. Formatted hh:mm:ss am.
Report Hyperlink	A URL for either the report or other supplemental information such as an image. In either case, the report is not stored within AuroraEHR. Credentials may be required to access the URL.
Date Record was Created	The date that this record of the outside report was created.

Clinical Alerts

The **ClinicalAlerts.csv** spreadsheet contains information that the staff should know about the patient. This could be medically significant such as the patient has an infectious disease, has trouble walking, has trouble remembering, dialysis status, etc. It could also contain preferences of the provider for this patient or appointment. It could also contain non-medically significant information about the patient such as the patient is difficult to deal with, prefers to have family present, etc.

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment for which these alerts are associated. If blank, the alert always pertains to the patient and is used as a default for new/subsequent appointments.
Alert Code	Code for this type of alert in AuroraEHR
Description	The description of the alert.
Comment	Any additional information beyond the description.
Date Record was Created	Date of the record's entry. Formatted MM/dd/yyyy.
Date Record was last Updated	Date of the record's last update. Formatted MM/dd/yyyy.

Allergies

The **Allergies.csv** spreadsheet contains the allergies the patient has. This list is not unique to allergies the patient reports, or is otherwise discovered, during the appointment. It's an historical list that is updated with each appointment and saved as a complete list for each appointment.

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment for which the allergies are associated. If blank, the allergy is part of the list stored at the patient level, containing the newest information and action as a default for new/subsequent appointments.
Allergen Name	The substance or medication to which the patient has an allergy.
Onset Date	Date when allergy was reported to have started. Formatted MM/dd/yyyy
Reaction	Description of the patient's allergic reaction
Reaction SNOMED	SNOMED code of the allergic reaction. May be blank if not known.
Severity Level	The severity of the patient's reaction to the allergen. Possible values are: • Mild • Moderate • Severe • Unknown
RXNORM Code	If the allergen is a medication, this column contains medication's RXNORM code. May be blank if not known.
Status	The status of the allergy. Possible values are: • Active • Inactive
Date Record was Created	Date of the record's entry. Formatted MM/dd/yyyy
Date Record was last Updated	Date of the record's last update. Formatted MM/dd/yyyy.

Immunizations

The **Immunizations.csv** spreadsheet contains the vaccinations the patient has been given or reasons why they did not. As well, this spreadsheet contains the patient's recorded presumed immunities. This list is not unique to immunizations the patient reports or is given during the appointment. It's an historical list that is updated each appointment.

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment with which the immunizations are associated. If blank, the immunization is used as a default for new/subsequent appointments.
Immunization	The name and code of the vaccine or presumed immunity
Status	The administration status. Used to indicate whether the vaccine was administered, not administered, is historical information, etc. Possible values are: • Complete • Refused • not administered (presumed immunity) • partially administered • new immunization record • ERROR: entered on this charge in error • historical information - patient • historical information - source unspecified • historical information - from other provider • historical information - from parent's written record • historical information - from parent's recall • historical information - from other registry • historical information - from birth certificate • historical information - from school record • historical information - from public agency
Lot Number	Manufacturer's lot number for a vaccine
Manufacturer	The manufacturer of the vaccine, if known. In the case of vaccines recorded from a patient's verbal report, this might not be available.
Route	How the vaccine was administered. Possible values are: • intramuscular • subcutaneous • nasal • intradermal • intravenous • oral • transdermal • other/miscellaneous • N/A
Site	Administration site. Possible values are: • left arm • right arm • left thigh

	• right thigh • left deltoid • right deltoid • left gluteous medius • right gluteous medius • left vastus lateralis • right vastus lateralis • left lower forearm • right lower forearm • N/A
Units	The amount of the vaccine administered (numeric)
Administered By	The name of the person who administered the vaccine.
Administered Date	The date the vaccine was administered. Formatted MM/dd/yyyy.
Administered Time	The time the vaccine was administered. Formatted hh:mm:ss am.
Refusal Reason	If the vaccine was refused, reason for refusal. Possible values are: • parental decision • religious exemption • patient decision • other • N/A
Refusal Note	Any additional information for vaccine refusal.
Note	General, overall, notes.
Date Record was Created	Date of the record entry. Formatted MM/dd/yyyy.
Date Record was last Updated	Date of the record last update. Formatted MM/dd/yyyy.

Medications (report)

The **Medications.pdf** report contains all medications listed in AuroraEHR.

Field	Explanation
Medication	Name of the medication, along with dose and unit information.
Duration	Describes then length of time during which the medication should be taken.
Start Date	Start date of taking the medication. Formatted MM/dd/yyyy.
Stop Date	Stop date of taking the medication. Formatted MM/dd/yyyy.
Number of Refills	Number of refills allowed for the medications
Last Fill Date	Date of the last refill. Formatted MM/dd/yyyy.

Problems/Diagnoses

The **Problems.csv** spreadsheet contains the problems the patient has been diagnosed as having. This list is not unique to problems the patient reports or is diagnosed with during the appointment. It's an historical list that is updated each appointment. Within an accession#, the problems are ordered to match the user-determined order of the problems in the encounter's problem list.

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment for which the problem is associated. If blank, the problem is used as a default for new/subsequent appointments.
Problem Code (SNOMED)	The SNOMED code of the problem.
Problem Code (ICD10)	The ICD10 code of the problem.
Description	Description of the problem. The default value comes from the code above, but the user who entered the problem may have modified the description as needed.
Onset Date	Onset date of the problem. Formatted MM/dd/yyyy.
Resolved Date	If valued, the date the problem was resolved. Formatted MM/dd/yyyy.
Note	Any useful information reported by the staff and/or patient.
Status	The status of the problem. Possible values are: • Active • Inactive • Resolved • Chronic
Date Record was Created	Date of the record entry. Formatted MM/dd/yyyy.
Date Record was last Updated	Date of the record last update. Formatted MM/dd/yyyy.

Review of Systems

The **ReviewOfSystems.csv** spreadsheet contains basic review of systems.

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment for which this section's clinical data is associated.
ROS	The review of systems text.
Date Record was Created	Date of the record entry
Date Record was Last Updated	Date of record last change

Social/Family/Surgical History

This export contains three files for social, family, and surgical history respectively.

Social history in **SocialHistory.csv**:

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment with which the Social History is associated.
Chance of Pregnancy?	Might the patient be pregnant? Yes or no.
Last Menstrual Period Date	If applicable, the date of the patient's last menstrual period. Formatted MM/dd/yyyy.
IVDA?	Does the patient have a history of intravenous drug abuse? Yes or no.
Alcohol Use?	Does the patient consume alcohol? Yes or no. Any additional notes may be recorded in the comments field.
Victim of Abuse?	Is the patient is a victim of physical or emotional abuse? Possible values are: • Patient responded yes • Patient responded no • Patient wasn't asked or didn't respond
Smoking Status	Patient's reported smoking status followed by the appropriate SNOMED code. Possible values are: • Current daily smoker • Current some day smoker • Former smoker • Never smoker • Smoker; current status unknown • Unknown if ever smoked • Heavy tobacco smoker (10+ cigarettes a day) • Light tobacco smoker (<10 cigarettes a day) • Screening not indicated (situation)
Smoking Status Comment	Smoking status explanation
Family History of Anesthesia Complications?	Does the patient or the patient's family have a history of anesthesia complications? Yes or no.
Comment	Additional remarks or general social history notes.
Date Record was Created	Date of the record entry. Formatted MM/dd/yyyy
Date Record was Last Updated	Date of record last change. Formatted MM/dd/yyyy

Family history in **FamilyHistory.csv**:

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment for which the family history is associated.
Condition	Name of the condition
Code	Code of the condition
Code System	Code system of the condition code
Affected Family Member	Relationship of person with the condition
Onset Date	Date of onset, if known
Note	Comments or notes pertaining to this family history record.
Date Record was Created	Date of the record entry. Formatted MM/dd/yyyy.
Date Record was Last Updated	Date of record last change. Formatted MM/dd/yyyy.

Surgical History in **SurgicalHistory.csv**:

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment for which the surgical history was recorded.
Code	Procedure code
Code System	Coding system used, such as SNOMED, CPT, etc.
Description	Description of the procedure
Date	Free form field for when the procedure took place. The date is the best the user can recall.
Note	Any additional notes or comments about this procedure.
Date Record was Created	Date of the record entry. Formatted MM/dd/yyyy.
Date Record was Last Updated	Date of record last change. Formatted MM/dd/yyyy.

Orders: Test and Results (report)

This export produces four separate PDF files **ImagingOrders.pdf**, **LabOrders.pdf**, **PathologyOrders.pdf**, and **TherapyOrders.pdf** for imaging, lab, pathology, and therapy orders respectively.

The following fields can be searched on. The number of search results will depend on the number of orders.

Field	Explanation
Order#	The unique ID of a lab, imaging, pathology, therapy order.
Order Instructions	Any specific instructions
Ordered	The date, formatted MM/dd/yy, and time, formatted hh:mm am, for when the order was placed.
Test	The specific tests in an order.
Code	For labs, the LOINC code of the ordered test. For imaging, the CPT code of the ordered test. For pathology, the LOINC code of the ordered test.

Vital Signs

The **VitalSigns.csv** spreadsheet contains documentation of a patient's vital signs.

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment for which the vital signs are associated.
Capture Date	Date when the vital signs were captured. Formatted MM/dd/yyyy.
Capture Time	Time when the vital signs were captured. Formatted hh:mm:ss am.
Systolic Blood Pressure	Numeric value of the patient's systolic blood pressure.
Diastolic Blood Pressure	Numeric value of the patient's diastolic blood pressure.
Blood Pressure Site	Location of blood pressure measurement. Is a free form text field.
Blood Pressure Side	Side of the blood pressure measurement site. Possible values are: • Left • Right • N/A
Blood Sugar	Numeric value of the patient's blood sugar.
Heart Rate	Numeric value of the patient's heart rate in bpm.
Height	The numeric value of the patient's height.
Height Scale	Scale (cm/in) used for height
Weight	The numeric value of the patient's weight.
Weight Scale	Scale (lbs/kg) used for weight
BMI	Numeric value of the patient's body mass index.
Oxygen Level	spO2 reading of the patient's O2 saturation.
Supplemental O2?	Is the patient using supplemental oxygen? Yes or no.
Inhaled O2 Concentration %	If the patient is taking supplemental oxygen, the percentage of oxygen given. A numeric value from zero to 100.
Pain Scale	The reported level of pain the patient is in. A numeric value from zero to 10, including N/A.
Respiratory Rate	The patient's respiratory rate in the number of breaths per minute.
Temperature	Numeric value of the patient's temperature.
Temperature Scale	Scale (C/F) used for temperature
Shoe Size	For podiatry practices, the numeric value of the size of shoe the patient wears.
Screening Not Done	If vitals were not captured, the reason why they were not captured. Possible values are:

	• Patient refused screening • Procedure contraindicated (situation) • Medical contraindication
Comment	Any additional comments that should be noted.

Additional Clinical Data

This export produces various CSV spreadsheets that weren't included in other export categories.

The **ImplantedDevices.csv** spreadsheet contains information of the patient's implants.

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment with which the implanted devices is associated.
Device Type (SNOMED Code)	The SNOMED code of the device's type.
Description	Text description of the device
Company Name	Manufacturer of the device
Brand Name	Device brand name
Lot Number	Manufacturer's lot number for the device
Catalog Number	Catalog number of the device
Model Number	Model number of the device
Serial Number	Serial number of the device
Unique Device ID	ID of the implanted device
Expiration Date	Date of implant expiration
Manufactured Date	Date of implant creation
Placement Date	Date of implantation
Placement Site	Location of the implant
Placement Laterality	Indication of location side, if relevant
Placement Provider	Provider who performed the implantation
Placement Note	Any further notes regarding placement
MRI Safety	Possible values are • MRI Safe • MRI Conditional • MRI Unsafe
Device ID	A number or identifier that denotes a specific kind of device.
Status	A device has either an active or inactive status.
Date Record was Created	Date of the record entry

The **PatientEducation.csv** spreadsheet lists the educational material given to the patient.

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment for which the education material given to the patient is associated.
Type	What the educational material is in reference to. The possible values are: • general • patient medication • patient problem • patient lab
Description	Description of the educational material
URL	Link to the material
Date/Time Given	Date and time the educational material was given to the patient. Formatted MM/dd/yyyy hh:mm:ss am
Given By	Name of the user who gave the educational material to the patient.
Date Record was Created	The date the record was created. Formatted MM/dd/yyyy.
Date Record was Last Updated	The date the record was last updated. Formatted MM/dd/yyyy.

The **PostAppointment.csv** spreadsheet lists the post-encounter data for the patient. This is usually collected by a staff member the next day. The record stores information received from the patient regarding nausea, fever, swelling, bleeding, and anything else deemed relevant.

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment for which this section's clinical data is associated.
Bleeding	Patient's response when questioned regarding bleeding
Drainage	Patient's response when questioned regarding drainage
Drinking Water	Patient's response when questioned regarding drinking water
Eating/Drinking Changes	Notes regarding any changes the patient has experienced in fluid or food intake.
Fever	Patient's response when questioned regarding fever
Nausea	Patient's response when questioned regarding nausea
Needlepoint Redness	Patient's response when questioned regarding needlepoint redness
Pain Medications	Patient's response when questioned regarding pain medications used

Sore Throat	Patient's response when questioned regarding a sore throat
Swelling	Patient's response when questioned regarding swelling
Unusual/Excessive Pain	Patient's response when questioned regarding any unusual or excessive pain.
Follow-Up Phone Call Comment	Comments regarding the follow-up call with the patient, from the person who contacted the patient.
Post-Discharge Comment	Comments regarding any details or events that occurred after discharge.
Date Record Entered	Date of the record entry. Formatted MM/dd/yyyy.
Date Record Last Changed	Date of record last change. Formatted MM/dd/yyyy.

The **PostOp.csv** spreadsheet lists all post-op measures for comparison to pre-op values:

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment with which this section's clinical data is associated.
Anesthesia Given?	Was anesthesia was given to the patient? Yes or no.
Anesthesia Type	If given, the type of anesthesia given.
Activity Arrival	Patient's ability to move their extremities upon arrival for the appointment. Possible values are: • Able to move 4 extremities: voluntarily or on command • Able to move 2 extremities: voluntarily or on command • Able to move 0 extremities: voluntarily or on command • N/A
Activity Discharge	Patient's ability to move their extremities upon discharge from the appointment. Possible values are: • Able to move 4 extremities: voluntarily or on command • Able to move 2 extremities: voluntarily or on command • Able to move 0 extremities: voluntarily or on command • N/A
Respiration Arrival	Patient's ability to breathe upon arrival for the appointment. Possible values are: • Able to cough and breathe deeply

	• Dyspnea or limited breathing • Apnea • N/A
Respiration Discharge	Patient's ability to breathe upon discharge from the appointment. Possible values are: • Able to cough and breathe deeply • Dyspnea or limited breathing • Apnea • N/A
Circulation Discharge	The patient's systolic blood pressure relative to their pre-anesthetic BP. Possible values are: • systolic BP +/- 20 mm/hg of pre-anesthetic BP • systolic BP +/- 21-49 mm/hg of pre-anesthetic BP • systolic BP +/- 50 mm/hg of pre-anesthetic BP • N/A
Consciousness Arrival	The patient's level of consciousness upon arriving for the appointment. Possible values are: • Fully awake • Arousable on calling • Not responding • N/A
Consciousness Discharge	The patient's level of consciousness upon discharge from the appointment. Possible values are: • Fully awake • Arousable on calling • Not responding • N/A
O2 Saturation Arrival	The patient's oxygen saturation level upon arrival for the appointment. Possible values are: • Able to maintain SpO2 above 92% on RA • Needs supplemental O2 to maintain SpO2 > 90% • SpO2 < than 90% with O2 supplementation • N/A
O2 Saturation Discharge	The patient's oxygen saturation level upon discharge from the appointment. Possible values are: • Able to maintain SpO2 above 92% on RA • Needs supplemental O2 to maintain SpO2 > 90% • SpO2 < than 90% with O2 supplementation

	• N/A
Left Hand Grip	Vascular assessment of the patient's left hand grip.
Right Hand Grip	Vascular assessment of the patient's right hand grip.
Left Brachial Pulse	Vascular assessment of the patient's brachial pulse on their left arm.
Right Brachial Pulse	Vascular assessment of the patient's brachial pulse on their right arm.
Left Radial Pulse	Vascular assessment of the patient's radial pulse on their left wrist.
Right Radial Pulse	Vascular assessment of the patient's radial pulse on their right wrist.
Left Dorsalis Pulse	Vascular assessment of the patient's dorsalis pulse on their left foot.
Right Dorsalis Pulse	Vascular assessment of the patient's dorsalis pulse on their right foot.
Left Posterior Pulse	Vascular assessment of the patient's posterior pulse on their left ankle.
Right Posterior Pulse	Vascular assessment of the patient's posterior pulse on their right ankle.
Color & Temp of Left Hand	The color and temperature of the patient's left hand.
Color & Temp of Right Hand	The color and temperature of the patient's right hand.
Color & Temp of Left Foot	The color and temperature of the patient's left foot.
Color & Temp of Right Foot	The color and temperature of the patient's right foot.
Number of Sutures	Number of sutures the patient received
Oriented X3 (Person, Place, and Time)	Is the patient alert and oriented to who they are, where they are, and the current date?
Discharge Date	Date of patient's discharge. Formatted MM/dd/yyyy.
Discharge Time	Time of patient's discharge. Formatted hh:mm:ss am.
Dressing On Discharge	Describes any dressings which were present at the time of patient discharge.
Transport to Recovery By	The method by which the patient was transported to recovery. Possible values are: • Independent Ambulation • Wheel Chair • Stretcher • Walker • Cane

Time Arrived in Recovery	The time the patient arrived in recovery. Formatted hh:mm:ss am.
Initial Fluid Intake - Intra Procedure - D5W	comment format
Initial Fluid Intake - Recovery - D5W	comment format
Initial Fluid Intake - Intra Procedure - NS	comment format
Initial Fluid Intake - Recovery - NS	comment format
Initial Fluid Intake - Intra Procedure - Contrast	comment format
Initial Fluid Intake - Recovery - Contrast	comment format
Initial Fluid Intake - Intra Procedure - Oral	comment format
Initial Fluid Intake - Recovery - Oral	comment format
Initial Fluid Intake Comment	comment format
Comment	Any additional notes regarding the patient's post-op or the values recorded.
Date Record Entered	Date of the record entry. Formatted MM/dd/yyyy.
Date Record Last Changed	Date of record last change. Formatted MM/dd/yyyy.

Pre Op in **PreOp.csv** lists all pre-op measures for comparison to post-op values:

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment for which this section's clinical data is associated.
Activity	Patient's ability to move their extremities upon arrival for the appointment. Possible values are: • Able to move 4 extremities: voluntarily or on command • Able to move 2 extremities: voluntarily or on command • Able to move 0 extremities: voluntarily or on command • N/A
Respiration	Patient's ability to breathe upon arrival for the appointment. Possible values are: • Able to cough and breathe deeply • Dyspnea or limited breathing • Apnea

	• N/A
Consciousness	The patient's level of consciousness upon arriving for the appointment. Possible values are: • Fully awake • Arousable on calling • Not responding • N/A
O2 Saturation	The patient's oxygen saturation level upon arrival for the appointment. Possible values are: • Able to maintain SpO2 above 92% on RA • Needs supplemental O2 to maintain SpO2 > 90% • SpO2 < than 90% with O2 supplementation • N/A
Dressing On Arrival	Describes any dressings which were present at the time of patient arrival.
Left Hand Grip	Vascular assessment of the patient's left hand grip.
Right Hand Grip	Vascular assessment of the patient's right hand grip.
NPO?	This question will have a yes/no answer.
Last PO	
Left Brachial Pulse	Vascular assessment of the patient's brachial pulse on their left arm.
Right Brachial Pulse	Vascular assessment of the patient's brachial pulse on their right arm.
Left Radial Pulse	Vascular assessment of the patient's radial pulse on their left wrist.
Right Radial Pulse	Vascular assessment of the patient's radial pulse on their right wrist.
Left Dorsalis Pulse	Vascular assessment of the patient's dorsalis pulse on their left foot.
Right Dorsalis Pulse	Vascular assessment of the patient's dorsalis pulse on their right foot.
Left Posterior Pulse	Vascular assessment of the patient's posterior pulse on their left ankle.
Right Posterior Pulse	Vascular assessment of the patient's posterior pulse on their right ankle.
Color & Temp of Left Hand	The color and temperature of the patient's left hand.
Color & Temp of Right Hand	The color and temperature of the patient's right hand.
Color & Temp of Left Foot	The color and temperature of the patient's left foot.

Color & Temp of Right Foot	The color and temperature of the patient's right foot.
Transportation To Procedure Room By	The method by which the patient was transported to the procedure room. Possible values are: • Independent Ambulation • Wheel Chair • Stretcher • Walker • Cane
Patient Arrived By	Method of patient's delivery
Comment	Text of the comment for the entry
Date Record Entered	Date of the record entry
Date Record Last Changed	Date of record last change

Preop Procedure Notes in **PreopProcedureNotes.csv** lists additional measures performed before surgeries:

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment for which this section's clinical data is associated.
Translations Provided By	Name of the translator, if any
Verbal Consent Obtained From	Name of the person who gave consent
Access Fistula?	Each of these questions will have a yes/no answer.
Access Graft?	
Access Left Arm?	
Access Right Arm?	
Access Other?	Place of the other access
Catheter Left Subclavian?	Each of these questions will have a yes/no answer.
Catheter Right Subclavian?	
Catheter Left Thigh?	
Catheter Right Thigh?	
Catheter Order Given?	
Catheter Provider Vital Signs Aware?	Each of these questions will have a yes/no answer.
Anxiety Reduction Explained Procedure?	
Anxiety Reduction Attained?	
Anxiety Reduction Allowed Time for Patient Questions?	

Anxiety Reduction Encouraged to Verbalize Concerns?	
Anxiety Reduction RN Signature	Stamp of electronic signature with RN name
Is a Declot Procedure?	This question will have a yes/no answer.
Declot Procedure Performed By	ID of the provider
Declot Procedure Sterility Monitored/Maintained?	This question will have a yes/no answer.
Declot Procedure No Breaks in Sterility?	This question will have a yes/no answer.
Declot Alteplase Heparin Given Time	Time of the injection
Declot Procedure No Thrombolytics?	This question will have a yes/no answer.
Declot Procedure RN Signature	Stamp of electronic signature with RN name
Antibiotics Ancef Given?	Each of these questions will have a yes/no answer.
Antibiotics Clindamycin Given?	
Antibiotics Vancomycin Given?	
Antibiotics Levaquin Given?	
Antibiotics Administered Via	Place of administering the antibiotics used
Antibiotics Administered Time	Time of administering the antibiotics used
Antibiotics RN Signature	Stamp of electronic signature with RN name
Date Record Entered	Date of the record entry
Date Record Last Changed	Date of record last change

Provider Orders in **ProviderOrders.csv** lists all orders that the provider has given to be performed during the appointment. This info includes medications to give the patient, if/when to remove sutures, some discharge instructions, if heparin should be given to the patient, and if so, how much and how to give it. As well, if the provider needs to be more specific, they can fill out a free text order. The provider can also record the patient's functional and cognitive status and whether the patient should be referred to another provider.

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment for which this section's clinical data is associated.
Puncture Left Arm?	Each of these questions will have a yes/no answer.
Puncture Right Arm?	
Puncture Left Groin?	
Puncture Right Groin?	
Puncture Left Jugular?	

Puncture Right Jugular?	
Puncture Other	A description of where the puncture was placed if not on the patient's arm, groin, or jugular
Catheter Left Subclavian?	Location of catheter placement; each of these questions will have a yes/no answer.
Catheter Right Subclavian?	
Catheter Left Thigh?	
Catheter Right Thigh?	
Discharge Disposition	Patient's disposition at the time of discharge
Discharge Diagnoses (SNOMEDCT)	Diagnoses with their SNOMED codes
Refer To	Referring provider name
Refer To Date	Date of the referral
Referral Reason	Reason for the referral
Functional Status	The SNOMED code and description of the patient's functional status.
Functional Status Effective Date	Date for functional status check
Functional Status Note	Note on functional status
Cognitive Status Status	The SNOMED code and description of the patient's cognitive status.
Cognitive Status Effective Date	Date for cognitive status check
Cognitive Status Note	Note on cognitive status
Free Text Order	Order of free text
Free Text Order Provider Signature	Stamp of electronic signature with provider name
Free Text Order RN Signature	Stamp of electronic signature with RN name
Ancef Medication Given?	Was 1g of Ancef, in 10ml of sterile water, IV STAT given to the patient? yes/no
Clindamycin Medication Given	Was 600mg of Clindamycin, in 20ml of normal saline, IV STAT, given to the patient? yes/no
Vancomycin Medication Given	Was 1g of Vancomycin, in 200ml of normal saline, IV over 1 hr, given to the patient? yes/no
Tylenol Medication Given	Was 500mg of Tylenol Extra Strength, as 2 caplets, PO STAT, given to the patient? yes/no
Antibiotic Provider Signature	Stamp of electronic signature with provider name
Antibiotic RN Signature	Stamp of electronic signature with RN name
Heparin Quantity Given 1000 Units via Arterial Port	The quantity of 1000 Units/ml of Heparin given to the patient via their arterial port, post-procedure
Heparin Quantity Given 5000 Units via Arterial Port	The quantity of 5000 Units/ml of Heparin given to the patient via their arterial port, post-procedure

Heparin Quantity Given 1000 Units via Venous Port	The quantity of 1000 Units/ml of Heparin given to the patient via their venous port, post-procedure
Heparin Quantity Given 5000 Units via Venous Port	The quantity of 5000 Units/ml of Heparin given to the patient via their venous port, post-procedure
Heparin Provider Signature	Stamp of electronic signature with provider name
Heparin RN Signature	Stamp of electronic signature with RN name
Suture Remove In Minutes	Suture removal time in minutes
Discharge When Stable and Provide Instructions?	Each of these questions will have a yes/no answer.
Exempt From Being Discharged into the Company of a Responsible Adult?	
Patient Transferred to Another Facility?	
Discharge Provider Signature	Stamp of electronic signature with provider name
Discharge RN Signature	Stamp of electronic signature with RN name
Date Record Entered	Date of the record entry
Date Record Last Changed	Date of record last change

Surgical Checklist in **SurgicalChecklist.csv** is a checklist of vital actions taken before and after a surgical procedure:

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment for which this section's clinical data is associated.
Patient Preop Confirmation?	This question will have a yes/no answer.
RN Preop Signature	Stamp of electronic signature with RN name
Patient Procedure Confirmation?	This question will have a yes/no answer.
RN Procedure Signature	Stamp of electronic signature with RN name
RN Postop Signature	Stamp of electronic signature with RN name
Signature	Stamp of electronic signature with surgeon name
Patient Recovery Management Concerns	A text field containing remarks on recovery management
Prophylaxis Given Within 60 Minutes?	Each of these questions will have a yes/no answer.
RN History Physical	

Confirmation?	
RN Instrument Counts Completed?	
RN Preanesthesia Assessment Confirmation?	
Equipment Problems Addressed?	
Site Marked And Visible?	
Team Members Introduced?	
Date Record was Created	Date of the record entry
Date Record was Last Updated	Date of record last change

Suture Info in **SutureInfo.csv** provides records of a patient's suture at the time of the appointment:

Field	Explanation
Account#	Unique ID of the patient in AuroraEHR
Accession#	The unique ID of the appointment for which the suture info is associated. If blank then the
Comment	Text of the comment for the entry
Date Captured	Date of the suture
Time Captured	Time of the suture
Signature	Stamp of electronic signature with surgeon name
Dry Intact Dressing?	Each of these questions will have a yes/no answer.
Pain or Active Bleeding?	
Redness or Swelling?	
Remove Sutures?	
Date Record was Created	Date of the record entry
Date Record was Last Updated	Date of record last change
